GOLD MINING IN '49.

How "Rocker" Separating was Carried on.

WASHING AND SIFTING THE DIRT.

The Miners' Most Expensive Instrument.—Hard Work.

The most expensive instrument of the early miner was the rocker, which, though simple in construction, cost in the mines from fifty to a hundred dollars. In general appearance it was not unlike a baby's cradle as used by our grandmothers and as still seen on the frontier. It consisted of a flat bottom with two sides that flared outward, and an end board at the head, while the foot was open save a riffle about an inch and a half high at the bottom to catch the gold that might pass another riffle across the bottom near the middle. At the head of the cradle was a hopper about eighteen inches square, with a perforated sheet iron bottom or wire screen. Under this was an apron, or board, sloping downward toward the head. Two substantial rockers under the whole completed the simple machine which gave to the world millions of dollars.

The modus operandi may be described as follows: Two sticks of wood hewn on the upper side were imbedded at the river's brink, one four inches lower than the other, on which the rockers were to rest, thus securing a grade in the machine to facilitate the outward flow of the water and sand. Two miners usually worked together as partners. One shoveled the earth into the rocker, while the other, seated on a bowlder or block of wood, dipped the water from the river and poured it upon the earth in the hopper with one hand, all the time rocking with the other. When the earth was thoroughly washed, he rose, lifted the hopper from its place, threw out the stones and gravel, replaced it, and thus the work went on. As the ground about the rocker became exhausted to the bedrock, recourse was had to the bucket, and the earth was carried sometimes a few rods, making laborious work for the miner.

To keep the rocker going another hand would be employed to carry earth, and each would carry two buckets at a time. Hard work of this kind suggested improvements in mining. At noon the gold and black sand collected above the riffles were taken up on a scraper and thrown into the pan, which was carried to the river and carefully washed to remove as far as possible all but the gold. The yield of the forenoon was carried to the camp, dried over a blaze, the dry sand blown out, and the gold weighed in scales or guessed at, and poured into the partnership purse and deposited under the bed or anywhere else out of sight.

The gold taken from the river bars was mostly in the form of scales resembling cucumber seeds, and of varying size. It was most plentiful on the bed rock and in a few inches of soil above it, though sometimes three or four feet of earth would pay to wash. Where the bed rock was hard the miner cleaned it, for a shovelful of dirt might contain a few dollars in small particles. Where the bed rock was soft shale or slate on edge the miner picked away an inch or so and washed it, as frequently the scales were found to be driven quite thickly into the crevices. When the ground was very rich the rocker was cleaned of gold every hour or so.—E. J. Waite in Century.

How to Die.

I was in Oudh at the time when a very rich Hindu—brother to the famous prime minister of Nepaul, Sir Jung Bahadur—arrived in a dying state at the sacred city of Ajudhia. Though stricken with mortal sickness, he had made the long and painful journey from Nepaul in order to die in the holy city that gave Rama birth, and which is to the Hindu what Mecca is to the Moslems, and far more than Jerusalem is to Christians.

On hearing of his arrival the English magistrate at Fyzabad went to see him, the day before his death, as it proved to be. He found the rajah lying on a low wooden bedstead, such as is used by the poorest natives, in a bare, mud plastered little room, having neither windows nor a single article of furniture except the bedstead in it, and with his silver dishes and drinking vessels spread about on the mud floor. To English eyes it seemed truly a strange and comfortless deathbed, but such a view of it would not have struck any of the Hindus present; the dying man, they would have said, had all he needed, and God was gracious to have let him live till his journey was accomplished.

I know of no western parallel to this scene.—Temple Bar.

An Even Thing.

Irate Father—Young man, I am amazed, astounded, sir, that you should seek to marry my daughter on so short an acquaintance. You are almost a stranger to her.

The Young Man—Well, she don't take any more chances than I do. She's almost a stranger to me, too.—Philadelphia Record.

A Hustling Farmer.

Twenty years ago Mr. P. R. Penny, while at work in a mill in Minnesota, was caught in a shaft and his arm was broken in thirteen pieces, his right leg broken in three pieces and three ribs fractured, injuries that crippled him for life. Notwithstanding this fact, he has cleared up 160 acres of land in Aroostook from the green woods, and in 1889 raised 4,100 bushels of potatoes from twenty-three acres first crop, and eight acres of which was in standing trees the 4th day of May of that year.—Presque Isle Star-Herald.

ROYALTY SMILED ON THE MATCH.

The Wedding of Prince Aribert and Princess Louise at Windsor.

The marriage of Princess Louise, of Schleswig-Holstein, to Prince Aribert, of Anhalt, has taken place in St. George's chapel, of Windsor castle, with all the pomp of royalty, and all aristocratic England has been in a flutter over it for a month. Queen Victoria and her immediate family of course occupied the place of honor, with the young emperor of Germany as her guest. The Prince of Wales escorted the German empress. The archbishop of Canterbury performed the service, and the bride moved up the aisle preceded by the choir of St. George singing a hymn composed for the occasion by the bishop of Ripon.

The situation was strongly suggestive of many important events in recent history, and the mixed relationship of the various parties presents a study in the complexities of royal and princely dynasties. The German emperor, to begin with, is the grandson of Queen Victoria, and the bride of the occasion is her granddaughter, but though the bride's father is a prince and her mother a princess, they have lived all their married life in England, their residence being Cumberland Lodge, and the bride has passed most of her life at Windsor castle, one of the residences of her royal grandmother.

ARIBERT. LOUISE.

When Frederick, Duke of Augustenburg, gave up his claims to the long disputed Schleswig-Holstein, and that principality was absorbed by Prussia, his son, Prince Christian, went to England, and on July 5, 1866, was married to the Princess Helena, third daughter of Queen Victoria. Parliament did the handsome thing, voting the young couple an outfit of £30,000 and an annuity of £6,000. Their fourth child, Louise, born Aug. 12, 1872, was the bride on the recent occasion, and the groom was Prince Aribert, fourth son of the reigning Duke of Anhalt, which is a principality allowed to maintain its ancient independence, although it is nearly surrounded by Prussian territory.

Prince Aribert was born in 1864, and in consideration of the fact that his father aided the Germans with all his forces and was personally active in several of the battles of the Franco-Prussian war of 1870, Germany has guaranteed succession and family rights in Anhalt. Present at the wedding were the parents of both parties, the royal family of England, the German emperor and empress and attendant noblemen and ladies, and a gorgeous array of titled gentlemen and ladies of both nations. The bride wore the same Honiton point lace worn by her mother at her marriage, and made over for that occasion from the dress designed by Prince Albert for Queen Victoria, and the merest outline sketch of the dresses of the six bridesmaids and other ladies fills many columns of English papers. The newly married pair proceeded directly to Berlin, where they will reside.

The Reign of the Bicycle.

It is estimated that at least 1,000,000 pounds of rubber are annually used for bicycle tires. The oldest patron of the seductive wheel, says a newspaper correspondent, lives in Connecticut. His name is Michael Cullen. He is seventy years old and rides daily from his home in Plainville to his work in the Bristol Brass and Clock shop. Mr. Cullen has worked in the Bristol shop for twelve years, and used to walk to and from his labor, but a year ago he learned to ride a wheel and now he glides back and forth between Plainville and Bristol with the swiftness of the wind. The distance between the places is three miles, and it is an exhilarating spectacle to see the old gentleman, his long white hair floating on the breeze, careering like mad along the country road. Mr Cullen is as spry and hale as most men at thirty years of age, and can easily ride his wheel at the rate of ten or twelve miles an hour.

Some Ohio River Statistics.

A recent census bulletin gives some interesting figures regarding the Ohio river. The number of miles of navigable water on the Ohio and its tributaries is 928, excluding the 500 miles from Cincinnati to the mouth of the Ohio. The cost of improvements on these waters was $12,129,713, which is equivalent to $8,494 per mile of navigable route. The total number of passengers, including ferry passengers, carried during the year covered by the census investigation was 2,573,396, and the total number of tons of freight moved was 10,744,063. The ton mileage of this freight movement has been carefully computed to be equivalent to 2,076,866,145.

Distinguished French Invalids.

Two illustrious invalids are just now objects of sympathetic interest in France. Gounod's health has become so badly shattered as to forbid his doing any work whatsoever, and his physicians have denied him the sight of callers. The other distinguished sick man is De Lesseps, whose hold on life is regarded as very slight. He is eighty-seven, and lacks the physical vitality to rally from the illness that has prostrated him.

An Active Man Chosen President.

Hon. W. S. Cappeller, president-elect of the National Editorial association, has long been active in Ohio politics and journalism, and whatever he has taken hold of he has generally made a success. He first came into general notice as auditor of Cincinnati—that is, of Hamilton county—and then as railroad commissioner of Ohio. He was chairman of the Republican executive committee of Ohio for several years, has been grand master of the Odd Fellows of that state and has held other positions of trust and honor.

W. S. CAPPELLER.

He is now editor and principal owner of The Daily News, of Mansfield, O., and as such took an active part in organizing the associated dailies of that state, having served four years as president of the association. All these years he has busied himself in politics, and has been a delegate to almost every national editorial meeting, being a ready and sparkling speaker, as well as writer. His family consists of a wife, three daughters and two sons.

GRIZZLY AND BISONS FIGHT.

What a Party of Indian Hunters Witnessed.

IT WAS A BATTLE TO THE DEATH.

The Bear, Though Mortally Wounded, Kills his Adversaries.

The following story was told us by a stalwart Indian, who, having been among the French half breeds a good deal, had received from them the French name of Baptiste. He told us the story as we were huddled round a camp fire in the dense forest on the eastern side of Lake Winnipeg, from which we and our dogs had been driven by a bitter, blinding, blizzard storm. He said:

"One summer long ago I was with a large party of Indians. We were making a long journey over the rolling prairies from one place to another. That we might have plenty of meat to eat two of us were appointed to keep about two days' journey ahead of the company to hunt and to kill all the game we could.

"Well, we two hunters kept well ahead. Some days we had good luck and killed a great deal, and then other days we did not kill much. What we got we cached, so that the party could easily find it by the sign we gave them when they came along. We always put it near the trail for them. Then we would push on, looking for more.

"One day as we had passed several valleys and had seen nothing that was worth our stopping to shoot we came to the top of a pretty large hill and cautiously looked over. There was a sight that we shall never forget.

"Right down before us, within gunshot, was a very large grizzly bear and two big buffalo bulls. Well for us the wind was blowing from them to us. They were very angry looking and were preparing for a big fight. The buffaloes seemed to know that the bear was an ugly customer, and he looked as if he did not know how to manage the two of them at once.

"For quite a while they kept up what you might call a pretense of battle. The bulls would paw the ground and keep up a constant roaring. This only made the bear the more angry, and if there had only been one he would soon have got his big claws upon him, but there being two made him cautious.

"After a while both of the bulls suddenly lowered their heads and together they charged the bear. As they rushed at him he quickly arose up on his haunches, and as they closed in upon him he seized one of them by the head and neck, and, with a sudden jerk, so quickly broke his neck that he fell down as dead as a stone.

"The older buffalo, which had charged at the same time, gave the bear a fearful thrust with his sharp horns, one of which pierced him between his ribs, causing an ugly wound from which the blood soon began to flow. The bear, having killed the other buffalo, tried to seize hold of this one also, but he, having given the bear the ugly wound, quickly sprang back out of his reach. He ran off for a little distance, but as the bear did not follow him he came back again. There they stood looking at each other, both very angry, but both very cautious. As they kept moving round it seemed to us as though the buffalo had so come round on the windward side of the bear that he caught the scent of the blood from the wound. The smell of blood always excites to fury these animals, and so, lowering his head, he furiously charged at his wounded yet still savage enemy. The bear rose up on his hind quarters to receive him, and, seizing him as he did the other, killed him on the spot.

"We saw him go from one buffalo to another and smell them both, but he did not offer to tear or eat either. We could see that he was very badly wounded from the way he kept twitching his side, from which the blood kept running. It was an ugly wound and he was a very sick bear, and so as he looked so cross we were not in a hurry to let him know anything about us.

"After a while he went off a little distance and lay down in the long grass, which rose up so high around him that we could not see him. We waited long for him to get up, but as he did not, and we could not stay there all day, we prepared for a big fight with him. We put our knives where we could instantly draw them, and carefully examined our guns to see that they were all right. Then we began to crawl down carefully through the grass toward him.

"My! how our hearts did beat, and how every second we expected he would hear us and the fight would begin for life or death!

"We got very close to him, although not near enough to see him. Then, as we heard no sound we made a little noise to attract his attention. And then we wanted him to get up, so we could have a better chance to shoot him. But he did not stir. So, with our fingers on the triggers of our guns, we called out: 'Mr. Bear, here are enemies ready for another battle!' Still there was no stir, and so we got up and went to him and found him as dead as the buffaloes. So without firing a shot we had a great quantity of meat."—New York Ledger.

She Was Absent Minded.

A demure looking young woman sat in a Sixth avenue elevated car with a look of abstraction on her face. Pretty soon there floated through the car a soft, sweet whistle, whose melody wandered carelessly for a few moments and then shaped into an air from "The Gondoliers." Half a dozen interested passengers glanced up from their papers to look for the whistler. The look deepened into a stare. For there sat the young woman with the same far away look on her face, while from her pretty red lips the low sounds came in the most unconscious way. Half the passengers in the car had their eyes on her face by this time, and the concerted stare brought her back all at once to a realization of the situation.

The sound dropped in the middle of a note, and the demure face grew very red and embarrassed as it turned to gaze steadily out of the window behind her.—New York Evening Sun.

In Two Parts.

The Rev. Dr. Howard, rector of St. George's, Southwark, and chaplain to Princess Augusta, ran continually into debt with many of the tradesmen in his parish.

It was in their special interests that he one day preached from the text, "Have patience, and I will pay you all."

He spoke at great length on the virtues of patience, and then proceeded:

"I now come to the second part of my discourse, which is, 'And I will pay you all,' but that I shall defer to a future occasion."—London Tit-Bits.

Preserved Orange Peel.

Weigh the oranges whole, and add sugar pound for pound. Peel the oranges neatly and cut the rind into narrow shreds. Boil until tender, changing the water twice, and replenishing with hot from the kettle. Squeeze the strained juice of the oranges over the sugar; let this heat to a boil; put in the shreds and boil twenty minutes.

Lemon peel can be preserved in the same way, allowing more sugar.—Marion Harland.

A QUEER OLD COLLECTOR.

What He Does with His Curios—His $300 Umbrella.

"Do you see that small, stout man across the way?" asked a loquacious policeman as he pointed out to the writer a stocky little person who stared abstractedly through his iron rimmed spectacles and waddled complacently along swinging an umbrella of generous proportions and sea green hue.

The writer remarked that he had seen the little man before, and inquired who he was.

"That man," replied the officer, "is a connoisseur and collector of curios, and owns what is perhaps the largest and most interesting private collection of relics in the United States. He is not a mere accumulator of worthless bric-a-brac, nor is his collection one of curiosities only. Every article in his large collection has a history, and the strangest thing about them is that they are daily (and many of them hourly) brought into requisition and made practical use of by their matter of fact owner. The dishes used on his dinner table, besides being varied and curious, have the added interest of having at some period of their history graced the board of some famous personage. His table linen, candelabra, clocks, rugs and chairs, his very knives and forks, once belonged to some noted persons.

"He declares his umbrella, however, to be his greatest treasure. It is his inseparable companion, and accompanies him wherever he goes. The handle of this umbrella is made from a piece of the Charter Oak, in which is set a small triangular piece of stone, chipped from Plymouth Rock; the stick is made from a branch of the old elm tree at Cambridge, under which Washington assumed command of the Colonial armies; the brass cap on the lower end of the stick was made from the trimmings of a sword scabbard once used by Gen. Grant; the green covering originaly served as the lining of a coat, worn on state occasions by the suave and courtly Aaron Burr; the ribs, springs and other metal trappings were manufactured from a small steel cannon, captured by the Americans from the Hessians at the battle of Brandywine. Eight oblong pieces of brass have been inserted in as many sides of the octagonal handle. These were made from buttons cut from the military coats of eight generals famous in the revolutionary war.

"The proud owner of this unique umbrella does not believe in keeping his treasures under lock and key, but makes free use of his interesting possessions. He is very careful, however, not to lend his cherished storm screen, and as yet has never left it behind him in a street car or elsewhere. The collector values his miniature parachute at $300, although nothing but absolute bankruptcy could ever induce him to part with the historical gamp."—New York World.

Finest Country House in America.

Almost every American has heard of J. C. Flood, the California millionaire, but very few are aware of the fact that Mr. Flood is the owner of the most magnificent country house and grounds in North America. The estate is at Menlo Park, near San Francisco, and during Mr. Flood's illness is closed to visitors. The estate covers 1,000 acres, and is under the charge of a landscape gardener and 120 assistants. The drives are several miles in length, and are made of white gravel kept spotlessly clean. The foliage, shrubbery and flowers are beyond description. Everything is a "symphony in white and gold." The porter's lodge is a beautiful cottage near the only entrance to the grounds, and the great gates are white and gold. The grounds are lighted by hundreds of gas lamps, with ground glass shades, the gas being made on the place. Statuary of the most chaste and elegant design and of exquisite workmanship gives a finish to the lawns and closely trimmed hedges.

But the house is the main attraction. It is built in a style of architecture that might be termed French, although not decidedly of that school. It is dazzling white, the roofs are of black slate in patterns, and the decorations are all in gold. Even the inside blinds and the furnishings are white and gold, and this effect has been preserved in the finishings of the servant's quarters, the superb stable and all the buildings on the premises. The house stands on an eminence and overlooks one of the most beautiful lawns that art can produce. Fountains plash on every side; a terrace of ivy and flowers hems in the eastern view, while a bank of violets and a wall of roses temper the force of the ocean breezes and perfume them. The perfect creation of an artistic mind, with all the necessary funds to maintain it in its perfection, Flood's palace stands unrivaled in America, a typical home of a self made millionaire.—San Francisco Letter.

Washing Clothes in Morocco.

The only work I ever saw men doing in Morocco is washing clothes. When a Moor washes his clothes it is because they need washing, and not for the absurd reason simply that Saturday night has come around, and as a Moor, from his outdoor life, can kick like a mule, they kick their clothes clean instead of scrubbing them. They seem to have regular washing bees when they get together at the river banks, provided with large flat stones; then they soak their clothes in Moorish soap until the tertiary period has had a chance to soften, after which the real fun commences. A thorough artist places his wash on the flat stone, cuts a double pigeon wing with each leg in turn, taps the inside of his knee with his opposite foot before he brings it down with a spank like the fond caress of childhood, making at the same time a noise with his mouth similar to the escape of a Westinghouse engine, while the dirt of ages flies in all directions, and all hands, or rather feet, keep time with the regularity of a dance, to the Moorish saint of the wash tub is supposed to hover around and flap his celestial wings in contentment as long as the racket is kept up in this manner.—Cor. Boston Transcript.

The Ambition of Algeria.

After an existence of fifty-seven years as a French colony Algeria has determined that it is time to be released from financial leading strings and to have a budget of its own, and this suggestion, originated and warmly supported by the governor genera., has been unanimously adopted by the conseil superieur. When the armies of Louis Philippe first descended on its coast the colony, according to the recent report of our consul in Algiers, was almost waste land. It has now nearly 9,000,000 of acres under cultivation, of which 199,000 acres are vineyards. The annual exports of the colony amount to £8,000,000, there is a daily service of steamers to France, 1,250 miles of railroads are in working order, and profound peace exists everywhere. Yet taxes in Algeria are still collected by the central power and confounded with those of France, so that the colony is actually ignorant of the amount of its own resources.—London News.

A Successful Affair.

"I say, Bobby," said Featherly, "did you hear your sister say if she enjoyed the exhibition we gave last night?"

"She was pleased with your part of it, Mr. Featherly. She told ma that you made a perfect exhibition of yourself."—New York Sun.

TIERS OF HUMAN BODIES.

Mummies in the Famous Cave of Crocodiles.

EXPLORING THE HORRIBLE PLACE.

Hot as a Furnace, With Foul Air.—Haunted by Bats.

It may safely be assumed that those who have visited Maabdeh are very few. It lies some distance from the Nile, behind Manfaloot, where no one stopped in the good old dabeeh days, and the modern steamers only touch; moreover, the pits are in the desert itself, some hours' ride. My own experience was due to accident. Dropping down the Nile, very late in the spring of 1863, our dabeeh was becalmed off Manfaloot, and the dragoman, badgered by two young Britons to find them sport, unwillingly named the pits of Maabdeh. As it chanced, the legend of the pits had been familiar to me as long as I can recollect. So, when the dragoman suggested a visit to the crocodile pits of Maabdeh I agreed at once. Long before dawn we set out, and in the afternoon we reached the spot.

The entrance of the pits is an oblong fissure in the middle of a small plateau among the mountains—that is, no other entrance was known in 1863. There are no facilities for descent; one may let himself fall sheer a matter of nine or ten feet, and clamber up again with the help of a donkey boy's cummerbund. I do not recollect that the ugly possibilities of this situation struck us at all, but perhaps some measures had been taken to make sure that the boys did not desert. One of them, indeed, headed the advance; our dragoman had never been down before.

CRAWLING ON THEIR STOMACHS.

The Arab began by stripping himself completely, and he advised us to do the same. Then we lighted a candle each, and in single file dived into the bowels of the rock. At a few feet distance the passage narrowed rapidly until there was only room to crawl along on one's stomach. This first gallery may be some fifty yards long; it opens on a chamber spacious enough, but a natural cavern evidently. On the further side runs another gallery as cramped as the last, heated like a furnace, reeking with foul air, vile stench of bats, and pungent fumes of bitumen. Then we understood why the Arab had stripped. This frightful passage may be 100 yards long, or the double of that or more—one is unused to measure distances crawling like a snake on one's stomach. At the end lies another chamber, of good height, apparently, if the floor were cleared; but the whole area is blocked with enormous masses of stone packed as close as they will stand, over which one has to clamber stooping.

Here myriads of bats assail the explorer, blowing out his candle instantly, clinging to his hair and beard in ropes. A moment more and they vanish with a soft rustle of countless wings, such as I have heard in other climes when the sand grouse fly overhead at dawn and evening. On the opposite side of this vault the first trace of handiwork is observed—a square doorway. I myself would have been quite satisfied to drop back at this point. But the dragman was interested now—taking, perhaps, a professional pride in putting the business through successfully. He could speak with the guide also. So we went on, still upon our stomachs, for an indefinite time, in an atmosphere beyond analysis and heat beyond example in the upper air.

PRIESTS AND REPTILES TOGETHER.

After some hundreds of yards, as it seemed, slowly the passage heightened—one could get upon one's knees; and then the flooring changed from smooth granite to a soft, uneven compost. I lowered my candle to observe. We were crouching along over kneaded human forms!

A very strange spectacle, which seemed to us an embodied nightmare under the excitement of that awful journey. I think I was almost delirious. No scene recurs to my memory now more fresh and striking than that black cave, with a slender glow of candle light here and there, and the half naked figures glistening with perspiration stretched out above a pavement of heads and limbs. Many of the faces had been gilt, and they shone flickering, here and there, upon the dusky mass. We could not get any explanation of the extraordinary mangling. The Arab said things had been so ever since he could recollect. It must be supposed that these were mummies of priests and attendants buried with the sacred reptiles in their charge—great personages, some of them, evidently. Their families had been laid with them; for there were as many women perhaps as men, and a great number of children.

INNUMERABLE PILES OF BODIES.

Every one had been stripped and torn to pieces—all of those on the surface, at least, for a hurried examination failed to show how deep the serried pile of bodies lay. On the other side of this vault lie the hindermost battalions of the crocodile host—innumerable. Standing on the human pavement there is just space enough above and in front to observe the manner of their disposal, for the topmost layer or two has been pulled down. If it were not certain for other reasons that the present entrance is not that formerly used, the arrangement of these crocodile mummies would prove it. No one can form an idea how far the caverns extend. Removing the top layers as they went, and crawling beneath the roof, Arabs, we were told, had explored a vault beyond this and found more crocodiles still on the further side. The mountain, they said, was stuffed with them; and it is possible—St. James' Gazette.

Color Blindness.

Color blindness is a congenital defect, and is incurable. The man who is born with it must submit to his limitations as long as he lives, and is simply playing ostrich when he tries to deceive himself or others into a belief contrary to this. Some color blind individuals suffer under greater disabilities than others, but a true color blind person is never sure to select either green or red correctly. The true method of detecting color blindness scientifically is to test this subject with the colors to which he is blind, and with "confusion colors" a sufficient number of times to provide against the possibility of his making the right selection by chance. This can be done with worsted or with common yarn—even old stockings—or with a painted board, if the proper colors are clearly defined. It can also be done with the aid of flags or lanterns out of doors.—New York Commercial Advertiser.

Satan as a Gentleman.

A friend who has great faith in the catechism, and teaches it with a pertinacity which would challenge the admiration of Calvin himself, is also very particular in instructing his children to speak politely on all occasions. The result of his teachings is sometimes amusing. This was the case one day when he was putting the youngest of four through his preparatory course. The question was asked, "Who tempted Eve?"

The little fellow, after a moment's thought, with an air of confidence replied: "It's the gentleman who lives in hell; I've forgotten his name."—Lewiston Journal.

MY IDEAL

He must be dark and handsome,
He must be tall and strong,
He must be brave and dashing,
He must not hate too long.

He must be kind and loving,
He must be strong and true,
He must be loyal in his love,
Or else he will not do.

In friendship he's unswerving,
And has a social air,
Whether in war he's serving,
Or love, he must be fair.

A woman's face he should respect,
Although he does not love it,
And as for any cruel jest,
Why he should be above it.

I do not wish him too extreme
In any of his ways,
Should answer yes where'er he can—
Be gentle in his ways.

His mind should be alert and bright,
His heart be pure and free,
To labor, wait, command, obey,
He should do readily.

In fact, he must be all a man,
Be earnest, free and brave,
As any who have ruled the land,
Or die the weak to save.

'Tis true that my ideal is high,
And I may never see him,
If I had only been a man,
I'd try, I'm sure, to be him.

—Brooklyn Eagle.

The Terrible Camera.

The day cannot be far distant when will become necessary for the lawmakers of the land to legislate against the camera upon the same lines and upon the same principle that it has already been found necessary to legislate against the carrying of concealed weapons. There is always a theory that the general good sense of the community will regulate these things, and very likely in the long run the good sense of the community—or the indifference of the community, which comes to the same thing, by allowing a thing to slip out of sight altogether—fulfills the function thus optimistically allotted to it; but in the meantime the irritation of the nuisance demands some more speedy and drastic remedy.

It is the opinion of the editor, reached after a careful study of the situation, and a temperate and dispassionate review thereof, that for an amateur to be found going about with an ordinary camera should be made a misdemeanor punishable by confiscation of the instrument and a fine to be regulated according to circumstances. To be found with a detective camera should in an amateur be punished by imprisonment for life; in a professional by instant death. Could these precise but mild laws be passed and rigidly enforced, there would be a very notable change in the comfort and in the moral tone of the community.

It is impossible that there should be any high average of ethical feeling in the land as long as the camera fiend is daily and hourly allowed to trample upon every feeling of individual liberty and freedom; and unless something is done to check this rapidly growing evil, who knows whether civilization will be able even to last out the century?—Boston Courier.

Can't Fool Him and His Compass.

"Give me a room with a southern exposure," said a drummer at the Seventh Avenue hotel. "If you don't this little instrument will tell me," he added, as he laid a round brass case on the counter.

"What's that?" asked Chief Clerk Perdu.

The drummer took off a lid and there was a compass. "I am a great believer," the commercial man continued, "in sunlight, and I have always made it a rule to sleep in a room where the sun shines for a part of the day at least. You know how people are bewildered with the directions in strange towns and new hotels.

Often when I call for a southern room the affable clerks give me one on the north or some other side, as it happens to suit their convenience. I never could be sure about it, and I hit on this little compass. As soon as I go into the room I put it on the table, and I can tell in an instant where I am.—Pittsburg Dispatch.

The Funnels of Steamers.

Few people have any idea of the size of the funnels on the great ocean steamers. If you ask the first half dozen people you meet for their estimate it is not likely that one of them will name a figure one-half the actual size. Most persons would say that the diameter of the largest steamer funnel is four to six feet and would want to wager that it was not more than eight feet. How far from the actual size such guesses are may be understood when it is stated that the funnel of the Etruria measures a little over eighteen feet in diameter. At even a short distance away this can hardly be believed. It gives an idea of the enormous size of the big steamers. We have grown so accustomed to them nowadays that we accept them as a matter of course.—Blakely Hall in Brooklyn Eagle.

Experiments with Dry and Moist Air.

A series of experiments has been made with regard to the familiar fact that not only dry high temperatures are more easily borne than moist, but dry cold causes much less discomfort than moist cold. Dogs, fasting or fed, being observed in an air calorimeter, it appeared that in all cases moist air increased the loss of heat by conduction and radiation.—New York Times.

Honiton, the royal lace, is made upon a pillow. Each sprig is worked separate, then all joined to the clear net ground. Making it employs the women and children of half a dozen counties. There are lace schools in several of them, to which children go at seven years old. Boys learn as well as girls, but seldom practice the art after the age of fifteen.

The sweet and luscious grapes are eaten with great relish by horses, cows and sheep. Deer are fond of grapes, and often do much damage in California vineyards. Hogs fatten upon grapes, rabbits love them and a number of the wild animals, as the elephant and camel, will eat them.

One of the inventions for life saving apparatus is the Irvine pneumatic gun for throwing a line to ships in distress or to persons in a burning house. The air is admitted from a reservoir to the chamber behind the projectile at a pressure of 2,400 pounds on the square inch.

The hottest region on earth is on the southwestern coast of Persia, where Persia borders the gulf of the same name. For forty consecutive days during the months of July and August the thermometer has been known not to fall lower than 100 degs. Fahrenheit, night or day.

The following is a splendid liniment for chilblains: One ounce of camphor gum, four fluid ounces of olive oil. Dissolve together by a gentle heat and apply to the afflicted parts.

SELLING A MINE.

How the Chinese Were Induced to Buy.

SCHEME OF SOME WICKED WHITE MEN.

They "Salted" What Proved to be a Valuable Mine.

In 1851 a party of American miners had been working a claim near Columbia, Tuolumne county, California, and not having even found the "color," they became discouraged; the more so as a company of Chinamen a short distance above them were doing very well. The Americans having expressed a willingness to sell, one day three Chinamen went to look at the claim. They talked it over among themselves, and finally asked the owners at what price they would sell. Of course the Americans made it out rich and put a high figure on it, though in fact they were resolved to sell out at any price, being sure that the ground was worthless. It was decided that the Chinamen should bring their picks and pans next day to prospect, and if they were satisfied they would buy at the figure agreed upon.

The miners, thinking it would probably be their last chance to sell, determined to salt the claim. It was a large piece of ground, and the trouble was where to put the "salt." One of the men soon hit upon a very ingenious plan. He took a gun and went, as he said, to get a quail or two, but in reality to kill a snake. As there were a great many about the place he soon killed a large gopher snake, which resembles the rattlesnake in appearance, but is perfectly harmless to man. Putting his game into a bag, he returned to camp.

On being asked by his companions what he had brought back for supper, he shook out the snake, and explained his idea thus:

"Now, boys, when the Chinamen come tomorrow they won't allow any of us to be too near, because they're afraid of 'salt.' Well, Jim, you walk along on top of the bank and have that dead snake in your pocket. Bill and me will stay talking to the Johns. I'll have my gun over my shoulder as if I was going for a rabbit, only, you see, I'll put 'salt' into the gun instead of shot. We'll find out where they are going to pan out next, and you be looking on, innocent like, with the snake ready to drop where I tell you. When them fellers start to walk there, just slide him down the bank, and when we all get there I'll holler, 'Hold on, boys!' and before they know what's up I'll fire the 'salt' all around there and make believe I killed the snake. How'll that do?"

Next morning four Chinamen came prepared for work. They tried a few places, but of course did not get the "color." The Americans kept at a distance, so that there could be no complaint.

"Well, John," said the schemer, "where you try next—over in that corner?"

The Chinamen were suspicious in a moment. They were familiar with salted claims, and were well on their guard. "No likee dis corn'. Tlie him nudder corn'," pointing to the opposite one.

Jim, with his hands in his pockets, was above on the bank, many feet away, watching. When he saw them point in that direction his partner gave a nod and he pitched the snake on the ground near the place. The leader exclaimed, "Hold on, boys!" and fired before they could tell which way to look. Going up to the snake, he pushed the gun under it and carried it away hanging over the barrel.

Jim walked off and Bill sat on a wheelbarrow on the opposite side from where they were at work. The Chinamen had no suspicion. They carried away several pans of dirt to wash in a stream near by, and when they returned Bill felt pretty sure they had struck some of the "salt," but the Chinamen said nothing except "Claim no good. Melican man talkee too muchee."

The Americans, knowing the game, refused to take less than the specified price, which the Chinamen finally paid, and in two days the sellers were off to new diggings.

The strangest part of the story is that the claim turned out to be one of the richest in the district. The Chinamen made a great deal of money, sold out and went home.—Hubert Burgess in Century.

Why Fruits Change Color.

Here are the best opinions of leading scientists as to why most fruits undergo changes during the ripening process: It is known that as fruits come to maturity there is a process of absorption of material from the tree's sap, as well as a cell growth within the fruit itself. That the absorption of oxygen and the giving off of carbonic acid gas is an action strictly analogous to the respiration of animals. That there is a transformation of vegetable fiber into sugar and water. The rapidity and perfection of this process depends principally upon the amount of sunshine to which the fruit is exposed while it is going on. The outer membranes of most all fruits assume a positive color when the ripening change is coming on, but why one plum is green and another blue, one apple red and another yellow, the most rigid research has failed to discover, but that the primary changes in the color of each particular species of fruit is due to the reasons given above there is not the least doubt.

When fruit has turned all its fiber to sugar and water the absorption of oxygen must be checked by cutting off light and air; or, if allowed to continue, the next chemical change involves the decomposition of the sugar, and the fruit becomes "rotten." The action of frost upon fruit is to crystallize all of its contained moisture. if this can again be converted into sugar by a very gradual process the sugar of the fruit is found to be uninjured.—St. Louis Republic.

In the French Colony.

Many natives of southern France find homes in the French colony of this town. To the superficial observer they seem as other French speaking folk, yet, upon examination, they seem as strongly marked as do our own native southerners. They bear throughout their lives the imprint fixed upon them in childhood by the sun of the Midi. They are darker, quicker tempered, softer spoken than other French folk. One patriotic Provencal, bearing a name instantly recognizable as of southern France, called his restaurant, now defunct, the Hotel du Midi. He and not a few of his guests were typical southerners, and the place had an atmosphere peculiar to itself.—New York Sun.

The influence of a white gown on the audience is marvelous. The very color of it hints of repentance, angels, redemption, purity, forgiveness. Lady Macbeth, Juliet, Camille (Lady Isabel, in "East Lynne," dies in her night gown, and very properly, too), Adrienne, etc., all will serve as proofs of the statement that actresses who have a penchant for death scenes play them in white robes.—Lillian Lewis.

INDEPENDENCE, CAL.

FRIDAY, JANUARY 1.....1892.

The Victoria "Colonist" says: "If any nation had treated the United States, under similar circumstances, as the United States has treated Chile, it would never be forgiven by the United States citizens." If this view of the difficulty between the United States and Chile had come from any other than a British source, the people of the United States might well give heed to it. If it is true that the United States has treated Chile unfairly, we cannot make amends too quickly. There is in this country little relish for war with a nation of less than 3,000,000 people. War will in fact be accepted only as a necessity which Chile has cast upon us. We have nothing to gain by a war with Chile, not even military reputation. If the United States forces should overrun the country in three months and dictate terms of peace from Valparaiso or Santiago, there would be no more glory in the act than there is when a British force in India shoots down a lot of natives with long range cannon. But British comment on American affairs has been of late years so malicious that little more attention is paid to what a British paper says than would be paid in the same organ of our avowed opponent. Whether our avowed opponent be Italy or Chile, British comment finds our position untenable.

Judge Wallace received the report of the elisor grand jury with remarks that must have cut the supreme court to the quick. He traverses their interpretations of the law that leave no excuse for the action of the highest tribunal of the state in coming to the rescue of the boodlers. He very pertinently says that if the elisor grand jury was to be declared illegally impaneled, it was not by a writ of prohibition that the procedure should have been taken. The jury was undoubtedly a de facto jury and all the acts it performed were legal. Only the acts done after the decision, if any were formulated, could come under the law of illegal acts. But a writ of prohibition wipes out all the proceedings before and after and leaves the boodlers free. The supreme court has reversed itself and has dragnetted the whole field of jurisprudence in order to make a decision that would bear the semblance of sound definition of law. But the fact remains, nevertheless, that it is a forced decision, and shows where the sympathies of the majority of the bench stand.

We are at a loss to understand any other underlying motive for Henry Watterson's attack upon Speaker Crisp for not appointing Mr. Mills chairman of the committee on ways and means but a blind prejudice to every Democrat and every section of the Democratic party that does not bend the knee in submission to the ultra-tariff views of the doctrinaires of the Carlisle - Watterson school of free trade. The Democratic party in the mass is not committed to free trade. Indeed, free trade in its full extent is a practical impossibility in politics. The country must have revenue, and the doctrine of the Democratic party has always been to establish a tariff that would afford the necessary revenue to carry on the government and at the same time so judiciously adjusted as to protect American labor and American industries entitled by their necessities and bearing upon the public prosperity to exceptional protection.

It is unfortunate that old Cyrus Field should take so much to heart the arrest of his son, but the feelings of the father should not deter the authorities from probing to the bottom this scandalous failure and punishing every one who helped in the fraud. If such a policy had been pursued ten or fifteen years ago probably we never should have heard of the Field failure. If every Wall-street swindler had been prosecuted and put in prison the business of raising money on other people's stocks and bonds would have become too hazardous.

All the stories telegraphed from the East about warlike preparations may not be true, but they point unmistakably to the fact that there is only one way of compeding the Chilean difficulty, and that is by Chile apologizing and making reparations to the United States.

The grip attacks high and low and visits all countries. The King and Queen of Denmark are down with it, and the Chinese Minister Li is a victim. No more democratic or universal disease was ever heard of.

A Race for a Wife.

South Broad street, from Jackson street to the navy yard gates, was the scene of a foot race the other day, the prize being the pretty daughter of a sailors' washerwoman. For some time Barney Burns, a marine, and George Lindsay, a sailor on board the receiving ship St. Louis, which is stationed at Leagne island, have been enamored of the bright eyed daughter of the woman who does their washing. The men were friends and the girl's affections seemed to be about evenly divided on the two ardent lovers. How to decide with which of the two she should cast her lot was a difficult problem, but the happy thought of a foot race presented itself.

The arrangements were perfected and at 9 o'clock the contestants appeared upon the course, which was two miles long, accompanied by a large crowd who had been advised of the contest. Burns stands 6 feet 6 inches in height and weighs about 200 pounds, while his opponent, Lindsay, is lithe and willowy; and the sports in the crowd were not long in determining upon the latter as the favorite.

At the crack of the pistol the lovers were off at a rapid gait, and until the tracks of the Greenwich Point extension of the Pennsylvania railroad were reached kept well together. The pace told upon Burns' wind, however, and he dropped behind, and when Lindsay reached the end of the goal his competitor was not in sight. The washerwoman's daughter will now become Mrs. Lindsay.—Philadelphia Record.

English Fortifications in America.

John Bull is preparing to make things pleasant for us. He has been of late especially active in strengthening his outposts near the United States. Six of the most powerful modern warships are to be sent to the North Atlantic squadron, the summer headquarters of which are at Halifax and the winter quarters Bermuda. Halifax is close to the American line and only 300 miles from Boston. Bermuda is only 650 miles from New York and is heavily fortified.

At Port Royal, in Jamaica, within one day's sail of Florida by steamship, Mr. Bull has some very powerful batteries. On the little island of St. Lucia he has a dry dock, a naval station and a heavy battery commanding one of the approaches to the mouth of the proposed Nicaragua canal. On all these strongholds money is now being spent. We all know about the arsenal, naval depot and fortifications at Esquimault, and the warships in these waters. Uncle Bull has industriously fortified his outposts as near as possible to the United States.

The increased activity in this work is only two or three years old. It must be costing a great deal of money. It manifests a very friendly interest in our welfare and shows that our jolly old uncle has his benevolent eye on us. We shall have to watch Uncle Bull, too, in the friendliest way. We must not let him outdo us in polite attention.—Boston Journal.

Recovered a Bank Note.

Recently a woman residing in South Shields was leaving the postoffice, and in passing along Keppel street, near the South Shields police headquarters, she tore up a five pound note, under the impression that it was an ordinary piece of paper. She did not discover her mistake till the evening, whereupon she informed Chief Constable Moorhouse of the unfortunate circumstance. It being very dark, a number of police officers were set to work with lanterns, and after a good deal of labor succeeded in collecting in different parts of the street a number of pieces of the note.

These were pasted onto a sheet of paper, and application was made to a Newcastle bank, but the patched up note being refused there, it was sent to London to the Bank of England, and by return of post a new five pound note was received by the woman, who showed her gratitude for the efforts of the police by sending a contribution, which has been placed to the credit of a private police fund.—Louden Tit-Bits.

Hunter Sam Pugh's Error.

Sam Pugh, of this city, was quite seriously hurt near Stillwater, O. T., a few evenings ago. With a party of young men he was out coon hunting. They chased an animal several miles, thinking they were trailing a coon, and when the animal was treed, Pugh climbed the tree to knock it down. In the darkness he could not see but what it was a coon, and he climbed up close to it and struck it. To his surprise he found the animal was a large and ferocious wildcat, which flew at him, biting and scratching him in a horrible manner, and causing him to lose his hold and fall to the ground. In his fall he struck a limb, fracturing three ribs and inflicting other severe bruises. He will be confined to his room for some weeks with his injuries.—Kansas City Journal.

The Moose Invited Death.

A bull moose was recently shot in the Maine woods which had nine prongs on one horn and eight on the other, the spread at the antlers measuring five feet. The animal apparently courted death, for, while the hunter who shot him was asleep by his camp fire, in the middle of the night the animal came up and smelled him over and awakened him.—Philadelphia Ledger.

Soldered His Eye.

A Bangor (Me.) plumber couldn't open his eye the other day because the upper and lower lids were held together by a drop of solder. The accident happened while he was using some solder in a gutter in which there was a little water. The moment that he applied the melted metal it snapped and flew. One piece of it came directly for his eye. The lids closed involuntarily the moment of contact and the solder rested upon the lashes; it soldered the lids together so firmly that it was impossible to move them. The eye was not injured in the slightest, but was effectually closed. The victim was half amused at the ridiculous side of the affair. A companion took him to a doctor, who severed the lashes.—Boston Herald.

Wouldn't Take the Preacher's Wealth.

As the Rev. W. F. Poor, pastor of the Lutheran church of Tribes Hill, was driving near the residence of Joseph Clark, on the West Amsterdam road, he was held up by two highwaymen, who, at the point of the revolver, demanded his money or his life. On discovering that their intended victim was a minister of the Gospel he was allowed to drive on and retain his valuables, and the highwaymen took to the fields.—Cor. Utica Herald and Gazette.

A DETECTIVE'S STORY.

How the Finding of a Visiting Card Led to an Important Arrest.

Two men sat in a secluded corner of the Ebbitt House lobby and enjoyed a quiet chat over their after dinner cigars. That was not a remarkable fact, but one of the men is one of the best known members in his profession, and if he were inclined to tell a history of his interesting experience it would fill volumes. The smooth shaven gentleman with the quiet demeanor is one of the keenest of criminal catchers, G. M. Fletcher, of Chicago. Mr. Fletcher related what he calls the strangest and luckiest piece of trailing in his life, and the end of the trail was in Washington, "although," says Mr. Fletcher, "it was only luck on my part that it did."

Fifteen years ago a wealthy old farmer named Wilson was found murdered just outside his house, near Evanston, Ill. The old man had that day concluded the sale of a piece of property, and was returning with nearly $2,000 in his pocket, as it was growing dark, the cash having been paid over after banking hours in Evanston, and Wilson incautiously allowed the remark to drop that he wished he had not made the sale until next day.

He did not like the idea of carrying so much wealth to his home, five miles distant. These facts, besides the murder itself, and the knowledge that a notorious gambler named Edmondson had overheard the speech, were all the clue offered the detectives, who were set to work on the case with a reward of $3,000, held out as an inducement for running down the murderer or murderers. Months passed, but no further trace of the gambler who was suspected could be found anywhere.

During the early spring of 1877 Fletcher was sent east on a mission by the agency of which he is a member, and in the course of his trip concluded to spend a day or twoin Washington before returning to the Lake City. While passing up Pennsylvania avenue, near Sixth street, with a friend, his attention was attracted to a small visiting card, which, after the manner of his profession, he picked up and examined.

"I wasn't thinking of business just then," said Mr. Fletcher, "but I suppose instinct led me to do as I did, and what do you suppose that pasteboard contained? The autograph of the very man I had been looking for for months. Of course the signature was not familiar to me, but the first thought to suggest itself was, 'How did the card get there?' and I could answer it only one way—Edmondson had dropped it—but how did he happen to retain the same name if he was guilty, unless he did not fear detection?

"Well, to cut a long story short, I determined to stay in Washington awhile and see what could be seen. I found out the most notable houses where a gambler of his type would be likely to hold forth, and after ten days' shadowing I found him in an old frame house on Four-and-a-Half street. Edmondson came with me without a requisition, and made no fight. In fact, he was tired of leading a hunted life and confessed the crime. He said he always had an idea that the visiting card would prove his doom, but somehow or other he could not destroy it, and knew at once when he missed it from his case that it would be a clew, for he had been traveling under an assumed name since the murder. The card was the last link of his former life.

"Edmondson was hanged a few months later, and that ended the most curious episode in my twenty-five years' experience as a detective."—Washington Post.

Something Wrong.

"Well," said the "brute" to his wife as he took his place at the breakfast table, "who are the new neighbors next door?"

"Why, how should I know?" answered the wife.

"Don't you know their name?"

"Of course not."

"Are they wealthy?"

"I'm sure I don't know."

"The man an old skinflint?"

"I don't know."

"His wife extravagant?"

"You will have to ask some one else."

"Any daughters? And are they proud and stuck up?"

"Why, Harry? I don't know."

"Anything mysterious about them? A secret connected with the family?"

"I don't know anything about them."

"What! You don't?"

"No."

"They have been here twenty-four hours—I'll send the doctor up as I go down town."

"What are you going to send the doctor up for?"

"Something must be the matter with you. That family has lived next to us for one whole day and you don't know the first thing about them yet. You need attending to."

And then he buried himself in his paper.—Philadelphia Press.

Good Authority.

Congressmen "before the war" were somewhat accustomed to the exchange of unparliamentary language, but perhaps no American legislators were ever so practiced in vituperation as the members of the much lamented, vanished Irish parliament on College Green. Somehow they contrived to keep on friendly private terms while treating one another to most picturesque abuse.

On one occasion a member, pointing a quivering finger across the house at his opponent, one Thaddy Burke, concluded with these words:

"And every mimber of the honorable gintleman's familee is benayth contimpt—from the white livered hound that is shivering on the flure to the painted hag that is grinning in the gallery."

"How did you know his sister was in the gallery?" whispered a comrade as the orator sat down.

"Sure, didn't Thaddy himself tell me she was going to be prisint when we were coming down to the house afther dinner?"—Youth's Companion.

The vote of a Riley county (Kan.) man was challenged because he had been in the penitentiary seven times. He was, however, equal to the emergency. He produced the pardoning papers for each offense.

Several days ago a child was bitten in the finger by a black spider at Madison, Ind. A few hours later the little one's arm began to swell, and death ensued on the following day.

MISCELLANEOUS.

Wiener's Cash Stores!!

Cor. I & Tulare Sts.,

FRESNO, Cal.

BRANCH STORES,

HOLT BLOCK, VISALIA.

FISH BLOCK, BAKERSFIELD.

We carry an immense and well assorted stock of Gents Clothing and furnishing goods, Hats, Boots and Shoes, Notions, Drygoods, Fancy goods Ladies' Hosiery, Underwear, Etc.

Our terms of trading are STRICTLY CASH.

We positively refuse one cent of credit. We have just one price to all.

This system ennables us to sell at a much lower rate than credit-giving stores, who make large bad debts, and a very slight acquaintance with us will prove that our statement is correct.

Our aim is to sell standard goods at cut rates, and the fact that our reputation for LOW PRICES and for STRAIGHT FORWARD DEALING is wider than THE STATE itself, and betokens our success in this direction.

Our stock is always fresh.

BARGAINS INNUMERABLE lie on our shelves and crowd our tables

If you want reliable goods cheap, try us. We fear no trade competitors. All our goods speak louder for us than the blast of a thousand horns, because

They Are Always The Cheapest and Best.

ON APPLICATION we shall be delighted to forward our country patrons a complete bound volume containing catalogue and list of prices. We shall also gladly mail, free of charge, samples of goods if desired.

Our Country Order Department is a specialty with us, to which we devote the closest and most prompt attention.

WE WILL SERVE YOU WELL AND MAKE YOU HAPPY, so remember the address,

Estate of Ezra M. Goodale, deceased—Filed order continuing application to mortgage real estate.

Estate of John Mullane, deceased—Filed order continuing hearing return of account of sales.

Estate of John A. Hannah, deceased—Filed return and account of sale of personal property and petition for confirmation.

Ibid—Filed order fixing day of hearing report of sale of personal property.

TUESDAY, December 29 1891.

Johnson vs. Mars—Filed affidavit of service by mail.

Harry vs. Harry—Filed notice of time of calling up demurrer for argument.

MARRIED.

MERCER—MOREHOUSE—At Independence, December 28th, by Rev. H. J. Winsor Mr Robert A. Mercer and Miss Kate Morehouse.

A Happy New Year, everybody.

Supervisors meet next Monday.

P. Labarge was up from Lone Pine yesterday.

P. H. Mack Esq. visited Darwin during the week.

C. Mates has a contract to pack ore from Panamint to Keeler.

Four big teams are kept busy hauling ore from Darwin and Modock.

See the delinquent notice published by the Stevens Ditch Co.

P. W. Forbes Esq. was at Big Pine during the week on official business.

Judge Conklin has been selected as president of the Kern county World's Fair Association.

L. F. J. Wrinkle, C. E. has been to Darwin making surveys at the Defiance and Independence mines.

Constable Jake Tracey of Big Pine visited Independence on Wednesday. He had company down but returned alone.

The storm has broken away and it looks a little like clear weather for a while. There is no end of snow piled up in the Sierras.

Hon. Tremmore Griffin has returned to Carson from San Francisco where he has been for medical treatment for some time past. His health is said to be greatly improved.

N. E. Conklin passed through town during the week en route for Tulare county with a band of horses. Mrs. Conklin is visiting at Bishop and will remain until his return.

The new year was ushered in with a social hop at Mair's Hall last night. Considering the cold weather the attendance was good, and a further amount was added to the organ fund.

Sheriff Gorman is compelled to utilize the upper deck of the tanks, the four cells being filled and one to spare. Dave says the jail Harmonica Band may be a good one of its kind but it is a dead poor kind.

A telegram received at Independence yesterday stated that the footrace at Bishop between Ober and Womack had been postponed on account of snow. The message stated that there was three feet of the beautiful at that place.

We have recieved a copy of the Annual report of the Postmaster General. It is a very complete work and contains much valuable information. The excess of postal expenditure in California over the receipts amounted to $417,613 77.

Mr. Robert A. Mercer and Miss Kate Morehouse, both of Mono county were married at Independence on Monday by Rev. H. J. Winsor. The young people remained in town until Thursday morning and then returned to their home in Mono.

The Christmas dance at Lone Pine was a success. A large hall with a good floor and good music was provided, and young and old united in having a jolly good time. A leap year party was given at the same place last evening and the young ladies are to be congratulated on their successful management of the affair.

Hon. P. Reddy is making extensive improvements at the Defiance and Independence mines. He recently paid Jack Wilson $5,000 for Wilsons interest in the Independence. In the latter mine there is a large amount of ore in sight, but owing to dust miners are unable to work long without getting sick. To obviate the trouble water for sprinkling will be pumped from the Defiance dump to the Independence, a distance of three-fourths of a mile and a raise of about 450 feet. The necessary pumps, pipes etc., are now on the ground.

An accident occurred on the North end of the C. & C. last Saturday in which an engine was badly wrecked. The train was just pulling into a curve when engineer Church saw a broken rail but too late to stop the train. He shut off steam, and he and his fireman Miller jumped. The engine left the track and turned over, breaking the smokestack and demolishing it somewhat. The cylinders were blown out, and both Church and Miller were scalded. They were not seriously injured, however, and will soon be around again. No damage was done to the train and no one else injured.

Two Foolish Boys.

On Monday of this week two young men were tried in Justice Hessian's court at Big Pine on a charge of disturbing the peace preferred by James Jones of Fish Springs. District Attorney Forbes conducted the People's case and they were found guilty and sentenced to a fine of $150 or seventy-five days in the county jail. The offence consisted in firing pistols promiscuously in the neighborhood of the Jones residence and in such manner as to endanger the lives of himself and family. The reckless bravado of boys just grown into manhood is greatly to be deprecated. The carrying of fire arms by any citizen is an unwarranted practice and one for which there is no excuse. If these boys will profit by the lesson their first offence has taught them they may become good and useful citizens. To carry a pistol constantly is the sure badge of a coward. A truly brave and honest man has no use for one. This is a fact that should be borne in mind by these two foolish young men, and it may be the means of saving themselves and their friends far greater trouble in the future. Looked at in the proper spirit this is the best thing that could happen to them, and surely will be if it serves to divert them from the course pursued for some time past. They bear an evil reputation and to this is due their heavy sentence. It is currently believed that they are the parties who riddled the school house at Fish Springs with bullets and destroyed the furniture. They are also said to have drawn weapons on Tom McLean. They are now in the county jail and will have ample time for reflection. They must remember that the mortification their friends must feel is harder to bear than the inconvenience they themselves must suffer. That to be confined in jail is a disgrace that only years of honest, upright bearing can efface and when liberated bear themselves accordingly.

Christmas at Big Pine.

Christmas was celebrated at Big Pine with a Christmas tree and appropriate exercises at the school house and a ball at the Big Pine Hotel. The exercises were conducted most successfully by Miss Matilda Meysan, assistant teacher, and consisted of recitations and songs. A duet by Stella and Adeline Meysan of Lone Pine was well rendered. The tree yielded generous gifts to all the little ones, and to the juveniles it was indeed a "Merry Christmas." For the elders the ball afforded every attraction that a ball could. The reputation gained by the present Boniface of of the Big Pine Hotel at the opening last spring did not suffer by the spread of Christmas night. Indeed Big Pine does nothing by halves, and the entire affair was in every characteristic of the place.

Should Be Cared For.

If there is any general fund set apart by the Nation for the care of soldiers' graves and cemeteries a portion of it should be applied to the maintainance of the burial ground at Camp Independence. There are many soldiers buried in the Post cemetery there. Of late years the fence has been permitted to rot away and cattle roam at will over the graves that have no railings. A small appropriation would suffice to place the grounds in good condition. Inquiry has been made of the Secretary of War to see if there is any fund for the purpose, and if not the citizens should see to it that the necessary repairs are made, and we respectfully suggest that the G. A. R. take charge of the matter.

Settlement Notice.

All persons knowing themselves to be indebted to the undersigned are hereby notified to call and settle their accounts on or before the 1st day of January, 1892.

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,

C. MULHOLLAND,
Independence.

"Of course it hurts, but you must grin and bear it," is the old time consolation given to people troubled with rheumatism. "If you will take the trouble to dampen a piece of flannel with Chamberlain's Pain Balm and bind it over the seat of pain your rheumatism will disappear," is the modern and much more satisfactory advice. 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

Our readers will notice the advertisements in these columns of Chamberlain & Co., Des Moines, Iowa. From personal experience we can say that Chamberlain's Cough Remedy has broken up bad colds for our children and we are acquainted with many mothers in Centreville who would not be without it in the house for a good many times its cost and are recommending it every day.—*Centerville (S.D.) Chronicle and Index.* 50 cent and $1 bottles for sale by

A. K. EUGLEY,
Big Pine.

We want every mother to know that croup can be prevented. True croup never appears without a warning. The first symptom is hoarseness; then the child appears to have taken a cold, or a cold may have accompanied the hoarseness from the start. After that a peculiar rough cough is developed, which is followed by the croup. The time to act is when the child first becomes hoarse; a few doses of Chamberlain's Cough Remedy will prevent the attack. Even after a rough cough has appeared the disease may be prevented by using this remedy as directed. It has never been known to fail. 50 cent and $1 bottles for sale by

ORDER FIXING TIME AND PLACE FOR HEARING PETITION FOR SALE OF PERSONAL PROPERTY AND REAL ESTATE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the estate of Francisco Paderes deceased.

IT APPEARING TO THE JUDGE OF SAID Court by the petition this day presented and filed by Ygnacia Abeduco, the Administratrix of the Estate of Francisco Paderes, deceased, praying for an order of sale of the personal property and real estate of said estate, that it is necessary to sell the said personal property, and the whole of the real estate, or a portion of it, to pay the debts outstanding against the deceased, and the debts, expenses and charges of administration.

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased, appear before the said Superior Court on Saturday, the 9th day of January, 1892 at eleven o'clock in the forenoon of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, in said county, to show cause why an order should not be granted to the said Administratrix to sell the personal property and the whole or so much of the real estate of said deceased as shall be necessary; and that a copy of this order be published at least four successive weeks in the INYO INDEPENDENT, a newspaper printed and published in said county.

Dated December 11th, 1891.

GEO. M. GILL,
Judge of the Superior Court.

ASSESSMENT NOTICE.

INYO MARBLE COMPANY.

Location of principal place of business, San Francisco, California. Location of works, Inyo, Inyo county, Cal.

Notice is hereby given that at a meeting of the Board of Directors, held on the 19th day of Nov., 1891, an assessment (No. 14) of Ten (10) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary at No. 1 Montgomery street, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 6th day of January 1892 will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Tuesday, the 26th day of January, 1892 to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.

G. W. LUCE, Secretary.

Office, No. 1 Montgomery street, San Francisco, California.

A BIG BUSINESS.

The growth and present size of the great retail business of Weinstock, Lubin, & Co., Sacramento, shows on the face that it possesses *a distinct character* of its own. It has done much to introduce many important reforms in storekeeping, which have been widely copied. There are people who have never heard of the big establishment, but who, through its silent influence, are being served by local dealers better than they otherwise would be.

It has done more than any other ten stores to give the "One Price System" firm and substantial footing on the Pacific Coast.

It has shown people living in small towns that they can deal through the mails with as much security as if they bought in person.

It has, by constantly raising its own standard of qualities, had an influence in raising the standard everywhere. The average grade of goods kept upon the Coast grows better each year.

It has been prominent in bringing west as stylish and desirable goods as are kept by merchants in New York, Philadelphia, or Chicago. Indeed, the manufacturers who supply them supply it. The goods are the same; and the Sacramento prices, while never higher, are sometimes considerably less. This is explained by the fact that the cost of conducting business in large Eastern cities is far greater than in the Capital City, the extra expense of overland freight being but a comparatively small item.

It has made it possible for out-of-town people to enjoy quite as satisfactory shopping facilities as do those living in large cities.

There is no desire on the part of the firm to take any special credit for whatever influence for good the house may have exerted. They have sought simply to build up a business on fair and just principles; to buy and sell as low as they can; to deal as far as possible only in the very best goods; and neither to fear nor favor any one, but to treat every customer as they would their most favored friend.

Whatever of success has come, they attribute it to the faithful carrying out of these aims and principles.

A large illustrated catalogue, giving full information about goods and prices, how to order, etc., sent free to any address.

BISCUIT. DUMPLINGS.
MUFFINS. POT PIES.
WAFFLES. PUDDINGS.
CORN BREAD. CAKES.
GRIDDLE CAKES. DOUGHNUTS.

Can always be made with Dr. Price's Cream Baking Powder. And while cakes and biscuit will retain their moisture, they will be found flaky and extremely light and fine grained, not coarse and full of holes as are the biscuit made from ammonia baking powder. Price's Cream Baking Powder produces work that is beyond comparison and yet costs no more than the adulterated ammonia or alum powders. Dr. Price's stands for pure food and good health.

Now let's turn our attention to the Thanksgiving turkey; he's the next thing due.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

"Beware of vanity, my boy. The birds of gaudy plumage do not make the best eating." "No, indeed. The parrot never gets into the soup."

THE WESTERN SETTLER'S CHOSEN SPECIFIC.

With every advance of emigration into the far West, a new demand is created for Hostetter's Stomach Bitters. Newly peopled regions are frequently less salubrious than older settled localities, on account of the miasms which rises from recently cleared land, particularly along the banks of rivers that are subject to freshets. The agriculturist or mining emigrant soon learns, when he does not already know, that the Bitters afford the only reliable protection against malaria, and those disorders of the stomach, liver and bowels, to which climatic changes, exposures and unaccustomed or unhealthy water or diet subject him. Consequently, he places an estimate upon this great household specific and preventive commensurate with its intrinsic merits, and is careful to keep on hand a restorative and promoter of health so implicitly to be relied upon in time of need.

It's bad enough to bite off more than you can chew, but it's worse to try to chew it.

MASTIFF PLUG CUT

HAS REACHED THE HEIGHT OF POPULARITY.

If you are willing to pay a few cents more for a strictly pure Smoking Tobacco, buy the Mastiff cut plug. Packed in patent canvas pouches, which retain the moisture and flavor of the tobacco.

J. B. Pace Tobacco Co., Richmond, Virginia.

I CURE FITS!

When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. Give Express and Post Office.

H. G. ROOT, M. C., 183 Pearl St., N. Y.

THE LOST SONG.

I plucked a wild flower from the river's brim,
And drank awhile its faint but fragrant breath,
Then cast it forth upon the wave a-swim,
And watched it, as I fancied, drift to death.
"'Tis lost," I said, but far adown the tide
A tempted maiden saw its dainty hue;
She snatched it kneeling at the water side,
And vowed: "I will be pure, sweet flower, like you."
And I, I never knew.

I plucked a song from out my heart one day,
And tossed it on the noisy stream of rhyme.
Sadly I watched it slowly float away
'Mongst thistles, weeds and sprigs of fragrant thyme.
"'Tis lost," I said, "'tis lost forever more,"
Although within my heart of hearts it grew
And yet, far down the reedy shore
It taught one soul its lesson sweet and true.
And I, I never knew.

—George Horton.

BEN'S WEDDING SHOES.

In the old time before the war Aunt Becky had a home of her own, a little white cottage just back of my father's house. She lived in fine style, gave her Sunday dinners, and "took on," as the other darkies said, "same lak de w'ite folks." Her old man Alec was a character, and his banjo and his songs, with his bushy hair and his "year bobs," as Aunt Becky called them, were important features around our home.

There was a time when Aunt Becky had been cleaning house for a week, and I had kept away as long as I could; but an evening came when I felt that I must have her help about some patchwork, so so I ran into her house through the kitchen door. But I stopped there when the sound of voices came to me.

"Dar's dem breeches aint had no less'n seb'n seats, en de las' one mighty nigh gone! I 'lay dat lazy nigger'll w'ar dem breeches 'dout no seat 'fo' I'll patch 'em agin!"

"Who is with Aunt Becky?" I wondered.

Then she went on:

"Dat jim-crow! Why, honey, dit jim-crow aint teched Alec's ha'r no day 'cep' Sunday sence he been bawned! Monday mawnin' he twises his ha'r inter two rolls, en ties 'em wid strings, en dar dey stays, en he aint bodder'n' his head longer no jim-crow du'in' de week. Right atter he done eat dinner on Sunday I sees him 'gin ter limber up, en switch roun' atter de bay rum bottle; den I knows w'at's er comin'. He ups en ontwises his knots, en kyards en kyards tell his ha'r des natal' stan's out en kivers de face er de yeth; den he gits his sto' cloze on, en his year bobs, en out he puts, en de Lord on'y knows whar he gwineter fetch up fo' mawnin'."

Aunt Becky stopped, and I heard some one ask a question which I could not understand.

"Ef you knowed all dey is to know 'bout dese hyer cloze er mine, yo pop eyes 'ud be popper'n dan w'at dey is."

The person to whom Aunt Becky was talking was only Charlotte, our little mulatto girl, so I opened the door and walked in. Aunt Becky heard me, but she did not turn round as she spoke:

"No eavesdroppers aint nuver heard no good er deyse'ves yit, en folks wa't walks on cat's feets is putty sho' ter hear w'at aint meant fer dey years."

"What do you mean, Aunt Becky?" I asked.

"Why, honey, is you dar?" she said, turning around and pretending to be very much surprised. "I wuz des er 'provin er Charlet's sassiness, comin' en axin me whar'bouts my cloze come fum."

As she spoke she took up a blue and gray plaid silk, and began to smooth it out on the bed.

"Dish hyer frock now, hit am seed good times, fer sho'. Miss Em'ly gin me dis fer ter w'ar ter ole Ben en Delphy's weddin'."

"When did Uncle Ben get married?" I asked, for I knew we were to have a story now.

"Why, yer see, honey, Marse Hill's nigger cabins jines up mighty close ter ole marster's niggers, en Delphy's cabin iz de nighes' one dis away. En ole Ben he wuz always totin' his tools en his hoe pas' Delphy's winder, tell 'twa'n't long 'fo' he done sot eyes on her, en dey wuz 'ginnin' ter cote. Hit did look mighty funny ter see dem two ole niggers settin' roun' de chimbly sparkin', kaze Delphy wuz turned sixty, 'en ole Ben wuz ev'y mite er sixty-fo'; but dey tuck on same lak dey wuz sixteen en twenty. Delphy wuz er bobbin' her head dis a-way en dat a-way, en ole Ben tuck ter kyardin' his ha'r a'mos' ev'y night.

"Well, dey weddin' wuz er big ter-do. Ev'y nigger w'at got er invite wuz boun' ter go, en' mo'n dat dey wuz boun' ter dress fine, too. Marse Sam he gin ole Ben de weddin' suit en er pa'r er shoes, but dar's des 'zackly whar de trouble wuz. Ole Ben wuz one er dese hyar bar'foot niggers clean ter de backbone, en he 'lowed ter Delphy up en down dat he wa'n't gwineter w'ar dem shoes.

"Delphy she come er flyin' over hyer one day, en 'lows ter me dat she aint gwineter stan' up longer no bar'foot nigger, en she don' see no way fer ter git dem shoes on ter ole Ben's foots.

"'I 'clar to grashus!' says I, 'don't you have no pesterment 'bout dem shoes, Delphy! You des wait en git dem shoes over ter yo' cabin; den w'en de weddin' night comes, en ole Ben gits dar, you fetch out de shoes, en tell him dat dey aint no bar'foot nigger gwinter stan' up 'longside er you, en eat yo' weddin' cake. I lay de victuals'll feeth him.'

"Atter dat Delphy didn't pester ole Ben no mo' 'bout the shoes, en dey wuz bofe ez pleasin' ez er baskit er chips. Mis' Hill gin Delphy one er dese hyer yaller buff silks wid pa'm leafs on it, en er head han'kercher w'at des went wid it.

"W'en de weddin' night come, I went down ter Delphy's house 'long 'bout sundown ter fix de bride, en I mus' 'low dat Delphy look mighty fine dat night. Dat yaller buff silk mighty nigh made yer mouf water, en de head han'kercher wuz puo silk, too.

"Delphy she 'low dat dey wa'n't nobody gwineter ketch her 'douten no head han'kercher on, weddin' or no weddin', en hit tuck me en Mis' Hill bofe ter keep her fum kiverin' up dat frock wid er w'ite apun. Delphy 'low dat hit look lak she felt mo' natchul wid er apun on, but she tuck'n lef' it off ruther'n 'spute longer me en Mis' Hill.

"Atter de milkin' wuz all done up, en de pigs fed en de cows watered, de niggers 'gun ter slick up en git ready fer de infa'r. Atter we done git Delphy fix up, 'twa'n't long 'fo' we heard er knock at de front do', en Delphy 'gun ter titter en giggle en 'low, 'Dar's Ben, I reckon.'

"Den I tuck er look out de winder, en sho' 'nuff dar stood de ole nigger dressed up wuss'n marster uv er Sunday. Ev'y knot er ha'r wuz kyarded out, en one er marster's ole beaver hats wuz settin' on top er his head. His sto' cloze wuz bran, spankin' new, en, mo'n dat, he had on er b'iled shirt en collar.

"But, grashus, honey, down at de bottom dar sot his ole black feet spread out flatter'n er pancake on de do'steps. I des tuck'n retch under de bed en fetch out de shoes.

"'Now, Delphy,' says I, 'you des lemme 'lone. I gwine fix ole Ben.'

"Wid dat I walks ter de do' en opens it er crack.

"'Good evenin', Ben,' says I.

"'Howdy, Aunt Becky,' says he; 'aint yer gwine ter let me in?'

"'Delphy's puttin' de cape jessamines roun' de weddin' cake,' says I. 'en she sont me wid de shoes, Ben, so yer won't make no bar'foot tracks crosst her front do'. Des set right down on de do'step en put on de shoes wiles I goes en looks after de roas' shoat er minit.'

"I didn't give Ben no time ter say nuthin', but I tuck 'n' drap de shoes right alongside er de ole nigger en shet de do' en button it on de inside. Den I tuck my stan' by de winder fer ter watch 'im.

"Fust he tuck off his beaver hat en scratched his hed en stood lookin' down at de shoes; en bless yer soul, honey! he wuz dat mad dat he couldn't sca'cely move. He kep' er mumblin' en mumblin' en scratchin' his head, but he ain't move yit.

"Putty soon he shuffled roun' er little en den up went his foot, en he gin dem shoes er kick w'at sont 'em flyin'. Den he turns roun' mighty mad en start fer de gate.

"Wid dat I goes er little way off'm de winder en hollers out:

"'Delphy, dish hyer mighty fine chicken salid w'at Miss Belle sent, en Miss Em'ly done empty de pote wine bottle in dish hyer syllabub."

"Nex' time I look out de winder ole Ben mo' nigher de house dan w'at he wuz, en I seed him lookin' roun' de ya'd lak he huntin' dem shoes.

"Den I hollers out ergin:

"'Delphy, Ben's gwinter kyarve de shoat, ain't he? En I reckon we better put de roas'n years en de chicken salid alongside er him too. I clar ter grashus! dish hyar table's dat full dat hit couldn't hole no mo'.'

"Dat done hit, honey, des lak I knowed it would. Nex' time I look out de winder Ben en de shoes wuz settin' on de do' steps makin' frens, en hit wa'n't long fo' I heard n'er knock at de do'.

"'Lordy, Ben!" says I, 'I mighty nigh forgot yer, I been dat busy wid de supper table.'

"Well, honey, hit wuz putty to hear dem shoes creak, en ter watch ole Ben walk in 'em, but de niggers wuz er gedderin' by dis time, en 'twa'n't long fo' de preacher come, en marster en Miss Em'ly en de chillun en Marse Hill's folks, en den de weddin' tuck in.

"Yer may say w'at yer please, honey, but dat wuz er mighty fine time. De preacher woz er fren' er ole Ben's, en he wuz one er deze hyer reg'lar backwoods zorters (exhorters). Der wa'n't no uppity ways 'bout him, en his ole jeans cloze looked mighty funny longer de bride en groom. Fust thing he 'low wuz:

"'Bre'r Ben en Sis Delphy, jine hands; den we'll ax de Lord's blessin'."

"Den off he went inter one er dese hyer camp meetin' pra'rs. Atter dat he gin 'em er talk 'bout how dey hatter ack w'en dey wuz married, des same lak dey wa'n't gwine on seb'nty (seventy).

"Atter de weddin' wuz over de w'ite folks shuck hands wid de bride en groom en den went out en tuck a look at de supper table, but dey wouldn't eat nuthin, kase dey 'low dat us niggers could eat all dey wuz. En dat wuz er fac', honey, kase atter de w'ite folks wuz gone de niggers tu'n looset fer sho' dat night.

"We had er whole roas' shoat fer supper, en roas'n years en wat'melons en mus'melons en cake en candy en bacon en greens en taters, en we nuver pass by de ash cake, kaze dat waz one er ole Ben's pennunces. En Miss Belle she made er whole mess er chicken salid, en Miss Em'ly whupped up de cream fer de syllabub, en Miss Hill made de bride's cake en put er gole ring inside.

"Cosen Delphy cut de cake fust, but she didn't git no ring. Den ev'ry nigger hatter cut de bride's cake en Mandy she got de ring, kaze her en one er Mis' Maxwell's niggers wuz keepin' comp'ny, en sho' nuff dey weddin' wuz nex'.

"Atter supper de house got too little en hot en we went out inter de ya'd fer de dancin'. Dey wuz er light'ood fire blazin' out der, en putty soon de reel wuz called.

"Alec wuz er rattlin' de bones en hollerin' de steps, so I tuck'n clipt in wid one er de young niggers, en fust thing I knowed I looked up en seed Ben en Delphy come prancin' down de line wid Ben's ole flat foots ez free en easy ez if dey hadn't been no shoes in dis worl'.

"'Ef you'd er bin Alec,' says I ter mys'f, 'you'd er kep' dem shoes on dis one night anyhow. But me en Delphy aint lak one ernudder 'bout dat.'

"Well, honey, dey wa'n't many steps dat we didn't dance dat night. Fust it wuz dis, end den it wuz dat, en dar wuz Alec er rattlin' de bones en' hollerin', en me hoppin' roun' ez spry ez er blue jay wid de limberes' nigger in de lot.

"'Long todes marnin' Ben en Delphy wuz des natally picked up en toted off ter dey cabin, but we didn't none uv us git much sleep dat night; but dey ain't been no weddin' on de place lak it sence. Dat wuz one er dese hyer ole times w'at yer don't see dese days."

Here Aunt Becky stopped. Her story was ended, but Charlotte and I sat still for a few moments until Aunt Becky spoke again.

"I reckon Miss Em'ly's down on her han's en knees scrubbin' lak er nigger."

"Why, Aunt Becky?" I asked.

"Kaze Charlet been down hyer havin' er free en easy time all de evenin', en de wuk boun' ter go on. Ef dey aint no little nigger up ter de big house ter do it, Miss Em'ly hatter pitch in en wuk herse'f."

This was enough for Charlotte. She sprang through the door and down the kitchen steps and was away across the yard in a moment. As I started more slowly, Aunt Becky dipped her hand into a bag that lay near the chimney and brought it out full.

"Hyer, honey, hole out yer apun fer dese goobers. Now cle'r right outen hyer en don't yer be bodderin' me no mo'."—Helen F. Kendrick in Youth's Companion.

Riders in the Time of Alexander.

One of the most precious relics of the past is a bronze statuette dug up at Herculaneum in 1751, and thought to be a copy of the equestrian statue known to have been made of Alexander the Great by Lysippus, after the battle of the Granicus, when statues of all the brave who fell in this initial victory were made by the famous sculptor. If it is truly a copy of Lysippus' work we can judge from it how the Macedonians managed their horses in a hand-to-hand conflict. The king is shown sitting on a blanket firmly held in place by a breast strap and girth. Without dropping the reins from his bridle hand he grasps this substitute for a saddle at the withers, and turning full half way to the right and looking backward, gives a swinging cut with his sword to the rear, covering as big an arc of the circle as the best swordsman who ever sat in a saddle.

The statue is full of life and natural to a degree. If not Lysippus' work, it is that of a consummate artist. The position shows great freedom of movement on the horse, and a seat strong and elastic. That the Macedonians kept their heels well away from the horses' flanks, or rather that they did not rely on their heels to cling to him, is shown by their commonly wearing spurs, a thing the Indian usually avoids, and the same habit shows clearly in this piece of art. —Colonel T. A. Dodge in Harper's.

Care of the Hair.

The hair, like every other portion of the human frame, if uncared for will go to waste and eventually drop out. This is due to a splitting of the ends of the hair, so that the interior oil duct which nourishes the hair is exposed, and the natural nourishment of the hair runs to waste, overflows upon the head, forming dandruff, which impedes the growth of the hair just as much as the tares among wheat. The best means to prevent this is a strengthening of the hair, and this can easily be accomplished by frequent cutting and the use of salt water and vaseline.

Have you ever noticed what bushy hair seafaring men have? Did you ever see a bald sailor? It is because their hair is in constant contact with the invigorating salt air, and is often wet with salt water. A good tonic of salt water should contain a teaspoonful of salt to a tumbler of water, and should be applied to the hair two or three times a week. The effect at the end of a month will be surprising.—American Spectator.

AMMONIA IN BAKING POWDER.

Discussion Before the American Chemical Society.

[*Chicago Tribune.*]

To the Editor of The Tribune:—I have just seen the report in your issue of Sept. 3, of the discussion at the Washington meeting of the American Chemical Society, Aug. 18, relative to the use of carbonate of ammonia in baking powders.

This report is incomplete and incorrect in many particulars, and as the paper which precipitated the discussion was read by me and was based upon my own experiments, I desire to make certain corrections in the interest of the truth and for the benefit of the large number of your readers to whom the question is one of great moment.

The paper as read before the society related that ammonia in baking powder is retained in the bread by reason of its affinity to the gluten. The concensus of opinion as expressed during the discussion was against the use of carbonate of ammonia in baking powder with the only exception of Dr. McMurtrie, who is now an employe of a baking powder company which uses carbonate of ammonia in its baking powder.

Of the other parties mentioned as having taken part in the discussion were Professor Dr. Barker, of the University of Pennsylvania, who is the president of the society and one of our highest authorities. In answer to a pleading by Professor McMurtrie that only small quantities of ammonia were used in baking powders, he stated: "No matter how small the quantity, I must decline to be dosed medically without my consent when taking my meals."

Dr. E. H. Bartley, formerly chemist of the Brooklyn Board of Health and Professor of Chemistry at the Long Island College, likewise named, did not, I believe, take active part in the discussion, but is already on record as strongly opposed to the use of ammonium carbonate in baking powders.

Dr. Richardson volunteered only the question whether the flour used in the exeriments was of good quality, of which I assured him by stating that it was the best and the flour used in my family.

Professor Mallet was not present.

Your article is misleading in so far as it gives the impression that ammonia disappears on baking. My actual tests agree with those made by others, showing that ammonia remains in the bread. My investigations simply assign a new cause for its retention.

H. ENDEMANN, Ph. D.

—*New York Tribune Sept. 17, 1891.*

NOTE.—Dr. Endemann, the writer of this communication, is well known in scientific circles, and was for twelve years chemist of the New York Board of Health.

The baking powder company above referred to is the Royal Baking Powder Company of New York, and the employe Dr. William McMurtrie, who defends that company's use of ammonia, is their much advertised government authority. There is no such office known under our government as that of government or United States government chemist.

The cable that is to connect the Bahama Islands with Jupiter Inlet, Fla., will be completed early in December. This will bring Nassau into greater prominence as a winter resort.

The drop-letter service on the electric road between St. Paul and Minneapolis is very popular. The boxes are placed within easy reach on the side of the car.

PILES! PILES! PILES!

Walding, Kinnan & Marvin, Wholesale Druggists, Toledo, Ohio.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. a bottle. Sold by all Druggists.

Miss Passee—Here is an article in this paper on "The Girl to Be Avoided." Mr. Greatcatch—Yes, I know. The girl who wants to get married.

A Continuation of a Cough for any length of time causes irritation of the lungs, or some chronic Throat Disease. "Troches" are an effective Cough Remedy. Price 25 cts. *Sold only in boxes.*

When the devil wants a man he doesn't care how near he sits to the pulpit when he goes to church.

TRULY A HOUSEHOLD REMEDY.

C. Middlebrook, 240 Bedford avenue, Brooklyn, N. Y., writes:

"I have used ALLCOCK'S POROUS PLASTERS for the last twenty years. They are truly a household remedy. If one of my children has a cold and wheezes, I put an ALLCOCK'S POROUS PLASTER on the chest and one between the shoulder blades. If any of the children have croupy coughs, or coughs of any kind, I place the plaster close up around the throat; the soothing effect is apparent almost always in two hours. If they have a disordered stomach, a plaster placed just below the chest bones makes digestion perfect in half a day. If there is any looseness of the bowels, accompanied by coldness of the skin, two ALLCOCK'S POROUS PLASTERS applied over the stomach cure in from two to five hours. I notice particularly that these plasters never abrade the skin or cause the slightest irritation. From my own experience I know they never fail for rheumatism, pains in the back or lumbago."

Fatal Bath After a Ball.

It is a bad thing to venture in a dangerous surf after being out all night at a ball, where liquor flows freely and the guests get gay. It proved a particularly bad thing for George Powell, a driver for Henry Ungerland, a livery stable keeper of Sheepshead Bay, who was drowned recently in Sheepshead bay. Powell had been to a ball at West Brighton, Coney island, given by the track keepers of the Brighton Beach race track. He was returning about sunrise with four of his fellow workmen in the stable. He insisted on bathing in the bay at the upper end, near the Manhattan Beach railroad track. The bay is very shallow, but Powell went in where there was a deep hole. He had been in the water only a moment when he threw up his hands and disappeared, according to the story of his companions, two of whom jumped in after him they say, but they could not find his body for twenty minutes. It is believed, however, that the men were all in bathing together, and the drowned man's companions did not realize that he was drowning until it was too late. Powell lived on Pacific street, Brooklyn, and he has a brother who is a brakeman on the Brooklyn and Brighton railroad.

They Watched His Sweetheart.

Joe L. Rearden is a handsome young giant, twenty three years old, who had an honorable career before him, but who "went wrong" and is now in the clutches of the law. He was chief bookkeeper and confidential man of the Fire Creek Coal and Coke company, of Fire Creek, Fayette county, W. Va. Last June he fled, taking with him, as is charged, a couple of thousand dollars of his employers' money. The case was placed in the hands of a Cincinnati detective agency, and the operatives assigned to the job of capturing the fugitive first tried to find out whether or not he had a sweetheart. After some inquiry they learned that he was enamored of a young lady living at Rome, Ga. A close watch was kept of her, and when she received a letter from Chicago the spies were not long in getting at its contents. As a result Rearden was located, arrested and taken back to answer for his misdeeds. He belongs to a respectable Kentucky family.

J. L. REARDEN.

Vast Sums Spent by Stamp Collectors.

One who is not a stamp dealer or stamp collector has little idea of the enormous proportions to which philately has grown. An English paper announces that postage stamp collectors are delighted at the prospect of adding to their treasures by the new French colonial stamps which will be issued shortly. When any new stamp comes out the regular stamp dealers in England, Paris and New York alone require at least $600,000 worth of specimens for their customers. For example, Tunis issued a fresh stamp three years ago, and the government printed enough for a year's supply. In a month the whole quantity had been bought up, chiefly for collectors. France will print separate stamps for each of her colonies in order to prevent people making a profit out of the exchange between the colonies. As before, the stamp will represent Commerce and Navigation standing upright in a boat, beneath the inscription, "Republique Francaise—Colonies," but the name of each possession will be engraved at the foot, so that the Madagascar stamp cannot be used in Cochin-China, and so on.

Material Always of Value.

The economy of material has been reduced almost to an exact science. When a thing ceases to be of value for one purpose it is utilized in some other way. The statement of a Pittsburg cable car magnate is of interest in this connection. Says he: "The ropes on cable roads are as a rule sold as soon as they are put in. The rope upon which we are traveling was sold several weeks ago. The old ropes are sold for inclines, elevators, etc. They are better for that purpose than if they were new. They have become so thoroughly soaked with oil and tar and so stretched that they are seasoned. They will never wear out on inclines or elevators because there is no strain on them compared with that of a cable road, and they have been tested so that they may be relied on. After they have been in use a short time on the cable roads, and before they show signs of wear, they are replaced by new ones.

It is said of A. J. McKeown, son of the oil magnate, John McKeown, that he is probably the richest young man in Pennsylvania. He enjoys a princely income which he spends with a lavish hand. In his younger days his father offered him $10,000 to stop smoking cigarettes, and subsequently raised the amount to $30,000 with the understanding that the boy should abstain from the use of tobacco in any form. This offer young McKeown refused.

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation permanently. For sale in 50c and $1 bottles by all druggists.

CALIFORNIA FIG SYRUP CO.
SAN FRANCISCO, CAL.
LOUISVILLE, KY. NEW YORK, N.Y.

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

"August Flower"

Biliousness, Constipation, Stomach Pains. "I have been afflicted with biliousness and constipation for fifteen years; first one and then another preparation was suggested to me and tried but to no purpose. At last a friend recommended August Flower. I took it according to directions and its effects were wonderful, relieving me of those disagreeable stomach pains which I had been troubled with so long. Words cannot describe the admiration in which I hold your August Flower—it has given me a new lease of life, which before was a burden. Such a medicine is a benefaction to humanity, and its good qualities and wonderful merits should be made known to everyone suffering with dyspepsia or biliousness

Jesse Barker, Printer, Humboldt, Kansas.

G. G. GREEN, Sole Man'fr, Woodbury, N.J.

CONSUMPTION.

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, with a VALUABLE TREATISE on this disease to any sufferer who will send me their Express and P. O. address. T. A. Slocum, M. C., 183 Pearl St., N. Y.

Tutt's Pills

The dyspeptic, the debilitated, whether from excess of work of mind or body, drink or exposure in MALARIAL REGIONS, will find Tutt's Pills the most genial restorative ever offered the enfeebled health.

Hercules Gas Engine

(GAS OR GASOLINE)

Made for Power or Pumping Purposes.

The Cheapest Reliable Gas Engine on the Market.

For Simplicity it Beats the World.
It oils itself from a Reservoir,
No Carburetor to get out of order.
No Batteries or Electric Spark.

It runs with a Cheaper Grade of Gasoline than any other Engine.

YOUNG WOMEN DOCTORS.

The Busy Life of a Female Medical Student.

STUDYING UNINTELLIGIBLE PHRASES.

An Interesting Career.—A Few of its Drawbacks.

A big, old fashioned square house, with a spacious yard all about it, stands in West Fifty-fourth street.

Over the stone steps that lead up from the gateway pass the feet of many women—sometimes young women and pretty ones, with their arms full of books and the glow of enthusiasm in their faces. Other young women, too—the pity of it—with faces that carry upon them a story of suffering and want, and sometimes of sin. And, perhaps next, there may pass through the gateway a woman with whitening hair, carrying a small leather bag and a physician's case. She has the alert, earnest face and quick step of the woman who has work ahead of her, and plenty of it; and she is followed by a bent woman with a tired face, who carries in her arms a sick baby whose thin cry leaves a pitiful echo in the ears of the passer by.

And they all go up the long walk and enter the wide hall, each one to the compassing of her own purpose.

But the young women linger a moment in the long hall and chatter like blackbirds about the weather and the walking, and turn over the pile of letters lying on the table. By and by one begins to differentiate them and to notice that most of them are still under 25, that several are exceedingly pretty, and that none of them differ in any way from the average well bred young woman. Then some one rushes up, notebook in hand: "Oh, Miss Brown," she asks, "what do you give as the first symptoms of locomotor ataxia, and what difference in respiration is there in eclampsia and hysteria?"

IN THE RECITATION ROOM.

But the outsider never learns, for just then some one cries out: "It's time for the histology girls," and they scramble notebooks and papers together and file into a large room at the left, which looks very much like a schoolroom, with its chairs and tables and blackboards and charts on the wall of various anatomized persons in uncomfortable attitudes. Before the pupils are fairly seated the professor of histology, pulling off her gloves as she enters, takes her seat at the little table on the rostrum and looks down at the faces before her. Shades of Galen! Who would not sit at the feet of such a woman to learn wisdom?

She is as young, surely, as the learners who sit before her. Her face has never a line upon it, and not even the gold rimmed glasses can make her brown eyes look severe, while a bonnet that is anything but professional crowns the shock of curly hair that tumbles over her forehead. It is the hour for the "quiz" in histology, and round after round of questions—sharp, rapid, incisive—comes from the professor's lips as she nods quick assent or dissent from the answers that come from all corners of the room.

ATTENDING LECTURES.

The histology "quiz" is over, and the girls do not seem to be altogether "annihilated," as they declared beforehand they should be; at least, there appears to be considerable bodily substance left, as they sweep their books together and hastily don wraps and overshoes for their journey to an adjacent building, where, with pencil and notebook in hand, they listen to a lecture by the famous Dr. Phœbe Wait, the substance of which will be required of them for the next day's recitation.

Now comes in the grave faced professor—the only man visible throughout the day's entire routine—who leads the clinique. And the students make a close circle about him with the ever present notebook and pencil, while patient after patient is led out from an anteroom, and he explores and expounds the causes of the various maladies that are presented, in terms whose length and learning seem at once to terrify and to gratify the subjects thereof.

The long list of patients is prescribed for at last, and the clinique is over. It is getting late in the afternoon, but the work of the young women is not yet done. A part of them must go up into the hospital for service there, and others go into the dispensary, where a dozen or so charity patients are waiting to be cared for. It is almost dark before the last one passes out into the street, and she does not walk as lightly as she did when she came up the steps in the morning. She is tired in body and brain, and her heart is always a little sadder for the suffering she sees.

AFTER THE DAY'S WORK.

But she goes home, takes a hot bath, eats a hearty dinner, and gets in three hours of solid study before she goes to bed. She doesn't get much time for amusement, though she likes it as well as any other young woman—perhaps even a little better, because she must see so much of the dark side of things. But she isn't altogether oppressed by the sadness and severity of her life. She wears good gowns that fit her well, and she likes them, too. She wears bangs if they become her, and high heeled boots if her feet are pretty, nor does she forget, even in the hurry of her morning toilet, to give her back hair the latest twist.

She doesn't faint away in the dissecting room at the first cut of the scalpel, as the man student usually does. She doesn't faint away at all while there, but after she leaves the room and the nervous strain is over she finds the world growing suddenly dark, and the next thing she knows some one is sopping her bangs with cologne, and she struggles back into the world to say, with professional interest: "Well, I'm glad to know what fainting is like, anyway."

Take her all in all, the woman medical student is a most interesting and delightful manifestation of the "girl bachelor," and she finds life just as full of zest and just as well worth the living as if she did not understand how closely one's estimate of it depends on the liver.—New York Sun.

She B-Bit the B-Bureau.

A certain young married lady of this city is fortunate in having a good, kind husband, whose devotion to her has never flagged for an instant since the first day he fell in love with her several years ago. She, unfortunately for her own happiness as well as his, was born with a temper like gunpowder. The following little family dialogue took place between them the other morning just after breakfast, during one of her lucid intervals. It leaked out, no matter how:

"Tell me," said he, "just for my own curiosity, how it happened that I never discovered this unhappy weakness in you in our courtship days, when I thought you a paragon of perfection? How did you ever manage to restrain yourself then?"

The poor woman hesitated a few moments before answering, and then, sobbing bitterly, dropped her graceful little head upon his sturdy shoulder and said: "I used to excuse myself from you for a few minutes and g-g-go up stairs and b-b-bite pieces out of the top of the bub-bu-reau."

And he was as well satisfied with this explanation as he could have been with any.—Detroit Tribune.

HOW TO SELECT AND USE A GUN.

A Talk for Boys from Which Older Persons May Get Some Benefit.

The gun is, perhaps, the most fascinating thing to boys that can be thought of, and it is, therefore, necessary that they should be instructed in its use. There is comparatively little danger in handling firearms if carelessness is avoided. Nearly all the accidents by which boys have been hurt or killed while using guns have been the result of gross neglect of the simplest rules of safety.

Three kinds of weapons may be classed as handguns—the rifle, the shotgun and the pistol. It is rare indeed for a boy to need a pistol, and I shall only say here that it is the most dangerous and the least useful of all arms. It is so short that it is hard to handle with perfect safety, and it is not accurate enough for use as a sport weapon. My advice to boys is to let it alone.

The rifle is a long range weapon of sport, and for large game it is the only effective one. Since the perfection of the shotgun the old time rifle has been less and less in demand for small game; still, for squirrel hunting, especially in the south, it is in common use, and for target practice it cannot be equaled.

All the best guns now made are breech loaders. No other kind is worth buying. I cannot here recommend any special maker's gun, but I would say that Americans make as good guns as the English or anybody else.

The best rifle for boys is a 32-caliber breech loader, which uses short metal shells. Such a gun, if of good make, will be quite accurate at any range within 150 yards, and will kill any game that boys are privileged to hunt. I say this because game that is large or dangerous should never be followed by the young or inexperienced. If, however, a boy must shoot large game, let him have a gun of large caliber. For deer, antelope and the like a 44-gauge is quite heavy enough, but for bear and all large and dangerous animals the guns to be used are extra heavy Express rifles, which none but strong men should try to handle.

For target shooting at short range a 22-caliber or even a smaller rifle may be used, and these small guns are very effective for squirrel shooting in low timber or for killing rabbits.

The rifle may be used for shooting at moving objects, but it requires great expertness, and there are few who can attain to success in it.

In choosing a shotgun the chief thing is to get one of excellent workmanship, and to do this requires some knowledge of the parts of the weapon. Of all the parts the barrel is the most important, though, for that matter, nearly all the reputable makers turn out good ones and no other sort. Order a gun with Damascus or laminated steel barrels and rebounding locks; have the left barrel "choked" and the right with cylinder bore. A choked barrel is bored so that it throws the shot very close together and with even distribution. The cylinder bore is of the same diameter throughout its length, and it scatters the shot over a large surface.

Boys will find a gun of the size called 20-gauge the lightest and best for shooting all game not larger than quail. For all ordinary inland shooting, however, the preferable weapon is the 16-gauge, weighing about seven, or better, six and a half pounds. Let the stock be as straight as you can well use, and the barrels should be twenty-eight or not under twenty-six inches long. I have used a gun of the heavier weight mentioned for years and have found it just the thing for small game, and have used it successfully on wild fowl. Still, for shore and boat, when water fowl are flying high and fast, it is much more satisfactory to handle a heavier gun.

The safe range of a shotgun loaded with small shot is from fifty to sixty yards at the greatest, though you will hear men boast of their guns killing every time at much greater distances. About forty yards is the more probable limit of safety for light guns loaded with, say, No. 8 shot. The pellets go with great force when they first leave the gun, but lose speed rapidly as their distance from the muzzle increases. Moreover, they spread apart or scatter as soon as they fly, soon getting so widely separated that there can be no certainty of their hitting the object aimed at.

The object in having the left barrel of your gun "choked" is to make it more effective at long range. Thus, if a bird is fired at and missed with the right barrel, which is always first used, the left barrel is better suited to make the second shot, as the flying bird has got much further away.—M. Thompson in Minneapolis Tribune.

Flirting Among Clerks.

There is, of course, considerable flirting among the clerks. If you put one woman with three men anywhere in the world she must be an extraordinary female if she does not throw coquettish glances at at least one of the three, and the men are not human if they do not look at her. I happen to know, however, that three-fourths of these treasury girls could be married if they wished husbands. They get good salaries and, as one of them said to me the other day:

"We have so much experience with men here that we are afraid to trust them. We are like Diogenes with his lantern. We can't find the honest man. When a woman gets $100 a month she doesn't care to divide this amount with a husband, and I can tell you I propose to stick to my salary as long as I can."

The heads of departments frown upon all flirting, and there is no better way for a female clerk to lose her position than by falling in love. There are lots of chances for quiet conversations, however, in this big treasury building. The building covers nearly two acres, and the length of the corridors in each story is nearly a quarter of a mile. As there are four stories, we have a mile of corridors, and there are little nooks and corners where a man might whisper a sweet nothing in a lady's ear if it were not for a messenger who is holding down a chair outside of some big official's door, and who is not infrequently ready to report anything out of the way.—Washington Letter.

The Use of Bonnet Ties.

The woman upon whom age, even an age in the neighborhood of 30, is beginning to set its seal is wise to wear ties on her bonnet or hat, because they will do much to make her look younger, and will conceal from the public that first sign that she has passed her twenty-fifth birthday—the wrinkles that come behind the ears and frequently extend along the throat. Even narrow velvet ribbons will hide these, and the woman who doesn't take advantage of their charitable offices announces that she has no idea of the practical use of dress.—New York Sun.

Let there be no white rubber about your baby. In the preparation of this material there is a certain amount of pernicious drugs introduced, which makes it undesirable for the infant. Plain black rubber alone should enter into the composition of the mouthpiece for the nursing bottle and the teething ring. What is termed a "drooling bib" is an abomination. It is composed of the ordinary white gum cloth, and is tied about the infant's neck in the same manner as is any other bib. Its professed object is to protect the front of the baby's dress and keep it dry, but its real effect is to increase the drooling.

A KANSAS EXPRESSION.

Curious Origin of a Peculiar Phrase.

"FOLLOWING TOM'S WHEELBARROW."

It Mean's That a Man has Done Wrong.—Who "Tom" Was.

Among the scouts who accompanied Gen. Sheridan during the campaign against the Indians in the winter of 1868-69, who were attached to headquarters in the capacity of couriers, selected for their courage and knowledge of savage methods, was Tom McFadden, who made a record for himself, and was one of the scouts sent out by Gen. Sheridan to bring "Sa-tan-ta" in as a hostage when the villainous old savage was sitting on his horse apart from his great band of allied warriors on a knoll, contemplating whether to attack the troops, who were in battle array one morning in front of Fort Cobb, and who was extremely impudent. McFadden was afterward one of Gen. Miles' scouts in his wonderful campaign against the Indians in 1871.

Late in the fall of 1867 McFadden and two other trappers established a camp on the Paradise, about two miles above its junction with the Saline. They had remarkable luck, and in a short time had accumulated a large lot of pelts, furs, buffalo hams and elk and deer meat. They possessed but one small team of horses, and their supplies running low they concluded to go to the then embryo town of Ellsworth, on the Smoky Hill, which had just been started on account of its proximity to Fort Harker, then the most important military depot and post on the plains. It was also the nearest trading point for the many hunters scattered along the rivers and streams of the wilderness of central Kansas, and about seventy miles from McFadden's camp. So Mac and one of his partners hoofed it into the new town, intending to hire teams to bring their meat and skins to the railroad, to purchase their needed supplies, including poison—the most necessary article of all their wants—with which to kill wolves.

Arriving at Ellsworth they vainly endeavored to hire teams, but all in the region had been employed by the quartermaster's department at Fort Harker in hauling hay from the various "grass camps" in the vicinity, so they had to go back, as they had left their only other partner alone in camp with but a few rounds of ammunition and the Indians anything but friendly. The railroad, at the time of their arrival at Ellsworth, was running a train to what is now Bunker Hill, then only a water tank station, to which point they shipped their supplies, as it was some miles nearer their camp, intending to pack the most needed articles on their backs and return with their own team in a few days for those things they could not take along.

After arriving at Bunker Hill and dumping their supplies on the little platform, dreading to start out on their long tramp loaded down with what they must take, intending to store the rest in some secure place until they could come for them, McFadden happened to see a pile of wheelbarrows belonging to the railroad company piled bottom side up along the track, and with the inspiration that is born of genius he turned to his partner and said, "Dan, this darned question of transportation is settled right here for here is a vehicle that looks as if it was constructed for our special purpose at this ticklish juncture."

So, waiting until the station men were out of sight, they proceeded to load up one of the fortunately discovered wheelbarrows with their supplies, which included among many smaller things 200 pounds of flour, and away they went across the high prairie toward their camp. Their route went over a smooth country until they neared the "breaks" of the Saline, and then it required a good knowledge of the region to find a passage through the precipitous limestone bluffs which characterize that portion of Kansas.

It is a difficult matter, or rather was in those early days, for a "tenderfoot" to find his way down into the valley of the Saline, as it is the most lumpy region in that part of the state. Knowing the whole country well, Tom and his partner struck for the nearest point on the river, satisfied that with their unique means of transportation they could go down the bluffs anywhere and cross the stream where a wagon would not dare to attempt it. At last the fortunate hunters arrived at their camp, tired, but with their supplies intact.

The next season that immigration which grew to be phenomenal in so short a time began to seek the beautiful and tempting valleys of the tributaries of the Saline, and of course the only route to the coveted localities was through the rough country north of the Union Pacific in Kansas, and the starting points the stations of the road. Bunker Hill was a favorite initial point on account of its nearness to the "Paradise" valley, and McFadden's wheelbarrow trail, which was still plainly visible, was taken for the wagon track of some preceding immigrant, which all persistently followed, and, naturally, too, only to be suddenly brought up all standing at some inaccessible bluff down which it was impossible to go.

Then nothing was left to do but retrace their steps to the main "divide," losing ten or twelve miles thereby. Thus a broad trail was made through the rough country, and considerable profanity was breathed on the pure atmosphere of the virgin prairie in that vicinity until the errors of the "old wheelbarrow trail" were corrected. It became a by word at last, when a man was lost and turned up after going miles out of his way, "Well, he has only been following Tom McFadden's wheelbarrow trail to the Saline."—Kansas City Star.

Mrs. Romero, wife of the Mexican minister at Washington, has had the back of her neck photographed.

How Canaries Build a Nest.

Many of us some time in our lives have taken an old bird's nest in our hands and admired the wonderful structure, the neatness and care with which the inside has been finished, whether it be the nest of a thrush, so carefully lined with manure and smoothed off with the art of a well taught modeler, or maybe the lovely lining which we find in a robin's nest or some of the finches. But we have few actual chances of seeing these miniature homes put together, unless they are built in captivity, under which circumstances the art of nest building becomes most interesting to a careful watcher.

Let us take, for instance, canaries. A pair of these birds in their second season's building—by which time they have perfected thoroughly the art, supposing they are supplied with a suitable box and materials for the purpose—commence first of all by filling the box with the rougher pieces of moss, after which the hen hops into the middle of it, and sitting down begins to turn round and round; by this process the inside of the nest is formed. If they find it not full enough, more moss is brought and the process repeated until it is to the satisfaction of the hen.

After this the delicate part of lining the nest is commenced, the hen sitting in the nest while the cock supplies her with hair, which he first prepares in the following manner: After picking up a small bunch of hair, which he holds across the middle, he flies upon the perch and knocks it from side to side against the perch, to shake all loose pieces out; after which he holds the wisp or bunch of hair on the perch with his foot, at the same time drawing his beak up it with a twisting motion.

This is repeated until it becomes somewhat woven together, and is then presented to the hen, which she carefully takes and places in the moss, one piece after another, until a smooth lining is the result. At this point she allows her husband to enter the nest, which they keep doing in turns, with a great deal of excitement and soft twittering, continually turning round and round to finish it off in a workmanlike manner.—Chambers' Journal.

The Colors of Letters.

In my youth I always associated the idea of color with the letters of the alphabet. In later years the discovery that other people recognized no such coloration came to me as a surprise. The letter R, for example, always calls up the idea of greenness. It is impossible for me to think of R without the thought that it is green. In like manner S is yellow and X scarlet. The coloration does not seem to lie in the letter itself, as printed or written, but to coexist with the conception which the letter represents.

As the letter R comes into my mind, it seems to go, with grass and leaves, into the category of green things. The sound has nothing to do with its apparent coloration, for C soft and C hard are recognized as the same letter and therefore colored alike. The coloration is not affected by the character of the type. It is in the letter itself, regardless of the way in which it may be printed, or of whether it is printed or written at all. The idea has no connection with the lettering in any colored picture books, nor does it arise from any association of that sort.

Words seem to me also more or less definitely colored, but the association of coloration with me arises solely from the letters of which the words are composed. The dominant letters, especially the initial letter, or the letters most conspicuous in pronunciation, give color to the word. Thus Rosalind, though containing but two green letters, has a dominant shade of green, as salvia or silica have of yellow. A pleasing variety in the colors of the letters tends to render a word attractive. Thus the words Vernon Severn and Exeter, with contrasted colors, are more attractive than such words as Patton, Hammond or Armenia, in which the colors are few or not contrasted.—President David Starr Jordan in Popular Science Monthly.

Dividing a Long Sermon.

Dr. Samuel Buell, of the last half of the last century, who used to preach two or three hours, like Isaac Barrows, was ingenious in detaining his congregation. On one occasion, after preaching nearly two hours—as long as he could feel secure in the presence of all his hearers—he remarked that he was done preaching to sinners, and that they were at liberty to go. The rest of his discourse would be addressed to good people.

A gentleman who once went to hear him stated that when the hourglass was nearly ready to be turned a second time from the commencement of his sermon he said, much to the relief of the person who related it, "Once more." After going on some eight or ten minutes longer he said, "To conclude," and after another about equal interval he said, "Lastly." The gentleman added that he expected every moment to hear him say, "Everlastingly."—St. Louis Globe-Democrat.

Popping a Question.

"Can you cook?" he asked tenderly, after he had suggested the probability that he would marry soon.

"No," she answered, removing her chair a degree or two north of his, "I neither cook nor am given in cooking. You will find what you need at the intelligence office."

And he went his way quickly, a wiser and a madder man.—Detroit Free Press.

A Simple Sewing Machine.

A sewing machine by a Welshman has no shuttle or bobbin. The thread is supplied directly from two ordinary spools, and sews through the assistance of a rotary looper. It is vastly more simple than any other sewing machine.—New York Telegram.

M. Mascart, one of the most eminent French electricians of the time, says that the use of the magnetic needle in tracing the underground geology, or, in other words, the past geography of a country, is one of those triumphs of science which are almost tantamount to divination.

GREEDY FOR GOLD.

Tragic End of an American Swindler's Career.

HIS SUICIDE IN A LOW LODGING HOUSE.

He Liked to "Live Easy" and Failed.—The Sale of a Republic.

George F. Parker, native of America, "chevalier of industry" and the champion all round swindler of his day, is dead. He "turned the box," declared the bank broken and put out the light of life in a London lodging house the other night. To drop the phrase of the gambler and state things plainly, he committed suicide. Luck

GEORGE F. PARKER.

seemed "dead against him," and he "quit the game" without a sigh, a protest or a complaint, save to a dissolute woman who left him when his funds gave out and queened it with the scoundrels of Paris, while Gentleman George starved in the big city across the channel.

Gentleman George? Yes, that was his title among the people who lived as he did—by their wits and without work. Outwardly he showed the polish of the Nineteenth century carpet knight. Physically he is spoken of by those who knew him as the "most grandly handsome fellow who ever walked Broadway." Mentally he was so superbly equipped that he could cope on any subject with a specialist in the range from Greek to garden culture, and morally he was as brilliant and as bad as an apple of Sodom.

He was a desperate faro player, and like that other famous confidence man, Canada Bill, lost all his illgotten gains in futile attempts to "break the bank." He gained his chief prominence in the criminal circles of New York four years ago. Before that time he had done nothing of moment, but in 1887, as the originator, manager and sole proprietor of the British American Claim agency, he swindled 50,000 people, who were persuaded to believe that they were heirs to English or Scotch estates.

After Parker had amassed nearly a million the police arrested him, but they could prove nothing, the jury was ordered to acquit and the man went free. He journeyed to London, lost his money on "the high card," was abandoned by his female friend and ended with a sensational suicide a sensational life. Wavy white hair covered his massive head and, with a coal black mustache, set off his aristocratic features and rosy complexion.

George F. Parker and Don Gil Areny never knew and never heard of each other, but it is probable that they might have done well as partners, for one was and the other is dominated by an unscrupulous greed for gold. The American sacrificed those who might have otherwise been his best friends in order to make an extra dollar. Don Gil, who is chief syndic of the republic of Andorra, has gone much further—he has sold out his country for a bag full of yellow metal, and will look on complacently while its stern virtues, molded in the adversities of a thousand years, give way before the demon blandishments of dishonest avarice. To state it briefly, Andorra is to become the plague spot of Europe.

DON GIL ARENY.

Years ago the Germans drove the Blanc gang of gamblers from Homburg and Baden-Baden. They found a resting place under protection of the prince of Monaco, and made the name of Monte Carlo notorious throughout the world. The present ruler of the pretty rock by the sea has given them notice to quit. They have "satisfied" Don Gil, and soon will perch with the other vultures on the heights of the Pyrenees.

The gamester Parker has to answer for crimes against individuals, and, in committing suicide, against himself. The Syndic Areny has morally slain a petty but ancient and honorable republic that he might add to the scant income of a mountain magistrate.

In each raged the greed for gold, but which has worked the greater harm?

F. X. WHITE.

A Hint to Parents.

It is a common occurrence for children to get beans, grains of corn and other foreign substances up their noses. This simple remedy is worth remembering: Get the child to open its mouth, apply your mouth over it and blow hard. The offending substance will be expelled from its mouth.—Herald of Health.

Put a teaspoonful of borax in your rinsing water; it will whiten the clothes, and also remove the yellow cast on garments that have been laid aside for two or three years.

Mme. Patti says: "I have dressed my hair the same way for ten years; not because the coiffure was the style, but because it is becoming to my style."

THE CONVERSION OF LONDON.

Effect on England's History of the Teachings of the Early Church.

London was converted in A. D. 604. The citizens relapsed, it is true, but they were again converted, and then, in sober earnest, put away their old gods, keeping only a few of the more favorite superstitions. Some of these remain still with us. They were so thoroughly converted that the city of London became a veritable mother of saints.

There was the venerable Erkenwald—saint and bishop—he who built Bishopsgate on the site of the old Roman gate; there was St. Ethelburga, the wife of Sebert, the first Christian king—her church still stands, close beside the site of the old gate; there was St. Osyth—queen and martyr—the mother of King Offa—her name also survives in Size, or St. Osyth's lane, but the church of St. Osyth was rededicated to St. Ben'et Sherehog—Benedict Skin-the-Pig—you may see the little old churchyard still, black and grimy, surrounded on three sides by tall houses.

English piety loved to dedicate churches to English saints—more likely these than Italian or French to look after the national interests. Thus there were in London churches dedicated to St. Dunstan, St. Swithin, St. Botolph (whose affection for the citizens was so well known that it was recognized by four churches), St. Edmund the Martyr, and later on, when the Danes got their turn, churches to St. Olaf and St. Magnus.

The Englishman, thus converted, was received into the company of civilized nations. Scholars came across the Channel to teach him Latin, monks came to teach him the life of self sacrifice, obedience, submission and abstinence. The monastery reared its humble walls everywhere—the first foundation of the first Bishop of London was a monastery. In time of war the monasteries were spared. Therefore the people settled around them and enjoyed their protection. The monastery towns grew rapidly and prospered. New arts were introduced and taught by the monks; new ideas sprang up among the people; new wants were created. Moreover, intercourse began with other nations; the ecclesiastic who journeyed to Rome took with him a goodly troop of priests, monks and laymen; they saw strange lands and observed strange customs.—Walter Besant in Harper's.

The Orange Industry in Paraguay.

The orange tree is generally understood to have been introduced into Paraguay by the Jesuits and the seeds distributed by the birds. However this may be, the orange has spread all over the country, from the river banks to the tops of the hills, and from the cottages even to the deepest solitudes of the virgin forest. Paraguay is the land of orange trees more truly than the country of Mignon. And what oranges! Juicy, perfumed and of a delicacy that Spain and Italy have never attained. The chief industry consists in the exportation of the fruit.

The great orange season is from May to August, when the ports of the Paraguay river, from Humaita to Asuncion, dispatch enormous quantities by steamers and schooners. Villeta, San Lorenzo and San Antonio are the principal ports, and there best may be seen the picturesque processions of laughing and screaming girls and women, who carry basket after basket of fruit on their heads from the shore to the ship, like a swarm of busy ants. Up to the present no industrial use has been made of the orange. Some sixty millions are exported annually, the same quantity is consumed by the natives, and perhaps treble that quantity is devoured by monkeys and birds, or left to rot on the ground.—Theodore Child in Harper's.

Where Horse Meat Soup Is Popular.

Every day, at early morning, noon and evening, in Paris, you will see poor people gathering at certain shabby cookshops in the quarters of Belleville, Montmartre, the Batignolles and others of the sections outside the boulevards, where poverty houses are thickest, each armed with a tin pail, a pitcher or something else calculated to carry liquid.

These receptacles are duly filled with thin but savory broth, ladeled from huge, steaming caldrons, and which costs only a cent or two a quart. I have drunk this bouillon and found it nourishing and good. It is made of the bones and scraps of horse meat after the choicer pieces are sold to the cheap restaurants, and the very essence and marrow of the meat are in it, for the boiling is kept up until the bones are fairly honeycombed and the meat reduced to shreds like bits of twine.

This broth provides the principal animal nourishment for the average laborer in the gay city. He adds to it a few vegetables, thickens it with bread, and it having, as the cook book might say, been "seasoned to taste," makes a palatable and hearty meal.—Alfred Trumble in New York Epoch.

Manuscripts Ahead.

Some of the larger magazines keep MSS. for years unpublished, their stock on hand is so great. This is not so hard upon the young author when they pay upon acceptance, but sometimes it inflicts great hardship upon the struggling author when he has to wait for his pay until his story is published. One of the editorial staff of The Youth's Companion told me not long since that they had over $100,000 worth of MSS. in their safe, all accepted and paid for, and it was a question if some of it could ever be published.—Emily A. Thackray in New York Epoch.

While the Jury Was Out.

Prisoner (thinking of the date)—This is the 13th. That means bad luck for me.

His Attorney (thinking of the jury)—My friend, the unlucky number for you, I am afraid, is twelve.—Chicago Tribune.

Her Appearance.

Bingo—Things have gone so with me lately that I have had to compel my wife to make her own dresses.

Kingley—Too bad. How does she look?

Bingo—Daggers.—Cloak Review.

GAMBLER KNOX HAD SAND.

His Fight With a Bad Band of Apaches.

A DESPERATE AND UNEQUAL BATTLE.

Defending his Wife and Baby.—The Indian's Tribute.

We were sitting one night at a freighter's camp fire, around which were drawn half a score or more of the freighters, who, with their outfits, were in camp for the night. Stories of old times when the Indians were bad, and of the bravery of the white pioneers, had gone around the circle until it came to old man Wilson's turn, who said:

Talk about sand in a man! I tell you it takes sand in a man to try and stand off single handed forty or fifty Apaches when he knows just how the scrap will end, and that the end will be his own death; but that was just the kind of sand that was in Felix Knox when he was killed by the Apaches. You see, Knox was an all around gambler, such as the tenderfoot from the east scorn so much and know so little about, but he had a heart in him bigger than any tenderfoot's head.

Well, it was in the spring of 1882. Knox, with his wife and baby and a Mexican driver, were coming from Silver City to Clifton. They got to York's ranch, which is on the Gila river, about thirty miles from Clifton, all right, but were told there that signs of Apaches had been seen, and that they had better go in camp there for a few days, but Knox—who had fought the Apaches dozens of times and didn't know what fear was—said he wanted to make Clifton that day.

They drove on, and were about two miles from York's ranch when Knox saw an Indian come from behind a low, round topped hill, and feeling assured there were more of them, and that it was a fight to the death, he filled his pocket with cartridges, kissed his little sleeping girl baby and his wife for the last time, and, with a 'goodby' to them, he jumped from the wagon and quickly turned the team, and told the Mexican driver to whip them back to the ranch, and that he would stand the Apaches off.

As the wagon turned and was furiously driven away the Apaches, who now came in sight, fired a volley, but killed no one. Then Knox faced his foes and pumped the lead from his Winchester into them. The Indians gradually circled around Knox and the end came. The Mexican driver lashed his team back to the ranch, where both of the horses fell dead from wounds received from the Indians' first volley.

A party, after a little delay, was made up and returned to the place where the fight took place, and there they found Knox's body, and the Indians, contrary to their usual custom, had not mutilated it in the least, but had taken a clean pocket handkerchief from Knox's pocket and carefully spread it over his face, and had fastened it there by putting a small stone on each corner of it to hold it in its place and keep the sun from the dead man's face. That was their tribute to the sand in Knox. Seventy empty shells were found that had been emptied from Knox's Winchester, and one of the raiding Indians afterward said their party numbered forty-two, and that Knox had killed seven of them.—Arizona Republican.

The Size of Hats.

Said a dealer in gents' furnishing goods: "Men's heads, or at least their hats, are growing smaller. I have noticed it year by year in my business, and where a 7 1-2 or 7 3-4 hat formerly was not a miracle, today the average hat is a 7, and it is seldom we have a call for a 7 1-4. However, there is a reason for this. Besides the custom of wearing the hat perched on the corner of the ear, it must also be admitted that almost all of the men wear their hair closely cropped nowadays, and this makes a great difference. I don't believe people's heads are growing smaller.

"In olden times the men generally wore long, bushy hair, and drew their hats down so that they always left a mark on the locks. Another thing worthy of notice is that hats of English make always run in larger size than American hats. A 6 3-4 hat of English make equals a 6 7-8 hat of American make. You can generally tell an English hat by the coat-of-arms in the crown."—Bay City Tribune.

Distasteful Vanity.

Auerbach, the German novelist, had a great appreciation of his own powers and work, and many stories are told of the obtrusive way in which he displayed his vanity. A German writer says of him:

Every year Auerbach visits three or four fashionable watering places, at each of which the following episode occurs at least thirty times. The novelist indulges in small talk with the little children of the natives, and invariably ends the conversation thus: "Knowest thou who has been talking with thee? Berthold Auerbach! Tell that at home!"

Wizzle's Great Head.

"Our young friend, Wizzle, must be improving rapidly. He tells me he has many compliments passed on his poetry nowadays."

"Yes, Wizzle has taught his parrot to cry, 'how beautiful!' 'what feeling!' and so on, every time he reads one of his poems aloud."—Munsey's Weekly.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.

FRIDAY, JANUARY 8 1892

The Hon. Joseph Benson Foraker must be a thorn in the sides of both Harrison and Sherman. He has an uncommonly frank way of speaking his mind. He has a notion that the President should not meddle in Ohio politics, and there are a great many who think precisely as Mr. Foraker does on this head. It is hard to make a Republican President understand that the masses resent federal interferance in the affairs of the States. The experiences of John Folger, under President Arthur, and of Jacob Sloat Fassett under Gen. Harrison, ought to have given the Washington authorities a very impressive object lesson, but they have failed of their efficacy. John Sherman, in his political operations, has always relied largely upon the co-operation of the federal office-holders, but this year he may slip up on that recourse. There was once an old Democratic cry of rotation in office which fits the case of Sherman exceedingly well. He has held public station long beyond the lifetime of an ordinary man, and many even of his fellow-Republicans believe that it is high time that he should be made to let go and give somebody else a show.

President Harrison, in his message to Congress, calls attention to the method of selecting Presidential Electors in Michigan, which is to let each Congressional district elect one and the State elect two at large. The President objects to this because it would afford another incentive to gerrymandering. The President is right as to the evils of gerrymandering, but the Michigan plan comes nearer the people—it is a minority representation without at all disturbing the integrity of the State. Gerrymandering ought to be prohibited in some way even if no change of the sort is made. It is an evil that ought to find a remedy somewhere. The greater the distribution of power, however, the greater the security of the people. As it is now pivotal States receive an undue amount of prestige and power. Under the Michigan plan the States would be more equal, and there would be so many close districts that it would be hard to manage all with money, as pivotal States are now managed. If it were required to make Congressional districts as nearly square as county boundaries would permit the evils of the gerrymander would be reduced to a minimum. Such a law should pass Congress and then all the States adopt the Michigan plan.

If John James Ingalls delivers any more public addresses between this and the time that the vacancy in the Senate occasioned by the death of Preston B. Plumb shall be filled, he will probably speak of himself as "a statesman hunting a job" instead of announcing that he is "a statesman out of a job." Ingalls wants to wear Plumbs shoes the worst way, but it is doubtful whether Governor Humphry will give them to him. Ingalls was one of the chief causes that lead to the Farmers' Alliance victory in Kansas last November a year ago, and it may be thought not to be good policy to create an occasion for another revolt. However, Ingalls is a man of many resources, and it should surprise no one if he should appear in his old place in the Senate.

Isador Jacobs, President of the A. Lusk canning company, which is now under a financial cloud, has been stating the reasons for the failure of the concern. Among other causes for the disaster, Mr. Jacobs states that fruit cans were very high and the concern started the Automatic Can company. How is that? We remember to have seen it distinctly stated in high tax newspapers that fruit cans were being manufactured from American tin plate at lower prices than were ever known before. Whom are we going to take as authority—the high tax papers, or Mr. Jacobs, a man who is acquainted with the actual facts?

The flour sent to famishing Russians clung to the official fingers long enough in that inhospitable country to be so adulterated that when it reached the famine stricken it was wholly unfit for use. Has the Czar no corner in remotest Siberia for the rascally fellows who thus fattened their purses upon the blood of the poor?

British barmaids have proved a failure in New York, even where so many American youths pose as nickel-plated Englishmen. The fact is that the American patron of a barroom is too much of a gentleman to enjoy being waited on by a woman.

Coolness in a Mixed College.

There is a coolness between the boys and the girls of the Stanford university. It all came about from a question of propriety. The boys gave a ball in their dormitory hall on Monday night, to which they invited all the girl students, as well as the professors. Elaborate preparations were made, and the young men anticipated an evening of enjoyment. They hired a band, and had the dormitory beautifully decorated.

One or two of the more modest and retiring of the maidens in the girls' dormitory were shocked at the avowed intention of some of the girls to attend the ball, and called a meeting of the girls, at which there was a long discussion of the affair.

Many of the fair students said they could see no harm in going to the ball as long as the professors were willing, but the more prudish damsels read a strong lecture on the evils of such doings, and, on a vote, there was a majority in favor of not attending the ball. So none of them went.

The boys waited long for the coming of the fair ones, but they came not. At first the collegians were very angry. Then they took the dancing floor themselves and made a "stag" party of it. They say, however, that for future festivities they will send no invitations to the girl students. This suits the ultra-modest among the latter, but the sociable girls feel crushed.—San Francisco Chronicle.

A Tremendous Barley Farm.

"We have now secured 250,000 acres of land in North Dakota for barley farms, and next spring we will send thousands of German emigrants to that state from Ohio, West Virginia and Indiana," said Colonel O. M. Towner as he discussed the future of this great northern state. Colonel Towner is manager of what is best known as the Barley syndicate of Chicago. During the last two or three months the company has succeeded in securing 250,000 acres of land in North Dakota, on which it is proposed to place German farmers to raise barley for malt purposes. These lands have been purchased in Nelson, Norman, Towner, Ramsey, Steele and Bottineau counties.

It is the opinion of the managers of this company that barley can be most successfully grown in that state, and they have the conviction of their belief sufficiently to purchase these lands and to send out emigrants from other states. The Germans are chosen on account of their knowledge of barley culture for this purpose. These emigrants will not be tenants, but owners of the land, it being sold to them on easy terms. The crops will be bought by the company and shipped to all points where there is a demand for barley.—St. Paul Pioneer Press.

To Celebrate the Marseillaise.

Another effort is being made by the inhabitants of Choisy-le-Roi, outside of Paris, to observe with much solemnity and ceremonial what is vaguely called the "Centenary of the Marseillaise." Choisy-le-Roi claims to possess the dust of Rouget de l'Isle—the composer of the hymn—who was buried there in 1836, his birthplace being Lons-le-Saulnier, in the department of the Jura. On this account the members of the borough council consider that they have the right to take the initiative in organizing a Right Republican festival this year, as the Marseillase, under the title of "Chant de Guerre de l'Armee du Rhin," was first heard in 1792.

President Carnot is to be asked to become honorary president of the committee of the fete, and appeals for funds will be made to all the cities, and also to communes which possess more than 4,000 inhabitants. No date as yet has been fixed for the celebration of the centenary, to which it is presumed that every patriotic Frenchman will give his sentimental and sympathetic—if not practical and pecuniary—support.—Paris Cor. London Telegraph

A Much Traveled Volume.

In opening a package of books wrapped in tin, the custom house inspectors cut with a knife the binding, by Ruban, of a "Poor Richard Almanack." The importer made no claim for damage from the government, paid the duty, returned the book to Paris to be rebound and wrote an ode to Diana of Poitiers, goddess of book lovers, in gratitude for the miraculous escape of the text of his Almanack. The book, rebound, came back fifteen days ago. The owner supposes that it is intact, but he does not know, and he cannot learn even by paying the duty again, for the official wants a new invoice, and the importer is naive enough to think that he can persuade the official that the first invoice, which is filed at the custom house, accurately describes the book on its fourth voyage across the Atlantic.—New York Times.

A Russo-Chinese Railway.

A Russo-Chinese railway is reported as the objective point of negotiations now going on between Russian and Chinese representatives. Russia wants the right to build a railway from Vladivostock, the Pacific terminal of the proposed Siberian railway, across the northern boundary of Corea to Tien-Tsin, and thence to Shanghai. The alleged object is quick transit of Chinese tea and silk to Europe. The Chinese, however, are very jealous of Russian influence in the east, and will probably decline Russian aid in railway building.—Engineering News.

Dr. John Piente, the amateur telescope maker, is now finishing a 30½ inch silver on glass mirror for Alleghany college, which, when mounted, will give that institution the largest reflecting telescope in this country.

An immense flume is being constructed near Fresno, Cal., which will not only furnish water for irrigating purposes, but will be used to transport lumber needed by farmers living near by.

It is believed that a well planned system for improving the breeds of cattle, horses and hogs throughout all Canada will be soon taken in hand by the administration. This would add greatly to the value of the permanent "living plant" of the people and to "practical politics" in the best sense.

A trained bat belonging to William Hester, of Spring Hill, Pa., conveys messages like a carrier pigeon. Its speed is very great—more than two miles a minute. It recently flew a mile in 27½ seconds.

Recent experiments in Queensland have shown that mother-of-pearl shells can be made to produce pearls artificially.

Saw a Dog Headed Serpent.

For over a year there have been rumors regarding the existence of a large serpent at Lake Kenosha, three miles west of Danbury, but every one who heard the story received it with incredulity. But the rumor grew in spite of skepticism, and the thoughtless were forced finally to admit that perhaps there was something in it.

Friday Edward M. Baldwin and George Downs were fishing in the lake. Both are elderly business men and opposed to notoriety in every way. They were engaged in hauling in fish, when suddenly to the west of them a huge head poked itself out of the water and contemplated the fishermen. This was thirty feet away from their boat. One of the men said it was not unlike the head of a pug dog, but dark brown or black in color. Both the fishermen lost interest in their fishing and fastened their attention on the serpent.

After viewing the fishermen for a few minutes the serpent moved toward them some ten feet, and his entire body was seen on the surface of the water. It was from fifteen to twenty feet long and moved slowly and easily, in the manner of a huge snake. It took a second view of the fishermen for a few seconds and then dived.

The sight unnerved the fishermen at first, but they resolved to get a nearer look. They saw the serpent perhaps half a dozen times, but were unable to secure a closer inspection of it.

The story has been corroborated with more particulars by John Clark, a hotel proprietor, Theodore Clark, the big box manufacturer, and many others who have seen the serpent. These men say the serpent is as thick as a dog's body.—Cor. Hartford Courant.

Game Galore in Maine.

Moose are so very plentiful in northern Maine that, as a sportsman can legally kill but one in a season, it is something of a disappointment to throw away the only chance on an undersized or lean animal, or one with poor antlers. The boss hunter of Medway, Lleweilyn Powers, is a man who wastes no powder on inferior game, and when he started out after his annual moose the other day he was determined to get a good one. He rolled his old slouch hat into a horn and called a moose to the water at Pockwockamos lake, but the bull did not suit, being too lean and carrying small antlers.

Another and another came in response of the hunter's call, and finally the ideal monarch of the woods appeared. This bull fell before Powers' rifle. He weighed over a thousand pounds and carried a perfect set of antlers that spread five feet. No fault can be found with a hunting ground which affords such opportunities as this for taking one's pick of big game. Almost anybody can get a moose in the upper Penobscot region. The other day a twelve-year-old boy named Hathaway went into the woods alone, called a big moose and dropped him at the first shot. Louisville Courier Journal.

Mining Dividends.

The dividends paid by mining companies of this country which report their earnings amounted to $1,421,875 during October. The total for the first ten months of the year is $14,095,990, an amount largely in excess of that paid in the same period of 1890.—Engineering and Mining Journal.

A Bright Idea.

A Kansas man gave his gates a liberal coat of white paint on All Halloween. Next morning he counted fifteen boys with a picket fence outlined on their backs.—Detroit Free Press.

It is pretty hard to be told at the beginning of a long, cold winter that gold table services are coming in. It was hoped that they had gone out to stay.

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,

C. MULHOLLAND,
Independence.

COURT NOTES.

Geo. M. Gill, Superior Judge.

TUESDAY, January 4 1892.

People vs. John Clarke—Filed bail bond.

People vs. Val. Sherman—Filed bail bond.

P. Reddy vs. Joseph Watterson et al—Filed objection and ruling and stipulation.

Ibid—Filed stipulation.

Estate of J. C. Eldy, deceased—Filed order of notice to creditors.

Johnson vs. Mairs—Filed bill and items of account.

THURSDAY, January 7, 1892.

P. Reddy vs. W. K. Miller—Filed complaint and issued summons.

Estate of John R. Hughes, deceased—Filed decree settling final account and distribution.

MARRIED.

McNETT—BOGART At Independence, Jan. 7, 1892, by Rev. H. J. Winsor, David A. McNett of Columbus, Esmeralda Co., Nev., and Miss Maud Bogart of Big Pine.

DIED.

SPENCER—At Bishop, Jan. 3, 1892, Alexander Spencer, a native of New York, aged 74 years.

Jack Wilson was in town several days this week.

D. Olds of Round Valley was in town on Wednesday.

Mrs. Elena McCord came up from Mojave on Thursday's train.

Jas. Peregrine was down from Round Valley during the week.

James Jones of Fish Springs was in Independence yesterday.

Geo. L. Drake came down from Bishop on Wednesday's train.

Jake Miller went to Bishop on Tuesday's train to take in the foot-race

John Clark came down from Bishop on Wednesday, returning next day.

Jack Welsh and Arlie Mairs returned early in the week from a trip to Saline Valley.

The Board of Supervisors was occupied most of the time yesterday on license ordinances for the coming year.

Hon. P. Reddy came in from Darwin on Tuesday's train, and went on to San Francisco yesterday morning.

Wells Barnes came in from the White Hills on Tuesday, where he had been prospecting for several weeks.

Rev. W. W. Kendall came down from Bishop on Monday last and has been holding religious meetings every evening since then.

John Clarke has retained Hon. P. Reddy, S. G. Sneden Esq., and P. H. Mack Esq., to defend him on his approaching trial on the 28th inst.

George Lewis came in from Darwin where he has been for some time past, early in the week. He is on the sick list, old father grip having had a grab at him.

W. L. Hunter started for Ventura county last Sunday via Mojave. He goes on business connected with the Hannah estate, and is expected to return two weeks hence.

W. B. Waterman of San Jose came up from Darwin on Tuesday's train. He spent several days in town on business connected with the estated of J. C. Eldy, deceased.

It looks as if the cold snap was over. There has been no ice for a week past, and yesterday about noon a warm rain began falling. To-day the weather has cleared off delightfully.

Last Monday news was received at Independence of the death of A. Spencer at Bishop. He had lived at West Bishop for many years and was one of the solid men of Inyo county. The funeral took place on Monday.

The people of Lone Pine last Saturday voted in favor of issuing bonds to the amount of $7,000 for the purpose of building a new school house there. A fine building and grounds should be secured for this sum.

The personal effects belonging to the late J. C. Eldy were sold at Independence by the Public Administrator last Tuesday. His saddle-horse, "Darby," was bought by Frank Whitmore; H. Levy bought the gold watch and the saddle; a trunk of clothing was bid in for Mrs. Gall, and Watterman bought the partnership interest in the business at Darwin.

Our readers will notice the advertisements in these columns of Chamberlain & Co., Des Moines, Iowa. From personal experience we can say that Chamberlain's Cough Remedy has broken up bad colds for our children and we are acquainted with many mothers in Centerville who would not be without in the house for a good many times its cost and are recommending it every day.—*Centerville (SD.) Chronicle and Index.* 50 cent and $1 bottles for sale by

J D Blair, hospital physician	125 00
E H Blake, burying dead, $15 22	17 50
J W Tracey, Constable fees 96 50	72 10
J G W Birchim, interpreter, 10 80	9 00
Ben Webster, " 4 20	3 75
Indian Bill, " 10 60	7 50
H Levy, boarding prisoners	103 60
J E Dunlap, Justice fees	45 00
A W Eibeshutz, mdse	180 25

Whereupon the Board adjourned until 9:30 o'clock a. m. of next day.

WEDNESDAY, January 6, 1892.

Board met at 9:30 o'clock a. m. pursuant to adjournment, same members present.

Minutes of preceding day read and approved.

Claim of A. L. Kinsley for hauling jail iron from Independence to bishop allowed, $5.

The Board proceeded to select from the assessment roll 100 persons to serve as trial jurors and 40 persons to serve as grand jurors for the ensuing year.

Reports of Road Overseers for districts Nos. 2, 3, 4, 5, 5½ and 6 were received and accepted.

The following claims were allowed and warrants ordered drawn.

W H Powers, Dist. No.	2	$ 57 00
M S McLeod "	3	155 20
J S McMurry "	4	19 00
John Keegan "	5	71 20
John Shepherd "	5½	33 50
G H Palmer "	6	37 55
W F Bennett "	7	82 00

The following claims were allowed on the Gen. Exp. Fund:

A L Kinsley, hauling iron	$ 5 00
J W Murphy, Constable fees	65 80
P W Forbes, sands	32 40
B H Yandell, taking testimony	30 60
A Carlisle & Co. $62 50 allowed	50 95

Bill of D J Hessian returned to be itemized.

Resignation of John Shepherd as Road Overseer for District No. 5½ accepted and petition to appoint Henry Glade as his successor granted.

Whereupon the Board adjourned until 9:30 a. m. of Thursday.

THURSDAY, January 7, 1891.

Board met at 9:30 o'clock a. m. same members present. Minutes of preceding day read and approved.

Claim of Geo. L. Drake for Constable fees considered and allowed in the sum of $286 40.

Claim of J. W. Murphy for iron work and repairs, $36.52, allowed $33.93.

Board adjourned until 1:30 o'clock p. m. at which hour it reconvened, same members present.

Resignation of W. O. Meroney as Justice of the Peace, First Township, was accepted.

Upon petition a new school district was formed embracing all the territory of Independence and Union districts lying east of Owens River.

Ordered that the old Great Register be cancelled and a re-registration of voters be effected.

Ordinances Nos. 33, 34 and 35, relative to road, poll and hospital taxes were re-enacted with slight changes.

Sheep license tax was fixed at the same rate as last year.

Ordered that the Clerk advertise for bids for hospital, boarding prisoners and county physician. Also to furnish the county with blanks, blank books and stationery supplies.

Ordered that proposals be advertised for to furnish 300 Great Registers.

Ordered that the Sheriff be empowered to make estimates and procure supplies for erecting a new chimney at the Court house.

Ordered that the Auditor draw his warrant for $8.00 in favor of Mrs. Keppler to pay for a cord of wood.

Ordered that the Sheriff cancel the entry on the assessment roll charging T. W. Richards with poll and hospital tax.

Auditor ordered to draw warrant on rebate fund for sundry differences in tax rates.

Board adjoured until 9:30 a. m. of next day.

No particulars have yet been received regarding the Ober—Womack foot-race. The affair was to have come off on Monday but was postponed because of the death of A. Spencer until next day. On Tuesday the track was not in condition and another postponement was made till Wednesday. On the evening of that day a telegram was received as follows: "Everything a fight. Ober ran, the other did not." It was reported that Womack has left the country. A large amount in cash and stock had been wagered on the result.

Meteorological Summary.

Following is the report of the Weather Bureau Station at Keeler for the month of December, 1891.

Number of cloudless days	1
Partly cloudy days	7
Cloudy days	1

H. E. WILKINSON,
Weather Bureau, Observer.

"Of course it hurts, but you must grin and bear it," is the old time consolation given to people troubled with rheumatism. "If you will take the trouble to dampen a piece of flannel with Chamberlain's Pain Balm and bind it over the seat of pain your rheumatism will disappear," is the modern and much more satisfactory advice. 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

We want every mother to know that croup can be prevented. True croup never appears without a warning. The first symptom is hoarseness; then the child appears to have taken a cold, or a cold may have accompanied the hoarseness from the start. After that a peculiar rough cough is developed, which is followed by the croup. The time to act is when the child first becomes hoarse; a few doses of Chamberlain's Cough Remedy will prevent the attack. Even after a rough cough has appeared the disease may be prevented by using this remedy as directed. It has never been known to fail. 50 cent and $1 bottles for sale by

ORDER FIXING TIME AND PLACE FOR HEARING PETITION FOR SALE OF PERSONAL PROPERTY AND REAL ESTATE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the estate of Francisco Paderes deceased.

IT APPEARING TO THE JUDGE OF SAID Court, by the petition in this day presented and filed by Ygnacia Abechuco, the Administratrix of the Estate of Francisco Paderes, deceased, praying for an order of sale of the personal property and real estate of said estate, that it is necessary to sell the said personal property, and the whole of the real estate, or a portion of it, to pay the debts outstanding against the deceased, and the debts, expenses and charges of administration.

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased, appear before the said Superior Court on Saturday, the 9th day of January, 1892 at eleven o'clock in the forenoon of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, in said county, to show cause why an order should not be granted to the said Administratrix to sell the personal property and the whole or so much of the real estate of said deceased as shall be necessary; and that a copy of this order be published at least four successive weeks in the INYO INDEPENDENT, a newspaper printed and published in said county.

Dated December 11th, 1891.

GEO. M. GILL,
Judge of the Superior Court.

[ENDORSED.]

ASSESSMENT NOTICE.

INYO MARBLE COMPANY.

Location of principal place of business, San Francisco, California. Location of works, Inyo, Inyo county, Cal.

Notice is hereby given that at a meeting of a Board of Directors, held on the 19th day of Nov., 1891, an assessment (No. 14) of Ten (10) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary at No. 1 Montgomery street, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 6th day of January 1892, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Tuesday, the 29th day of January, 1892 to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.

G. W. LUCE, Secretary.

Office, No. 1 Montgomery street, San Francisco, California.

A BIG BUSINESS.

The growth and present size of the great retail business of Weinstock, Lubin, & Co., Sacramento, shows on the face that it possesses *a distinct character* of its own. It has done much to introduce many important reforms in storekeeping, which have been widely copied. There are people who have never heard of the big establishment, but who, through its silent influence, are being served by local dealers better than they otherwise would be.

It has done more than any other ten stores to give the "One Price System" firm and substantial footing on the Pacific Coast.

It has shown people living in small towns that they can deal through the mails with as much security as if they bought in person.

It has, by constantly raising its own standard of qualities, had an influence in raising the standard everywhere. The average grade of goods kept upon the Coast grows better each year.

It has been prominent in bringing west as stylish and desirable goods as are kept by merchants in New York, Philadelphia, or Chicago. Indeed, the manufacturers who supply them supply it. The goods are the same; and the Sacramento prices, while never higher, are sometimes considerably less. This is explained by the fact that the cost of conducting business in large Eastern cities is far greater than in the Capital City, the extra expense of overland freight being but a comparatively small item.

It has made it possible for out-of-town people to enjoy quite as satisfactory shopping facilities as do those living in large cities.

There is no desire on the part of the firm to take any special credit for whatever influence for good the house may have exerted. They have sought simply to build up a business on fair and just principles; to buy and sell as low as they can; to deal as far as possible only in the very best goods; and neither to fear nor favor any one, but to treat every customer as they would their most favored friend.

Whatever of success has come, they attribute it to the faithful carrying out of these aims and principles.

A large illustrated catalogue, giving full information about goods and prices, how to order, etc., sent free to any address.

Hot Griddle Cakes.

Dr. Price's Cream Baking Powder possesses a peculiar merit not approached by that of any other baking powder. It produces the hot buckwheat, Indian or wheat cakes, hot biscuit, doughnuts, waffles or muffins. Any of these tasteful things may be eaten when hot with impunity by persons of the most delicate digestive organs. Dr. Price's Cream Baking Powder leavens without firmentation or decomposition. In its preparation none but the purest of cream of tartar, soda, etc. is used, and in such exact equivalents as to always guarantee a perfectly neutral result, thereby giving the natural and sweet flavor peculiar to buckwheat and other flour that may be used, the natural flavor so much desired and appreciated by all. The oldest patrons of Dr. Prices powder tell the story, that they can never get the same results from any other leavening agent, that their griddle cakes, biscuits, etc. are never so light and never taste so sweet or so good as when raised with Dr. Prices Cream Baking Powder.

"What killed your goat—circus posters?" "Oh, no. He fattened on circus posters. It was a package of cigarette papers killed Marmaduke."

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted. .....

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

If you care to enjoy the latter half of life take good care of the first half.

Use Enamelline Stove Polish; no dust, no smell.

THE REASON.

"Tis not because she's fair,
Though she is very fair;
Nor though her smile is rare,
And bright her word and act,
And all her gowns have air;
Neither because she puts, forsooth,
Into her sketches dash and truth;
Nor just because of tact,

That she hath been to me
Hope, joy and melody.
But 'tis, you see, because—
She is—I'll whisper low.
Why is it? Here I pause.
I could not tell you if I would.
I would not tell though I could.
So you can never know.

—Catharine W. Fowler in Brooklyn Eagle.

CURING A CRANK.

"I am a miserable man," said Mr. Cyrus Maddox gloomily, "and it is best that the world should be rid of my presence. No one cares for me."

"Oh, don't say that, uncle," said Lizzie Silver beseechingly. "You know I love you. You are the only friend I have in the world, and if you were to die what would become of me?"

"I suppose young Guy Cheevers would console you for my loss," said Mr. Maddox grimly. "At any rate, I don't care. I will end my troubles and sorrow to-morrow at 12 m."

And with these fearful words he strode out of the room, leaving Lizzie sobbing, with her curly black head resting on a dinner plate.

"What's the matter now, Bess? Has the milliner disappointed you in your love of a bonnet?" asked a warm, hearty voice, which was the property of "young Guy Cheevers," as Mr. Maddox called him, as that gentleman strode into the room.

"Oh, Guy!" sobbed Lizzie. "Uncle Cyrus is going to die to-morrow at 12 o'clock."

"How do you know?" asked Guy.

"He said so."

"But how does he know?"

"He's going to kill himself."

"So as to make himself a true prophet, eh?" asked Guy laughingly.

"Oh, Guy, don't joke!" cried Lizzie tearfully. "He will—I know he will."

"I doubt it," said Guy skeptically.

"But he tried to commit suicide several times," persisted Lizzie fearfully. "Once he tried to smother himself with burning charcoal, but he forgot to stop up the keyhole, and I smelt the smoke and got some neighbors to break open the door and saved him. Then he tried to hang himself, but the cord broke; and he fired a pistol at himself, but he forgot to put any ball in it, so that failed; and then"——

"Gracious!" cried Guy, as Lizzie stopped for want of breath, "what a determined man he must be! Such perseverance deserves to be rewarded. Have you any idea what plan he will try now?"

"I'm sure I don't know," said Lizzie mournfully. "Something dreadful, I suppose."

"But what does he want to make away with himself for?" asked Guy wonderingly.

"Why, he says he is a miserable man, a burden to every one, and that life has no joys for him, and that he is weary of this world"——

"And so would like to try the next?" said Guy. "Perhaps he won't find it so pleasant as the one he is quitting. What an unreasonable man he must be! He is rich, talented, healthy, and has a very pretty niece"—and here in a moment of abstraction he allowed his arm to wander around Miss Silver's waist—"and what more can he want? But some people never are satisfied. It seems he is determined to pry into futurity, and it seems a pity to disappoint so laudable an ambition, but duty—duty to myself—compels me to interfere. I dislike any scandal or excitement. A coroner's jury would cause both, therefore we must balk his little game."

"But how?" asked Lizzie curiously.

"A prudent general," said Guy haughtily, "never confides his plans to his army, particularly when the army is of the feminine gender; so excuse me; mum's the word. But rest assured, my dearest Elizabeth, that unless your worthy uncle shuffles off this mortal coil in a surreptitious manner before 12 m. to-morrow he will not do it afterward—of course I mean illegally. Farewell till to-morrow."

Having concluded this address Guy strode off in a tragic manner, leaving Lizzie greatly surprised, but still quite reassured, for in her opinion what Guy couldn't do wasn't worth doing.

The next morning Mr. Maddox made his appearance very saturnine and gloomy, and ate his breakfast with a mournful air that was terribly impressive. Having finished, he then took leave of his niece in a feeling manner.

"I am about to leave you," said he mournfully. "I am about to end this life of misery. I hope that you may be happy."

"Oh, don't go!" said Lizzie, tearfully clinging to him, and looking into his face pleadingly.

"It's useless," said Mr. Maddox firmly. "My mind is fixed, and nothing you can do can persuade me to relinquish my purpose. But you, my dear child, shall not be unprovided for. I intend to make my will in the few hours that are left me, and you will not be forgotten. Good-by, my dear child, farewell!"—and then, after embracing his niece fervently, Mr. Maddox rushed from the room frantically and securely locked himself into his own room and began to prepare himself for his last journey.

"Nine o'clock!" he said to himself, looking at his watch. "Three hours yet! Enough to do all I have to do! First to make my will!"

The last will and testament of Mr. Cyrus Maddox was evidently not a long one, as it was finished in less than an hour.

"Eleven o'clock!" said Mr. Maddox, "and I have finished. How slow the time passes, to be sure! Now, what shall I do until 12 o'clock, for I am determined not to die until noon"——

A knock at the door.

"Go away!" cried Mr. Maddox angrily. "You can't come in."

"I am very sorry to disagree with you," said a voice outside the door, "but I can come in. I have a duplicate key here, and if you don't open the door I will."

Mr. Maddox rose and unlocked the door savagely, and Mr. Guy Cheevers stalked into the room, carrying an oblong box under his arm.

He placed the box on the table, and then took a seat opposite Mr. Maddox and stared blankly at him.

"What do you want?" asked Mr. Maddox fiercely. "Don't you see I am engaged?"

"Oh, I know," said Guy, "what you are about to do! Don't think that I am going to interfere—not at all. But before you make your quietus I wish to ask you a few questions. Have you provided for your niece's future welfare?"

"What's that to you?"

"Considerable. I am about to marry Miss Silver; so her interests are naturally mine."

"Then she is provided for—amply."

"Thank you for your information. Very glad to hear it. And now excuse the apparent impertinence of the question, but where is your will?"

"Here," said Mr. Maddox, laying his hand on it.

"Suppose you give it to me to take care of?"

"Give it you! Why, pray?"

"It might become misplaced," explained Guy.

"I'll keep it myself," said Mr Maddox roughly.

"Then just leave a memorandum on the table," said Guy earnestly, "to tell where it is. It will save trouble, perhaps."

"Get out!" cried Mr. Maddox angrily.

"Ah, I see!" said Mr. Cheevers coolly; "in a hurry to begin. Well, I won't detain you; but I have a little suggestion to offer."

"Well?" said Mr. Maddox impatiently.

"It is this," said Guy. "Miss Silver informs me that you have made several previous efforts to cut short your trouble and your breath, and always unsuccessfully. Now it seems to me you don't go the right way about it. This box," and here he opened the box before alluded to, contains several little plans that I think might please you. Here's one," and he showed a little steel instrument.

"What's that?" asked Mr. Maddox curiously.

"This," said Guy, "is an article that you can place round your neck like a collar, then, by striking your hand on the left side of your neck, a sharp spike is driven right into your jugular vein"——

"But that would kill me?" said Mr. Maddox, staring.

"Well, ain't that what you want?" demanded Guy sternly. "Now, here's another," he went on. "Here's a wheel, you observe; you place this band round your neck, pass it round the wheel and give it two or three turns—then let go. The recoil will twist your head almost off your shoulders—kill you to a certainty."

Mr. Maddox stared at him with unfeigned horror.

"Then," went on Guy coolly, "here's a little package, a torpedo. It contains nitro-glycerine. You place it in your mouth, snap your teeth on it, and off goes your head, smashed into millions of atoms."

"Good heavens!" exclaimed Mr. Maddox fearfully. "What a terrible idea!"

"Not at all," said Guy soothingly. "Beautiful invention—I quite pride myself on it—scientific suicide, you see! Anybody can take poison or blow their brains out, but to do it scientifically requires real talent. You have it, and I am confident that you will reflect credit on my inventive skill. Now," he continued confidently, "if you could use all three of these inventions at once—cut your jugular, garrote yourself and blow your head off, all at once—why, I'd thank you."

"What!" cried Mr. Maddox fiercely, "do you think I'm crazy? Do you think I'm going to use any of your infernal inventions? Get out of this room, you cold blooded villain, before I throw you out of the window!"

"But I have a great many more to show you," remonstrated Guy, "and you see I want you to try as many as possible. Well, well!" he added, as Mr. Maddox grasped the poker threateningly, "I'm going. But I'll leave this box here, and before you get rid of yourself just make a memorandum of what you will use and leave it on the table, because you know there will probably be nothing left of you to draw conclusions from, and so"——

Here any further speech was cut short by Mr. Maddox seizing his visitor and hustling him out into the passage.

"Well?" said Lizzie, anxiously, to Guy.

"I think it's all right," said Guy, grinning. "Get the lunch ready. Your uncle is all right. He'll be down."

And sure enough, so he was, and though he spoke not he ate most voraciously of everything.

"Lizzie," said he suddenly, after an hour's pause, "did you ever see an infernal old fool and an idiot?"

"Never that I know of," said Lizzie. "Why?"

"Because just look at me and you'll see one," said Mr. Maddox grimly, and he stalked upstairs.

Up to the present time of writing Mr. Cyrus Maddox is alive, enjoying remarkably good health, and he seems to be on friendly terms with Mr. Cheevers and his wife Lizzie. He probably forgave that gentleman on account of a discovery that he made that the nitro-glycerine torpedo contained nothing more dangerous than salt, and the other "infernal inventions" were infernal in about the same ratio, but Guy still maintains that when persons are weary of life they should end their troubles by scientific suicide.—Boston Globe.

In His Way.

"Oh, yes; Swift is a good fellow in his way."

"Indeed? What a pity! Blocks his own path, eh?"—New York Press.

What is Worsted?

A woolen yarn is soft and fluffy, while a worsted yarn is hard and firm, possessing a much greater tensile strength. In the woollen yarn the fibers are tangled and crossed, and drawing is avoided as much as possible in preparing the raw material for spinning, so as to leave the natural curvature of the fibers undisturbed and afford the greatest freedom of action to the felting and quality of the wool. In worsted yarns the object is to obliterate the felting quality and to secure elongation and parallel arrangement of the fibers.

In the early days of the manufacture the best results were only attainable in worsted yarns from long fibered fleece. The English wools are commonly called combing wools for this reason, and it was the possession of this fleece of an unrivaled quality which made England the birthplace of the worsted manufacture, and has kept it at the front in this process.

One of the results of improved machinery has been to remove any distinction between woolens and worsteds based upon the difference between the wools employed in the two processes. Short wool of merino blood can now be combed as successfully as the longer staple. The processes of treatment, however, continue to differ radically. This difference is primarily created by the introduction of the combing machine, an instrument unknown to the wool manufacture proper.—S. N. D. North in Popular Science Monthly.

Birds Are Like Human Beings.

Canaries, like human beings, vary very much in character, some cocks being so indifferent and idle that they will let the hen do all the work of building and rearing, while they themselves sit and plume their feathers. Others, again, are perfect gentlemen in their manners, waiting on the hen with a quiet courtesy, and seeing that all she requires is at once brought to her. Again, the hens vary in disposition, some hens behaving in a quiet, modest way, attending to their young ones with regularity, while others are in a constant state of chatter with their husbands, pecking and arguing with them every time they go near. Thus we see that these little birds have their tiffs and domestic quarrels, not unlike ourselves.—Chambers' Journal.

Vegetarians in History.

It is evident from Arrian and Porphyry that vegetarian orders of men were well known in their time, and that they were found in India in the time of Alexandria. They existed in different orders long before the time of Jesus in Egypt, Syria, etc., and were known by the names of Essenians, Essennees, Esyans, Coenobites and Faithists, etc., and those on Mount Carmel, of whom Elijah, the prophet, was the chief rabbi, described by Pliny, were known as Carmelites. Whatever the name the principles were all the same—all were vegetarian.

The Masonic order had its origin in these ancient brotherhoods without doubt. All the Masonic emblems of today were known to these brotherhoods, so also their passwords.—Dr. Tanner in Kansas City Times.

MADDENED BY HUNGER.

Parisian Mob Cries Out For Bread.

A howling, surging mob of gaunt and famine stricken Parisians rushed through the streets of Paris in the last quarter of the eighteenth century, hurling anathemas on the head of the Minister of Agricultural, and muttering curses on the aristocrats who whirled by in their gorgeous equipages. The corn supply had failed and the improvident Parisians, already ground to the earth by the oppressions of the nobility, were the first to suffer from the scarcity. They sent deputations to the king to pray for relief from the gnawing pangs of hunger. Trade was tottering and the prestine glory of France seemed likely to be overwhelmed on the rock toward which the corrupt nobility had driven the ship of state. Little was done to relieve the famine and the moans of the hungry ones broke out into a sullen roar that boded no good to the throne of the Capets. The echo of that terrible cry reached the palace of Versailles where Marie Antoniette, the beautiful wife of Louis XVI., held her court. When she heard the threatening voices of her suffering subjects, she asked what they wanted.

"They are crying for bread which they cannot get," answered her courtiers.

"If they cannot buy bread," murmured the dreamy and impractical queen, "why do they not buy cake—it is cheap enough."

This answer was carried to the mob and a derisive cheer went up from the hungry crowd. Mutterings against the luxury of the rich while the poor were starving, swelled little by little. A cry was raised "Down with the baker and the baker's wife, and the Parisians hungry as they were caught the significance of the nick-names. This was the first blow struck at the monarchy. Louis XVI. and Marie Antoinette were known to the Parisian mob as the baker and the baker's wife, and the unfortunate answer of the queen when her subjects were starving was remembered until the guillotine had severed the destines of the house of Capet from those of France.

Little more than one hundred years later another cry is heard. This time in America. It is not a cry for quantity of bread but of quality. Everywhere adulteration is common in articles of food, and especially the twin poisons ammonia and alum are used to adulterate our baking powders by the greedy and merciless manufacturers. Many states have stringent laws on food adulteration, yet they fail to check the evil. It is on the increase. The last report of the Dairy and Food Commissioner of New Jersey shows 47 per cent. or nearly half of the food preparations submitted to him for examination were adulterated.

Sometimes the adulterants used were found harmless, and in these cases the purchaser would be only swindled, but in many instances rank poisons were found in articles of every day consumption. A large percentage of canned vegetables, such as peas and string beans, were found to contain copperas to give a green color, and a number of baking powders had been doctored with ammonia to give an artificial leavening strength and so permit of carrying more waste matter. In these cases there is not only fraud but danger to the public health.

In view of the failure to enforce existing laws, the recent United States Government report recommends the passage of a law in every state requiring the manufacturers of all food preparations to print on every label a list of all the ingredients the article contains. This goes straight to the point. It is not even necessary to wait for the legislatures to act, Boards of Health of the larger cities can take this matter up and make a thorough examination of all the food preparations and expose such manufacturers as are found adulterating our daily food, and so protect the public.

Candid—Baron to wealthy banker—My good sir, I happen to be just now in pecuniary difficulties; could you assist me with one of your daughters?

SOMETHING FOR THE NEW YEAR.

The world renowned success of Hostetter's Stomach Bitters, and their continued popularity for over a third of a century as a stomachic, is scarcely more wonderful than the welcome that greets the annual appearance of Hostetter's Almanac. This valuable medical treatise is published by The Hostetter Company, Pittsburgh, Pa., under their own immediate supervision, employing 60 hands in that department. They are running about 11 months in the year on this work, and the issue of same for 1892 will be more than ten millions, printed in the English, German, French, Welsh Norwegian, Swedish, Holland, Bohemian and Spanish languages. Refer to a copy of it for valuable and interesting reading concerning health, and numerous testimonials as to the efficacy of Hostetters Stomach Bitters, amusement, varied information, astronomical calculations and chronological items, &c., which can be depended on for correctness. The Almanac for 1892 can be obtained free of cost, from druggists and general country dealers in all parts of the country.

After the barn is rifled,
When stolen is the horse,
Why do we lock the portal?
To save the door, of course.

For Throat Diseases and Coughs, use *"Brown's Bronchial Troches."* Price 25 cts. *Sold only in boxes.*

The number of eggs in a 6-pound eel in November is fully 9,000,000. It's a good eel.

DYSPEPSIA AND CONSTIPATION.

Henry B. Archer, Receiver of Taxes of the city of Yonkers, N. Y., says of BRANDRETH'S PILLS:

"For the past ten years I have been using BRANDRETH'S PILLS for self and family. We find them a sovereign remedy for indigestion and constipation, taking one or two every night for ten days. They are also admirable blood purifiers, perfectly harmless but exceedingly effective as a cathartic. I first used them myself, particularly for biliousness and dyspepsia. They relived me in two weeks. I cheerfully recommend them."

Woman's Place in Journalism.

The arrival of woman in journalism is not news of this year or last. Her place in the world of newspapers is well defined. She is there because there is need for her in fields that man cannot fill. She has come to stay, not "until somebody calls her off," but until the professional career of a lifetime is over. Think of some of the female press writers in our own city—Mrs. Sangster, Miss Gilder, Mary Mapes Dodge, Miss French, Marion Harland, Jennie June, Mrs. Heaton, Kate Upson Clark, Midy Morgan, Mrs. Chittenden, Nellie Bly, Miss Bisland and Mrs. Archer. Are these ladies triflers in their profession? Are not their positions as well established as those of male writers?

Do not many of them do work that men could not do, which constitutes a special province of female journalism? Fancy a mere man undertaking to edit the woman's page of a daily paper. It is necessary that there should be a lighter branch of woman's literature, as well as the more serious. Passementerie ought to be well described as one of the topics that interest the household. Juliet Corson and her fellow laborers in gastronomic education have done not a little for American health. It is thoughtless cynicism to deny that there is in journalistic work a growing demand for female talent.—Mansfield in New York Recorder.

Tricks of Artists.

A French paper says that for two months of the year the chief business of the two thousand and odd exhibitors at the Salon is to attract the attention of visitors to their own pictures. Some of the "dodges" which have been found useful for the purpose, it seems, are highly ingenious. The plan found most effectual, and therefore most commonly employed, is the "Yankee Amateur Dodge." It consists of employing two or three agents, dressed in an eccentric fashion, to walk backward and forward with a mysterious air. The public is greatly awed by their appearance, and reports are soon circulated that the picture will be sold for its weight in gold.

Another highly recommended plan is to hire the best looking model introduced into the picture to walk backward and forward in front of the canvas. The identity is soon discovered, and great sensation is the consequence. A few years ago a painter found out a still more original plan. He placed some soft, resinous substance, which would grow soft with warmth, in front of his own picture. The unfortunate person who happened to stop for a few minutes would find himself fixed to the spot for some time. Our authority thinks this last method the most businesslike and effectual.

Where Woman's Knowledge Is Weak.

In considering the requirements of modern housekeeping, take, for instance, one feature—that of plumbing. Scarcely a householder but has experienced the ills resulting from bursting or leaking pipes—ills which entail greater inconvenience to the feminine than to the masculine members of the family; therefore it should naturally follow that the mistress would be specially interested in preventing or ameliorating such disasters, and that the subject would receive at least a portion of the intelligent thought she is so willing to bestow in other directions. It is a lamentable fact, however, that in an emergency not one woman in fifty knows how to turn off the water supply, not to speak of arresting a leak, of no matter how infinitesimal proportions.—New York Post.

The Champion Bible Reader.

Robert T. Barker, of New Bedford, Mass., has read the Bible through no less than 100 times, it is reported. He began reading it in 1868, out of sheer curiosity, and had it finished before he scarcely realized it. Again he began and again he finished, finding more enjoyment in the perusal than the first time. He read it again and again, until, as the years rolled by, he found himself reading it through on an average of about four times a year. At length, having nothing else to do, he conceived the idea of reading it through 100 times, and for the past few years he applied himself diligently to the task. He says he can read it through in a month. He does not intend to cease his reading now, but has begun on his 101st reading, and hopes to complete 200 times.—Exchange.

It Was Slow Climbing.

Young Lady Tourist (to mountain guide)—Do you make a good living at your business?

Guide—Yes, miss. Why shouldn't I?

Young Lady—I fancied you might find it uphill work.—Harper's Bazar.

Five things are essential to success in life. One is a good wife; the other four are money.

HOW'S THIS!

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by taking Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligations made by their firm.

West & Truax, Wholesale Druggist, Toledo, Ohio.
Walding, Kinnan & Marvin, Wholesale Druggists, Toledo, Ohio.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. a bottle. Sold by all Druggists.

It is the bee in the politician's bonnet which causes honeyed words to flow from his lips.

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation permanently. For sale in 50c and $1 bottles by all druggists.

CALIFORNIA FIG SYRUP CO.

SAN FRANCISCO, CAL.
LOUISVILLE, KY. NEW YORK, N.Y.

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

CONSUMPTION!

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, with a VALUABLE TREATISE on this disease to any sufferer who will send me their Express and P. O. address. T. A. Slocum, M. C., 183 Pearl St., N. Y.

ADVICE TO THE AGED.

Age brings infirmities, such as sluggish bowels, weak kidneys and torpid liver.

Tutt's Pills

have a specific effect on these organs, stimulating the bowels, gives natural discharges, and imparts vigor to the whole system.

SIR HENRY THOMPSON, the most noted physician of England, says that more than half of all diseases come from errors in diet.

Send for Free Sample of Garfield Tea to 219 West 45th Street, New York City.

GARFIELD TEA Overcomes results of bad eating; cures Sick Headache; restores Complexion; cures Constipation.

BORE WELLS with our famous Well Machinery. The only perfect self-cleaning and fast-dropping tools in use. *LOOMIS & NYMAN,* TIFFIN, OHIO.

RUSSIA'S OIL CENTER.

A Section of Country Devoted to Nothing Else.

APPEARANCE AND OUTPUT OF THE BEDS.

The Basin of the Caspian Sea Rests on a Sea of Naptha.

Tiflis is midway on the railway that cuts the Caucasus in its whole width and puts the two seas in communication—the port of Batoum on the Black sea with that of Bakou on the Caspian. As we leave the capital in the latter direction the eye is at first ravished and then desolated by the changing aspects of the land. The track follows the Kour, which rolls its broad sheet of water majestically through wild forests and rich tilled soil, while two chains of snowy ridges stretch away out of sight in the distance—the Caucasus to the left, the mountains of Armenia to the right.

Soon we leave the river, which goes to join the Araxes toward the south; the plain gets broader and barer; tall cages built of planks perched on four tree trunks rise in the midst of the rice fields like watch towers. The inhabitants of the villages, who are all Tartars in this region, take refuge at night in these aerial nests; the marshy land is so unhealthy that it is dangerous to sleep there. In spite of these precautions the peasants whom we see are devoured by fever; their emaciated visages remind us of those of the inhabitants of the Roman campagna. After leaving Hadji-Caboul, the station in Moorish style where a new line branches off—"the Teheran line," I am told by the engineers who are building it, and who hope to carry it into the very heart of Persia—we enter an African landscape, sad and luminous.

REMARKABLE SCENERY.

The mountain chains become lower; they are now simply cliffs of gilded sandstone festooning against a crude blue sky. At their feet the desert, a sandy expanse, covered here and there with a rose carpet of flowering tamarisks. Herds of camels browse on these shrubs under the guard of a half naked shepherd, motionless as a bronze statue. The fantastic silhouettes of these animals are increased in size and changed in form by the effect of the mirage, which displays before our eyes in the ardent haze of the horizon lakes and forests. From time to time we meet a petroleum train, composed of cistern trucks in the form of cylinders, surmounted by a funnel with a short, thick neck.

When you see them approaching from a distance you might mistake them for a procession of mastodons, vying in shapelessness with the trains of camels which they pass. The sun burns in space. Yonder a green band glitters beneath its rays; it is the Caspian. We turn around a hill and behold! on this western shore, in this primitive landscape, which seems like a corner of Arabia Petræa, a monstrous city rises before our eyes. Is it once more the effect of mirage, this town of diabolical aspect, enveloped in a cloud of smoke traversed by running tongues of flame, as it were Sodom fortified by the demons in its girdle of cast iron towers?

I can find but one word to depict exactly the first impression that it gives: It is a town of gasometers. There are no houses—the houses are relegated further away on the right, in the old Persian city—nothing but iron cylinders and pipes and chimneys, scattered in disorder from the hills down to the beach. This is doubtless the fearful model of what manufacturing towns will all be in the Twentieth century. Meanwhile, for the moment, this one is unique in the world; it is Bakou—the "town of fire," as the natives call it; the petroleum town, where everything is devoted and subordinated to the worship of the local god.

The bed of the Caspian sea rests upon a second subterranean sea, which spreads its floods of naphtha under the whole basin. On the eastern shore the building of the Samareand railway led to the discovery of immense beds of mineral oil. On the western shore, from the most remote ages, the magi used to adore the fire springing from the earth at the very spot where its last worshipers prostrate themselves at the present day. But after having long adored it impious men began to make profit by it commercially. In the Thirteenth century the famous traveler, Marco Polo, mentions "on the northern side a great spring whence flows a liquid like oil." It is no good for eating, but is useful for burning and all other purposes; and so the neighboring nations come to get their provision of it and fill many vessels without the ever flowing spring appearing to be diminished in any manner. The real practical working of these oil springs dates back only a dozen years.

At the present day it yields 2,000,000 kilogrammes of kerosene per annum, and disputes the markets of Europe against the products of Kentucky and Pennsylvania. The yield might be increased tenfold, for the existing wells give on an average 40,000 kilogrammes a day, and in order to find new ones it suffices to bore the ground, so saturated is the whole soil with petroleum. C. Marvin, "The Petroleum Industry in Southern Russia," compares the Aspheron peninsula to a sponge plunged in mineral oil. The soil is continually vomiting forth the liquid lava that torments its entrails, either in the form of mud volcanoes or of natural springs. These springs overflow in streams so abundant that it is hopeless to store their contents for want of reservoirs; often they catch fire and burn for weeks; the air, impregnated with naphtha vapors, is then aglow all round Bakou.—Harper's.

After the Rain.

Clara—I have just had a delightful walk. How deliciously fresh and pure and clear the landscape looks this evening!

Flora—Ya-as. I just read in the papers that some detectives are securing this part of the country.

Fighting Over Carlo.

The funniest case that I ever tried was about a dog. Old Judge Southard was on one side and I was on the other. The judge's client wanted fifty dollars for a dog that my client was alleged to have killed. The dog was not worth fifty cents, according to the market value, for the law provides for no valuation on canines. At any rate the case was the means of making that canine the most expensive dead dog I have ever heard of. There were three trials, and a disagreement resulted every time. The costs, I think, were something in the neighborhood of $400. I knew I had a forlorn case, and my only hope was to mix up the jury on the question of valuation.

The judge had his witnesses well trained, and so had I mine. At just such a time and at just such a point in their testimony two little girls who figured prominently in the case for the prosecution would burst into tears and exclaim in tones of the most piercing agony: "Dear, darling Carlo; poor, dear, darling Carlo; I shall see you no more. A wicked man has killed our poor old friend—boo-hoo." That was all very well in its place, but it didn't affix a valuation on the dead dog. The judge had some butchers to testify as to the probable worth of the defunct animal. Their estimates varied from $50 to $100. But I had some butchers, too, and they discounted the wailing and weeping of the judge's infants. When we asked them on the cross examination what they thought poor, dear Carlo was worth, "Well," they said, "if cats were scarce Carlo might have brought two cents per pound for a sausage compound." There was a compromise afterward, and we shared the costs of the poor, dear, darling Carlo litigation between us.—St. Louis Globe-Democrat.

Cold Baths in Winter.

"I tell you, I was rather put to it," said an ingenuous, albeit somewhat careless youth, "when I was stopping in London one winter with Mrs. L. 'Would you mind using Algy's bathroom, as it is just next door?' she asked me after I had been shown to my room. 'Not at all,' I answered. 'Algy had no hot water faucet put in,' she went on. 'He loves cold water, but the maid can bring you some if you like,' looking as if she intended to weigh me in the balance to see if I was wanting. 'I never use hot water myself,' I responded mendaciously, but resolved at all hazards to have a good reputation.

"Well, that brute of a husband of hers called me every morning. 'Hello, Jim, I'm through, old fellow; now's your turn.' Now, I think once or twice a week is enough for cleanliness, and I know too much bathing does not agree with me, but I do not dare to confess this to the L's. So every day I rolled myself in my dressing gown and proceeded to take my turn at the tub."

"But did you take your bath?" said his sister skeptically. "Ah! that is another matter," he answered with a guilty laugh. "I made enough noise at all events to satisfy them."

Not every one is so frank about their reluctance to take a cold plunge, but it is certain that the love of water is not as inherent a quality with our men as with our British cousins. We are greatly on the mend, however, in this respect, and this generation of tall, finely formed youths and maidens proves that the regime of the day is a good one.—New York Tribune.

Reversing in Dancing.

If one were dancing for show or dancing for pleasure in a solitude a deux, reversing would be a variation of the proceedings, with a good deal to be said for it. As things are, however, reversing in respectable ballrooms causes collisions or perils of collision nine times out of ten, and so few couples can reverse with complete success that in the tenth instance those who reverse invariably produce the impression that they are showing off at the expense of their less artful neighbors, which impression is usually correct.

There cannot be complete success in reversing without a continual recollection of the fact that a reversing couple is like a ship on the starboard tack, and is bound to get so far out of the way of every couple not reversing as to allow them to hold their course unimpeded. Therefore, under existing circumstances, and at all places where more than three or four couples are gathered together, reversing is sin and should not be practiced in public.—Saturday Review.

People Who Have Had New Hair.

Some cases reported of persons of great age, where the hair has returned to the normal color, are very remarkable. By an inscription on a tombstone at Breslau it appears that one John Montanus, who was a dean there, recovered three times the color of his hair. A Mr. Marazella, of Vienna, died in 1774, aged one hundred and five. "A few months before his death, according to the account, "he had several new teeth, and his hair, grown gray by age, became black, its original color."

John Weeks, of New London, Conn., at the age of one hundred and six married a girl of sixteen, at which time "his gray hairs had fallen off, which were renewed by a dark head of hair." He died eight years later. Susan Edmunds, of Winterbourne, Hants, at the age of ninety-nine, five years before her death, acquired "new hair of a fine brown color." She died in 1780.—Hyland C. Kirk in New York Times.

His Mouth Needed Stretching.

Little Sue was to have a grand treat in the shape of an after dark "outing." But mamma thought her small Bennie too young to share it.

When the little fellow's lips quivered pitifully, she promised him as his "good time" the privilege of "sitting up" with his auntie. Bennie was much impressed with his new dignity.

As the long evening wore on he bravely held his little, sleepy eyes wide open, until at last tired baby nature found relief in a series of gaps.

"I guess Bennie is getting sleepy," auntie said.

"Oh, no I isn't, auntie," the little hero said manfully, "only my mouf needs stretching."—Ladies' Home Journal.

A Bride in Dead Earnest.

She was an Indiana (Pa.) bride, and although somewhat mixed in her responses, was clear as to her determination. When asked by the clergyman, "Dost thou take this man to be thy lawful wedded husband?" she responded very distinctly and emphatically, "God being my helper, I do." The minister looked very grave and the groom cast sheepish glances, while smiles lighted the faces of several of the guests.—Exchange.

Where Vanity Begins.

Observe a tiny mite of four dressed for a children's party. With what delight does she twist herself round to admire a new sash; what pride her diminutive features express at the crimpy mass of hair that waves around her face; how complacently she smooths her silk frock; with what inmost joy does she regard her fine stockings and daintily shod feet.—London News.

HOW WOULD YOU LIKE IT?

The Position of Government Lighthouse Keeper.

FOOD, FUEL AND LIGHT FOR NOTHING.

Uncle Sam's Queer Practice.—Cape Ann's Lonesome Guard.

"I know at least one man in this country who is able to live cheaply and get paid for doing it, all because he lives where the cost of getting his food, fuel and light to him is about five times as much as the original cost of the supplies themselves," said the captain of a schooner in the coastwise trade. "It seems queer that a man can get along more economically on account of the high cost of getting his supplies to his home than he could if the cost were less, don't it? But it's a fact. This man's nearest market is thirty miles from where he lives, and a ton of coal will cost him $6 in that market.

"If it cost him no more than $6 to lay that ton of coal down in this man's bin he would have to pay for both coal and delivery, and the ton would stand him in $12. The same in proportion with his beef and his pork and his potatoes and his flour and his oil. But just because it costs in the neighborhood of $30 a ton to carry his coal from the yard to his bin, and corresponding prices for his other supplies, he gets the whole business for nothing. His flour he gets free, and his beef and his pork and his potatoes and his oil, as well as his coal. The entire outfit don't cost him a cent from one year's end to the other, and he gets $1,000 a year for staying where he is and receiving the annual donations.

"It will be queer now if you are not thinking to yourself that this man I am speaking of has a soft snap. Well, may be he has. He is a lighthouse keeper. He lives on a big rock at Cape Ann. No sea going vessel can get within a quarter of a mile of his home. No loaded boat can reach his abiding place in safety. To get a ton of coal to his bin, which is perched on the rocks above high water mark, it must be shipped from Boston to as near the lighthouse as the vessel dare approach. The coal is in bags, and these are placed in small boats, which carry them to the edge of the shoal water, inside of which the boats dare not enter. The bags of coal are then carried ashore on the backs of the crew, who wade through the surf, clamber up the rocks with their burdens and empty the coal in the lighthouse bin. The other bulky supplies are delivered to the Cape Ann light keeper in the same manner, and the government pays the expense. May be he has a soft snap, but I'd rather be on my vessel, tossing and pitching on the heaviest sea that his light over shone out upon than to be firmly grounded on that Cape Ann rock as he is. Wouldn't you?

"But this man isn't the only one the government supplies with free coal, light and rations at its lighthouses. Whenever the keepers are located at stations where the cost of carriage exceeds the cost of supplies they are provided free; but where the cost of delivery does not exceed the price of the goods the keeper is compelled to pay for both. That's a queer rule, but government has many a queer way of doing things. At all the barren rock lighthouses, like Cape Ann, Minot's ledge and others, the keepers have even to be supplied with fresh water from points on the mainland. They collect a great deal from rains in cisterns and tanks, but in most cases it is not sufficient for the needs of the keepers, and the supply from abroad must be regularly taken to them, no matter what the cost or the difficulties are in getting it there."—New York Evening Sun.

The Seaside Parasol.

The extremely fashionable parasol to be used at the seaside or at the mountains is the most unique Japanese one that can be got. On top must be tied a large black ribbon bow, the ends of which come far down on the parasol when it is opened. It really looks very pretty when worn with a cotton gown and makes a bright speck on the landscape. The red parasol is also in vogue, and is of plain, heavy silk, with a natural wood handle. One having a silver handle is voted extremely bad form. The very pronounced liking for red is thought to be the outcome of the general woman's disposition. Lining her coat with scarlet, wearing a scarlet frock, having a scarlet parasol and wearing a scarlet bonnet is the nearest she can get to painting the town red, which from her youth up she has always had a yearning to do.—New York Letter.

Repair Your Worn Out Clothes.

A poor man who wants to dress well and as cheap as he can should not discard a suit so long as its color is firm and its fibres hang together. No man knows how far $15 a year spent for repairs will go toward making his appearance presentable, nor how large an expenditure for new garments it has saved him until he tries it. If men with moderate incomes, who feel obliged to dress shabbily six months out of the year, observed a woman's way of sponging, overhauling and retrimming they might get a useful object lesson from it.—New York Star.

Wilson—Philson is a man who keeps his word, whatever else may be said of him.

Bilson—Do you find him so?

Wilson—Yes: he borrowed five dollars from me a year ago, and he said he'd never forget my kindness.

Bilson—And he hasn't?

Wilson—No; every time he wants to borrow money he comes to me.—Harper's Bazar.

Nothing delights the average Englishman more than to be a member of a society with a long and involved name. In fact societies such as "The Society for the Better Promotion of Relaxation from Business Cares and Enjoyment During Luncheon Hours in the Municipality of London" grow in strength and influence.

A Successful and Benevolent Venture.

The new Mission Kindergarten just started on First avenue is flourishing. Richard Watson Gilder, who runs The Century, is president of the Kindergarten association, and Mrs. Grover Cleveland is vice president. Sixty of the lowest class of hoi-polloi children made their appearance on the first day and have kept on coming through the rain and shine of fall weather with a persistency that would astonish the mothers of Murray Hill tots. And if you could see what these children eat—what they bring for lunch. Bad bananas, wormy figs, specked pears and plums, "chunks" of hard brown bread, bones cruelly devoid of meat, and everything else calculated to derange the internal organism of any other than these street gamins.

Yet they are intelligent and healthy, too. You would be surprised, you really would, if you could behold the fat, rosy cheeks and the bright eyes that follow the teacher's every move. Her gentle "No, no, little boys; never do that," is to them a royal command. And a whole manual of etiquette is found in her smile and frown. A nursery maid is in constant attendance. The parents were requested not to send babies under 3 years old, but, more often than not, little 3-year-old is intrusted with the care of Yosef, aged 2, and Mina, "just turned 1 year."—New York World.

An Experiment in Keeping Lodgers.

An experiment is to be made by "The Silver Cross Circle" of the King's Daughters in the shape of a "Quiet House." Mrs. M. L. Hollister is treasurer and Miss Anna F. Pierson president of the movement. The sum of $1,000 has been promised and no difficulty is anticipated in securing the necessary funds. A large house will be rented suitable for the convenience of twenty families. There will be a common assembly room or parlor, a general laundry and a nursery and kindergarten, where the young children will be cared for and amused at an expense of a few cents a week.

The rooms will be rented singly or in suites of two and three at not more than $1 a week. The object, while philanthropic, is in no way charitable, the idea being to assist working women, widows with children to support, and aged people in finding a safe, convenient, cheerful and inexpensive dwelling place free from contaminating influences. The society proposes to paint the floors, thus doing away with carpets; to lay in a large supply of fuel and retail it to the tenants at actual cost, and to help solve the problem of bread and butter, provisions and light in the same manner.—New York World.

A Chinese Suttee.

A case of suttee, which is unusual in China, although it is regarded as a great virtue, is reported from the neighborhood of Foochow. The victim was a young woman, 24 years of age, whose husband died of leprosy early in the year. She was childless and had none except distant relatives to depend upon for support. She had, therefore, she said, no alternative but to commit this act of self sacrifice. As soon as her intention became known she received several invitations to grand banquets, all of which she accepted and enjoyed as if there were to be no sequel.

After a special feast of this character she ascended a stage constructed for the purpose, where the village elders came to make their obeisances, each three times, as if she were already a canonized saint. The signal having been given by firing off a gun, she ascended a scaffold with her hands unpinioned, and there, in the sight of all, strangled herself. Her body was placed in a coffin, which was duly prepared beforehand. It is said that the emperor will grant a tablet extolling her virtue as soon as the viceroy of the province represents the case to the throne.—London Times.

A Princess' Break.

Here's a true story about the Princess Engelichieff, fresh from the Fair City. Not long ago that beautiful Russian lady attended a reception given at the Calumet club. She was regal in old satin and old jewels and was escorted by one of the handsomest officers of the club. In the old settlers' room the portrait of Long John Wentworth was pointed out to her. Now, the late Mr. Wentworth was far from spirituelle, and at the first glance the princess, with a little start, exclaimed, looking at a circle of friends, "Do show me a big sticker! I have heard so much about the Chicago pig sticker." The gentleman flushed a little; there was an "audible silence," and her hostess replied, "Princess, you are on the arm of one."—Chicago Letter.

Women Who Want to Fight Duels.

At the last meeting of the League for the Emancipation of Women Mme. d'Estoc proposed a vote of censure on the lady called "Severine," whose article lately caused M. Mermeix to fight M. Labruyere. Mme. Severne was condemned by the whole assembly of women waiting for emancipation, because she did not take up the challenge of the author of the revelations of Boulangism, and meet him on the field of honor herself instead of allowing an obliging journalist to fight for her. The resolution proposed by Mme. d'Estoc was that every woman who does not assume responsibility for her actions and who allows a man to champion her cause is guilty of a deed of inferiority.—Paris Cor. London Telegraph.

Rival Woman Suffragists.

Susan B. Anthony and Laura M. Johns arrived in Pierre, S. D., on the same train with Marietta M. Bones, who is widely known as the arch enemy of Miss Anthony. They are all three guests of the city, and are noted for equal suffrage lectures, and the two former are giving a series of speeches in the city. The ladies of the city have accompanied them in two parties, one with Miss Anthony and Miss Johns, and the other with Miss Bones, drives about the city, heading each procession with a brass band and displaying much rivalry in their public demonstrations.—Cor. Minneapolis Tribune.

A PLEA FOR THE CUR DOG.

One of Low Degree that is a Gentleman among Dogs.

HE IS UNSELFISH AND FEARLESS.

A Leader among Canines.—Converting a Vicious Bulldog.

"I wonder," said a New York gentleman whose love for dogs of all kinds, but chiefly for those that nobody else seems to care for, makes him rather unpopular in his neighborhood, "what constitutes a well bred dog? I don't mean from the fancier's and breeder's point of view. We all know that the long haired, silky Skye, the smooth, bright eyed black and tan and the æsthetic Yorkshire are supposed to be 'born in the purple' and have nothing in common with the yellow and white creature with a black badge of demerit over one eye—the animal we call a cur.

"But what would the dogs themselves have to say about it if they could speak? They ought to be the best judges, and their opinions, so far as I can gather them by watching their actions and bearing toward each other, do not corroborate human sporting sentiment in the matter at all. The question I want to hear fairly answered is: Which is the gentleman and which is the blackguard among dogs?

"You see this dog beside me, and no doubt you wonder, as all my friends do, why I keep 'such a cur' in the house. Well, I keep him because I believe him to be a canine gentleman. Appearances are certainly against him, but I have seen gentlemen with ugly faces and ungainly figures, shabbily clothed, before now.

"Can he fight? you ask. So far as his own personal inclinations are concerned he would rather run ten miles than fight for ten seconds, but if an ability and a willingness to fight are necessary qualifications for a gentleman, then John L. Sullivan's name should stand high on Ward McAllister's scroll of social fame.

THE BUTCHER'S DOG.

"Can he hunt rats? I allowed one to escape from a trap under his nose a few days ago, and he wanted to play with it. He will harm no living thing, and in that sweetness of disposition, I hold, lies his chief claim to the rank of gentleman.

"Of course, I don't expect sporting men to agree with me, but that all the dogs in the neighborhood share my opinion about him is plainly indicated by his extreme popularity among his kind. Being utterly unsuspicious, he is frankly fearless of them all, and only once have I seen his trust betrayed. That was when the butcher's bulldog (an animal that is called well bred, though he is brutal in appearance and disposition) seized him, without a particle of provocation, and would have killed him if the butcher had not interfered with the cleaver.

"Do you suppose that Lazarus (that is my dog's name) harbored any malice against that ugly, vicious beast? Not an atom. As soon as the first soreness of the attack had, in some measure, abated, he trotted back to the big dog without the slightest appearance of distrust, and, I suppose, in his guileless way, reasoned with him. His gentle nature prevailed, and he has, in a great measure, refined that rough savage character.

"They are good friends now, and the bulldog shows a certain subserviency toward Lazarus, and when he is present will refrain from exercising his great teeth upon the flesh of any other dog.

TWO DOGS COMPARED.

"I have no doubt at all that he recognized the true canine gentleman instinctively and bowed before him. That he did not detect it before it was almost too late was due to the well known intellectual dullness of the bulldog, whose small modicum of brains is usually carried in his fangs. All the other dogs defer to him at the first meeting, and though, marketably speaking, he is 'a cur of low degree,' he has become the guide, philosopher and friend of every animal around us whose friendship is worth having. And if you imagine for a moment that they have been mistaken in choosing such a leader you know very little about canine intelligence.

"Now, look at that self satisfied fellow taking a sun bath in the garden. He is said to be a pure Dandy Dinmont, though he is a little too large to have been what the dealers call 'finely bred,' but even from their point of view he is none the worse for that. That dog cost seventy-five dollars when he was a pup, and I have been told he is worth $250 now. But, though I won't sell him, I have no affection for him, because he is not a gentleman. He is quarrelsome, without much power to fight his own battles, and he is intensely greedy and selfish. He growls all the time he is eating a meal, just with the general principle of deterring any animal within the sound of his voice from trying to share it with him.

"Why, if the cat wants to eat off the plate with Lazarus, she is always welcome to a share of the food, or even to all of it if she is in a particularly grasping mood. Now, which of those two dogs is the blackguard and which the gentleman? Let the dogs speak and the dealers hold their tongues."—New York Recorder.

The daily average of visitors to the People's palace in London is about 1,100, and at present the number of books for their use does not amount to 12,000. The Clerkenwell Free library's return as to what books are most in request shows that out of 47,000 volumes issued to readers over 37,000 volumes were novels.

Pall Mall, the famous locality in London, is said to be so called from the fact that in earlier times it was an alley for tennis playing, and took its name from the name by which the mallet was known—pell mell, or pall mall.

Vaughelm, the famous Hanoverian sportsman, slew wild boars by the hundreds, but ran away from a table upon which there was a roasted pig, or fainted if unable to beat a retreat.

Arabia's Contribution to Science.

Rome boasted that she dispensed with native physicians for the first 600 years of her existence. Whether this was the result of her unusual vigor is not recorded. In the days of her prosperity and success she developed considerable ability in the medical line and gave to the world the distinguished physician Galenus. For some time after the fall of Rome the treatment of disease was chiefly in the hands of monks. In connection with the monastery there were frequently the well managed hospital and garden filled with plants noted for their healing virtues.

The Arabs of the Middle Ages were devoted students of science and particularly of medicine. When they came in contact with Christendom they made two important contributions. They gave to the church the writings of Aristotle, which, in the hands of St. Thomas Aquinas, saved the church from a crude materialism.

They gave to the medical world the wealth of their scientific researches, especially in the line of chemistry, and substituted milder remedies in place of the terrible hellebore and other drugs of Hippocrates. Averrors and Avicenna were the leading Arabian scientists, and Dante has given them a place in that honorable circle of the "Inferno" which contains the leading physicians of heathen times.—Chicago Herald.

A Mine in Ancient Greece.

At Laurium are found 2,000 ancient shafts, with their connected galleries. These shafts average about two meters square (the round shaft is almost unknown) and are sunk from 20 to 120 meters in depth, but never below sea level. The galleries open into ancient chambers, sometimes 30 feet high and 150 feet wide. According to M. Cordella's estimate the ancients extracted from these mines a mass of mineral amounting to 105,000,000 cubic meters and yielding 2,100,084 tons of lead and 8,400 tons of silver, or a value of 4,171,378,600 drachmas.

The work employed steadily about 15,000 laborers—3,000 in the mines themselves—almost exclusively slaves. The earthern lamps, water jugs and picks found in our day in some of the low, tortuous passages through which a man must work his way on hands and knees have a pathos of their own. Slaves were cheap and the labor problem easy at first. Proprietors worked their own slaves or hired other people's at an obol per day—say 55 drachmas a year (a saddle horse in Athens now brings 200 drachmas per month)—and the price of slaves ranged from 45 drachmas upward, according to quality.—Engineering Record.

Ancient Milling.

For ages various cereals used in breadmaking were ground with very uncouth contrivances hardly deserving the name of mill, as we understand it. They consisted of two portable circular stones, the upper being the smaller and turned upon the lower and concave one by means of an iron or wooden handle, the grain being placed between them. These stones were usually obtained from a quarry in the vicinity of Babylon, from which sufficient were taken to supply all the eastern countries.

The grinding was usually performed by two females, who sat opposite each other with the millstones placed between them, the upper stone being kept in motion by the hands of the operators. Very often this tedious work was assigned to prisoners, who considered it a most degrading task. This fact is recorded in Holy Writ, in whith we are told that Samson "did grind in the prison house of the Philistines," and Jeremiah bewails the fact that the Babylonians "took our young men to grind."—Detroit Free Press.

A Hop Picker.

The record of the fertility of American ingenuity has been increased by the addition of the invention of a machine for picking hops. It is claimed this machine will do the work as clean and much more rapidly than it can be done by hand. The apparatus is mounted on a wooden frame, heavy enough to insure stability, and is about 7 feet long by 5 feet wide and 4 feet high.

The branches of the hop bine are fed into a receiver and are seized between two rollers and gradually pulled through. The hops fall into an inclined screen, and by their own weight fall into the box prepared to receive them. The leaves and bines fall on the same screen, but are carried back by the returning motion and thrown into a separate pile. It requires only one man to turn the wheel and another to feed bines into the rollers.—Boston Transcript.

Green Soldiers on Sentry Duty.

Early one morning when in camp two Seventh regiment men had adjoining posts. Instead of walking in the same direction, as they should have done, they were plodding toward and from each other. Suddenly the sentry on post No. 5 bawled out as he saw some one approaching from post No. 6:

"Who comes there? Halt?"

The response was quickly given, "Get out, you darned idiot, I'm the sentinel." Then a whispered conversation was held, the result being that the matter was to go no further.—New York Herald.

Before You Tell a Secret.

If you are just on the point of making a confidence it is a good plan to pause before doing so to note the proportion between the times you have regretted giving a confidence and the times you have regretted withholding it. If after this you decide upon making your friend a confidant you must have weighty reasons for thinking him worthy of it.—Murray's Magazine.

The majority of people die sooner than they should. George E. Waring, Jr., says: "Disease is not a consequence of life; it is due to unnatural conditions of living—to neglect, abuse and want." And Dr. Stephen Smith says: "Man is born to health and longevity; disease is abnormal, and death, except from old age, is accidental, and both are preventable by human agencies."

AN ANTELOPE'S JUMP.

His Agility was a Revelation to the Hunters.

BOUNDING OVER TWENTY RODS OF BRUSH

Typical Yarn of the Champion Liar of the Mining Region.

In one of the old mining towns of this part of California, away up on the slope of the Sierra Nevadas, there lived several years ago, during the active working of the hydraulic mines, a celebrated character whose modesty, as he still lives in the land of the living, forbids my giving his name. His justly celebrated fame arose from his remarkable power of narration. He could take any trivial occurrence that happened in town, dress it up in such glowing colors and throw so many vivid sidelights upon it that not even the participants themselves could recognize it. G. B. undoubtedly wore for years the belt as champion liar of that mining region, and one of his stories, that I happened to hear him relate, I think is worth preserving. I will let him tell it in his own words:

"It was in the spring of '50 that a train of sixty-five on us started across the plains for Californy. The most on us were young men an' able to rough it, but we had three famblies, with about a dozen young uns among us, an' one baby was born on the way. Wal, of course, fresh meat soon got mighty scase, as there was so many trains on the trail ahead on us that all the game had been killed or scairt away. The young mother she kept kind o' pindlin like after her kid was born and got sick o' bacon an' sich like, an' the young fellers that had hosses o' their own to ride, there being half a dozen on 'em in our train, used to scour out on the plains for fresh meat for her.

"One day three on us got arter a couple o' antelope early in the mornin' when our hosses was fresh, an' we jest took after 'em, a yellin' like Comanches jest to see 'em run. There was a couple o' hills on the plain that stood seprit, with about twenty rods o' ground between 'em at the fur end, and the critters made a break to go between 'em. We was comin' on arter 'em like we meant to catch 'em, when they see that this open place between the hills had grown up with tall chapparral.

"Now an antelope won't run up a hill, nor into thick bresh if he knows it, so they stopped till we got a'most up to 'em, an' one on 'em tried to run back by us, but one o' the boys stopped him with a charge of buckshot. The other one, seein' what an almighty tight place he'd got into, jest made for the bresh an' tried to jump over it. Wal, sirs, he made the all firedest jump as ever I see; but when the critter got up into the air he seed he hadn't jumped far enough, an' I'm a liar if he didn't gather himself in the air an' gin another o' the most tremenjous jumps that any critter ever did make, an' jest went a-sailin' right on over the bresh an' landed on t'other side on't slick and clean!"—Cor. Forest and Stream.

Deceptive False Curls.

Every one must have noticed the number of ladies who wear short, curly hair at present. It may astonish you to learn that most of these charming curls are false. Typhoid and other fevers have played havoc with hair. After such an illness the hair is almost invariably seriously injured, and even if it does not fall out it becomes so dry and harsh that there is nothing to be done but to shave it close and wait for a new growth. Unless the hair grows very rapidly it will be two or three months before it is long enough to look well, and in the meantime a wig is a necessity. The short, curly hair looks more natural than a dressed wig, and is easier to keep in order, so most ladies prefer them. Elderly ladies, however, often use French twists and pompadours. Few people know how common wigs are. I have sometimes sold five or six in one day, and a great many ladies say they are sorry when their own hair grows out, as the wig has saved them so much time and trouble.—Interview with Wigmaker.

Inventor of the Detective Camera.

It was a Parisian who hit upon the novel idea of a detective camera. He made a small camera, which he concealed in his hat. A shutter in front was so cleverly arranged that the joint could not be seen. At first he used wet plates, but he soon saw the disadvantage he was laboring under. About that time the lightning dry plates were put on the market and the Frenchman's hopes rose high. He could take his hat anywhere with him, and no one, at a glance, would suspect its double purpose. Placed on a table facing the person to be taken, the little button at the back could be pressed and the exposure made. In some respects the hat camera was immeasurably superior to the toys now on the market.—New York Evening Sun.

It has been shown that the incandescent electric light does not "smoke" the ceiling, as has been claimed, but that the smoky effect is due to dust. The heated lamp causes a current of heated air to rise, and the consequence is there is more dust deposited above the lamp than anywhere else.

Herbert Spencer, writing to Dr. Janes, of the Brooklyn Ethical society, observes: "In my earlier days I constantly made the foolish supposition that conclusive proofs would change beliefs. But experience has long since dissipated my faith in men's rationality."

The Prince of Wales is said to be a lightning change artist in the way of doffing his attire. He can get out of one suit and into another in a twinkling, and as he is obliged to change his costumes several times a day the accomplishment is a valuable one to him.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, JANUARY 15 ..... 1892.

John Sherman has been returned to the U. S. Senate by the people of Ohio. He is a rank enemy of silver, and we hoped to see him beaten by Foraker. Sherman says he thinks a free coinage bill will be passed at this session of Congress, but that it will be vetoed by the President.

Henry Cabot Lodge, author of the infamous Force bill, has written a long article for the New York Tribune advising the Democrats in congress to adopt Reed's gag rules. Mr. Lodge has noted with admiration the effect Reed's rules had in dispersing a Republican majority and, he now wants to try it on the Democrats. No, thank you.

It is rather disheartening to see the boodlers shouting their approval of the supreme court while the honest citizens are hanging their heads with disappointment and mortification, but the people still have a remedy if they will only apply it without fear or favor. If men will only vote their honest convictions and not their prejudices, the body politic can be purged notwithstanding the railroad power.

The board of engineers appointed to investigate and report upon the most available site for a deep water harbor on the Pacific Coast coast confine their recommendations to Santa Monica and San Pedro. They give their preference to the latter on the ground that it would cost $700,000 less to give protection there to the area needed for shipping purposes.

The new government in Chile seems disposed to cultivate friendly relations with the United States. It is likely that a proper expression of regret for the attack upon the Baltimore's sailors will be made by the Chilean authorities and also such redress as will be satisfactory to the administration at Washington and the people of the United States. Had some official expression of regret at the occurrence been afforded by the Chilean government at the time the trouble occurred, there would have been no disposition in this country to make much of the affair. What aroused strong feeling on the part of the United States was the defiant and insolent tone assumed by the Chileans with relation to the outrage. There is still every reason to believe that the ignorant masses in Chile are unfriendly to the United States, but the new Chilean President and his ministry are of a different frame of mind, and are well aware of the folly of provoking the wrath of such a nation as the United States.

David B. Hill has stepped down from the Gubernatorial chair in New York, leaving both houses in the Legislature and every branch of the State government in control of the straight Democracy. He will now proceed to Washington and have some fun with the Republicans in the Senate. Unless he has changed, the Republicans who have been complaining about his absence from Washington will think he arrived too soon. In his larger sphere of action Senator Hill promises to be a striking figure. No man has grown faster in political prestige than he, and his mental stature has increased with every elevation. He owes nothing to accident, and every step he has taken gives evidence of careful deliberation and great sagacity. He was successfully elected District Attorney, Assemblyman, Mayor of Elmira, Lieutenant-Governor and Senator, and every indication points to his elevation to the Presidency next year.

A mass meeting of 2000 people was held in San Francisco last week. It was presided over by A. C. Paulsell, late Harbor Commissioner and a prominent candidate for governor on the Democratic ticket at the last election. Resolutions were adopted unanimously stating that whereas, the late grand jury had shown that official venality of the most depraved type existed in the city and State government, that all positions from U. S. Senator down were sold, and that legislators brazenly bartered their votes, the people of the city thanked the late grand jury and Judge Wallace for their action in trying to put an end to this, and denounced the criminal interference of the S. P. railroad people in politics as the first cause of the corruption that exists. Another resolution requested the re-election of Wallace as presiding judge for the ensuing term, but the judges showed how much heed they paid by electing Judge Troutt to the position.

COLD WATER CURES ALL.

A UNIVERSAL PANACEA FOR SUFFERING HUMANITY.

"The Abbe Sebastian Kneipp" and His Power of Healing—A Patient Describes the Method of the Priest's Treatment—Cold Water Used Externally.

Few Americans have seen the little village of Woerishofen, between Memmingen and Augsbourg, in Bavaria, and yet for the past four or five years this little burg has attracted as many visitors as Bayreuth and Oberammergau. Woerishofen is celebrated not for its mineral waters, not for its bracing air, but for its marvelous cures performed by the priest of the village, the Abbe Sebastian Kneipp. Each year at least 30,000 invalids make a pilgrimage to Woerishofen and endure all inconveniences in order to be cured by the Abbe Kneipp.

The Abbe Kneipp is a celebrity in Germany. He is called a genius, a savant, a benefactor of the human race. Everything in the village is named for the wise priest. For instance, there is Kneipp coffee, Kneipp bread, Kneipp linen, etc. Always at least a dozen physicians are present at the consultations of the priestly healer, and these, after thoroughly understanding his system, will found Kneipp Anstalten at Stuttgart, Munich, Wurtzbourg, etc.

This good abbe believes that water will cure all the ills to which flesh is heir. A friend who went from Paris to consult the Abbe Kneipp has told me of her experience at Woerishofen, and of her great admiration for the abbe's wisdom.

THE ABBE.

In the village there are only three or four primitive inns, but most of the invalids lodge in private houses no less primitive. The abbe has been compelled to build a large house for the benefit of the clergy, for priests also ask to be cured by their confrere.

The abbe receives at the presbytery, and begins consultations at 8 o'clock in the morning. The great physician sits in a large room on the ground floor, surrounded by pupils. The abbe is a fine looking man. His regular features and fresh complexion denote health, and his broad, high forehead, hardly touched by a wrinkle, is framed in white hair.

His eyes are the bluest and brightest I have ever seen, for his soul seems to be concentrated in these eyes, and they penetrate you through and through—in fact, to make a diagnosis, the abbe only looks at a patient and in diagnosis he never errs. Some who went to the priest with despair in their hearts left him buoyed up by courage and with the assurance that their diseases were not incurable.

Although the abbe says "I cannot destroy death," still he has cured many whose diseases baffled the skill of others. A man whose face was disfigured by a horrible cancer asked his advice. Calmly the priest said, "It is easily cured," and after several weeks of lotions and baths the cancer disappeared. The blind have recovered their sight and the lame have walked.

According to the Abbe Kneipp every disease originates in the blood; there may be a disturbance in its circulation, where may be a derangement of its composition.

WHAT WATER DOES.

Water alone can act thoroughly on the blood, and water produces four noticeable effects. It dissolves the injurious principles of the blood, eliminates that which has been dissolved, restores regular circulation to the purified blood and fortifies the debilitated organism. In a talk with the abbe after consultation hours, he said that fifty years ago people did not take cold as at the present time. Why? Simply because the body was more hardened to changes in temperature.

Water makes the body capable of enduring all climates, and the best way to begin the treatment is to walk barefoot in the wet grass. After a quarter of an hour's promenade without drying the feet, one must put on dry shoes and stockings and exercise until the feet are very warm. "If you can find no dew, no wet grass," said the abbe, "walk on cold, wet stones, or even on the snow. That is my remedy for those who are always taking cold."

The abbe's treatment varies according to the malady. For some he prescribes vapor baths, for others wet compresses, for others baths with oats or hay added to the water, etc. The water must be as cold as possible, and in winter snow is preferred. But a cold bath must never last more than five minutes, including the time required for dressing and undressing, and the bather must never use towels, but always exercise for fifteen minutes after the bath. Friction only causes unequal circulation, but exercise produces a uniform heat.

Warm baths should always be followed by a plunge in cold water. The good abbe says one must never drink too much water, and the least possible during repasts. "Drink a little water before eating, very little while eating, and two or three hours after drink as much as you wish."—Paris Cor. New York World.

Proceeds of a Jackknife.

The champion horse jockey belongs in Belfast in the person of Lije Walker. Just to give his boy an idea how to get along in the world Lije started away from home one day on foot and nothing in his pockets but a jackknife. He was absent just one week and returned driving a pair of horses harnessed into a top buggy. Hitched to the rear axle was another horse and a cow, while ahead was a dog. "See how your pap does it," said Lije to his son, as he gazed at the time of day from a handsome watch. For a fact he had got the whole turnout for his jackknife, and swapping the proceeds into one thing and another.—Belfast (Me.) Mail.

One Little Thing.

"It's little things that count," said Hicks.

"Ye-es," returned Mawson. "But very inaccurately. My boy can't count eleven without making about forty mistakes."—Harper's Bazar.

The Bear Scares the Ranchers.

There is a bear roaming the river bottoms in the vicinity of Linda that, when it sees a man, rises on its hind legs and begins to dance. It is thought the creature must have escaped from some gypsies who recently passed through the town. Many of the ranchers living near there are so frightened that they sleep in their windmills at night.—San Francisco Call.

Narrow Wagon Tires and Bad Roads.

While the subject of new roads is being agitated by the legislatures and the agricultural journals, the farmers are busy working up the subject in a practical—though possibly not in the most proper—way by industriously, and at much expense of time and team, cutting up and destroying the roads by driving heavily loaded, narrow tired wagons over them. When we see a man on a heavily loaded, narrow tired wagon urging along his jaded team, engaged to his utmost power in making mud, and then grumbling because of the "horrid muddy roads, he seems to be an object for pity.

The only thing he seems disposed to do to make matters different is to throw some hard words into the muddiest places, and then continue his custom of turning out on to the highway with his rut digger every time the ground is too wet for plowing. Now, if the legislature is to do anything for the roads, let them begin by legislating the narrow tires off the heavy lumber and truck wagons. I have seen a single heavy, narrow tired wagon in the distance of a half mile cause more damage than could be repaired in six days of ordinary road work.

The question seems to be about this: Which is the better economy, wide tires and good roads or narrow tires and bad roads? The narrow tires are as much out of place on the farm as on the highway. Men admit that facts and philosophy are in favor of wide tires, and say that when all the others use wide tires they will do so. They seem to be afraid that they will do more than their proportionate share of good in this world. It seems that the legislature may have to help them out of their ruts.—Coleman's Rural World.

Tommy Picked the Police Chief's Pocket.

In Madison, Wis., there is a chief of police, J. E. Adamson, who is clubbing himself. Saturday he visited Chicago to get Thomas Kingston, aged fourteen, who was wanted at Madison for larceny. He had been arrested by Chicago officers. Late in the evening he handcuffed himself to young Kingston and started for the train. Before it reached Desplaines the chief was snoring loud and long.

Kingston is a cunning little rascal. He saw his opportunity. He quietly went through the pockets of the sleeping chief and found the key which unlocked his handcuff. Stealthily he crept over the snoring officer, and when the train stopped at Desplaines the chief and his youthful prisoner parted company.

The train had gone a good many miles when Chief Adamson awoke. Of course he was mad, but when he looked for the key with which to remove the handcuff from his own wrist his wrath knew no bounds, for Tommy had taken it with him. All efforts to remove the bracelet were fruitless, and until he reached Madison his left hand and wrist were buried deep in his overcoat pocket. They were "out of sight."

Kingston was picked up by Chicago officers. He is at the Desplaines street station waiting for another bout with Chief Adamson.—Chicago Tribune.

Mining Dividends.

The dividends paid by mining companies of this country which report their earnings amounted to $1,421,875 during October. The total for the first ten months of the year is $14,095,990, an amount largely in excess of that paid in the same period of 1890.—Engineering and Mining Journal.

A Bright Idea.

A Kansas man gave his gates a liberal coat of white paint on All Halloween. Next morning he counted fifteen boys with a picket fence outlined on their backs.—Detroit Free Press.

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,

C. MULHOLLAND,
Independence.

DESERT LAND, FINAL PROOF.

D. E. No. 512.

LAND OFFICE AT INDEPENDENCE, CAL., Sept. 3d, 1891.

Notice is hereby given that Dennis Leonard of Bakersfield, Kern County, California, has filed notice of intention to make proof on his desert land claim No. 512, for E. ½ of Section No. 2 and the W. ½ of Section No. 1, Tp. 10 S., R. 34 E., M. D. M. before Register and Receiver at Independence, California, on Saturday, the 10th day of October 1891.

He names the following witnesses to prove the complete irrigation and reclamation of said land: G. Sanger, W. Sanger, A. P. Sanger, M. Naylor, all of Big Pine, Inyo County, California.

C. W. CRAIG, Register.

Sang this PRETTY song and made money for us. Address Austin, Texas, and Inc. Sewing Machine, Ohio. See ad. Others are doing as well. Why not you? Even earn over $500.00 a month. You can do the work and live at home, wherever you are. Even beginners are easily earning from $5 to $10 a day. All agree. Work can not injure time or health. Any one can become a worker. Failure unknown among them. NEW and WONDERFUL. Full particulars, FREE. M. Hallett & Co., 23 x 1 BOX PORTLAND, MAINE.

$6000.00 a year is being made by John R. Goodwin, Troy, N. Y., at work for us. Reader, you may not make as much, but we can teach you quickly how to earn from 75c to $10 a day at the start, and more as you go on. Both sexes; all ages. In any part of America, you can work where it suits, giving all your time, or spare moments only to the work. All is new. Great pay ALMOST for every worker. We start you, furnishing everything. EASILY, QUICKLY learned. PARTICULARS FREE. Address, GEORGE STINSON & CO., Portland, Maine.

COURT NOTES.

Geo. M. Gill, Superior Judge.

SATURDAY, January 9, 1892.

Estate of Frank Paderes, deceased—Order for sale of property.

Harry vs. Harry—Filed amended complaint.

WEDNESDAY, January 13, 1892.

Trial jury of fifty drawn to attend Wednesday, January 27, 1892, at 10 a. m.

People vs. Val. Sherman—Issued subpoenas to A. M. Bulkeley, A. P. Smith, V. G. Smith, A. L. McGee, L. W. Allingham, Walter Ober, Charles Dixon and George L. Drake.

People vs. John Clarke—Issued subpoenas to John Woods, Joseph Merritt, H. C. Hartshorne, Jacob Schober, H. G. Pommey James Hurst, L. W. Allingham, A. W. Sheets and Peter M. Gano.

THURSDAY, January 14, 1892.

August Stecker vs. A. Fyfe et als.—Filed notice of overruling of demurrer to complaint.

FRIDAY, January 14, 1892.

Estate of Benjamin F. Theban, deceased—Filed affidavit of publication of order to show cause.

BORN.

SPRATT—At Big Pine, Jan. 4, 1892, to Mr. and Mrs. S. H. Spratt a son.

DIED.

LEVY—At San Francisco January 12, 1892, David Levy, a native of California, aged 34 years.

ENOS—At San Luis Obispo, Cal., January 6, 1892, William S. Enos, a native of California, aged 38 years.

SPRATT—At Big Pine, Jan. 5, 1892, the infant son of Mr. and Mrs. S. H Spratt aged 1 day.

S. P. McKnight C. E. is in town.

Mrs. J. J. Gantt has returned to Modock.

T. C. Boland was up from Keeler early in the week.

Receiver J. W. Clark visited Bishop early in the week.

Frank Shaw of Bishop is reported to be quite ill of la grippe.

What's the matter with that Washington's Birthday celebration?

R. Way came down from Bishop on Tuesday returning next day.

John McSweeney has been ailing with la grippe for some time past.

C. Mulholland has so far recovered from his late illness as to be out of doors again.

Mr. and Mrs. John Anton have removed from Keeler to Lone Pine where they will reside.

District Attorney Forbes and P. H. Mack Esq., visited Big Pine during the week on legal business.

Mike Womack, the footracer, was in town last Monday. He was on his way home to Tulare county.

Little Nellie Webb has been dangerously ill this week but was reported a little better this morning.

Miss Martha Dodge of Lone Pine spent last week visiting with the family of A. N. Bell at Camp Independence.

See the notice of the sale of real estate and personal property belonging to the estate of the late Frank Paderes.

Will H. Graham published his notice of intention to make final proof on his desert entry on the Eastside this week.

W. H. Walker came up from Olancha early in the week and remained for several days in town. He was accompanied by his mother.

Who ever saw lovelier weather in the month of January? Warm, sunny days with birds singing is more like spring than mid-winter.

Norman E Conklin, son of Judge A. R. Conklin, arrived here Wednesday from Inyo county having had a nine day trip overland.—*Bakersfield Californian.*

Uncle Peter Laird came in from Rose Springs last week. He says that cattle are doing very well in that section of country. He still suffers considerably from his shoulder that was dislocated.

The San Francisco *Bulletin* of the 6th contains the following: "The Inyo and Kern Canal Company has incorporated with $1,000,000 capital stock, of which $350 have been subscribed by the following incorporators and directors: Andrew J. Robinson, Frank H. Austin, G. P. Rixford, J. W. Wesson and H. Oresen. The object of the corporation is to conduct water along Owens River Valley and Rose Springs Valley into Indian Wells Valley, etc."

At the regular meeting of Inyo Lodge No. 301, I. O. O. F., held on the 6th, the following officers were installed to serve for the ensuing term: J. E. Shepherd, N. G.; F Bedford, V. G.; J. D. Blair, Sec.; B. Rhine, Treas.; J. N. Yandell, N. S. N. G.; M. Muldoon, L. S. N. G.; W. Barnes, R. S. V. G.; J. D. Lewis, R. S. V. G.; John Alexander, Conductor; P. H. Mack, Warden; George Lewis; R. S. S.; N. E. Conklin, L. S. S.; A. Stecker, I. G. The installation ceremonies were conducted by Bertrand Rhine, D. D. G. M.

Obituary.

A telegram was received at Bishop on Tuesday announcing the death of David Levy at San Francisco. He was a brother-in-law of A. Cohn of Bishop and had been engaged with him in the general merchandising business at that place since 1884. Last summer his health began to fail, and about the first of November, realizing that a change was necessary, he went to San Francisco where his death resulted from consumption. He leaves a wife and little daughter to mourn his early death.

William Sessons Enos died at San Luis Obispo on the 6th of pneumonia. An account of his death was first seen in the *Examiner*, and a letter received by John McSweeney yesterday confirmed the sad news. The letter stated that he had been ill only a week. His remains were taken to Daviseville, Yolo County, his old home, for interment. He was a Knight Templar and a Native Son. W. S. Enos came to Inyo county early in 1883, purchased considerable property and brought here from Yolo county a large number of fine horses. He was unfortunate in his business dealings and a year ago closed out his interests here and with a few fine young horses saved from the wreck of his fortune, removed to San Luis Obispo to begin anew. Not a word reflecting on his honor could ever be said. He was most kind hearted and generous, and his intentions were always of the best. He leaves a widow and four children to whom he was an affectionate husband and kind father. A host of friends will read of his death and think, "Poor Will! At least he always meant well."

Wiener's Enterprise.

It was our pleasure recently to be shown through the mercantile establishment of A. J. Wiener of Fresno. These stores are located on the corner of Tulare and I streets and occupy a two-story brick building with a floor space 150x150 feet. The first floor is divided into five stores: The dry goods department comprising six departments, a shoe store, clothing store, millinery department and gent's furnishing goods. The second floor contains departments as follows: Toys, dolls, games, plush goods, silverware and cutlery, crockery, books, art decorations and dressmaking department. The floor space in Wiener's stores is next in size to any in the State. The variety of goods displayed in these stores makes it possible for customers to do all their shopping under one roof, and as Wiener is noted for quick sales and small profits the stores have grown into popular favor. He is an intelligent advertiser, changing his advertisements each week, quotes prices and keeps faith with the public in all his announcements. The monthly cut sales keep his stock new and complete through standing orders in the East to ship the latest novelties once a month with which to replenish all the departments. The branch store, located on 19th street, Bakersfield, is conducted on the same principle and has done a fine business from the start.—*Californian, Bakersfield.*

Hay Measurement

There being considerable discussion recently in the vicinity as to the measurement of hay it may be of interest to state that there are two rules in use. One is known as the one-third rule and is as follows: To find the place of the stack take one third of the distance over and square it on the base. The other, known as the Government rule, and the one in general use among cattle dealers and large hay growers is as follows: Subtract the width of the stack from the distance over and divide the remainder by two; square the result on the base for the face, e.g.: Suppose a stack is 20 feet wide and 50 feet over. Taking the base, 20 feet, from the distance over, 50 feet, would leave 30 feet, which, divided by two would give 15 feet; This squared on the base, 20 feet, gives 300 square feet as the face of the stack. A stack 40 feet long would thus contain 12,000 cubic feet, which divided by 512 gives a trifle less than 23½ tons of hay in the stack.

The Indian Queen Case.

Last week Judge Rising dissolved the injunction held by the Indian Queen against the Poorman mine. On receipt of the Judge's decision the Poorman people attempted to resume work in their mine, but found that the Queen's employes had locked up their tunnel and placed armed men on guard, who forbade the Poorman people going to work. This would seem to be an open violation of the Court's mandate. The Poorman people are taking steps to have the invaders bound over to keep the peace, so that they may resume work. It is feared there will be serious trouble before the matter is settled.

The Indians in this county are evidently getting very short on their whisky rations owing to Sheriff Gorman's persistent efforts in that direction. J. F. Cannell, better known as "Shorty" is in the habit of getting on an occasional "jag." The Indians are aware of this, and on different occasions they have waylaid him when he was going home and taken away his bottle. The offence was committed again on Tuesday night and one of the perpetrators was arrested and is now in the county jail awaiting examination.

R. J. Laws, Dr. J. F. Holmes, George T. Mills, Hume Yerrington and E. B. Yerrington are registered at the Norman House. They came down on a private car attached to Wednesday's regular train, and are enjoying a hunting trip in this vicinity.

NOTICE OF SALE OF PERSONAL PROPERTY AT PUBLIC AUCTION.

NOTICE IS HEREBY GIVEN THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the 9th day of January, 1892, in the matter of the estate of Francisco Paderes, deceased, the undersigned, administratrix of said estate, will sell, at public auction, to the highest bidder, for cash, gold coin of the United States, and subject to confirmation by said Superior Court, on the

30th DAY OF JANUARY,

1892, at one o'clock p. m., at the late residence of the said deceased, in the town of Lone Pine, in the county of Inyo, State of California, the following personal property belonging to said estate:

6 horses.
2 mules.
8 sets of harness.
1 wagon.

YGNACIA ABOCHUCO.
Administratrix of the estate of Francisco Paderes, deceased.
Dated January 12, 1892.

"Of course it hurts, but you must grin and bear it," is the old time consolation given to people troubled with rheumatism. "If you will take the trouble to dampen a piece of flannel with Chamberlain's Pain Balm and bind it over the seat of pain your rheumatism will disappear," is the modern and much more satisfactory advice. 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

Our readers will notice the advertisements in these columns of Chamberlain & Co., Des Moines, Iowa. From personal experience we can say that Chamberlain's Cough Remedy has broken up bad colds for our children and we are acquainted with many mothers in Centerville who would not be without it in the house for a good many times its cost and are recommending it every day.—*Centerville (S.D.) Chronicle and Index.* 50 cent and $1 bottles for sale by

A. K. EUGLEY,
Big Pine.

We want every mother to know that croup can be prevented. True croup never appears without a warning. The first symptom is hoarseness; then the child appears to have taken a cold, or a cold may have accompanied the hoarseness from the start. After that a peculiar rough cough is developed, which is followed by the croup. The time to act is when the child first becomes hoarse; a few doses of Chamberlain's Cough Remedy will prevent the attack. Even after a rough cough has appeared the disease may be prevented by using this remedy as directed. It has never been known to fail. 50 cent and $1 bottles for sale by

A. K. EUGLEY
Big Pine.

NOTICE OF SALE OF REAL ESTATE AT PUBLIC AUCTION

NOTICE IS HEREBY GIVEN THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the 9th day of January, 1892, in the matter of the estate of Francisco Paderes, deceased, the undersigned, administratrix of said estate, will sell at public auction, to the highest bidder, for cash, gold coin of the United States, and subject to confirmation by said Superior Court, on the 6th day of February, 1892, at one o'clock p. m., at the late residence of said deceased, at the town of Lone Pine, County of Inyo, State of California, all the right, title, interest and estate of the said Francisco Paderes at the time of his death, and all the right, title and interest the said estate has by operation of law or otherwise, acquired other than or in addition to that of the said Francisco Paderes at the time of his death in and to those certain lots, pieces or parcels of land situate, lying and being in the town of Lone Pine, County of Inyo, State of California, being Lots 6 and 7 in Block No. 14, as the same are known and designated on the official plat of said town of Lone Pine, now on file in the office of the County Recorder of said Inyo county.

Terms and conditions of sale: Cash, gold coin of the United States, ten per cent. of the purchase money to be paid on the day of sale, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

YGNACIA ABOCHUCO
Administratrix of the estate of Francisco Paderes, deceased.
Dated January 12, 1892.

DESERT LAND FINAL PROOF

D. L. No. 621.

LAND OFFICE AT INDEPENDENCE, CAL., January 9, 1892.

A BIG BUSINESS.

The growth and present size of the great retail business of Weinstock, Lubin, & Co., Sacramento, shows on the face that it possesses *a distinct character* of its own. It has done much to introduce many important reforms in storekeeping, which have been widely copied. There are people who have never heard of the big establishment, but who, through its silent influence, are being served by local dealers better than they otherwise would be.

It has done more than any other ten stores to give the "One Price System" firm and substantial footing on the Pacific Coast.

It has shown people living in small towns that they can deal through the mails with as much security as if they bought in person.

It has, by constantly raising its own standard of qualities, had an influence in raising the standard everywhere. The average grade of goods kept upon the Coast grows better each year.

It has been prominent in bringing west as stylish and desirable goods as are kept by merchants in New York, Philadelphia, or Chicago. Indeed, the manufacturers who supply them supply it. The goods are the same; and the Sacramento prices, while never higher, are sometimes considerably less. This is explained by the fact that the cost of conducting business in large Eastern cities is far greater than in the Capital City, the extra expense of overland freight being but a comparatively small item.

It has made it possible for out-of-town people to enjoy quite as satisfactory shopping facilities as do those living in large cities.

There is no desire on the part of the firm to take any special credit for whatever influence for good the house may have exerted. They have sought simply to build up a business on fair and just principles; to buy and sell as low as they can; to deal as far as possible only in the very best goods; and neither to fear nor favor any one, but to treat every customer as they would their most favored friend.

Whatever of success has come, they attribute it to the faithful carrying out of these aims and principles.

A large illustrated catalogue, giving full information about goods and prices, how to order, etc., sent free to any address.

The Sham and the Real.

Every good thing has its imitators, every genuine article its counterfeits. The Ammonia and Alum Baking Powders sold over the counters are no more like Dr. Price's Cream Baking Powder, than the paste is like the real diamond, or a counterfeit is like one of the old master's genuine paintings.

When greedy and merciless manufacturers claim their adulterated and harmful baking powders are as good as Dr. Price's, they know they are not telling the truth. These people know they are destroying the stomachs and the complexion of the consumers, and there are many grocers recommending such powders over their counters—knowing same to be injurious and worthless—simply to make a large profit.

Dr. Price, a concientious physician, has spent a lifetime in perfecting and popularizing his Cream Baking Powder, the only Pure Cream Tartar Powder now to be obtained., and the

Multitudes of imitators all over the land have sprung ng his sys- not to imitate the purity of Price's Cream Baking Powder, but to see how cheap they could make their counterfeits and hoodwink the public.

Some use Ammonia and others Alum, but all these shams cry in chorus, "Buy this, its just as good as Dr. Price's and much cheaper.

Price's Cream Baking Powder is the standard for purity and perfection the world over, and is beyond comparison.

Dr. Price stands for Pure Food and a foe to all shams.

When a woman dies and her husband refuses to marry again, is it a compliment to his first wife, or is it a sign that he has had enough of it?

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted. Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

MASTIFF PLUG CUT

Put that in Your Pipe and Smoke it

Price ought to be one of the least considerations when buying smoking tobacco. If you want the best and are willing to pay a few cents extra, buy the Mastiff Plug Cut; there is more solid comfort in one package than you can get out of a dozen others. Packed in canvas pouches.

J. B. Pace Tobacco Co., Richmond, Virginia.

FROM THE FRENCH OF GAUTIER.

When I am dead upon me place,
Before the coffin has me hid,
A little red to light my face,
A little black about the lid;
For I desire on my close bier,
As on that night he told his love,
In rose eternal to appear,
With kohl my soft blue eyes above.

Make me no shroud of cloth so fine,
But drape me in the pure white Swiss
Of that soft garb of mousseline
I wore the night I felt his kiss.
That is the robe to me most dear;
I wore it when it pleased him most.
His look has made it sacred here,
So let me grace it as a ghost.

—Springfield Republican.

AN OLD MAID'S STORY.

It was one of those cold, dark November afternoons when the daylight all goes soon after 3. A chilly kind of white mist was hanging about, and the trees in the square were shaking off their few remaining leaves, as though they were at last convinced that the poor, black, shriveled things were no ornament, but rather a disfiguration. My knitting had dropped idly on my knee, and I was thinking. My pet was sitting opposite, thinking or dreaming, too, her deep eyes full of the golden firelight, her oval face framed by her rich, soft black hair.

I was thinking, I remember perfectly, what a different thing it must be to feel old age creeping on if you had some one beside you who had been young with you and who grew sober and gray when you did, and if you had sons and daughters who reverenced and loved you as I loved my dear mother long, long ago.

Strange thoughts for a little old maid of 63; sad thoughts too, that made the fire become obscured and then shoot out long needles, until I recollected that my pet was very fond of me, though there was no relationship between us.

She was all I had, for our family had dwindled and dwindled until there were only three representatives, and between me and those two others there was a long standing estrangement.

The old house was wonderfully quiet. Outside was the usual hum of the city traffic, distant nearly a quarter of a mile; inside, no sound but the purring of my cat and the flutter, flutter of a flame in the fire.

A loud, energetic ring at the bell startled us both.

"Why, auntie," said Mabel, "you are asleep."

"Who can it be?" I wondered. "It's not my day, so it is not likely to be a caller. If it is, we must have the gas."

Directly after the room door was opened and a name was announced that took my breath away.

"Mr. Armitage."

Jane ushered in a figure of which at first I could only see that it was one of the stronger sex, with an erect, almost haughty carriage of the head.

For a moment I thought it was my brother himself, as I rose to my feet, all trembling, but Mabel stirred the fire into a bright blaze, and I saw a dark eyed young man, not like my brother, but so like some one else I used to know, that I forgot I was a withered old woman, and almost unconsciously breathed the word

"Lionel."

"Yes," he answered, taking both my hands into his strong grasp, "Lionel Armitage; and this, then, is Aunt Dorothy. What a tiny little aunt it is!"

He bent down and kissed me, a proceeding that gave the queerest sensation. I could not have spoken directly to save my life.

"I have come as a peacemaker, aunt," he went on, using that title as though he had seen me at intervals ever since he was born, "to make up the family quarrel; though, upon my honor, now I think of it, I haven't the ghost of an idea what it was all about. However, my father begins to feel that he is getting old; he doesn't look it, though. He's as upright and handsome as he ever was. Well, he thinks it's time bygones were bygones, and I volunteered to come and see if you were of the same opinion."

"I should have been glad to be reconciled any time these twenty years, my dear," I said, wiping away a few foolish tears. "But better late than never. I am very, very glad. Sit down, Lionel, and talk to me here, by my side. You are not a bit like the Armitages, Lionel."

"No; I am generally supposed to be a kind of reproduction of my mother's brother, who died quite young. I was named after him, you know."

"Yes, I know."

"Twenty years, aunt; what a pity it seems! For my part I think family quarrels are an awful mistake. Do you know I seem to have a recollection of you, though the last time I saw you I was a little chap of six or seven. I had an idea you were very tall, by the way."

"Where is Julius—your father, I mean? Is he in town?"

"No, he's down at the old place; the town house is wrapped in brown holland at present. I'm putting up at Drayton's."

"My dear boy, you mustn't stay at the hotel. I have two or three spare rooms. Do make this your home while you are in town," I said, persuasively, but was almost surprised at the alacrity of his acquiescence.

"With the greatest pleasure; nothing I should like better, Aunt Dorothy," he said.

"And how does your mother look?" I asked next. "Is she as energetic as ever?"

He winced.

"She was taken from us two years ago," he said in a low voice.

I was too shocked to speak. I never looked at the papers, or this news would have been no surprise to me. For a little while we were silent.

There was a great deal to be talked over, however, and the hours flew by more quickly than ever, though they always fly terribly fast.

"I must be going," he said, at last. "That was 6 o'clock that struck. I say, aunt, wasn't there some one here with you when I came in?"

"That was Mabel Verdi, Lionel; the cause of the quarrel." And I peered into the gloom, never having noticed when she slipped away.

"How? What do you mean?"

"Well, my dear, it was like this. When I was a little more than 40, there was a certain Miss Verdi, a poor seamstress, who did plain sewing for me. She had been my housemaid; she left me to marry a wretch who deserted her, and left her to support herself and her year-old baby. She fell ill, and I went to see her two or three times, and when she died, as there were no relations, I brought the forlorn baby home till something could be done with it. The whole of it was, I determined to keep it altogether. That was why your father was so angry. And that child is Mabel Verdi."

Lionel whistled softly.

"And was that all?"

"That was all. We are an obstinate family, Lionel. The more your father objected to my bringing the child up, the more resolved I became."

"H'm! It was very good of you. The girl must have been no end of trouble. And so you have brought her up to be your maid or companion!"

"She is my adopted niece," I said, rather stiffly, for his tone hurt me in some way. "I shall leave her everything I have."

He said no more. It seemed to me that he too thought I had lost caste by what I had done. I was sorry, for I had taken a strange liking to the boy.

Soon after he took his leave, promising to come on the following day and bring his "traps." No sooner was he gone than Mabel came back dressed for dinner.

"Aunty, do you know it is nearly 7, and you are not dressed?"

"Never mind, love," I said, gathering up my knitting. "Dinner can wait for me for once. Mabel, the long family disagreement is at an end. That was my nephew Lionel."

"At an end?" Mabel cried. "Oh, Aunt Dorothy, I am glad of that! Now, perhaps, you will tell me what it was."

I shook my head and laughed, for that was a point on which, though she was very curious, I would never enlighten her.

"Isn't he handsome, Mabel? What did you think of him?"

"I scarcely saw him," she answered indifferently.

She laughed at me many times that evening for my absence of mind, told me that I took salt to my apple tart at dinner and never knew it, and that I smiled at my tea and at everything.

It may have been true, for I could think of nothing but the message of reconciliation after so many years. I wrote a long letter to Julius, that is my brother, that very night.

The next afternoon Lionel came.

"I hope you're prepared to have me on your hands for at least a fortnight, aunt," said he, as we sat together chatting. "In fact, I shall very likely want to stay for good—you look so homelike and comfortable here."

"Armitage hall used always to be homelike and comfortable enough," I remarked, and then regretted the words, for a cloud came over his face.

"Ah, yes, in my dear mother's time," he answered softly.

"It is all this sort of thing that does it, I think," he said, after a pause, picking up my knitting from a gypsy table and letting two of the needles slip out so that an endless number of stitches were instantly lost. "I hope I haven't done any damage," and he stuck the needles in again at random and laid the work down. "All these dainty womanly trifles"—And he raised some pretty crewel work of Mabel's from the work basket on which it lay. He looked at it meditatively, then turned his attention to the basket and its other contents.

The little silver thimble he tried on his little finger, which would not go fairly into it, then looked up and caught me smiling.

"Don't laugh at me, Aunt Dorothy. Somehow the sight of these brings back many things. "This, for instance," he said, still looking at the tiny thimble, "is just the size of my mother's"——

He broke off, for Mabel came in just then. I introduced them at once, Mabel blushing as though it were she who had been caught inspecting some one else's property, Lionel gravely courteous and perfectly at his ease.

I received a kind letter from Julius very soon after, in which he told me how glad he was for his son to be with me, and plainly intimated that he would be pleased if I persuaded him to stay as long as he would, for he, Julius, had no intention of coming up to town at all this winter, and he was afraid the boy would be bored to death if compelled to remain throughout December at the hall.

And so the fortnight lengthened into a month, and Lionel was still with us. He escorted us to theatres, concerts and the opera, and we had a gayer winter than usual.

At first I was half afraid he might fall in love with my pet, but I soon came to the conclusion that such an idea was altogether absurd. The two conversed so little—for Mabel was a quiet girl who never talked much, but merely listened to other people, with her expressive eyes saying a thousand things she would never put into words.

On the whole, I believe it must be disconcerting to any man, after delivering what he thinks rather a neat speech, to meet a pair of eyes dancing with fun as Mabel's often did. She had a gift of seeing the ludicrous side of everything, though her secret amusement never showed itself except in those black eyes or the slightly compressed lips.

Consequently it was both a surprise and a shock to me when, six weeks after his arrival, Lionel said to me in the simplest way:

"Aunt Dorothy, I am going to marry Mabel."

I could not speak for a minute or two. The room turned round.—True Flag.

A Big Hollow Tree.

The largest tree in Snohomish county probably is a cedar which stands a little way from the Kent's prairie and Stanwood road, about six miles from Arlington. A party of nine went down from this place Sunday to satisfy themselves of the truth of what by them were regarded as exaggerated reports of its size. It has been claimed that the tree is ninety-nine feet in circumference, but the measurement taken Sunday shows it to be but sixty-eight feet.

Still, that is considerable of a sapling, being nearly twenty-three feet in diameter. If measured around the roots and knotty protuberances the tree would likely measure the ninety-nine feet claimed for it, but that is not a fair test. Sunday's measurement was as close to the body of the tree as a line could be drawn. About seventy-five feet from the ground the tree forks into four immense branches.

Just below the fork is a big knot hole, and five of the party climbed up and made an exploration of the inside of the tree, which is a mere shell, though still green. They went down some forty-five feet in the tree and claim that there is standing room for at least forty men there. A peculiar feature which they noticed was that the tree is barked on the inside the same as on the outside.—Arlington (Wash.) Times.

Individual Dislikes.

I hate to see a man chewing tobacco while he is whipping his boy for smoking.

I hate to see a man with a suspicious breath boast of his temperance principles.

I hate to see a man continually talking about how much he loves everybody and never do anything to help anybody.

I hate to see a man always talking about what a happy place heaven is and doing nothing to make his home resemble it.

I hate to see a prominent church member slipping into a butcher shop to buy something for breakfast on Sunday morning.

I hate to see a man remember everything the clown said twenty years ago and forget every word the preacher said last Sunday morning.—Ram's Horn.

IS ALUM POISONOUS?

(Hall's Journal of Health).

"This question has caused a good deal of discussion. Alum is used by many bakers to whiten their bread, enabling them to use an inferior flour. It is most extensively employed as a cheap substitute for cream of tartar in the manufacture of baking powders. Its use has not been considered immediately dangerous, although it continued it induces dyspepsia and obstinate constipation. But the fact that many cases of poisoning have occurred from the use of alum, puts the question in a more serious aspect, and prudent people will exercise caution in the selection of baking powders."

"Under what conditions then, does this substance—formerly used only for mechanical or medicinal purposes—become poisonous? They are certainly obscure, and at present we can only surmise what they may be. We suspect that the cause exists in the individual poisoned; some peculiarity of the constitution producing a morbid change in the secretions of the stomach, with which the alum combines and forms an active poison; or the secretions may be healthy but in unusual proportions, and that these less or greater proportions in combination with the alum constitute a poison."

"For example, two part of mercury and two parts of chlorine form calomel, which is not poisonous, but change the proportions to one part mercury and two parts of chlorine, and we get corrosive sublimate, which is a deadly poison."

"Then again we know nothing of the constitutional peculiarities. Why is it that one person can eat all kinds of green fruits and vegetables with impunity, while the same course might cost another individual his life? One person can handle poison ivy and sumac without being in the least affected; another is poisoned if he approaches to within ten feet of them. Out of a family residing in a malarial district, some of the members will suffer half the year with fever and ague, while the others will enjoy excellent health during the entire year. Foods that are wholesome to some persons are actually poisonous to others. This is especially true of some kinds of fish. There is no safety in taking alum into the stomach, as it is shown to be always injurious, and often dangerous." * *

The *Scientific American* published in a recent number a list of alum and ammonia baking powders, which is of great value at this time. Following is a condensed list compiled from official reports. Powders marked with a star seem to have a general sale, as they are mentioned in at least two of the official reports:

*ATLANTIC & PACIFIC.	*ROYAL.
CROWN.	SILVER STAR.
*DAVIS' O. K.	*SNOWDRIFT.
GEM.	STAR.
*KENTON.	STANDARD.

There are, in addition to the foregoing list from the *Scientific American*, a number of such powders sold in the western that were not found in the eastern stores.

Following is a list of the most prominent:

ANDREWS' PEARL,	Contains Ammonia. (C. E. Audrews & Co., Milwaukee.)
ACME,	Contains Ammonia. (Thos. Wood & Co., Philadelphia.)
DON BON,	Contains Alum. (J. C. Grant Baking Powder Co., Chicago.)
CALUMET,	Contains Alum. (Calumet Baking Powder Co., Chicago.)
CLIMAX,	Contains Ammonia. (Climax Baking Powder Co., Indianapolis.)
FOREST CITY,	Contains Ammonia Alum. (Vowle Bros., Cleveland.)
HOTEL,	Contains Ammonia Alum. (J. C. Grant Baking Powder Co., Chicago.)
HERCULES,	Contains Ammonia. (Hercules Baking Powder Co., San Francisco.)
ONE SPOON, TAYLOR'S,	Ammonia Alum. (Taylor Mfg. Co., St. Louis.)
RISING SUN,	Contains Ammonia. (Phoenix Chemical Works, Chicago.)
ROYAL,	Contains Ammonia. (Royal Baking Powder Co., New York.)

The Pomona *Progress* says: T. B. Atkinson showed us a lemon, just brought from Florida, which was literally covered with the oyster-shell scale. It has been claimed that this scale does not work upon the fruit, only upon the trees; but that lemon was badly infested. The oyster-shell scale is a pest that can be extinguished by fumigation, the same as other scales.

"My wife is queen of the tea-table," remarked a host to a friendly visitor. "And she never reigns but she pours," was the quiet reply.

USING THEM FOR EVERYTHING.

Peter Magerus, 251 Johnson avenue, Brooklyn, N. Y., says:

"During the last eighteen years I have been using over fifty ALLCOCK'S POROUS PLASTERS a year in my family. I have found them a most perfect external remedy. They have repeatedly cured me of rheumatism, to which I am subject every Winter. They have cured me of pains in the sides and back three times. My wife, children and mother-in-law tell me ALLCOCK'S PLASTERS are the best remedy ever made, so agreeable, so certain. I know they have cured my wife of pains in the back and of a severe cough. My mother-in-law has been cured of a most severe cold, which threatened to turn into pneumonia, by ALLCOCK'S PLASTERS."

Oh, faithful pipe, untoward is thy fate,
Full oft debased are offspring of the great;
Yet still thy old age must it sadly fret,
That thou art grandpa to the cigarette.

SOMETHING FOR THE NEW YEAR.

The world renowned success of Hostetter's Stomach Bitters, and their continued popularity for over a third of a century as a stomachic, is scarcely more wonderful than the welcome that greets the annual appearance of Hostetter's Almanac. This valuable medical treatise is published by The Hostetter Company, Pittsburgh, Pa., under their own immediate supervision, employing 60 hands in that department. They are running about 11 months in the year on this work, and the issue of same for 1892 will be more than ten millions, printed in the English, German, French, Welsh Norwegian, Swedish, Holland, Bohemian and Spanish languages. Refer to a copy of it for valuable and interesting reading concerning health, and numerous testimonials as to the efficacy of Hostetters Stomach Bitters, amusement, varied information, astronomical calculations and chronological items, &c., which can be depended on for correctness. The Almanac for 1892 can be obtained free of cost, from druggists and general country dealers in all parts of the country.

A wooden dog-kennel should be built with the bark on and be lighted by a bay window.

For Coughs, Sore Throat, Asthma, Catarrh, and other diseases of the Bronchial Tubes, no more useful article can be found than "*Brown's Bronchial Troches.*"

The Train Boy.

A boy who gets a position as train boy for our company must put up a certain amount of money as a guarantee. He must be recommended for honesty, intelligence and activity. He must take care of his stock, putting it on the car and taking it off. He is charged with everything he takes out and is held to the strictest accountability on his return. He must turn in every cent. There are only two ways in which he can make anything outside of his earnings. One is by occasionally scorching a granger on a book. He may be able to get fifty cents for a twenty-five cent book now and then, but if the company finds it out the boy is discharged. Another way in which he can make something extra is by taking books and papers of his own and disposing of them.

I have often been asked the question, "What becomes of these train boys?" Occasionally a bright, attentive boy will get a position in a railroad or an express office. I regret to say, however, that the inducements are for him to go to the devil. There is something about the business which will send a boy to ruin unless his moral stamina is well grounded. They turn out as sporting men as a rule. I was thinking the other day of six young men whom I started in the business as many years ago. One of them is now an express messenger. Another is a clerk in a manager's office. The third is in a gambling house in New Orleans. The fourth is in jail in a Michigan town, and the others are still on the road. That is not such a bad showing. But I am forced to admit that it is above the average.—Interview in Chicago Tribune.

To Preserve a Necktie.

Fred Hewen, who now deals in gentlemen's furnishing goods in a wholesale way, and who used to cater to the immaculate youth of Chicago in the same line, was in a party when a member of the group stepped to the adjacent mirror and attempted to adjust his stubborn necktie. "I can't make it stay in place," he complained, "and I guess I'll have to throw it away. It's about time, I think, because it is worn and all covered with fuzz." Hewen stepped toward the young man, and regarded the four-in-hand scarf with a critic's eye. "Take it off a moment," he said, "and I'll fix it for you." The young man removed it and handed it over. Hewen struck a match, and, when it was burning well, he held it near the necktie. The flame lapped off the fuzz in an instant, and the tie was returned looking as good as new, almost. "Never throw away fuzzy neckties," said Fred. "Burn off the fuzz in that way and you'll get twice the wear out of them."—Chicago Herald.

Henry J. Raymond's Herculean Effort.

When Daniel Webster died, the news first came to The Times through its business office.

It was on Sunday morning, and Mr. Jones at once started out to find Mr. Raymond. The latter was found on his way to church, and came immediately to the office. He lost no time, but, sitting at his desk, he wrote incessantly from 11 a. m. Sunday to 2 o'clock a. m. Monday, and turned out with his own pen an obituary sketch of Webster filling sixteen columns of The Times printed in solid nonpareil type. It was his habit in writing never to revise anything he wrote. Page after page of copy would go into the printers' hands without interlineation or correction of any kind. So admirable was his story of Daniel Webster's career that the Appletons took the matter and with but little change published it as a life of Webster.—Harper's Weekly.

He Lacked the Influence.

Representative Allen, of Mississippi, was requested the other day by one of his constituents—it was a colored "friend and brother"—to give him a recommendation in writing by means of which he hoped to secure a situation as watchman or something equally important. Mr. Allen complied with readiness, as he knew the man to be capable and trustworthy. In fact, the "certificate of character" was so exceptionally complimentary and set forth Sambo's qualifications in such glowing terms that, turning to Mr. Allen, he said:

"Look heah, Marse Allen, can't you gib me somethin' to do yo'self on dat recommendation?"

It took some time on the part of Mr. Allen to explain to the colored "friend and brother" that just now he possessed not very much "influoence."—St. Louis Republic.

Use Your Eyes First.

If you got into the habit of always letting your eyes attend to a thing first you will avoid lots of embarrassing situations. Suppose you have been discussing Miss Belleville's hair, and have committed the indiscretion of calling it red, when a voice sounds close at your side, which to your horror you think you recognize as Miss Belleville's voice—why give a convulsive start, a confused snicker, and a compromising gurgle of half formed explanation or deprecation? You will be wiser and safer, and more graceful, too, if you just turn your eyes to see if it is Miss Belleville. If it is, your complete repose may make her think she didn't hear aright, in case she did hear, and will not arouse her suspicions in case she didn't hear.—New York Star.

Increase of Bad Poetry.

I know a literary man who is called the "poetry editor" of one of our magazines. He reads all the poetry submitted to his magazine, and probably handles more than 1,500 pieces of verse each year. "Last year," he says, "it was fully that number. This year there is almost a third increase, with the quality getting decidedly worse. Now, there is nothing in the world so difficult to write as a good sonnet, quatrain or poem. And yet will our young authors insist upon making their literary debut with some verses. Ninety-nine per cent. of them are as a natural consequence hopelessly bad."—Gor. Philadelphia Times.

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation permanently. For sale in 50c and $1 bottles by all druggists.

CALIFORNIA FIG SYRUP CO.
SAN FRANCISCO, CAL.
LOUISVILLE, KY. NEW YORK, N.Y.

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

"German Syrup"

For Throat and Lungs

Hemorrhage Five Years. "I have been ill for about five years, "have had the best "medical advice, "and I took the first "dose in some doubt. This result-"ed in a few hours easy sleep. There "was no further hemorrhage till next "day, when I had a slight attack "which stopped almost immediate-"ly. By the third day all trace of "blood had disappeared and I had "recovered much strength. The "fourth day I sat up in bed and ate "my dinner, the first solid food for "two months. Since that time I "have gradually gotten better and "am now able to move about the "house. My death was daily ex-"pected and my recovery has been "a great surprise to my friends and "the doctor. There can be no doubt "about the effect of German Syrup, "as I had an attack just previous to "its use. The only relief was after "the first dose." J. R. LOUGHHEAD, Adelaide, Australia.

If you have a **COLD or COUGH,** acute or leading to **CONSUMPTION,**

SCOTT'S EMULSION

OF PURE COD LIVER OIL AND HYPOPHOSPHITES OF LIME AND SODA

IS SURE CURE FOR IT.

This preparation contains the stimulating properties of the *Hypophosphites* and fine *Norwegian Cod Liver Oil.* Used by physicians all the world over. It is *as palatable as milk.* Three times as efficacious as plain Cod Liver Oil. A perfect Emulsion, better than all others made. For all forms of *Wasting Diseases, Bronchitis,* *CONSUMPTION,* Scrofula, and as a Flesh Producer there is nothing like SCOTT'S EMULSION. It is sold by all Druggists. Let no one by profuse explanation or impudent entreaty induce you to accept a substitute.

CONSUMPTION.

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed so strong is my faith in its efficacy, that I will send two BOTTLES FREE, with a VALUABLE TREATISE on this disease to any sufferer who will send me their Express and P. O. address. T. A. Slocum, M. C., 183 Pearl St., N. Y.

Old Gold and Silver Bought; send your old Gold and Silver by mail to the old and reliable house of A. Coleman, 41 Third street, San Francisco; I will send by return mail the cash, according to assay; if the amount is not satisfactory will return gold.

A HAUNTED CONSCIENCE.

What Follows the Taking of Human Life.

AN INCIDENT OF THE LATE INDIAN WAR.

A Soldier Kills Two Savage Brule Indians With One Shot.

"It is a dreadful thing that human life must be sacrificed," said Major C. O. Bates in the rotunda of the Lincoln hotel the other evening. There was an ominous look between him and Colonel Bob McReynolds as the latter spoke. Somehow it had just leaked out that there was some unwritten history as to the Nebraska militia upon the frontier. A word or two of kindly condolence elicited the following from Colonel McReynolds, who has kept very silent heretofore.

"It was very nearly 3 o'clock when Major Bates and myself left Pine Ridge agency. All day Indians had been swarming about the agency like so many bees around a hive. Each one was armed with a Winchester, and had on his person no less than 100 pounds of ammunition. The wildest excitement had prevailed all day, so that when we left the agency at that late hour en route to Rushville you can believe we were on the alert.

"From Pine Ridge the road led over a plain for nearly five miles. Then began the range of mountains known as Pine Ridge. The major and I had spurred our horses for a couple of miles out of the agency, then drew up into a walk. We were following a circuitous road that led over these Pine Ridge mountains, when suddenly from behind the rocks ahead there confronted us two Brule Sioux, with Winchesters ready for action. Major Bates instantly uttered an alarm. This caused one of the enemy to skulk behind the other, both with Winchesters leveled upon us.

"I was fairly panicstricken myself, and scarcely knew what I was doing, but Major Bates, with his cool headedness, drew his Winchester to his shoulder and fired. The report echoed up and down the valley, and when the smoke cleared away, there were two forms motionless upon the brow of the little hill ahead. My horse, frightened at the report of the gun, was struggling in a frightful manner, and it was all I could do to restrain him. Finally, when I got him quieted, I rode to Major Bates' side. He was pale as a sheet of paper, yet firm and composed as a soldier should be. His first remark was, 'Oh, God, this is awful!'

"The single shot from his Winchester had killed them both. They fell upon their faces, their hands tightly clenched about the weapons they bore. We looked for others, but none were in sight. Then I rode within a few feet of the bodies and picked up a war club. Their blankets and ghost shirts were swarming with vermin or I would have taken them along. The major divested one of the dead Indians of his war bonnet, placed his scalping knife in his belt and remounted.

"As if by some strange fascination I lingered on the spot for a few moments. Those bronze forms, motionless, lay with face to the earth. Human life had perished there. The cold, snow covered hills, resplendent with their wintry beauty, brought naught but chill to the soul. Two forms, clad in their red blankets, lay silent in death. They meant harm to us who would not have harmed them. The winter's sun was fading beyond the chill blue hills.

"I rode from the spot and joined the major on the crest of a hill. His voice was husky in tone when he said, 'Let us get away from here.' The road led over a mountainous country for the next seven miles, then we came to the outposts of the Nebraska militia at Jarchow's ranch, where, after admission within the picket lines, we met General I. W. Colby, Colonel J. P. Bratt, of the First regiment, and Colonel J. C. Bills, of the Second. Major Bates here, true to his soldierly qualities, told of the fate of the two Brules. General Colby's face wore a vexed look when the affair was recounted. He seemed to think we should have waited until we were fired upon. Observing this, the major answered, 'I have done so, and this is my explanation.'

"I wish the affair was effaced from memory," continued Colonel McReynolds. "The picture of those Indians lying there so still, the snow covered hills and silence of the hour, will long dwell in my memory, and I know that with all justifiable action of Major Bates, it must forever remain to him a nightmare which can never be forgotten."—Chicago News.

The Parrot's Laugh.

Some years ago I possessed a parrot which, among its other accomplishments, could mimic perfectly the cook's call for Kitty, the household cat.

Polly's cage hung usually in the kitchen, and Kitty's favorite mode of exit in the summer was through the adjoining window and along the wooden partition fence which ran up to it.

No sooner would Polly observe Kitty sunning herself at the end of the fence or in the yard than up would go the cry: "Here, Kitty, Kitty! Here, Kitty, Kitty!" and the deluded quadruped hardly ever failed to respond by dashing rapidly toward the window.

Then that mischievous parrot would chuckle and flap its wings and yell, "Ho, ho, ho!"—thereby clearly demonstrating its intense enjoyment of the practical joke played upon the credulous cat.

Do you think that Polly did not laugh? If so, I don't know what a laugh is.—New York Telegram.

There were, prior to the 1st of June, 1891, when the roadway of the Brooklyn bridge was made free by law, thirty-four collectors, nineteen gatemen, ninety-two policemen and one hundred conductors employed upon the Brooklyn bridge. The expenses of the bridge for 1890 were: Supplies and rentals, $500,140; pay rolls, $535,207, and salaries of officers, $40,048.—New York Sun.

Two Miles a Minute Without Steam.

A runaway railroad train on the branch of the coast division from Aptos up to the Loma Prieta lumber mills created a sensation along the line of the road Sept. 13. Eight empty cars broke loose from the engine at Monte Vista, about eight miles north of Aptos. The road from Monte Vista to Aptos is a heavy down grade the entire distance, and the cars, soon after starting, attained a tremendous rate of speed, and passed through Loma Prieta at a mile a minute.

The flying cars kept on the track until they had gone the entire eight miles to Aptos. Here four of the cars turned on to the main track without damage, two running as far as the high bridge at the west end of Aptos, and the other two stopping near the station. The other four cars dashed off the track and were smashed into bits.

How the cars kept on the track for eight miles at such a speed over a curving mountain road is wonderful. No one was on the train at the time it started, and no one was injured, the only loss being the four wrecked cars. Railroad men claim the train made the eight miles in four minutes.

The down passenger train from Santa Cruz, bound for San Francisco, had a hairbreadth escape from destruction. The passenger train had passed the place where the runaway came onto the main line but a minute and a half previously. One of the wrecked cars struck a cypress tree forty feet high and a foot and a half in diameter and laid it flat, almost tearing it from the ground.—Cor. San Francisco Chronicle.

Naval Prize Money.

Some interesting particulars in reference to the apportionment of naval prize money and bounties are contained in a return which has recently been printed by order of the house of commons. From this it appears that during the financial year 1889-90 the sum of £8,322 was paid over by the accountant general out of a total of £63,365, which has accrued during the last thirty-eight years, including shares allotted to the Naval Brigade for services rendered during the Indian mutiny and booty gained during the Chinese war of the same decade.

Of the balance, £47,500 has been paid over to the consolidated fund since 1865 in accordance with the act of parliament, and £7,543 remains in hand should claimants arise. A curious feature of the return is the fact that out of £20,156 the proceeds of captured slave dhows during comparatively recent years, only £8,185 appears to have been claimed. The government percentage account shows a total of £13,161, and out of a balance in hand on April 1, 1889, of £3,994 only 16s. 4d. seems to have been paid during the year on account of claims arising prior to 1865. The total sum transferred to the consolidated fund since 1855 is £83,500, in addition to £173,000 referred to in the annual account for the year.—Galignani Messenger.

Worthless Watermelons.

During the season the watermelon business was the best it has ever been. Prices were high and sales large, for melons have been better than usual this year. So good was the business that the river men who were engaged in bringing the melons went back to the York river region, down the bay, and brought large loads up there, expecting to realize handsomely. Then the "cold snap" set in, and the melon operators were all dumped. At one wharf on the river front there were 40,000 melons going begging at $4 to $8 a hundred, while earlier in the season the same quality of melons sold easily for two or three times these prices. What a chance the Washington boarding house keepers had to "put up" watermelon rind preserves!—Washington Post.

Ex-Senator Pomeroy's Big Hotel Bill.

The judgment of $15,324.50 recently issued by the supreme court of Kansas in favor of the plaintiff in the case of E. A. Smith against S. E. Pomeroy dates back to 1873. Smith was proprietor of the old "Tefft house" in Topeka, where Pomeroy made his celebrated unsuccessful attempt to be re-elected United States senator. Pomeroy quartered his political friends at the "Tefft house" during the campaign, creating a bill of $19,324.50. After his defeat Pomeroy paid Smith $4,000, claiming that was enough. Smith thereupon instituted proceedings in the district court of Atchison county for the balance. The debt, including interest and costs, amounts to about $20,000.—St. Louis Republic.

Figs Ripening Outdoors in Maine.

Mr. R. F. Gordon, of Livermore, writes: "I would like to say that I have a fig tree, now ten years old, which is out of doors and bears every year. It has borne about forty ripe figs this year, and now has several nearly ripe upon it, with about 100 green. The fig does not ripen the same year in which it forms, and the fig tree does not blossom, but the fig is formed and grows from the under side of a leaf to about the size of a large acorn the first year, and the second year to the size of a hen's egg and then ripens.—Lewiston Journal.

Policeman Patrick Stark, of the Third precinct, New York city, found the champion scrupulous man while acting as a census enumerator. He was J. Grinker, of No. 76 East Broadway, who refused to give any information, as in his opinion "it was a reflection upon the United States government."

Congress several years ago enacted a law placing an import duty of $10 per pound upon smoking opium brought into this country. Notwithstanding this heavy duty the regular importation of opium through legal channels and upon which duty was paid amounted to $1,500,000 last year.

A clever New York journalist, Franklin Fyles, recently produced a new play called "Overlook" at Boston, and critics commend it as very entertaining, novel and dramatic. Mr. Fyles has written several plays, but "Overlook" is said to be his strongest in conception and originality.

POINTS ABOUT DOGS.

Things to Think of When Selecting a Pup.

TREATMENT OF DOGS THAT MAY GO MAD.

Stress Laid by Experts on a New Breed Known as the Crockery Dog.

Having noticed that the dog catchers of New York, owing to the money there is in it for them, are regular enthusiasts in retiring unlicensed dogs from circulation, it is fair for me to infer that the owners of the numerous dogs seen on the streets have paid the requisite license.

This being so, there must be a great many people in New York who are so much attached to their four footed pets that they are willing to pay actual cash to retain them as companions. The average New Yorker likes dogs more than the resident of any other city in the world, except Paris during the siege.

Almost every style of plain and ornamental dog is represented in New York. Dogs of all breeds gaze at you from the windows of the houses along the lines of the elevated railroad. From the window of a passing carriage a Skye terrier looks out, creating the impression that he is, after all, not a dog, but an imported English snob of the Lord Dundreary style of beauty. All that he needs to completely deceive the public is an eyeglass.

There are emaciated greyhounds, which, like the Sarah Bernhardt parasol, have their ribs on the outside; ugly, squatty, drab pugs, the favorite pet of the ladies; French poodles, shaven, with a tuft of hair on the end of the tail, and Mexican dogs, called "pelons," which cannot flee as a bird to the mountain, because they are as destitute of hair or feathers as the front row in the orchestra.

A friend of mine living in Harlem, who has never owned a dog to cheer him with the gentle wag of his tail, has written to me to pick him out a dog—that is, if I think there is no danger of hydrophobia. He also wants to know what is the best remedy for hydrophobia in case his pet should be afflicted with it, and to let him know what my views on the subject of dogs really are. As there are many others who are hungry for information on this subject I have given the question a great deal of time and meditation.

The dog is generally regarded as a noble animal. So is man, when he behaves himself. However, it can be said that, although the dog has associated with man for the last five or six thousand years, he has only contracted one of man's bad habits—viz., that of worrying his species when he finds one in distress. A dog with a tin kettle tied to his tail is chased by all the other dogs; so is the man who gets into trouble.

There are, however, some things about dogs none of us like—fleas, for instance. But a greater objection still is the tendency of the canine to become rabid. It is almost impossible to ascertain whether or not a dog has actually got hydrophobia. Some canines are addicted to fits which are often mistaken for hydrophobia. Frothing at the mouth is no sure sign, for a dog may froth worse than a Coney Island glass of beer, and yet not be half as mad as the man that tries to drink it.

Hydrophobia is a disease full of mystery. A man has been bitten by a dog that was unmistakably hydrophobic, and yet the man did not go mad at all. On the other hand, a man has been bitten by a dog that showed no symptoms whatever of hydrophobia, yet, nevertheless, the bitten man got so mad that, meeting the owner of the dog three weeks afterward, he seized him by the collar and wrapped him around a telegraph pole several consecutive times.

A very queer case occurred in Texas. A gentleman was out walking with his mother-in-law for his pleasure. They were attacked by a rabid dog. Such animals are absolutely destitute of fear. But the queerest feature was that the man suffered intensely. It required the strongest opiates to restrain him, and even then his cries of anguish could be heard for blocks and blocks.

The man had not been bitten at all—at least, not by the dog—neither had his mother-in-law, but the dog tore to pieces a valuable shawl worth seventy-five dollars the lady was wearing, and she gave her son-in-law to understand that she expected him to buy her a new one. The man was of a selfish disposition, and the idea of squandering on his mother-in-law the money he had laid aside for cigars made him almost frantic with grief. Dr. Spitzka and other distinguished specialists have declared this to be one of the most remarkable cases on record.

Hydrophobia is a dreadful thing. The meaning of the word is "dread of water."

No doubt Pasteur of Paris and Gibier over in New Jersey can cure it if taken in time, but the surest cure is to inoculate the suspected dog with a gun just before he gets the dread disease. One ounce of lead administered internally is better than a ton of subsequent cure. To ascertain if the dog is going to go mad watch his actions closely when a milk wagon passes. If he acts strangely have him destroyed at once.

The person who has a dog for a pet has to run the risk of the animal going mad. Instead of coming up smiling and feeding out of his master's hand, as he has been taught, the dog may suddenly get mad and feed on his master's leg without any teaching whatever. Even a dog that was not mad has been known to seize his master's wooden leg—he was a veteran of the war—and held on in spite of energetic efforts to make him desist. He just simply wooden leg go. This is what the owner of a dog may expect at any time in return for kind treatment. Still, if there were no dogs a great many people would have nothing to love—no object in life.

If, in picking out a dog, you select one that barks, under the impression that he will not bite because the proverb says "barking dogs do not bite," you are liable to be deceived. Of course a barking dog does not bite, because he cannot bite while he barks, but he may bite after or before he barks. Remember this in picking out a dog.

In conclusion, the authorities all agree that the very nicest dog to have is a crockery dog. His advantages over the live quaduped are numerous and manifest. If you want to train him he can be easily broken. You can add to his attractiveness by painting landscapes or portraits of prominent citizens on him. You don't have to watch him for hydrophobia. If you set him to watch anything you can rely on his watching until the heavens are rolled up as a scroll.—New York Herald.

Sorry to Part with It.

Ward—Why did you bite that dollar you loaned me; to see if it was good?

Randall—I wasn't biting it; I was kissing it good-by.—Harper's Bazar.

A Wonderful Cannon.

In process of construction at the gun factory in Watervliet is a 10-inch gun, which, when completed, will be one of the greatest caliber and most wonderful in its design ever made in this country. This huge gun will be built according to Capt. Crozier's latest design of wire winding. Capt. Crozier is located in the ordnance department at Washington, and the present gun is the fourth of its kind in existence. The work of boring the gun has been completed, and it will be placed in the lathe preparatory to commencing the wire winding.

The square wire to be used will be of steel, as is also the gun proper, a tenth of an inch in thickness and will be wound from the breech to the muzzle the entire length. To produce the desired work a dynamo has been placed in the gun factory, which will be utilized to weld the ends of the wire by electricity. When completed it is expected that this gun will throw a 560 pound projectile from twelve to fifteen miles, the greatest distance yet accomplished. The weight of the powder charge will be about 230 pounds, and the penetration will be, it is expected, about twenty-four inches in armor plate.—Albany Argus.

A Belfast Youth's Experiment.

One of our young men asked his father for the horse the other evening to go to Northport. But the old gentleman allowed that he and his wife would go themselves, and soon after did go, leaving behind a mad young man. But he finally hit upon the idea of harnessing up the cow. This he did into the best buggy. The cow was very docile until he tried to drive her. When she felt the weight of the wagon attached to her she gave one bellow full of fright, and with tail over her back she ran kicking and plunging through the garden, tramping the vegetables and knocking down bean poles, the young man clinging on to the seat, howling for some one to stop her.

But nothing could stop her. Finally a stone wall got in her track and she cleared it in grand shape; but the buggy, young man and harness were so badly mixed up that a neighbor who came to the rescue could not tell one from the other. The cow has not yet been seen, but the ruin she left behind will forever be a monument to her wrath. The buggy was carried to the barn in a bushel basket and the young man on a stretcher.—Belfast (Me.) Age.

Oarsmen at Harvard.

I noticed the other day in the papers an item about Harvard college which, if not an error, is a striking indication of the growth and magitude of the athletic spirit there. It was to the effect that eighty members of the freshman class are candidates for their class crew. What a change is this from a period even so late as fifteen or twenty years ago, when (at least so I understand from the graduates of about that period) a dozen men would be about the number of freshmen who had this commendable ambition. Of course the classes have grown since then, but in nothing like a similar proportion. I, for one, am not alarmed by the athletic tendencies of the modern student. I have seen so many intellectual men hampered all their lives by want of vigor, and so many commonplace men succeed by dint of nervous energy and nervous composure, so to say, that I don't care how much time the boys spend in cultivating their muscles and their physique.—Boston Post.

No Change.

W. W. Welling, stamp clerk at the postoffice, is very popular with the public, and his return to duty after a few weeks' absence recently was hailed with satisfaction by many. Mr. Welling has an impediment in his speech. Shortly after his return a well known business man came to the window for some stamps. Mr. Welling tore off a sheet and threw out the change in his usual brisk manner.

"Well, I see your right hand hasn't forgotten its cunning," remarked the patron.

"No," responded the clerk, without changing his expression, "b-b-but my t-t-t-tongue still c-c-c-cleaves to the r-r-roof of my m-m-mouth."—Indianapolis Journal.

Full Fare for the Corpse.

On a train from Aurora to Chicago the other day a strange incident occurred. A poor man, accompanied by three children, was bringing the corpse of his wife to the city. He was provided with a ten-trip ticket, and said he had been told by the station authorities at Aurora that the fare for himself and children and the body of the wife could be punched from the trip ticket. The conductor insisted upon full fare for the corpse, "and intimated that if he did not get it he would have to put the body off." A disinterested passenger thought the man had sufficient sorrow without being compelled to argue with the conductor, and paid the fare.—Philadelphia Ledger.

Weather signs conflict this year with the usual regularity. A covey of partridges took shelter in a Norristown outshed, and the prophets predict a cold winter on the strength of the visitation. A swarm of bees have celled up a home near the top of a Sunbury oak tree, and the prophets predict a mild winter.

The emperor of Austria has subscribed upward of £100,000 toward the various funds which have been raised for the relief of the sufferers by the late floods in his dominions. The archdukes, his majesty's brothers, have given £80,000.

The police at Chillicothe, Mo., are in hot water. An enterprising advertising firm distributed a wagon load of whistles to the children of that place, and the noise they make is identical with that of the police whistle.

The Anglo-French postal convention signed in Paris on Sept. 24, 1856, which expired on the 30th ultimo, has been prolonged until Dec. 31 of this year by exchange of notes between the two governments.

CRAIN'S POKER STORY.

Why he Wasn't Shot on the First Night,

AND HOW HE ESCAPED ON THE SECOND.

The Doughty Congressman's Quick Wit Saves His Life.

Congressman Crain, who represents the Galveston district of Texas, tells some remarkable stories of poker playing in that state during war time. It was an epoch there of lawlessness and mob rule, and personal bravery was the quality of leadership. One night he was playing in a game with three or four others, one of them a desperado named Boyd. The latter took advantage of the conviviality of the proceedings to hold out a card, and Crain saw him do it. On the spur of the moment Crain said, "Boyd, you are cheating!"

It was a foolish thing to do, unless with pistol in hand, because it meant immediate murder. But, to the surprise of every one, Boyd simply turned very pale laughed and replied, "Crain boards at my house, you know, and so I can't afford to shoot him."

The next evening Boyd came uninvited into Crain's room, where some other men were, and offered to play Crain a game of two handed "freeze out." The latter assented and they sat down at the table, while the rest drew their chairs back and waited for the tragedy they supposed was coming. A few minutes later Boyd again cheated, so openly that he doubtless intended to be caught, and Crain at once charged him with the offense.

Immediately Boyd leaped to his feet, seized two chairs and threw them into the air. One of them struck Boyd as it fell, and he drew the pistol he had ready, crying, "Crain, you hit me with a chair!"

"Like a flash," says Crain, in telling the story, "my instinct as a criminal lawyer came to my aid. I saw that his purpose was to claim self defense in shooting me. So, without stirring from my seat, I pointed my finger at Boyd, who had me covered with his gun, and said: 'Boyd, you know that isn't true. I haven't touched you. If you want to fight I'll accommodate you anywhere you like and with any weapons within an hour of this time. Let's fight, if need be, but there's no occasion for murder!'"

Crain's coolness of action saved him and the duel never came off, because friends interfered. He lived to secure Boyd's acquittal of murder subsequently. Later on, however, Boyd was killed with his boots on in a row.—Washington Star.

A Horse's Intelligence.

When Sunday comes my horse knows that I am not proceeding on my professional rounds, but he will put on his best style and proceed to the accustomed church, when, without any guiding on my part, he will land his load at the church door, and woe to the team that may chance to get in ahead of him. On no other day of the week will he make the attempt to turn up into or pay attention to the road leading to the church.

Two weeks ago, on Sunday, I took my wife out for a ride on Bolton mountain, and in going had to pass a church, one to which the horse was not accustomed to go, when to my surprise he was bound to stop. It was only with some difficulty that I got him past the post. About a mile and a half farther on he came to another church, one at which he has never been accustomed to stop. To my surprise John made another strong effort to stop. On any week day he will pass that church daily without paying it the least attention.—A Physician in Hartford Times.

Cultivating the Rubber Tree.

The threatened dearth in the world's supply of rubber has led to the formation of a syndicate to cultivate the rubber tree on a large scale. In Ceylon steps have already been taken to carry out the same idea by sowing the seed of the cerea in patches of jungle, and the supply of rubber from that island promises to be, in a few years, double what it is at present. Encouraged by the apparent success of this experiment, the syndicate proposes to carry on the rubber cultivation on several large estates in the southern part of Mexico, not far from the gulf, where the climate will be most favorable for their operations.

The rubber tree grows with great rapidity, and a tree of average size will yield about twenty gallons of milk, which is equal to forty pounds of dried rubber. From the testimony of experts it is found that this yield will give a handsome return on the capital to be invested.—New York Telegram.

How a Chinese Druggist Prescribes.

The Chinese druggist and his clerks wear the same haughty and secretive airs which so become their Caucasian co-laborers. Should an ailing fellow countryman call at the establishment to have his pains relieved and his ills cured, he merely steps into the store. The druggist's knowledge of Mongolian diseases enables him to diagnose at once where the seat of the suffering man's ailment lies. The wise and all discerning pharmacist shrugs his shoulders and mutters a word or two.

A clerk steps up to a box and draws forth a dried snake, coiled and held in that position by skewers. He passes it to an attendant, and while the patient is counting out his two dollars the snake is reduced to a powder and put in a paper package. The sufferer goes his way with a gleam of hope in his eyes, for every Chinese knows that snake powder is a determined foe to rheumatic pains.—San Francisco Chronicle.

Old Words and New.

Some of the words used by old fashioned country people, and laughed at by those who hear them, are not corruptions of language, but merely survivals of old forms—forms so old that many educated persons have forgotten, or perhaps have never known, that they were once in good and regular standing as English words.

If an old woman "axes your pardon" she is speaking as the most careful English scholars spoke for hundreds of years, down almost to the end of the Sixteenth century. Thus in Wycliffe's New Testament—about 1380—we read, "What man of you is, that if his sone axe hym breed, whethir he wole take hym a stoon?" And Coverdale's translation of the gospel according to St. Matthew, published in 1535, has "Axe and it shall be given you."

So, too, when the same old woman says "piny" instead of peony, she is only following the ancient usage. In William Browne's "Britannia's Pastorals," printed in 1616, the poet contrasts "the ruddy piny with the lighter rose."

It amuses the schoolgirl of the present day to hear lilacs called "laylocks," but Walter Savage Landor always said "laylocks," following, as his biographer tells us, a pronunciation "traditional in many old English families."

When an Irishman speaks of his "fader and moder" he is guilty of nothing worse than talking older English than we are accustomed to hear. "Worschipe thi fadir and thi modir," says Wycliffe's New Testament.

"Axe," "laylock" and the like are now vulgarisms, and as such are to be avoided, but it is well enough to know that they were once as well received in good society as their successors are at present.—Youth's Companion.

How Insects Breathe.

If we take any moderately large insect—say a wasp or a hornet—we can see, even with the naked eye, that a series of small spotlike marks run along the side of the body. These apparent spots, which are eighteen or twenty in number, are in fact the apertures through which air is admitted into the system, and are generally formed in such a manner that no extraneous matter can by any possibility find entrance.

Sometimes they are furnished with a pair of horny caps, which can be opened and closed at the will of the insect; in other cases they are densely fringed with stiff interlacing bristles forming a filter, which allows air, and air alone, to pass; but the apparatus, of whatever character it may be, is so wonderfully perfect in its actions that it has been found impossible to injure the body of a dead insect with even so subtle a medium as spirits of wine, although the subject was first immersed in the fluid and then placed beneath the receiver of an air pump. The apertures in question communicate with two large breathing tubes, which extend through the entire length of the body.

From these main tubes are given off innumerable branches, which run in all directions and continually divide and subdivide, until a wonderfully intricate network is formed pervading every part of the structure and penetrating even to the antennæ.—Lutheran Observer.

Effect of Cold and Accident on Hair.

Arctic voyagers and other travelers in frigid regions have frequently been subject to canities as the effect of cold, a circumstance quite in keeping with the fact that animals, such as the bear, fox and lemming, inhabitants of the extreme north, have hirsute coverings of white. The writer was once acquainted with a man named Sweeny, formerly a sailor, whose hair was jet black except a snow white tuft about the middle of the frontal suture, where the scalp had been taken off through a fall from a mast on shipboard. Where burns and severe local inflammations have resulted in a loss of a portion of the scalp, the injured part has similarly been covered in many cases with a growth of white hair.—Hyland C. Kirk in New York Times.

When a Man Flatters.

As many sirens as there are, so many are their ways of charming. There are assaults and there are sieges, open battles and ambuscades. The platonic affection stalking horse is one of the most frequent. There is ever danger present when a woman listens with patience to a man's talk about himself. Woman flatters man on the qualities by which she enslaves him. A woman never tells a man that his will is of iron, save when she is bending it to her own uses. Some are attracted by the simplicity of a character; but to many the difficulty of understanding a character constitutes its greatest, perhaps its only, charm, so that when once they have probed it they throw it aside as of no more interest.—Murray's Magazine.

Not Cast Down.

"I have always held," said a cheerful man, "that a happy disposition and ample wealth would enable one to bear up pretty well under the ordinary misfortunes of life. Riding up town the other day on the elevated railroad I sat next to a fine looking couple, evidently husband and wife, and evidently possessed of abundant means. As they chatted along pleasantly together he mentioned incidentally the fact that he had that morning lost $4,000 on stocks. She said, 'Did you?' and then they didn't bother about that any more, but branched off on something else."—New York Sun.

A Two Edged Argument.

Fraulein Silberstein—Why, papa, you might have advanced that money to Lieutenant Von N——!

Herr Silberstein—I know him too little.

Fraulein S.—Ach, that is only an excuse, for you refused Herr X—— as well only the other day.

Herr S.—I know him too well.—Lustige Blatter.

Knew What He Wanted.

Seedy Individual—Introduce me to your friend.

Jones—Not much. I'd rather lend you the money myself.—Harper's Bazar.

POISONS FOR ARROWS.

Methods Practiced by Savage Tribes.

HOW THE DEADLY STUFF IS OBTAINED.

Rattlesnake Venom and Decomposed Deer's Liver.—Crushed Reptiles.

"The use of poisoned arrows is undoubtedly of very ancient origin," said Dr. W. J. Hoffman. "They are believed to have been employed in Europe in prehistoric times, and later on, according to Aristotle, Strabo and Pliny, the Celts and Gauls envenomed their shafts with the juice of a plant of the genus hellebore. The Scythians prepared arrow poison by mixing serpent venom with the serum of putrid blood, and other instances are recorded in literature of peoples in the Black sea and in Asia Minor who practiced similar arts.

"The Alnos of Japan prepare a poison for spreading upon bamboo or metal arrow points to kill game with, a small portion of flesh about the wound being cut out before the animal is cooked and eaten. In Java, Borneo, New Guinea, and other of the East India islands the same practice obtains to a considerable extent. The poisoning of arrows prevails extensively in Africa, particularly on the west coast, in the Gaboon, among the Somali, and with the Bushmen. By the Bushmen the juice of a plant is used, mixed with the pulp of a venomous worm.

"The best known and most active of poisons is the woorara or 'urari' of South America. It is chiefly used for the tips of darts blown from the blowgun, and the most imporant ingredient is the juice of the plant from which strychnine is obtained, to which is added certain other vegetable elements and serpent venom. In Central America poisons are also employed on arrows and blowgun darts. The Caribs employed a poison made from the sap of a tree called the 'mancenilles.' The antidote was the application to the wound of what we know as 'arrowroot.'

"The Seris of northwestern Mexico prepared poison by putting into the ground a cow's liver, rattlesnakes, scorpions, centipedes and other unpleasant things and beating them with a stick. Into the mixtures the arrow points were dipped. The Apaches and neighboring tribes were until recently in the habit of smearing upon their arrows a composition said to consist of decomposed deer's liver and rattlesnake venom. In some instances crushed red ants are also reported to have been used. A microscopic examination of such a coating upon arrows obtained from Apaches in 1871 showed the presence of blood and a crystalline substance that was apparently rattlesnake venom. The venom of serpents retains its poisonous properties, when dried, indefinitely. One instance of poisoning by such an arrow mentioned to me was that of a man whose wound was a mere scratch on the shoulder blade, but previous to death, which ensued, the flesh of the man's back fell off, exposing the ribs and spine in several places.

"The Shoshone and Bannock Indians state that the proper way to poison arrows, as formerly practiced by them, is to secure a deer and cause it to be bitten by a rattlesnake, immediately after which the victim is killed, and the meat removed and placed in a hole in the ground. When the mass has become putrid the arrow points are dipped into it. The Clallams of Puget Sound used to make arrow points of copper, which were afterward dipped in sea water and permitted to corrode. I have never met an Indian who would admit the use of poisoned arrows in warfare against man. In nearly all instances when poisons are prepared by Indians the operation is performed with more or less ceremony, chantng and incantation for the purpose of invoking evil spirits or demons. In their belief the effects of poison are due wholly to the presence in them of malevolent spirits or demons, which enter the body of the victim and destroy life."—Washington Star.

"Chivalrous!"

An exciting story of the rescue from drowning of a Japanese, by an Englishman whose life the Japanese himself had set out to save, is told in a Japanese paper, The Kobe Shimbun. The Englishman was a resident of Tokio. Being on his way to Yokohama, and finding no ferryboat, owing to the swollen state of the river, he determined to swim across with his clothing in a bundle tied on his head.

The daring attempt attracted a crowd of sightseers, one of whom, observing that the stranger was apparently in difficulty, plunged in and swam to his rescue. The Japanese was a good swimmer, but the waters ran swiftly, his strength gave out and he was carried down stream. Then arose a cry from the spectators, for they saw that the Japanese was going to sink.

By this time the Englishman had almost reached the opposite bank, but when he heard the cries of the crowd he turned about, and seeing the drowning Japanese, he again faced the current, and coming up with the drowning man, caught him with one arm and swimming with the other hand he brought him ashore amid the cheers of the crowd.

"How chivalrous was his action!" exclaims the Japanese journalist in conclusion. "His name we know not, but he has our highest admiration."

Redeeming Mutilated Currency.

Mrs. Rosenburg came into the treasury department in 1863, soon after the division was organized, and holds one of the best positions at the present time. She is an expert at the work of putting into shape mutilated money. Such money comes to the treasury from all parts of the country by mail and express. Any individual is at liberty to send it for redemption. Some of it is very bad. Mrs. Rosenburg tells of an instance where she recovered some bills which had been in a pocketbook and nearly destroyed by fire. The money had shriveled into a small round wad, and it seemed a hopeless task to bring it into recognition again, but with much care and a great deal of patience it was accomplished. The first business is to put the mutilated particles into water, so that they may unfold to their fullest extent, then they are pasted on paper to form as perfectly as possible the original bill. It requires a quick eye and a dexterous hand to make the most of this money.—Washington Cor. New York Press.

Mr. Girard's Watchfulness.

Stephen Girard, the once famous millionaire of Philadelphia, if he was here today, would probably be an enemy to the present half holiday system. He employed a corps of clerks, whom he kept at their duties from early morn until midnight, watching them very closely. If he saw their eyes growing heavy over their evening duties, he would kindly send an old colored man in with a steaming pot of hot coffee to keep them awake until their work was finished.—Chatter.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, JANUARY 22.....1892

The recent election of a United States Senator in Ohio deserves more than mere passing mention. It is a matter of national importance. Sherman entered politics a poor young man; he is now a millionaire. Had those millions been taken from the people of Ohio the citizens of other states need not be much concerned about the matter; but there is not a State or Territory in the Union whose citizens have not been fleeced to contribute to the wealth of John Sherman. He is a cunning and unscrupulous politician, only that and nothing more. He has used his official position to put relatives and tools into every political office where they could help continue him in power. He has been able to throw the doors wide open and tell his creatures in Ohio to walk in and help themselves. They were not slow to seize the opportunity, and now the creatures of Sherman are in office all over the country. This is how he is able to secure his reelection to the Senate. Of course he has not been able to secure an office for every man of his party in Ohio, and those who were left out have revolted and followed another leader. Doubtless many honest men in Ohio bitterly opposed his election, because no honest man can support such an unscrupulous, selfish man as he is. The administration lent all its influence to secure the reelection of Sherman, and this will not be forgotten when nominations are again to be made. Whether the free coinage of silver be right or wrong, it will never be forgotten that Sherman procured the demonetization of that metal by an act as criminal and dishonest as forgery. John Sherman is a bad man and a bad citizen and to continue him in the Senate is an injury to the people of the whole United States.

When two men of such world-wide fame as Cardinal Manning and the Duke of Clarence and Avondale die on the same day from the same disease—the malady which is popularly know as the grip—it cannot fail to attract attention to the ravages of this disease, which, it is now admitted, is a genuine epidemic. It is not necessary here and at this time to say anything biographically of the men whose names have been mentioned. They are part and parcel of current English history and of the history of the world. Born in wholly different stations and called upon to exercise wholly different duties and functions, both were men of note and distinction and men whose decease will leave a gap not easy to fill. So far as the epidemic itself is concerned it can only be repeated that the surest remedies are preventive in their nature. The grip usually begins with what seems like a mere cold, but this year it develops rapidly into bronchial and pulmonary affections, which it seems almost impossible to counteract. If there be a weak spot in the throat or lungs the grip finds it unerringly. Obviously, then, the proper measures against the grip are precautionary ones. Avoid taking cold, keep the system in the best order possible, and shun excesses of any kind, and in this way one may as a rule avoid a disease which seems trifling in its incipiency, but which is often fatal in its results.

A striking and somewhat amusing instance of Republican consistency and political honesty has just been furnished. While the Republicans of the Ohio legislature were denouncing the Democrats of New York for stealing two State senatorships, they coolly proceeded to throw out a Democratic senator who had received a majority of the votes cast, and give his seat to a Republican. This practice of unseating Democrats is so common with republican majorities that it hardly excites attention. No Democrat ever expects fair treatment in in a legislative contest from a Republican majority, and he is never disappointed. The Republican party has always grabbed everything in sight whenever it had the power, and has never cared a button about the rights and wrongs of a case when an advantage is to be gained.

The $1,000 offered by the chairman of the Republican State committee for the original ancient pardner letter will have to be forthcoming, as it looks now, the court having overruled the demurrer to plaintiff's complaint to recover the same. It now becomes simply an issue of fact, and there's no doubt the Republican bluffers have found themselves up a Stump, so to speak.

The Apparition in the Elevator.

Some years ago a young man came to Chicago from Germany. His father had cut him off from his annuity. He lived in the same house where I lived. He finally obtained a place in one of the big grain elevators here. I do not know what the place was except that he had something to do on the top floor, away up under the roof. Several men were employed with him in the same place. One day while he was dusting he suddenly stopped and asked his assistants who that nicely dressed old man was that was standing back there by the shaft. Strangers are never allowed in these big elevators, and to see one there well dressed was enough to excite comment. His companions looked in the direction indicated and said they saw no one. He insisted, and when they laughed at him he went to the place where he saw the figure standing. On his approach it vanished.

The young man fainted. He recovered and then asked his companions to make a note of the occurrence, the date and the time of day. He said the figure he saw was that of his father. In twelve days he received a letter from the old country telling him of his father's death. The date and time agreed with the date and time of the occurrence I have described. The letter informed him that his father had forgiven him and remembered him in his will. He returned to the fatherland, got his portion of the estate and is living there now. You may say what you please, but I have never felt like scoffing from the time I heard this story. The spirit of that boy's father appeared to him on the top floor of that elevator.—Eugene Field in Chicago News.

Why the Shark Is Always Hungry.

As it is a source of wonder how the flea manages to exist in the sand, where his chances of obtaining a meal may not occur once in a lifetime, so naturalists are puzzled as to how the shark maintains himself. The ocean is wide, and the number of men who fall overboard small indeed in comparison to its area. The vast proportion of sharks, then, must go through their lives without a remote chance of obtaining a meal at the expense of the human kind.

There is no ground for the supposition that the shark can exist upon air; he is not like the whale, provided with an apparatus that enables him to sweep up the tiny inhabitants of the seas. He is too slow in swimming, and infinitely too slow in turning, to catch any fish that did not deliberately swim into his mouth; and unless we suppose that, as it is said of the snake, he exercises a magnetic influence over fish and causes them to rush headlong to destruction between his jaws, it is impossible to imagine how he obtains a sufficient supply of food for his sustenance.

Indeed, it would appear that it is only when he gets the good luck to light upon a dead or badly injured fish that the shark has ever the opportunity of making a really square meal. His prolonged fasts certainly furnish an ample explanation and excuse for his alleged savagery of disposition.—London Standard.

Uses for a Bottle of Gold Paint.

A twenty-five cent bottle of gold paint is a capital investment for any woman. She will find a dozen occasions for its use every week of her life. Perhaps she chips some bit of Japanese or other fancy porcelain in dusting; a brushful of gold paint over the chip will make everything right. A gilt picture or mirror frame may be bruised or tarnished; call in the little bottle again and remedy in five minutes and for a fraction of a cent a damage the cabinet maker would charge a dollar to repair and keep your frame a couple of days besides.

By the by, you girls who are clever with your paint brushes, did you ever spend a few dollars at the damaged counters of the large Japanese stores? Do you know that you can buy for a trifle lovely delicate vases and bits of oriental wares that would sell for many dollars were it not for a crack or a chip somewhere. Buy them joyfully, take them home tenderly and spend half an hour with your paint box, filling up the nick with flour paste, plaster of paris or putty. Any of these will take color nicely, and if carefully painted and dried the vases will be practically as good as the best.—New York Press.

An Ideal Way to Live.

"The man I marry," quoth a vivacious young woman the other day, "has got to promise to give me a yacht home. I've just been visiting some friends who live all the year round on their yacht. During the summer they cruise about our northern waters and in winter go south, taking in the Mediterranean, Japan or Norway and Sweden by way of occasional outings. The yacht, a large schooner, is gorgeously fitted and has every needed convenience, comfort and luxury, including a well stocked library, aboard. It is an ideal existence—no calls to make, no balls, no shopping, no uncomfortable gowns, sunshine, fresh air and the starlight—what can one want more?"—Her Point of View in New York Times.

Where Amber Is Found.

The largest quantity of amber is found on the southern shore of the Baltic, between Memel and Konigsberg, where it is cast up by the action of the ground swell after the northerly gales. It is also found on the coast of Sicily, on the shores of the Adriatic, on the English beach of Norfolk and Suffolk and at Cape Sable in Maryland. Mining for amber in beds of brown lignite or wood coal is carried on in Prussia, and it is found in excavations all over Europe.—Philadelphia Times.

A Short Lived Lake.

"A month hence," says a California engineer of reputation, "the Salton lake will have dried up." Salton lake, it will be remembered, is the shallow inland sea which was formed by a break in the Colorado river, whose waters in modern times, at least, flowed into the Gulf of California, as we know it. The basin of the short lived lake, however, was once a part of the gulf, and if the flow of water had continued some modern improvements might indeed have been effected. The river will not boom again till spring, when the lake may refill. Any device that could render it permanent would have a mitigating effect upon the dreaded Arizona climate, of which dire stories are told. Worse things could happen than the tapping of the Colorado river higher up, so that all its waters might flow into the old channels and make the wilderness blossom with the rose.—New York Commercial Advertiser.

NEW LONDON IN WAR.

The Strategic Value of a Connecticut City in the Defense of New York.

Navy officers who have studied the region have often and urgently pressed upon their department the importance of developing the station at New London and making it efficient. One must admire their energy and faithfulness in continuing to lay before their superiors the vital importance of strengthening this strategic base in the outer defense of New York in the face of long continued pigeonholing of reports. That their anxiety is not unfounded becomes plain when we consider that Great Britain has a powerful station at Halifax, from which, if so disposed, she could hurl her thunderbolts of maritime war upon this unprotected spot at very short notice, precisely as she could strike our South Atlantic coast from the Bahamas. She may never even wish to do either thing, but isn't it rather foolish to remain unprepared for the blow when we have ample resources for establishing a guard against it?

The amount of trade that passes through Long Island sound coastwise is hardly conceived of by the majority of citizens. It amounts to a great many million dollars' worth a year, and all this trade could be paralyzed by a quick stroke from a foreign navy. In 1889 the entire munitions of war manufactured in the United States amounted to $11,000,000. Of this total, $9,000,000 worth was manufactured in Connecticut alone. A foreign fleet in the sound, therefore, would be able to deprive us of our main source of munitions without even attempting to attack New York.

Cut off a city's supply of air and what would it matter whether that city surrendered or not? Shut off from New York in war time nine elevenths of the material it needed for war and it would be as helpless as a city without air to breathe. But this is not all. An enemy in the sound could cut at New London and again at New Haven, the chief lines of land communication and railroad transportation between New England and New York.

If of the loss which would thus be caused a small percentage were now to be promptly applied to building up New York's outer line of defense, with a strong navy yard at New London as its base, the whole cost would be defrayed in a few years without inconvenience to any one. In time of action, while our battle ships and cruisers patrolled the Race or engaged the enemy, with support from the forts, our monitors, emerging from New London, would lurk safely behind Fisher's island, prepared to assist; for there again, on the north face, nature favors us with the sheltered waters of Hay harbor and West harbor. In case of injury, vessels could quickly run into New London, and repair at the navy yard. Thus, while the surroundings and topography are not the same as those of the entrance to the Mediterranean, we should still have what might well be called "an American Gibraltar," quite as invulnerable as the stronghold at the pillars of Hercules, and much greater in range.

Boston can be equipped effectually to defend herself; and Newport also, if fortified, is in a position to ward off an enemy. But neither of these, by so doing, can help to defend New York. New London, on the other hand, if her natural advantages are utilized, can repel any attack on New York from the east, and thereby relieve the metropolis from dread in that quarter. It is well, it is indispensable, to protect New York from assault by way of the Narrows. But what will it avail to bar that small front door if the broad rear entrance through the sound be left undefended?—G. P. Lathrop in Harper's Weekly.

A Chance for a Fortune.

There survive in this city a few hand cork cutters who still contrive to make a sort of living in competition with the cork cutting machines and the peasants of Catalonia. One of these men hangs out a curious sign in an east side street. It is a glass case containing the model of a house all of cork. It is possibly the house that Jack built, for there are bits of cork to simulate bags of grain. The factory is a shed in the rear of an ordinary dwelling house. Here, with the aid of some simple machinery, the cork cutter manages to eke out an existence. His chief grievances are the competition of machinery and the problem of disposing of the waste.

Light as cork is, tons of clippings accumulate, and although various uses have been discovered for this refuse, it brings little or nothing when sold, and constantly accumulates to the embarrassment of the corkcutter. There is a comfortable little fortune for the man who shall devise some really profitable use for cork clippings.—New York Sun.

How They Got Along.

A Nantucket woman tells of the annoyance to which the Mitchell household was subjected, after its daughter, Maria Mitchell, became famous, at the hands of two importunate tourists. Its privacy was so persistently and unwarrantably invaded that its members felt occasionally that politeness ceased to be a virtue. One persistent woman, who got herself admitted on a shabby pretext, so wearied a sister of Miss Mitchell, into whose hands she fell, that when the woman after a series of searching questions wound up with, "And what do you do in this dull town after the tourists are gone?" the other replied, with a drawl natural to her, "Oh, we cut off our coupons."—Exchange.

Mysteries of Manufacture.

Cigar Manufacturer—Yes, sir, it's an actual fact that cigar boxes are not made out of cedar at all; they are made out of paper and colored with cedar extract.

Friend—Well! well! Now won't you please tell me what cigars are made of?—Good News.

A valuable antiseptic soap is made by adding twelve parts of sulphate of copper to eighty-eight parts of any good soap. It will readily heal sores and scratches and is devoid of any irritating action.

Lobsters Dig Clams.

There is nothing which lobsters, when grown, are so fond of as fresh fish. Flounders and other bottom fishes frequently fall a prey to their appetite, and sometimes they will nimbly capture small minnows as the latter go swimming by. They dig clams out of the mud or sand and crush the shells of mussels with their claws, devouring the soft parts.—Washington Star.

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,
C. MULHOLLAND,
Independence.

COURT NOTES.

Geo. M. Gill, Superior Judge.

SATURDAY, January 16, 1892.

Estate of Henry J. Evans, deceased—Filed petition for probate of will.

Estate of Alexander Spencer, deceased—Filed petition for probate of will.

Estate of J. C. Eddy, deceased—Filed return and account of sales of personal property and petition for confirmation of same.

MONDAY, January 18, 1892.

A. D. Gilbert vs. J. W. Robinson—Filed complaint.

WEDNESDAY, January 20, 1892.

Annie Harry vs. Robert Harry—Clerk's entry of default.

Estate of Benjamin F. Theban, deceased—Filed claim of estate of Thomas Parker deceased.

W. H. Russell vs S. P. Smith—Filed Sheriff's certificate of sale on foreclosure.

DIED.

WEBB—At Independence, January 17, 1892 Nellie Sybil, daughter of Mr. and Mrs. T. Webb, aged 5 years, 1 month and 20 days.

Rudolph Schober of Bishop was in town to day.

Jake Tracey was down from Big Pine on Wednesday.

Mr. W. K. Miller was up from Lone Pine on Monday.

First quality of beef steers are quoted at 5¼ to 6 cents in San Francisco.

See the price list of Wiener's Cash Store at Fresno published this week.

Hon. P. Reddy is expected to arrive at Independence on Monday's stage.

Mr. James A. McKenzie of Darwin was in town at the beginning of the week.

W. H. Russell of Benton is in town. He expects to return to Benton to-morrow.

Charley Summers, the Bishop cattle king, has been at Independence several days this week.

The Duke of Clarence and Avondale eldest son of the Prince of Wales, died last week of the grippe.

Dr. S. A. Crapman, the Bishop dentist, is at the Norman House, where he will remain for a short time.

The fastest quarter-mile recorded was made by Sleepy Dick at Known, Kansas, Nov. 24, 1888, the time being 0:21½, 0:22¼.

Mr. J. J. Gunn is reported to be doing well at the Minnietta mine and is sending out a good deal of ore to Keeler for shipment to San Francisco.

O. I. Mains of the Norman House has received a fine lot of fresh Eastern oysters. Guests at that popular hostlery will have a chance to sample them.

Henry Raine started for San Francisco last Sunday. It is said that N. Raine is quite ill in San Francisco and that Henry went in response to a telegram.

Louis Scrabbell has returned from Los Angeles. He reports the horse market there as being very dull. Rowan had made a few good sales but had most of his horses yet unsold.

The Indian tried in the Justice's Court last Monday for stopping "Shorty" Cannell on the road was acquitted, there not being sufficient evidence to hold him for trial in the Superior Court.

Independence bids fair to be quite lively next week. There will be upwards of a hundred visitors in town connected with the two cases to be tried in the Superior Court on Wednesday and Thursday.

Under-Sheriff Holland has been up in the north end of the county during the week serving subpoenas upon witnesses and summoning jurors to appear at Independence on Wednesday of next week.

On Wednesday word was received that Frank Fitzgerald was very ill at Modoc. Dr. I. J. Woodin went down and met him at Keeler, but as the doctor has not yet returned no particulars can be ascertained.

The political pot is beginning to get into a lively simmer over in Kern county and we notice the names of A. R. Conkling and J. W. P. Laird occupy prominent positions as the possible candidates for the Superior Judgeship.

Bertrand Raine has received word that his father's health has not improved, and that he is in a critical condition. Bert will start for San Francisco on to-morrow's train. Henry Raine will return to Independence on Monday.

As we have heard of no other affair for Washington's Birthday, we venture to suggest that an entertainment be given for the benefit of the school organ fund. A considerable amount has already been raised, and a successful play would complete the fund.

Edna Matlack, the elder daughter of Mr. and Mrs. W. F. Matlack has been very ill for the past week with the grip. Dr. Woodin is in constant attendance and no serious result is apprehended. The grip is a very insidious disease, however, and the parents are wisely adopting every precaution to prevent a fatal termination.

Foot race Gossip.

A talk with Rudolph Schober last evening elicited the fact he is still firmly convinced that Womack is a faster man than Ober. He says he timed the former repeatedly in 10 seconds and 10⅛ on a track 6 inches over 100 yards long. He says that on the morning of the race Womack assured his backers that he would run in 10⅛ or less that day, and on that assurance they were anxious to see the race come off. But they gave Womack to understand that any trifling would result disastrously to his welfare. Schober states that Womack gave him the slip and failed to show up, which confirms him in the belief that the festive sprinter had entered into a combine with the other side and dared not win. In fact he was a dead man in any case, win or lose and wisely concluded not to run, as his skin would be in better fix without any holes in it. Of course all this is a mere opinion, and Womack may be entirely square. It is reported that he is mining in the Alabama hills, and it is quite within the bounds of possibility that a race may yet be arranged.

Darwin Doings.

At the Independence mine a very important improvement has been completed by the introduction of water to the different parts of the mine. The mine is very dry in all its parts, and when miners were at work the air quickly became so filled with dust as to make it very disagreeable and injurious to health. Mr. Reddy determined to remedy this by the introduction of water pipes to the various workings. This has been done, and now the men keep the ground all about them well sprinkled, and the air is free from dust, clear and pure. There is plenty of ore in sight, and teams are on the road all the time hauling to Keeler. There are no idle miners at Darwin; if more men could be had they would be employed at the Independence mine. The wages paid are $3 50 a day. The Defiance mine, also owned by Mr. Reddy, is reported to be looking well with much ore in sight. Mr. Lockie McFitzgerald is reported to be accumulating a large amount of ore at the furnace, with intent to make a run soon.

Keeler and Mojave Stage Line.

Since the reorganization of the Keeler and Mojave stage line about two months ago, the business has steadily increased. The time between Keeler and Mojave has been reduced to about twenty-one hours, and travelers going to San Francisco much prefer that route to the long journey around by Reno. Parties going to Los Angeles get through in about a day and a half, instead of being four days on the road if the trip should be made by way of Reno. For weeks past the stages leaving both ends of the line have been filled with passengers. As the advantages of the route become better known to the public, travel will increase.

To Keep the Peace.

Wm. Witherill has made a complaint in the Justice Court against J. F. Mulner and Archie Farrington charging them with threats against life, and praying that they be bound over to keep the peace.—Sheriff Stewart left on Sunday with a warrant of arrest. The trouble grows out of the recent suit for the possession of the Poorman claim in Furnace Canyon. *Hawthorne Bulletin.*

Horses Killed.

On the farm of Sheriff Gorman, at Camp Independence, is a large hay stack. Horses were allowed access to the stack till they had eaten into it and left a great overhanging mass on one side. Some days ago the stack fell over and at least one horse was buried and killed. It is a very common practice to allow horses and cattle to eat from haystacks, and unless some precautions be taken similar accidents may occur.

This week it becomes our painful duty to record the death of Nellie Sybil Webb, the little daughter of Mr. and Mrs. T. Webb. Naturally a frail and delicate child she could not withstand an attack of the prevalent grip, and her death resulted from that fell disease on Saturday morning last. The funeral took place on Monday, and the entire community expressed their deep sympathy with the bereaved parents by their presence.

NOTICE OF SALE OF PERSONAL PROPERTY AT PUBLIC AUCTION.

NOTICE IS HEREBY GIVEN THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the 9th day of January, 1892, in the matter of the estate of Francisco Padres, deceased, the undersigned, administratrix of said estate, will sell at public auction, to the highest bidder, for cash, gold coin of the United States, and subject to confirmation by said Superior Court, on the 6th day of February 1892 at one o'clock p. m., at the late residence of said deceased, in the town of Lone Pine, County of Inyo, State of California, all the right, title, interest and estate of the said Francisco Padres at the time of his death, and all the right, title and interest the said estate has, by operation of law or otherwise, acquired other than or in addition to, that of the said Francisco Padres at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the town of Lone Pine, County of Inyo, State of California, being Lots 6 and 7 in Block No. 14, as the same are known and designated on the official plat of said town of Lone Pine, now on file in the office of the County Recorder of said Inyo county.

Terms and conditions of sale: Cash, gold coin of the United States, ten per cent. of the purchase money to be paid on the day of sale, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

YGNACIA ABECHUCO
Administratrix of the estate of Francisco Padres, deceased.

Dated January 12, 1892.

DESERT LAND FINAL PROOF

D. L. No. 624.

LAND OFFICE AT INDEPENDENCE, CAL., January 16, 1892.

Dried Peaches.....10 cts
Dried Apples.....10 cts
Other varieties of dried fruit for sale on reasonable terms.

S. A. Densmore,
Independence, Cal.

$3000 A YEAR! I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a Year in their own localities, wherever they live. I will also furnish the situation or employment, all of which you can earn that amount. No money for the undertaking unless successful as above. Easily and quickly learned. I desire but one worker from each district or county. I have already taught and provided with employment a large number, who are making over $3000 a year each. It is NEW and SOLID. Full particulars FREE. Address at once, E. C. ALLEN, Box 420, Augusta, Maine.

"Of course it hurts, but you must grin and bear it," is the old time consolation given to people troubled with rheumatism. "If you will take the trouble to dampen a piece of flannel with Chamberlain's Pain Balm and bind it over the seat of pain your rheumatism will disappear," is the modern and much more satisfactory advice. 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

Our readers will notice the advertisements in these columns of Chamberlain & Co., Des Moines, Iowa. From personal experience we can say that Chamberlain's Cough Remedy has broken up bad colds for our children and we are acquainted with many mothers in Centerville who would not be without it in the house for a good many times its cost and are recommending it every day.—*Centerville (SD.) Chronicle and Index.* 50 cent and $1 bottles for sale by

A. K. EUGLEY,
Big Pine.

We want every mother to know that croup can be prevented. True croup never appears without a warning. The first symptom is hoarseness; then the child appears to have taken a cold, or a cold may have accompanied the hoarseness from the start. After that a peculiar rough cough is developed, which is followed by the croup. The time to act is when the child first becomes hoarse; a few doses of Chamberlain's Cough Remedy will prevent the attack. Even after a rough cough has appeared the disease may be prevented by using this remedy as directed. It has never been known to fail. 50 cent and $1 bottles for sale by

A. K. EUGLEY
Big Pine.

NOTICE OF SALE OF REAL ESTATE AT PUBLIC AUCTION.

NOTICE IS HEREBY GIVEN THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the 9th day of January, 1892, in the matter of the estate of Francisco Padres, deceased, the undersigned, administratrix of said estate, will sell at public auction, to the highest bidder, for cash, gold coin of the United States, and subject to confirmation by said Superior Court, on the 6th day of February 1892 at one o'clock p. m., at the late residence of said deceased, at the town of Lone Pine, County of Inyo, State of California, all the right, title, interest and estate of the said Francisco Padres at the time of his death, and all the right, title and interest the said estate has, by operation of law or otherwise, acquired other than or in addition to, that of the said Francisco Padres at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the town of Lone Pine, County of Inyo, State of California, being Lots 6 and 7 in Block No. 14, as the same are known and designated on the official plat of said town of Lone Pine, now on file in the office of the County Recorder of said Inyo county.

Terms and conditions of sale: Cash, gold coin of the United States, ten per cent. of the purchase money to be paid on the day of sale, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

YGNACIA ABECHUCO
Administratrix of the estate of Francisco Padres, deceased.

CALUMET ★ Contains Alum.	[redacted]
HOTEL ★ Contains Alum.	[redacted]
YARNALL'S ★★ Alum and Ammonia.	[redacted]
MILK ★★ Alum and Ammonia.	[redacted]
SHEPARD'S ★★ Alum and Ammonia.	[redacted]
BON BON ★ Contains Alum	[redacted]
FOREST CITY ★★ Alum and Ammonia.	[redacted]
CHICAGO YEAST ★★ Alum and Ammonia.	[redacted]
CROWN ★★ Alum and Ammonia.	[redacted]
SILVER STAR ★★ Alum and Ammonia.	[redacted]
DODSON & HILS ★★ Alum and Ammonia.	[redacted]

Above diagram was drawn and verified in all its details, by Prof. Peter Collier, who is pre-eminent as a Chemist, and Scientist. The illustration is made in accordance with his chemical tests of each brand enumerated.

The Carbonic acid gas was calculated to get the leavening strength and the quantative analysis to ascertain the comparative wholesomeness, purity, and general usefulness of the leading Powders. The result of Prof. Collier's examination and test, reveals the fact, that, with but one exception, every brand tested contained either Ammonia or Alum, and a number both.

Not one woman in ten thousand would use an Ammonia or Alum Baking Powder if she knew it. Such Powders not only undermine the health, but ammonia imparts a sallow or blotched complexion.

NOTE.—Dr. Price's Cream Baking Powder, as shown by Prof. Collier's examinations, is the only pure Cream Tartar Powder found free from adulteration and the highest in strength. All authorities report Dr. Price's free from Ammonia, Alum, Lime, or any other adulterant. The purity of this ideal Powder has never been questioned.

★ Indicates the Powder containing either Ammonia or Alum.

★★ Indicates the Powder containing both Ammonia and Alum.

While the diagram shows some of these Ammonia or Alum Powders to be of higher strength than others classed below them, it must not be taken that they possess any value. All Ammonia or Alum powders should be avoided as dangerous, no matter how high their strength.

Buy your holiday presents early and your pocketbook will avoid the rush later on.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

S. F. N. U. No. 496. New Series No. 51

HUMPTY DUMPTY.

I suppose you will think that was not her true name, but it was. She was a little colored girl, a slave, too, but she had a good master and mistress, who never ill-treated those who were dependent on them, but did all they could to make them happy.

When the baby opened its eyes upon this world her parents were much exercised over a name for her, but before it was settled it became only too certain that the poor little creature was doomed to pass through life in sad deformity. The dark, curly head settled down too far on the shoulders and the back arched behind it.

"Oh!" exclaimed Harry Fairleigh, the first time he saw the baby. "Why, mamma, she's a regular Humpty Dumpty; isn't she?"

"Wha's dat, Massa Harry, wha's dat—Humpty Dumpty?" cried Aunt Dinah, her ear caught by the new name.

Humpty Dumpty on the wall—
Humpty Dumpty got a fall,

quoted Harry, and that ended the search for a nice, big name for the little stranger, and so Humpty, as they called her, became a recognized member of the household, and by no means a useless one as she grew older.

"Humpty has more thought, young as she is, than all the rest of the slaves put together," Mrs. Fairleigh used to say, and it was true.

Humpty's master lived in Georgia on a large plantation where cotton and sugar cane grew in great luxuriance. He had a large number of slaves, whose neat little houses were scattered all over the plantation, each one with its own garden plot.

The Fairleighs had a beautiful home, plenty of money, and love and peace among themselves, so they ought to have been happy, you will think. And so they were, as far as these things went, but over all there was a cloud, a tiny one at first, but it kept on growing bigger and bigger, causing Mr. Fairleigh many an hour of the sharpest anxiety, until by the time Humpty was 14 years old the sky darkened, the thunder began to mutter, and the long looked for storm broke forth.

Mr. Fairleigh's home, which had been his father's and his grandfather's before him, was not far from the Florida line, and the Indian village of Miccosukee was only a few miles on the other side.

Florida was then a Spanish province, though the Spanish commanders had no power outside their fortified posts, and in the interior, the Seminole Indians, who, as their name indicates, were "runaways" from the Creek nation, held full sway. The Red Stick tribe of the Miccosukee village were their allies, and were called Red Stick because in the center of the village stood a tall pole painted red, to denote the warriors' thirst for the blood of the palefaces, and on it were many hundreds of American scalps.

Besides these hostile Indians there were hundreds of runaway slaves and escaped convicts roaming at will over the beautiful Florida wilderness, ready at all times to join the Indians in robbing and murdering Americans. They spared the Spaniards because the Spanish authorities in Florida encouraged their lawless acts. So, as you may believe, things were bad enough at all times, but now they were growing worse, and the Indians had declared war. For months past Mr. Fairleigh's anxiety had been intense, and again and again he had urged his wife to abandon their home until peace should be restored.

But Mrs. Fairleigh loved her home and was not willing to leave it, so kept putting off her departure.

The day came, however, late in March, 1816, when her husband came riding home from the town, twenty miles away, at breakneck speed, his face white and drawn with intense excitement.

He rode straight to the stables, called the slaves together and bade them harness all the horses and mules to the wagons. Then he came to the house and loaded up all the most valuable furniture.

"Be quick!" he ordered. "The Red Sticks are out pillaging and murdering. We must get off as fast as possible. There! There! Don't wail or moan; work, work, with all your might; that will do more good than howling!"

Then he dashed into the house, and in a moment more all there was bustle and confusion and rapid, energetic action. In less than three hours the plantation was deserted and its whole population well on the road towards a place of safety.

But of course, when the flight had been so hasty, some important things had been forgotten, and so a week later, hearing that the Indians had left that part of the frontier for the time, Mr. Fairleigh decided to return to the plantation for a few days, taking with him E Pluribus Solis (for thus had Humpty's parents named her elder brother, acting on the advice of mischievous Harry), a sturdy youth of 18, and Humpty to cook for them, for young as she was she had learned a great deal of this difficult art.

There was much to do to prepare for a long absence, so the three were very busy, and every little while Humpty, who of course felt very anxious, crept out upon the roof to look for signs of the enemy, and at last, on the second day, quite early in the morning, her heart gave a great leap as she saw over the tree tops a column of smoke rising skyward. She knew that only one thing could make such a smoke in that particular spot, a burning house, that of their nearest neighbor two miles away, and she was equally sure that the Indians were there robbing and burning, and only not murdering because the family had deserted their home.

Humpty was only a little girl, only a little negro hunchback. The sight and the shock overcame her. Head over heels like a ball she rolled down the ladder that led to the roof and lay on the floor screaming at the top of her voice. Only for a moment, though. Then she stopped, caught her breath, doubled up her fists and pummeled herself unmercifully.

"You, Humpty, you misible critter," she cried indignantly, "git right up, and run and tell massa and Solis! There now, stop yellin', and git up quick, mean, misible little nigger, you! 'Pears like yer oughter be scalped, but don't want to, no how—oh, Lord!"

Panting and breathless, little Humpty rushed across the fields to Mr. Fairleigh and her brother, and in a few moments all three were running back to the house. But before they had gone half way a shot, another and another from out the young forest warned them that their foes were already upon them.

They were close to an old log cabin, once used as a smoke house for curing bacon. It had a great chimney, built of clay and sticks, running up on the outside, and on the inside a large fireplace and two rooms.

Since the new troubles with the Indians Mr. Fairleigh had repaired the old cabin and built a high, strong picket fence around it, intending, if he was so unfortunate as to be surprised by the enemy, to take refuge there until help could come from the settlement. In the cabin was a keg of powder, a good store of bullets and several rifles, besides a keg of water and some provisions, for he had thought it all out and prepared for a short siege, if needs must.

The bullets rattled against the picket fence as the three fugitives rushed through the gate and barred it behind them. E Pluribus Solis, with his teeth chattering and smarting under the reproaches of his sister as "a mean, misible nigger, feared of Injuns," yet managed to help his master get out and load the half dozen rifles that the latter's forethought had placed ready to their hands. Around the inside of the two rooms that constituted their castle a platform had been raised for the express purpose of being used to fire at the Indians over the top of the tall fence.

A large party of them ran out from the woods as the gate closed, but after two or three had been dropped to the ground by the balls from Mr. Fairleigh's rifle they did not dare to come any nearer, as that involved exposing themselves to his fire while crossing the open field.

So, for the present, they contented themselves by sending a shot now and then at the cabin and with burning down the beautiful house where Mr. Fairleigh's grandfather, father, himself and his children had been born.

As soon as the house and stable were in flames the Indians noisily retired, driving before them the two horses that had brought the three besieged ones from the settlement.

And then all was quiet and peaceful as the hours wore on toward nightfall. Only for the smoke that rose from the site of the ruined home of the Fairleighs there was not a sign that an enemy was near.

But Mr. Fairleigh was not deceived nor tempted beyond the enclosure that sheltered the old cabin. He knew the Indians were there in the woods, watching and waiting for the cover of darkness to creep down upon it unawares.

Humpty kept watch while her master and Solis arranged pieces of fat wood, placed in the enclosure on purpose to serve such a purpose, so that they would burn through the night and cast a light on the whole line of fence, for the worst danger they had to face was that the Indians might succeed in getting over the fence and then enter the cabin through the roof or set fire to it.

As soon as it was dark Humpty was stationed as a lookout at the loopholes, while the other two lighted the pine knots and then stood close against the pickets ready to fire at a moment's warning.

Before long Humpty saw a round dark object rise above the top of the fence and a warning note told Solis, who guarded that side. In a second there was a flash and report, a yell, and the dark object disappeared.

Later on the little hunchback's keen eyes detected a suspicious movement in a corner that was partly in the shadow, and a shot from Mr. Fairleigh was followed by a shriek and the heavy fall inside the enclosure of a dead Indian.

There was a long rest after this, but toward daylight wide awake Humpty thought she heard a slight rustling in the room with the chimney and the huge fireplace, and as she went softly in several small pieces of clay rattled down. The little girl hesitated a moment, then crept cautiously near and looked up the chimney. Strange to say, as Humpty drew back and tiptoed across the room, her dark face gleamed all over like a ray of sunshine bursting out of a cloud and spreading over the landscape.

In perfect silence she picked up some pieces of fat pine, used for kindling, and filled her arms with the coverings from a bed in the corner.

"Hi! hi!" she chuckled, shaking from head to foot, "I'll swinge dat chicken, fer shua; fust rate idee! He won't know what's happenin'. Wha's de chimbly; swinge 'em, swinge 'em well!"

Quick as a flash Humpty placed the kindlings in the fireplace, lighted them, and when they blazed up, threw on the bedclothes, and then more wood.

Then, the picture of delight, she darted away, and mounted to a loophole.

"Hi! massa, I se swingin' a chicken goose up the chimbly. Come in yer, massa, he tumble down or he get on de roof. Shoot here or catch him on the roof, one or t'other. Reckon he fetch mighty warm by dis time, hi! hi! Humpty, swinge 'em, shua!"

Mr. Fairleigh darted into the cabin, and E Pluribus Solis raised his rifle, ready to fire if Humpty's "chicken goose" appeared on the roof. And this is just what he did do, evidently in a great hurry, and in the midst of a cloud of smoke. "Swingin'" was something he had not calculated on, neither on the bullet that went crashing through his head, and sent him rolling off the roof to the ground.

That ended the attack for the time. The first rays of light were streaming out from the east and the Indians drew back under shelter, having lost three of their boldest warriors.

But still Mr. Fairleigh had no hope of ultimate escape; he knew his enemies would not give up the siege. Humpty saw his trouble. There was one person whom she loved with utter devotion, and that person was her master. All day long she moved about quietly and thoughtfully; she was turning something over in her mind, and just before night she went to her master and told him about it.

"Let Humpty go, massa," she pleaded. "Solis, he'll look out sharp, and Humpty'll creep, creep, creep till she gits clar off, and den run, run, run. Git help heah 'fore tomorrow night, and den massa'll be all right."

At last Mr. Fairleigh yielded. The plan would at least give little Humpty a chance of escape.

And so, as soon as it was dark a picket was cautiously loosened and the heroic little slave crept through, not knowing but the next moment a tomahawk might descend upon her head.

Slowly, now curling on her hands and knees like a dog, now dragging herself along like a snake, she made her way across the field until at last she gained the shelter of the woods. Still cautiously, but walking now, she went steadily on, and when she felt sure she was beyond hearing of the Indians, who were now, no doubt, drawing near to the cabin, she ran, ran as she had never ran before.

Twenty miles to the settlement and then all that distance to be gone over again before help could reach her beloved master!

On and on she ran till suddenly she stopped short, catching her breath and shaking from head to foot, for there was a strange sound in the air; coming closer along the wagon track she was following a heavy tramp and deep murmur. Humpty was terribly frightened. She thought it was a whole regiment of spooks, or "hants," as she called the "spirits," and she dropped down in a heap.

Very soon the noise came opposite her, and then she saw what it meant, and her little, sorely tried heart gave a throb of joy.

Soldiers! hundreds and hundreds of them.

Yes, it was really Gen. Jackson's army with that brave hero himself riding at their head. They were on the road to the Miccosukee village (you will find it on the Florida maps to this day, only it is not an Indian town now) to punish the Red Sticks, and how well they did it, too, history tells us.

But now, led by Humpty, they marched rapidly to the relief of the cabin where so desperate a fight was being fought, and they arrived in time to kill or capture every one of the savages, who had just succeeded in scaling the fence and were attacking the cabin itself. So they were nicely caught in a trap of their own making, and not one escaped.

Humpty used often to tell the story in the peaceful after years of her life, and never forgot to relate with glee how she "swinged the chicken-goose in the chimbly."

Perhaps she tells it yet, for she was living only two or three years ago.—Helen Harcourt in Philadelphia Times.

NEEDED LEGISLATION.

Baking Powder Bill Passed by the Minnesota Senate.

[*St. Paul Dispatch.*]

The recent newspaper discussion of the dangerous qualities of ammonia comes from the alarming increase of its use in baking powders. People who absorb it in small quantities from day to day suffer from slow ammonia poisoning. Taken internally in sufficient quantities it eats away the coatings of the stomach and intestines and causes death. Slow ammonia poisoning produces various forms of stomach trouble.

Not one woman in ten thousand would use an ammonia baking powder if she knew it. Such powders not only undermine the health, but ammonia imparts a sallow and blotched complexion.

Following is the bill recently passed by the Minnesota senate. It's the danger signal which the law throws out for the protection of the people:

A Bill for an Act to Regulate the Traffic in Baking Powder.

Section 1—Any person who shall knowingly sell or procure the sale, or offer for sale of any package or can of Baking Powder, containing any Ammonia in it, not distinctly, legibly and durably branded, stamped or marked in a conspicuous place with the words in the English language "This Baking Powder contains Ammonia" in letters of great pica, or any letters equivalent thereto in length, shall be guilty of a misdemeanor, and punished by a fine not less than $20 nor more than $50; shall be confined in the County Jail not less than ten or more than twenty days or by both fine and imprisonment, at the discretion of the court.

Section 2.—The sale or offer for sale of the substance mentioned in the foregoing section in packages not stamped, marked, branded or labeled as therein required, shall be prima-facie evidence of knowledge of the character of said substance, on the part of the person so selling or offering for sale and his employer.

Section 3.—This Act shall be in force on and after its passage.

NOTE.—An incident occurred in the house when the senate bill came up for passage, in reference to an amendment proposed by Mr. Diment. This was opposed by several members. Mr. Feig said that if the bill as it came from the senate was all right then the amendment was all wrong. The amendment compelling the printing of the word "Ammonia" on the label only affected the Royal Baking Powder, and no wonder they felt the senate bill was a blow at them.

The Great Cathedral of Nicaragua.

The great cathedral of San Pedro of Leon is probably the finest religious edifice south of the City of Mexico. It was finished in 1743 at a cost of $5,000,000, occupying thirty-seven years in construction. It is of cut stone and is one firm mass of masonry, covers an entire square, and its front extends across one side of the Grand Plaza. Like similar buildings, whose ruined arches and walls may be seen in Antigua de Guatemala, this church has walls at least fifteen feet in thickness, and has the solidity of a rock. Numerous earthquakes have produced no impression, and the storms of a century and a half have in no way injured its fine quality of stone.

While inspecting its interior I met the cure, an old gentleman of perhaps 65 years of age, who, though a well traveled European, had never visited the United States. He told me that in the numerous disputes between Leon and Grenada the church had often been converted into a fortress, and sustained a few bombardments from besieging forces. Thirty pieces of artillery are said to have been planted on its roof at one time, and on its eastern side there are many indentations made by shot.

This cathedral was once possessed of great wealth, the chancel was surrounded with a railing of solid silver, while all the altar ornaments were of gold. With the exception of the cup and plate used at mass the church has no ornaments of precious metals now. Much was shipped to Spain, and what remained did not escape the rapacity of the soldiers, who have many times advanced and retreated through Leon.—Nicaragua Letter.

Why Thread Is Numbered.

Every seamstress, whether she wants No. 30 or 60 or 120 thread, knows from the number just what size the thread will be and what kind of sewing it can be used for; but how the numbers came to be just what they are and just what they mean not one person in 1,000 knows, yet it is a very simple matter to explain, providing you only know the points and how to elucidate them. When 840 yards of yarn weigh 7,000 grains, a pound of cotton, the thread makers mark it No. 1. If 1,680 yards weigh a pound, it is marked as No. 2. For No. 50 yarn it would take 50 multiplied by 840 to weigh a pound. This is the whole explanation of the yard measurement as used by the spool cotton manufacturers. The early manufactured thread was of three instead of six cord, the number being derived from the number of yards to the pound, just as it is today. No. 60 yarn made No. 60 thread, though in point of fact the actual caliber of No. 60 thread would equal No. 20 yarn, being made of three No. 20 strands twisted together.—St. Louis Republic.

Disadvantage of Red Hair.

The unhappiest girl in New York is, without doubt, the one to whom a kindly nature has given the real Titian red hair. Aside from the fact that she is no longer the possessor of a rare and envied glory, she finds herself classed with the supremely foolish women who are invoking the aid of chemicals to give their hair the matchless tint. One supersensitive girl with the Titian coloring says that she can no longer walk down Broadway without an uneasy consciousness that her hair is misrepresenting her, and a second young woman declares that it is a positive pain to her, instead of a pleasure, to meet persons for the first time, because she feels in their manner a certain shade of difference from that to which she has been accustomed, and which she attributes to the suspicion of silliness that the color of her hair invites.—New York Evening Sun.

HIGHER THAN ORDERS.

The Conductor Tells Why He Has in His Heart a Soft Spot for Tramps.

"No, we don't bounce the tramps who ride on the bumpers of our freight train," said a freight conductor who has a run to the west. "I presume that we carry an average of a dozen each trip, but if they remain between the cars we pretend not to see them."

"But it is against orders," was urged.

"Oh, yes; but there is a higher power than general orders, even for railroad men. Five or six years ago I used to be hard on the railroad tramp. I'd have the train looked over at every stop, and if we caught a chap he got handled pretty lively. Nowadays I throw out a hint to the brakemen to shut both eyes, and if the tramp don't presume too much on my good nature, no one will disturb him."

"What happened to change your mind?"

"Oh, a little incident of no interest to the public, but a great deal to me. I was married in December three years ago. On the third night I got an order to run out with an extra. There was a cold rain, which froze as it fell, and one of my crew got hurt at our very first stop. This left us short handed, and as we could not supply his place I had to act for him. We were back in the mountains, running strong to make time, when the engineer whistled brakes for a grade. I climbed out of the caboose with the brakemen, and had set two brakes and was after the third when a lurch of the cars threw me down and I fell between two of them. I had just one glimpse of the red cheeked bride at home, just one swift thought of her in widow's weeds and her heart breaking, when a hand grabbed me. I was going down head first, but the strong clutch turned me over and my feet struck the bumpers. I'd have gone then, only some one put my hands on the ladder, flung his arms around me from behind to hold me there, and said:

"You are all right, old man. Your nerve will come back pretty soon."

"And it was a tramp, eh?"

"It was, and he held me there until the train reached its stop, and then helped me down, for the sudden fright had taken all my strength and nerve away. But for him I should have been ground up under the wheels. This is the reason I keep a soft spot in my heart for the genus tramp, and why, when I sometimes walk the length of every train and find every bumper occupied, I look skyward and pretend not to see as much as an old fur cap."—New York Sun.

Mortality of Clergymen.

Among much curious information on the subject of ministers it is shown that of 2,030 who died 196 lost their lives from infectious disease, the largest number, 127, being from "abdominal typhus," that is, gastric and nervous fevers. Constitutional maladies carried off 153 pastors, of whom 132 succumbed to "new malignant forms of disease," that is, to troubles of a cancerous character.

Diseases of the nervous system proved fatal in 113 cases, 81 dying from brain disease and 32 from affections of the spine. As many as 524 died from throat and lung troubles, of whom 196 yielded to pneumonia and bronchitis and 156 to consumption. Heart disease was the cause of death in 204 instances; 209 died from apoplexy and 223 are said to have died from old age. Only 14 out of 2,030 committed suicide; 12 perished through accident, 1 being murdered; 9 were described as insane.—Medical Journal.

A Costly Shipwreck.

The Royal Charter is the most notable modern instance of the wreck of a "treasure" ship. She left Australia with £350,000 in her. Of this sum, says Charles Dickens in his chapter on this dreadful shipwreck in "The Uncommercial Traveller," £300,000 were recovered at the time of the novelist's visit to the spot where she had driven ashore. Meanwhile how much gold and silver, minted and otherwise, is annually afloat? How many millions are annually borne over the deep to and from India, America, Australia, China and South Africa by English steamers alone? There should be no difficulty in making the calculation, which, when arrived at, must surely yield a fine idea of the treasure over which the red flag flies, and an excellent notion of the trust that is reposed in the British shipmaster and of the high qualities which go to the fulfillment of it.—Sydney Herald.

Seamless Steel Boats.

Hydraulic power is now being applied to the manufacture of seamless steel boats. These boats are claimed to be proof against the destructive influences of sun and shower and to be much more durable and reliable than the ordinary wooden boats. Though made of steel, the weight will not be greater than that of a wooden boat of the same size, and the buoyancy will consequently be not less. It is contended that in every respect the seamless steel boat will be superior to the wooden one, and the cost of the one will not be materially greater than that of the other.—New York Commercial Advertiser.

Uncovered Himself.

The person who is much given to criticising the faults of others must expect to meet with a sharp rejoinder occasionally.

A man of this sort, who was often as foolish as he was pretentious, was once asked this question:

"Don't you spend a good deal of your time in denying other people's intelligence?"

"Yes," said the boaster, "I go around putting the dunce cap on other people's heads."

"Aren't you afraid you'll take cold?" asked the other quietly.—Youth's Companion.

HOW'S THIS!

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by taking Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligations made by their firm.

West & Truax, Wholesale Druggist, Toledo, Ohio.
Walding, Kinnan & Marvin, Wholesale Druggists, Toledo, Ohio.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. a bottle. Sold by all Druggists.

Girl violinists are becoming numerous. Girls are always after beaux.

"August Flower"

Dyspepsia. There is a gentleman at Malden-on-the-Hudson, N. Y., named Captain A. G. Pareis, who has written us a letter in which it is evident that he has made up his mind concerning some things, and this is what he says:

"I have used your preparation called August Flower in my family for seven or eight years. It is constantly in my house, and we consider it the best remedy for Indigestion, and Constipation we have ever used or known. My wife is troubled with Dyspepsia, and at times suffers very much after eating. The August Flower, however, relieves the difficulty. My wife frequently says to me when I am going to town, 'We are out of August Flower, and I think you had better get another bottle.' I am also troubled with Indigestion, and whenever I am, I take one or two teaspoonfuls before eating, for a day or two, and all trouble is removed."

Indigestion.

Constipation

When the past begins to interest you more than the future, it is time to make your will.

SOMETHING FOR THE NEW YEAR.

The world renowned success of Hostetter's Stomach Bitters, and their continued popularity for over a third of a century as a stomachic, is scarcely more wonderful than the welcome that greets the annual appearance of Hostetter's Almanac. This valuable medical treatise is published by The Hostetter Company, Pittsburgh, Pa., under their own immediate supervision, employing 60 hands in that department. They are running about 11 months in the year on this work, and the issue of same for 1892 will be more than ten millions, printed in the English, German, French, Welsh Norwegian, Swedish, Holland, Bohemian and Spanish languages. Refer to a copy of it for valuable and interesting reading concerning health, and numerous testimonials as to the efficacy of Hostetters Stomach Bitters, amusement, varied information, astronomical calculations and chronological items, &c., which can be depended on for correctness. The Almanac for 1892 can be obtained free of cost, from druggists and general country dealers in all parts of the country.

Just now and then a girl who decides not to marry in haste has a chance to repent at leisure.

SKIN DISEASES.

What spectacle is more disgusting than that of a man or woman with a skin disease which shows itself in pimples or blotches on hands, arms, face and neck? It is simply impure blood. See what BRANDRETH'S PILLS did for a chronic case:

George Chapman, Pincening, Mich., says: "For four years I was in the Mounted Infantry in the U. S. Army, residing during that time principally in Texas. Almost all of that time I had a chronic skin disease, characterized by an eruption over the entire surface of my legs and thighs, arms and chest. The doctors termed it eczema. I had given up all hopes of ever being cured, when BRANDRETH'S PILLS were recommended to me. I concluded to try them, and did so, and I have thanked God daily since then that I did so. I think I used them altogether for about three months, and, by that time, was completely cured and have never had any trouble since. My skin is as clear as any one's.

Trust to luck very much and you will seen find that it is the only thing in town that will give you credit.

Sufferers from Coughs, Sore Throat, etc., should try "*Brown's Bronchial Troches.*"

Visitors would sometimes like to make a too precocious child smart.

Use Enameline Stove Polish; no dust, no smell.

Try Germea for Breakfast.

Stamped out—blood-poisons of every name and nature, by Dr. Pierce's Golden Medical Discovery.

It's a medicine that starts from the beginning. It rouses every organ into healthy action, purifies and enriches the blood, and through it cleanses and renews the whole system. All Blood, Skin, and Scalp Diseases, from a common blotch or eruption to the worst Scrofula, are cured by it. For Tetter, Saltrheum, Eczema, Erysipelas, Boils, Carbuncles, Sore Eyes, Goitre or Thick Neck, and Enlarged Glands, Tumors, and Swellings, it's an unequaled remedy.

Don't think it's like the sarsaparillas. They claim to be good for the blood in March, April, and May. "Golden Medical Discovery" works equally well at all seasons. And it not only *claims* to do good—it *guarantees* it. If it doesn't benefit or cure, in every case, you have your money back.

You pay only for the *good* you get.

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

CHRIST IN LIMESTONE.

The Savior's Face Carved by Nature.

A PEBBLE FOUND NEAR OBERAMMERGAU.

Picked up by a Lady After a Performance of the Passion Play.

There is at present temporarily residing in Albany a lady who has in her possession a wonderful freak of nature. It is merely a piece of limestone, but carved most marvelously by the forces of nature into a face—the face of Christ in death.

To a reporter Mrs. Oliver T. Bacon, the lady referred to, told the story of her prized curiosity. Mrs. Bacon said:

"Overhanging the village of Oberammergau is a high mountain peak held in reverence by the villagers, who consider it their guardian angel. After witnessing the Passion Play of Sept. 12, 1880, I made the ascent of this mountain. A few flowers for pressing and two small bits of rock as souvenirs were taken near the summit, the latter remaining in my pocket two weeks. Later on, with a number of curios purchased, a box was packed and shipped to Georgia. More than eight years after a fire occurred in the Young Men's library, where the cases were stored.

"In relabeling the curios injured by water this package containing two pebbles was uncovered. Although rough and unhewn, in a certain angle Ruben's 'Conception of Christ,' in death, suddenly stood out, the drooping mouth more drooped, the eyes closed in an eternal sorrow; the brow plowed deeply in furrows of pain, the nostrils grown thin through lack of breath; the whole face weary and sorrowful with the weight of the world's sin."

Mrs. Bacon is from Atlanta, Ga. After talking about the curio for some time she produced a velvet sack. Within the sack was was a silver case, like a watch case, and in it was the simple yet wonderful piece of stone. Holding it at a certain angle the face full of suffering was easily seen. The freak is truly wonderful. As yet it has only been viewed by a few persons.

The Rev. S. F. Smith, D. D., author of "My Country, 'Tis of Thee," writes from Newton Center, Mass., Sept. 3, 1890: "The pebble, about half an inch in length, casually picked up by Mrs. Bacon on Mount Christus, near Oberammergau, is a most remarkable freak of fracture, seeming as if it were the fruit of design, and the design of a skilled artist. It requires no effort of imagination to see in it the head of the suffering, dying Christ, vivid in form and expression. The pebble is only a fragment of reddish limestone. The curiosity is that the fracture should exhibit so pathetic and exact a portrait. Mrs. Bacon sets a high value on the gem and regards it almost with reverence. It is certainly remarkable that a little stone, picked up without selection from the common road as a mere souvenir of the place and directly following the performance of the 'Passion Play' at Oberammergau, should present so touching a form."

Of it Bishop Doane said: "I have had the privilege of seeing the pebble found by Mrs. Bacon on Mount Christus, near Oberammergau. It arrests the attention and arouses the reverent amazement of any one to whom it is shown. Dr. Smith's description of it is very accurate, and no one, I am sure, can look upon this curious natural product without great interest and wonder."

Assistant State Geologist Merrill says concerning the stone: "I have had the pleasure of seeing the pebble which Mrs. O. T. Bacon has brought from Oberammergau, and consider it the most remarkable example of accidental resemblances which I have ever observed in so small a stone. The material is limestone, veined with chert, and the colors of the two substances contrast in such a manner as to delineate, with much exactness, a human face. No tool appears to have touched it. The surface seems to be entirely due to fracture and abrasion."—Albany Argus.

Reading from Duty.

Possibly, then, one should read from a sense of duty to others? Never! Never! Who that is a lover of good books has not been annoyed by the rabble who are toadies to good books? Who put them in conspicuous places in their conversation as they push the visiting cards of the upper one hundred into prominence on their tables? The insufferable, unwarranted conceit of these readers from duty! Why, a book lover is charmed into a blessed humility in the presence of his author, and mentions him in conversation as one would lift the curtain of some precious shrine.

And then, though some few can talk showily as a result of this duty goaded reading, none can talk to edification. Usually the conversation of such readers amounts to this: "Have I read the 'Inmost Revelations of Susy Thrilling?' Why, of course! Every one reads it, you know. Gladstone wrote a review of it, you know. Let's see. It came out in the Seavell Square library, didn't it? Number 2,139. Double number, and forty cents. Splendid, wasn't it?"—New York Ledger.

American naval officers are men of many clothes, and the official etiquette of dress aboard ship is appalling to a landsman. Every officer must have four or five styles of hats and caps, at least as many different kinds of coats, and even prescribed styles of neckties in considerable variety. The captain ordinarily prescribes the uniform of the day, but when a flagship is within signaling distance of another man-of-war the admiral is the authority on clothes as on other things. To appear on deck with the wrong necktie is to invite a reprimand. Subalterns, who are a good deal given to grumbling, insist that most commanders prescribe the uniform of the day without considering the thermometer, with the result that everybody swelters in thick blue broadcloth on hot days and shivers in white duck when the weather is cool.

THE NEWSPAPERS.

Facts and Opinions Presented by the Editor of The Journalist.

Newspapers are started for two reasons—either as a business enterprise, to give the people the news and to make money, or as an organ to exploit the views of a man, a clique or a party. A newspaper as a business enterprise frequently makes money; as an organ it is usually an expensive luxury.

I do not mean by this to undervalue the party paper; a newspaper without convictions is like a man without bones, it cannot make a very vigorous figure in our rushing, bustling, positive life. But a newspaper, as a business enterprise, must represent the views of the majority of its readers. A strongly Republican paper in a Democratic town may please its editor—until pay day—but it will not be a glittering financial success. In other words, the man who starts a paper should study the wants of the public he is to cater to and choose his location with reference to the kind of paper he intends to publish. This may seem commonplace advice, but there are papers which would lead one to believe that there is another reason than those mentioned which induces people to start newspapers—because they do not know any better.

For the capital invested there is no better paying piece of property than an intelligently managed newspaper. There are hundreds of papers in America which are paying all the way from 10 to 200 per cent. on their capital every year. The editors are well-to-do and respected, and the stockholders are happy in the consciousness of having made a good investment. This is more frequently the case in the smaller towns than in the large cities. Roughly speaking, it would cost $250,000 to establish a daily newspaper in New York city, and then it would require exceptional skill and good management to make it a success.

In the smaller towns, where competition is not so sharp and expenses not so heavy, the outlay can be reduced to a very reasonable figure, indeed; the chances of success are much greater and the returns are larger in proportion. Unless, indeed, the unfortunate editor tries to run a daily paper in a town which will only support a weekly, or chooses a location too near to a large city, where he is brought into ruinous competition with the metropolitan dailies, even then he has a chance if he will make his paper thoroughly and actively local.

The city newspaper man finds vast amusement in poking fun at the rural editor's news items concerning the painting of Deacon Jones' barn, and the size of Farmer Duzenberry's potatoes. And what does the city newspaper man do? He devotes a column or two to an imaginative description of Mrs. Riverside Rive's ball or Bertie Softpate's latest escapade. To the unprejudiced observer the country editor is the more dignified of the two. They are both dealing in news, and presumably they are both giving their readers what they want.

In the New York dailies, Sunday and daily, the average amount of reading matter measures sixty columns. Dividing this into six parts, the proportion of each department will be about as follows: Local matter, twenty-five columns; telegraph, nineteen columns; Washington, five columns; foreign, three columns; editorial, five columns; clippings, three columns. This result was obtained by measuring four Suns, four Heralds, five Worlds, three Timeses and one Tribune, and fairly represents the average on the leading papers, and it may be taken as an approximately correct proportion of the departments to each other, exclusive of the advertising. In other words, a well balanced paper, whether of four or twenty-four pages, should be divided up in about that ratio.—Allan Forman.

In the Matter of Dress.

We are told that although a woman's hand is more delicate than a man's, she can hang on to a hotter plate: and that she will never employ a button where she can use a pin, while a man won't use a pin while he can tie himself up with a piece of string.

When a woman puts on a new gown it is one of the happiest days of her life, while a man feels uncomfortable until he has grown used to his new clothes. But this is not the most peculiar thing about new clothes. When a woman so garbs herself she is brand new from head to foot. She is a symphony in silk, or wool, or cotton, as the case may be.

A man is entirely different. Even when he puts on a full new suit, his hat or his boots are apt to be old enough to spoil the effect as a whole. When all these things are brand new his cravat will have a frayed edge, or his gloves be shabby with wear, as the case was with Mr. Wilfer. A man with a $10 silk hat on his head and a six shilling gingham umbrella in his hand is not an anomaly, but a woman who robbed Peter to pay Paul in such a way would have her sisters in the streets all twisting their necks off to stare at her.—New York Evening Sun.

Wholesale Rates in England.

English cigars are notoriously just a little the worst cigars in the world. I think that must be the reason why most Englishmen prefer a pipe. The popular cigar (if there be any) is one of home manufacture and it costs tu'pence (4 cents). The charge for 100 is at the same rate, no reduction being made on a large order. A friend of mine here always buys his cigars by the thousand, and he pays a shilling apiece, straight through; these cigars retail at a shilling apiece, and the dealers argue that my friend ought to pay more, rather than less, when he buys a quantity.—Eugene Field's Letter.

A Wise Provision.

"If one only knew," I heard a lady exclaim; "if one only knew how long one had to live! If I only knew, for example, that I was to die within ten years wouldn't I have a good time until then? No, my lady, you would not. You would sit off in a corner by yourself and shiver and shake and curse the fate that divulged the great secret of life. It is a wise provision of nature that we don't know—that we plan for fifty years ahead and are gone to-morrow.—New York Commercial Advertiser.

Be Social.

"Farmers, be social with your cattle," is the advice given by an agricultural journal. We never considered the subject before, but we see now how farmers miss it. They could have a good deal of fun with their cattle if they would only be more social. When they have company in the evening, they should ask their oxen in to join in the conversation. A game of checkers with the old brindle cow would enliven a dull evening.—Texas Siftings.

Their Light a Warning.

In the opinion of Mr. Belt the light of the glowworm and firefly—at least in Central America—is a sign to night flying insectivorous birds that they are not eatable; their phosphorescent light is a warning signal.—Catholic World.

The Danger of Using Slang.

Harry—However did you come to send Miss Timidde into convulsions last night?

Jack—Why, she said something about never having allowed a man to kiss her, and I thoughtlessly yelled "Rats!"—Epoch.

SAW GREAT CHANGES.

A Veteran Soldier's Thirty Years of Army Life.

A PRIVATE DURING HIS WHOLE CAREER.

Fought in Two Wars.—Influence of Wives in Camp.

"If I had my life to live over again I would enlist in the regular army at a much earlier age than that when I enrolled myself with it in 1842." The speaker was James Whalen, one of the oldest inmates of the Soldiers' home, in Washington. Though 78 years of age he appears no more than 60. His figure is as erect, his step as firm and elastic and his whole bearing as graceful and energetic as that of a man in the full vigor of youth, while his head is completely covered with a thick growth of hair, but slightly tinged with gray.

Though he has known little of school instruction or the study of books he possesses that natural intelligence and rare power of observation which learn from everything seen or heard, and which soon make their possessor a profound scholar in that greatest of all learning, a knowledge of men and things. He also possesses the natural genius of an orator and writer, and when he once begins to talk upon some subject which arouses his interest and enthusiasm he rattles away with a fluency and eloquence that seem incredible in one so comparatively unlettered.

"I was 30 years of age when I enlisted," he continued. "That was in 1842, and I was 60 when I retired, in 1872, after thirty years of faithful service, during which I passed through the two most important wars, with the exception of the revolution against Great Britain, in which the United States ever engaged—the war with Mexico and the late civil war. I think the Mexican war of greater importance than that of 1812, because it added to our country an immense territory of almost priceless value.

"Though I am more than eight years beyond the three score and ten allotted as the life of man I constantly think and speak of myself as a boy, and it is only when I consider the wonderful changes that have taken place in our country and its military service since I first shouldered one of Uncle Sam's guns that I realize my age. The only arms we had then were heavy, clumsy old muskets that contained only one ball at a time, and had to be loaded from the muzzle after being once discharged.

"We did not even have cartridges. With an old fashioned ramrod we first rammed down some powder. Then we placed a bullet in the palm of our hand, covered it with powder, poured powder and ball into the gun, rammed them down, rammed down a small wad of paper, placed a cap on what was called the nipple of our gun—something that no modern gunmaker or user knows anything about—and then we were ready to shoot.

How different from the needle guns, Chassepot rifles, the Winchester and Remington arms of the present day! A little brass cannon carrying a twelve pound ball was the largest gun we had, and was considered something terrific. Now Uncle Sam's cannons are sixteen inch guns, carrying a ball weighing 500 pounds, which requires 250 pounds of powder to fire it, and which will perforate a steel plate sixteen inches thick at a distance of twelve miles.

"It was but a short time after my enlistment before I became convinced that a man in the army has a far easier, pleasanter life and a much better chance to prosper and do well, if he behaves himself, than in any menial position—such as that of a laborer or servant, for example—outside of it. The officials always manifest an interest in a private who shows a desire to be faithful and improve his condition, and will encourage and aid him in every possible way.

"In the army, as elsewhere, the man who squanders his money will be always poor and wretched. On the contrary, if he is industrious and thrifty there is no walk of life in which an ignorant, unlettered man, lacking the education necessary to enable him to aspire to anything better than daily labor for daily bread, can do better.

"Though only officers are now permitted to have their wives with them, yet when I became a soldier in 1842 and for many years afterward a certain number of women were allowed to each company in a regiment as laundresses. These women were the wives of the private soldiers, and as I was so fortunate as to secure one of these positions for my wife I was able to have her with me until the breaking out of the late civil war. This practice is still observed in all the armies of Great Britain and her colonies, and I think our government made a great mistake in abandoning it. Married men with wife and children by their side make the best soldiers.

"The presence of those dear ones restrains a man and tends to make and keep him ever sober, faithful and brave in the discharge of his duty. In time of battle he has a more direct interest in winning the fight than the single man, or those wife and children are in perfect safety hundreds, perhaps thousands of miles away. He feels that he is battling for a personal stake, and accordingly puts forth his highest, best efforts.

"In this respect a British soldier has a marked advantage over the American, though in every other way the condition of the former is not so good as that of the latter. The British soldier is not so well paid nor so well fed, and his chances for promotion are not nearly so good, but to be allowed to have wife and children with him more than compensates him for all his other disadvantages."—Chicago News.

His Celestial Jokelet.

John—I went to a Chinese laundry to have some washing done and a crazy Chinaman drove me out with a poker.

James—Indeed! What for?

John—A new way to iron a caller, I suppose.—Pittsburg Bulletin.

THE HISTORIAN OF OHIO.

Despite His Years, He Is Still a Bright and Vigorous Man.

Patriotic citizens of Ohio are congratulating themselves over the completion of a history of their state, which in its method, arrangement and conditions of authorship is one of the most noteworthy books ever issued.

Its author, Henry Howe, was born in New Haven, Oct. 11, 1816. The son of the first publisher of Webster's Dictionary, and bred in an atmosphere of books under the shadow of Yale college, it was but natural he should take to authorship and publishing. His first work was "Memoirs of Eminent Mechanics," issued by the Harpers in 1839. In 1840 he traveled over the state of New York in association with John W. Barber, making drawings and collecting material for an historical work on that state, which was issued in 1841. Two years later was issued by them "Historical Collections of New Jersey."

In 1843-4 Mr. Howe singly made a tour over Virginia, largely pedestrian, and in 1845 published "Historical Collections of Virginia." These state works—New York, New Jersey and Virginia—are scarce and out of print. The term "old gold" has been applied to them by admirers as books thumbed in youth which they in vain attempt to find in old age.

In 1846 Mr. Howe went out over the mountains to Ohio, passing successively through every county in it on the back of an old, slow going horse, named, in irony, Pomp. Much of the state was then a wilderness. He made drawings of the historical points and county seats, talked with the pioneers and eminent men of the commonwealth and gathered its history from those who laid the foundations.

In 1847 he published the "Historical Collections of Ohio," a work of 600 pages, with 177 engravings from his pencil sketches. It was immensely popular and had a greater sale than any state work even to this day issued. On its publication he settled in Cincinnati, where for some thirty years he has resided, engaged in writing and publishing books, mainly historical, which were sold by subscription all over the country.

In 1877 he returned to New Haven, and after some literary ventures there, in the fall of 1885, on entering his seventieth year, again went to Ohio to make a second tour of the state for a new edition of his work. This, after about six years of close application, he accomplished by its issue in three large volumes.

The new work contains all of the old; in it are the portraits and histories of Ohio's eminent characters for the last hundred

HENRY HOWE.

years; local and general information, legend and story, geography and antiquities; indeed, everything pertaining to Ohio and Ohio history.

Throughout the work is contrasted the Ohio of today with that of nearly fifty years ago. On his tours he kept "Traveling Notes," which he has introduced into his chapters regardless of the dignity of history or art. These have a literary bonhomie that gives an agreeable individuality to his chapters. He is exceedingly bright and entertaining, varied in anecdote, kindly in sympathy and pervaded by a rare spirit of humor.

It is indeed a remarkable work, and Ohio is fortunate in the possession of such a historian. The general assembly of the state has given official indorsement of its worth by purchasing 1,200 sets for public libraries and other institutions. Otterbein university has conferred the degree of LL. D. upon Mr. Howe, and he has been elected to honorary membership in many historical societies both within and out of the state. He now resides in Columbus, where he publishes his work in connection with his son. No one in looking upon his slight frame and snowy locks of age would suppose that he had the physical vigor and mental power to have accomplished such a great work.

They Must Respect the Kaiser.

It isn't safe to discuss the emperor of Germany in his own realm save with laudatory phrase. Not long ago a young American got into serious trouble because he carelessly said to a companion in a Berlin cafe, "I cough at the kaiser." The police had him locked up almost before he could catch his breath. The latest sufferer is a Roman Catholic priest, who recently remonstrated with the head of a household for hanging Emperor William's portrait between the pictures of two saints, remarking that a mere Protestant sovereign ought not to be placed so near the holy ones of the Catholic church. His words were reported, and the priest was brought before a neighboring tribunal and condemned to four months' imprisonment in a fortress for treason.

Density of Population in Cities.

According to a recent census bulletin the density of population per acre in the large cities of the United States ranges from 4 in St. Paul, 5 in Minneapolis, 9 in Omaha, 10 in New Orleans and Buffalo, 11 in Chicago and Denver, 12 in St. Louis, to 59 in New York, 48 in Brooklyn, 31 in Washington and 30 in San Francisco. For other cities the figures for population per acre are, in round numbers, Baltimore, 24; Boston 20; Cincinnati and Milwaukee, 19 each; Cleveland, Detroit, Indianapolis and Newark, 16 each; Nashville, 14; Rochester and Philadelphia, 13 each.

He Will Cross the Black Water.

Caste prejudice is lessening among Indian princes since many of them have visited Europe. To a rigid Hindoo "crossing the black water" means a grave sin, and so the maharajah of Mysore—one of the richest and most powerful native rulers—has been much perplexed between his wish to accept the queen's invitation to England and his dread of infringing the rules of his faith. Finally he called a council of eminent Hindoo priests to solve the difficulty, and with their sanction he will journey to England in the autumn.

Dr. Salvador de Mendonca, who has just left his legation at Washington for a visit home to Brazil, is the richest of the foreign representatives at that capital.

THE BOWSER FAMILY.

Mrs. Bowser Comes to the Front as Usual.

HER ARGUMENTS WERE TOO DEEP FOR HIM

Discussing the Policy of European Governments.—Quieting the Baby.

I had a caller the other afternoon when Mr. Bowser came home, and after she had gone he asked:

"How long was Mrs. Blank here?"

"About half an hour."

"And you talked about fashions, I suppose?"

"Yes, mostly; what should we talk about?"

"Mrs. Browser, did it ever occur to you that there was anything in life beyond millinery and dress goods and dressmakers?"

"How?"

"How! Why select some subject of sense—art, science, mineralogy, the labor question, or self government—and discuss it with calmness and justice, and learn something worth remembering for half an hour. You women folks might as well have been born with a pumpkin on your shoulders in place of a head."

I made no reply to this, but determined to catch Mr. Bowser in his own trap before the week was out. Fortune favored me. It was only two days before a neighbor called over as he was at work in the back yard, and for two long hours those men sat down on a ladder and discussed the question whether a back gate should open inwards or outwards, and the advantages offered by either situation.

Mr. Bowser contended for the gate opening outwards, and the neighbor for the opposite, and the discussion resulted in Mr. Bowser getting red clear back of the ears and jumping up to exclaim:

"Well, let's drop the subject right here. There can be cranks on alley gates as well as on politics and religion."

"And there can be lunatics outside of the asylums," hotly replied the neighbor.

"Don't call me a lunatic!"

"And don't you call me a crank!"

"Go home and hang your old gate to the moon!"

"I'll hang it according to the rules of common sense, and don't you forget it."

When Mr. Bowser came in to wash his hands I observed:

"Mr. Bowser, did it ever occur to you that there was anything in life beyond hanging a back gate?"

He replied with a "humph!" of disgust.

"Select some subject of sense, Mr. Bowser—art, science, mineralogy, the labor question or self government—and discuss it with calmness and judgment and learn something worth remembering for half an hour!"

He looked around in a desperate, helpless way, and put on his hat and went off without a word in reply. I wasn't going to let him off on that, however. When he came home that evening I had Mrs. Orfendorf over to supper, and as soon as we were seated at the table I queried:

"Doesn't it strike you that Germany's policy on the Samoan question is one of conciliation instead of aggression?"

"It certainly does," she replied, "but there may be a hidden motive behind this seeming submission. Trace the record of the man back as far as you will, and his policy has been either aggression or strategy."

Mr. Bowser looked from one to the other of us in astonishment.

"I notice," said I, as I passed the biscuits, "that the Spanish colonial policy is working towards a radical change. Incited by the example of other and stronger nations, it is about to extend its arms and enfold new possessions."

The stare that Mr. Bowser favored me with made my flesh creep.

"I do so hope you can come down to the next meeting of the Woman's Scientific, Political and Literary club," said Mrs. Orfendorf, as she toyed with her strawberries. "Those gatherings are very, very interesting. At our last meeting we discussed the 'Drift Period,' and at the one next week we shall discuss 'Two Proposed Amendments to the Constitution of the United States.'"

"Oh, I'd like to go ever so much, and I think I can promise you I will be there. Can Mr. Bowser come, too?"

"Well, hardly. Men take such little interest in such things that they are obstructions."

And Mr. Bowser sat there, turning red and pale by turns, until his chair grew so hot that he had to pretend a headache and get excused. I anticipated an awful tragedy after my visitor took her departure, but Mr. Bowser contented himself with saying:

"Now that that shallow pated, long nosed old nuisance has finally taken her leave, let's go to bed."

He regained his assurance after a couple of days, however. I was talking to our 2-year-old baby, and talking as all mothers talk, when Mr. Bowser flung down his paper and exclaimed:

"Mrs. Bowser, you make me tired talking to that young un that way. No wonder so many children grow up to be sap headed."

"How shall I talk?"

"Talk sense—the same as you would to an adult. He's old enough to understand, and I believe he will appreciate it."

"Very well; I'll try."

"Thank you. It's more than I expected you'd do."

The trial came that night. We had scarcely got to bed when baby awoke and began to whine. He had got cold and was feverish.

"Now, Harry," I began, "snug down and try to go to sleep. It's nothing serious, and I object to being kept awake."

He howled more lustily.

"My son," I continued, "this exhibition of ingratitude astonishes me, and I insist that you change your course of conduct at once or leave my house. Filial respect, if nothing"——

"What in thunder and blazes are you talking about?" roared Mr. Bowser, as he sat up in bed.

"I'm talking sense to baby."

"Not by a jug full, you ain't!"

"Then you try it."

"I'll try it by wringing his neck if he doesn't shut off steam! He's howling out of spite!"

"Then warn him that you may be compelled to inflict due chastisement, but do it calmly and grammatically."

"I i i i i i i!"

That's what Mr. Bowser said as he jumped out of bed and disappeared into the spare room, and that was the last I saw of him until morning.—Detroit Free Press.

The Esquimau hunter puts a chunk of fat on a sharpened flint and fastens it to a wooden stake planted in the ground. In licking off the fat the wolf cuts his tongue, and maddened by the taste of the blood continues to lick the sharp stones. Other wolves, attracted by the smell of blood, gather around. In their fury they turn upon one another, and the end of the fight is like the historic tragedy of the Kilkenny cats—there are no survivors. All the hunter has to do is to remove the skins and rebait his savage trap.—Exchange.

RESCUED FROM THE RUINS.

A Thrilling Incident in Connection with New York's Latest Horror.

There is no busier place in New York city than the intersection of Park place and Greenwich street, two squares west of

REMOVING THE BODIES.

the postoffice and in the center of the heaviest printing business west of Broadway. And never is it busier than at 12:30 on Saturdays, when the usual half holiday has but just begun. And just at that hour came the most appalling calamity the metropolis has suffered in many years—the collapse of the Taylor building, which extends 150 feet along Park place.

A few children were at play on the sidewalk, and in the restaurant every seat was occupied, and a few men stood by waiting for a seat.

There was a sudden jar, a grinding sound, a flash of dust and smoke and flame—then instant death to at least a hundred persons. The whole vast building swayed, quivered for a second, collapsed and sank in a murderous mass upon the victims. In less time than it takes to tell it the wreck was wrapped in flames and dark yellow sheets of fire were pouring from the adjoining windows. In five minutes more the police cordon was formed and several engines were pouring water on the ruins.

Another five minutes and tens of thousands of people pressed upon the police, while here and there were heard screams and sobs and unavailing cries for friends and relatives known to have been in the building or near it. The saddest group, perhaps, was in the home of Eugene F. Heagney, near by, whose three children were on the sidewalk just before the crash. The frantic father screamed and struggled to get to the ruin, but was held back. As fast as the fire would permit, the eager workers tore away the bricks and timbers, and at the end of two hours and a half a wild cry was heard.

"A child! A child! and alive!" Two heavy timbers had fallen side by side and over them an iron shutter. Under it was heard the cry of a little girl. The bricks and timbers flew like feathers, and in another instant Fireman Edward S. Mulligan had her in his arms, badly burned, it is true, but not fatally hurt. He held her up and a great cry arose. It was echoed cheer on cheer through all the adjacent streets.

MAMIE HEAGNEY'S RESCUE.

"A girl—a nine-year-old girl—and alive—yes, alive under all that wreck!"

And then more cheers for the gallant firemen. And yet was the cheering less strange than the weeping. The ordinarily reserved New York nature gave way, and hundreds of people in whom one would have thought the emotions to be dead sobbed in their excitement. It was Mamie Heagney, whose parents were crazed with grief. Her little three-year-old sister, Annie, had died near her, but her brother, Peter, five years old, had gone away just before the collapse and thus escaped.

Soon details of other marvelous escapes were heard. One boy had fallen all the five stories under a heavy engine which had, nevertheless, saved him from serious hurt. One waiter had escaped from the front of the restaurant, another from the back. A few girls had escaped by a rear window. And so on. But of the 150 or more known to have been in the building very few are accounted for. All the rest, at least 100, were instantly killed. The horrible sights revealed as the workmen, one squad succeeding another day and night, tore away the wreck may easily be imagined. And as to whether the calamity was due to a defective building, an explosion or the heavy presses, we must await the slow action of a coroner's jury.

The Rattlesnake Season.

Men who live in snake infested districts have comparatively little fear of the effects of a bite. The other day William Lightner, of Beccaria township, Clearfield county, Pa., was bitten on the wrist by a huge rattlesnake when some distance from home. Having no whisky with him, he took his knife and cut out the flesh into which the fangs had pierced. Then he sucked the wound, bandaged his arm and beyond a slight swelling he suffered but little. At about the same time, near Monroe, Orange county, N. Y., an eleven-year-old boy went out in the woods, saw a huge rattler, seized him just back of the head and carried him alive and squirming into town. The residents frightened him with their cries of alarm, and he would have released his hold had he not been warned to cling tight and avoid being bitten. The snake was finally secured around the head and rendered helpless, after which he was uncoiled and placed in a large box with a glass window in it. On making an examination it was found that the snake had nine rattles and a button.

Texas is infested by rabbits and lots of people are earning wages since the bounty law went into effect. In one day 13,000 scalps were turned into the commissioner's court at Midland and paid for with county scrip.

BAD FOR THE LAW MAKER.

The German Baron's Differing Points of View.

HE WAS A STRONG ADVOCATE OF THE LAW

Didn't Think it Applied to His Case.—His Dislike for Money Lenders.

Freiherr Marschall von Bieberstein, the state secretary for foreign affairs, who accompanied his imperial master, the German emperor, on his trip to Great Britain, while a member of the reichstag in 1878 very unexpectedly found himself in an embarrassing situation, as a result of his activity in securing the passage of a law relating chiefly to the Jews, the story of which was related yesterday by Mr. Moses Oppenheimer, of 38 Broadway.

"I have met the baron many a time," said Mr. Oppenheimer, "at the Mannheim Chess club, of which we both were members. He is an ambitious man, and was much pleased when he was, in 1878, elected to the reichstag, the first ultra-Conservative member that had obtained a victory in Baden. He was very active in the German parliament, being one of the brightest, as well as the most aggressive, men in that rather dull conglomerate, the ultra-Conservative party. His prominent participation in the enactment of the antiusury law resulted in a rather funny complication.

"I happened to know personally the other actor in the story, and I have my information directly from him. His name was Louis Altheimer, a well-to-do Hebrew residing in Mannheim and living on the proceeds of a snug fortune which he had amassed in his youth in the United States.

CALLED THEM BLOODSUCKERS.

"Altheimer's specialty was to lend money to officers of the army, to officials and others of that class of society on their promissory notes. His regular charge was 12 per cent. per annum. He would, of course, accommodate only people who seemed to be good pay. As a rule he would extend the note from time to time on payment of the interest, provided he had no fear of suffering a loss.

"In those days Baron Marschall's father was yet alive and in possession of his moderate estate. The young prosecuting attorney had to get along in the main on his rather modest salary. He managed it pretty well until he had some trouble with a young woman. It would never do for the rising young courtier and conservative statesman to have the scandal made public, and to hush it up about 5,000 marks in cash was absolutely required. The baron entered into negotiations with Mr. Altheimer and secured the loan of his note. The interest was paid promptly, and the little bill was extended several times without any difficulty.

"In advocating the antiusury bill in the reichstag Baron Marschall delivered a vehement speech against blood sucking usurers, especially those of Hebrew descent. The law as passed, largely owing to Marschall's persistency, was exceedingly vague in its provisions, leaving it practically to the discretion of the courts to say whether in any given case the taking of more than 6 per cent. was criminal usury, punishable by imprisonment at hard labor and by fines.

"The session of the reichstag closed; the baron returned to Mannheim and resumed the duties of his office. Meanwhile his note for 5,000 marks, held by Mr. Altheimer, was soon to fall due. The baron wrote a note to his creditor, asking him to call and arrange for an extension of time under the usual conditions. Altheimer replied briefly in writing that under the new antiusury law he did not feel safe in continuing to lend money in his former way, and therefore proposed to go into some other business, where his capital would yield him legitimate profits. He notified the baron that the note would be presented for collection.

"This turn of affairs was embarrassing for the young statesman. He wrote again to Mr. Altheimer, saying that the usury act was never intended for cases like his, and could not apply to their relation. He urged a renewal of the note as a perfectly safe and sensible transaction.

"A reply soon came from the Hebrew, acknowledging the baron's good intentions as well as his legal acumen, but at the same time pointing to the fact that the interpretation of the law was left entirely to the courts.

"'Under those circumstances,' Altheimer continued, 'I do not feel disposed to put my neck into the halter. I cannot renew your note. You have been accommodated so far by one of the much abused Hebrew usurers at his own terms. Your popularity and your position will probably induce some of your Christian friends to lend you the amount without security on perfectly legal interest.'

"Mr. Altheimer's note, it is needless to add, was promptly paid. Marschall subsequently became the diplomatic representative of the grand duke of Baden at Berlin, and still later he was appointed under secretary of state in the foreign office, filling the place formerly occupied by Count Herbert Bismarck."—New York Sun.

Free lunches are unknown in England. An American who sees crackers or cakes on the bar and nibbles one of either is promptly surprised with a demand for another two cents. There is a lunch department in nearly every place, however, where for a few pennies one may get a snack of bread and meat or cheese, the bread and butter being invariably the subject of separate charges, as are pickles and, in fact, everything except the contents of the cruet stand.—Chicago Post.

A Cruel Reason.

He—She's a remarkable girl. She doesn't hesitate to tell everybody that she is twenty-seven. Don't you admire her for it?

She—No, because I know she is thirty.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.

FRIDAY, JANUARY 29.....1892.

The worst and most dangerous item of political corruption is the prostitution of judges. This has now fallen to a depth of degradation in our own land as bad as was ever before known in any country. The Supreme Courts of States are presided over by Judges who are the willing tools of corporations. Those Judges were nominated and elected to office by the influence of corporations. In all cases where the profit of corporations is to be increased by trespassing upon public rights it is now seen to be useless for the people to bring suits in defense of their rights. When suit is brought in a Court of subordinate jurisdiction, and the people get judgment against a corporation, the defendant at once appeals to the Supreme Court of the State, and there the judgment is sure to be reversed. It is equally useless for the people to appeal to the Supreme Court of the United States. The Senate is largely composed of the principal officers of great corporations. It is through the influence of these men that Justices of the Supreme Court are appointed, and of course care is taken that none are offered for appointment except men whom the corporations are assured will decide in their favor in all cases brought by the people in defense of their rights against corporate greed. Under such a condition of things popular government is a delusion and the forms of freedom a mockery. It was by the instrumentality of corrupt and servile Judges that Charles I and his son James inflicted grinding tyranny upon the people of England. The fate of those two Kings ought to be a warning to all their imitators that when a great people are driven past endurance their vengeance is swift and terrible. It took two revolutions, one of them accompanied by a long and bloody war, to free England from her tyrant Kings and vile Judges. We need as thorough a reformation, no matter what means may be necessary to secure it. The last session of the Legislature in our own State gives a burning example of the need for reform. The influence of corporations got together a lot of bandits to make laws for a law-abiding people. The corporations wanted certain aims secured through the instrumentality of the Legislature and having secured these aims were perfectly willing to give up the State to pillage by their vile instruments. It is through the use of such criminals as leagued together for robbery in our Legislature that Senators are sent to the United States Senate, where they in turn are able to secure the appointment of Judges of the Supreme Court who are the ready tools of the corporations and never hesitate to sacrifice public rights when corporations require them to do so.

The people of this country are scarcely disposed to regard with favor the proposal said to have been advanced by the British government to act as an intermediary in the Chilean question. England's concern in the matter arises from the circumstance that she has about half the foreign trade of Chile and does not wish to have this profitable branch of her commerce cut off by war. It is not a question for the offices of an intermediary. There is no problem of international law or other intricate matter to be elucidated. The question is simply whether Chile is to make a decent expression of regret and apology for a most outrageous attack in her chief seaport, by a mob of her citizens, upon unarmed and inoffensive sailors from a United States war vessel who were harmlessly enjoying a day's holiday on shore. No foreign aid is needed to inform the government of this country whether this constitutes a grievance or not, or as to what is the proper course to take in the matter.

The Tribune draws a fine distinction between the words "news" and "event." The death of the Duke Clarence he says was "news;" the death of Cardinal Manning was "an event". This true, and the newspapers have been consistent in their appreciation of the difference—they have devoted colums to the "news" of Prince Victor's death and dismissed the "event" of Cardinal Manning's death with the ordinary half column of "obituary" most of which they stole bodily from the encyclopedia. But the "event" will live longer in the minds of the people and operate far more potently upon the future of the world than the "news."

But yesterday the American press was ridiculing the Duke of Clarence as "Collars and Cuffs." Now that he is dead the same journals are printing a vast amount of nauseating twaddle about his brains, goodness and cleverness. He was probably a fairly good specimen of the English prince; not particularly good nor grossly bad, but a well bred idler, who did nothing very well and was not a shocking example of depravity in high life. In some respects the great American press is an ass.

Whoever reads the signs of the times with discriminating judgment must conclude that the men who have for a quarter of a century made politics a trade in California, have dealt in verdicts as in merchandise, and have considered legislation a legitimate field for the excercise of venal instincts, must take a back seat. There is going on unquestionably a revolution of sentiment that will presently class all such men as public enemies.

The Bulletin says: The Traffic Association is making systematic comparisons which show that the Southern Pacific's freight rates are much higher than those of Eastern lines. The Interstate Commerce Commission more than confirm this in showing them to be higher than Western as well as Eastern lines. After establishing the fact the next and most difficult thing will be to correct it.

It is related in Eastern circles that during the recent trial of the big guns of the Miantonomah three of the officers of the ship were made deaf by the bursting of their ear drums. A naval authority says in relation to the matter that the officers should have known enough to prevent such injury by opening their mouths and standing on their toes at the moment of discharge.

KNOCKING OUT A JEHU.

Resentment of the Insults of a Big Stage Driver by a Little Dude.

Colonel William Greene Sterrett, of the Galveston-Dallas News, tells this story:

"Once, a good many years ago," he said, "I was traveling in a stage in western Texas. It was long before the snort of the locomotive was heard on the prairies of that region, over which the buffalo yet roamed. At one of the stations a young Englishman and his wife got in. He was a little fellow and dressed as a typical Englishman—what we now call a dude. The driver was a big, raw boned six footer. He was a noted fighter. He had never been whipped and was a regular terror. He seemed to take a dislike to the little Englishman from the start. Presently he stopped the stage, got down, came back and threw open the door.

"'Here,' he said to the Englishman, 'you come out of that and get up on the seat with me. There ain't room for you in there.' The Englishman didn't move. 'Come out, I tell you,' roared the driver. The Englishman just sat still. 'If you don't come out, I'll haul you out by the legs,' shouted the Jehu. Then the rest of us expostulated with the driver. I was too tired to fight and couldn't get at my gun, so I just expostulated along with the rest. We told the driver there was plenty of room inside; that the Englishman was not crowding us, and that if he (the driver) insulted or injured any of his passengers he would be discharged by the stage company. The driver by this time was wild. He swore he was in command of that stage and that he proposed to run it to suit himself, and if that blankety blank cuss didn't come out he'd pull him out.

"'All right,' said the Englishman, at last. 'I will come out, and when I am out I will whip you soundly.'

"He got out slowly. We all felt sorry for him and sorrier for his wife. She didn't seem scared or worried, though, and all she said was:

"'Charley, don't let him scratch your face.'

"Well, when the little Englishman got out he took his coat off and handed it back into the stage. Then he started toward the driver and the driver started toward him. We heard a sound a good deal like that made by hitting a steer in the head with an ax. Down in a heap went the driver. He was up as quick as a flash. Down he went again. Actually that little English dude knocked that burly six foot driver clean off his feet a dozen times. How it was done none of us could tell. The big fellow would rush at the little 'un with his arms going like flails. Suddenly the little fellow would make a dash, his right arm would fly out, and down would go the driver. After the dozenth round that driver called out:

"'Hold on, stranger—hold on! I'm whipped and throw up my hands. You kin ride anywhere on this stage you darn please, outside or inside or on the hosses. You're the boss now; but,' he added, glaring savagely at the rest of us, 'I kin lick anybody else on this stage.'

"We didn't expostulate. The Englishman climbed back into the stage as quickly as he got off. His wife was satisfied, for 'Charley's' face wasn't even scratched. At the next station the driver explained that if he'd only have got hold of the little fellow he'd have hugged him to death like a bear; 'but,' he exclaimed, 'every time just as I was about to lay hands on him the ground 'd fly up and hit me on the back of the head.'

"Who was the little fellow? Oh, a graduate of Cambridge, and the best boxer of his time at the university."—Washington Post.

The largest building that ever was erected was the machine gallery at the Paris exhibition, which was exactly a quarter of a mile in length, with a span of 360 feet.

Pope never could compose well without first declaiming for some time at the top of his voice, and thus rousing his nervous system to its fullest activity.

THE TETTIX.

Dewy and fragrant was the twilight falling
Upon the wide sweep of the Argive plain,
But, from the oleander copses calling,
No night bird voiced its immemorial pain.

Yet, clear and sweet, harmonious and winning—
Bar intermingling with melodious bar—
The tireless tettix with its violining
Filled all the sundown silence near and far.

And we, who loved the blithe note of the cricket
Beside the hearth when autumn days were bleak,
Hearing this homelike sound from mead and thicket,
Felt in our hearts a kinship for the Greek.

—Clinton Scollard in Lippincott's.

Glad He Had Been Bluffed.

It's essentially a story of Chicago.

A rather shabby looking man walked into the office and took a chair beside the big desk.

"I'm a little hard up," he said, "and if you could let me have $100 for a short time I think it would tide me over."

The man behind the desk looked at his caller and became reminiscent.

"Why, I haven't seen you for years," he said. "Let me see! You used to call down at my farm in the old days when I was located near Forty-first street."

"Yes," said the caller; "I drove down there one day with a party of friends and filled up with some of your cherry brandy."

"I remember it perfectly," said the man behind the desk. "After you had taken a little of it you wanted to buy the farm."

"And you wanted $2,000 for it," said the caller.

"And you agreed to take it," added the man behind the desk.

"I did," admitted the caller, "and you came to my office the next day."

"Yes, and you swore you wouldn't take it as a gift."

"And you declared you had witnesses to my agreement to buy."

"But you bluffed me off."

"I did," admitted the caller.

"Well," said the man behind the desk, "I don't mind paying you $200 for bluffing me off. The farm has made me rich."—Chicago Tribune.

Men Who Wear Small Hats.

I never saw an earnest worker, or a man who had real and serious duties to perform, who wore a hat too small for him.

Many great lawyers and statesmen, cranky but shrewd speculators, popular preachers, and history making generals and editors wear hats too large for them—sometimes so large that they act as extinguishers and are stopped in their downward course only by the projection of the ears; but I never saw one who wore a hat too small, perched upon the top of his head. Indeed, I might assert as a positive and invariable fact that, save in cases of dire necessity, such as shipwrecks or utter and hopeless poverty, the man who wears a hat too small for him is a silly, frivolous, conceited creature, with no serious ideas on any subject, and only the most flippant and shallow views of life and its obligations. Even among tramps and vagabonds, the fellow with the "dinky" derby balanced upon his mop of unkempt hair, is the most hopeless wreck among his class; while there is always a gleam of intelligence, a spark of hope, in the tramp whose hat is too large for him.—Kate Field's Washington.

Never Heard of Him.

Telegraphers' stories are unique sometimes, and they do not hesitate to tell them to one another. It is said that the operators in New Haven, having always lived there, seldom hear of anything beyond the limits of the city and their operating rooms. The fact was illustrated recently when an operator in New York remarked to the man he was working with in New Haven that Parnell had just died.

"Who?" was the inquiry.

"Parnell," was the reply.

After a short interval, during which, it is supposed, the New Haven operator was in conference with somebody, this message was sent: "If you mean P. T. Barnum, we heard that long ago, but no one knows who Parnell is."—Telegraph Age.

New Alloys.

Two new alloys for making boring and cutting tools have been invented in England. The metal equals steel in hardness and temper, and does not lose its temper when heated by friction. The alloys consist of pig iron, ferro-manganese, chromium and tungsten in proper proportions, melted together in crucibles under stick charcoal and calcined borax. This compound is then remelted with bar iron and proportions of nickel, copper and aluminium are added. It is then cast in sand molds.—New York Times.

Stage Coach Dreams.

Losses are presaged by a dream of riding in a stage coach. If you run after one you will be out of employment for a long season. To see one pass will rid you of troublesome friends. If you are in a stage coach and it turns over without injuring you, you will be lucky in your speculations, but if you dream that you are killed by the fall you must expect misfortunes.—New York Herald.

The Matching Habit.

A woman brought a small sugar coated pill into a South End drug store the other evening and wanted a box of pills just like them, under the impression that matching pills was as simple a matter as matching ribbons.—Springfield Homestead.

In appearance the ordinary truffle is about the size of a walnut, with a rough, brown, warty surface, closely akin to the potato, which it likewise resembles in consistency, though not in color.

A Public Duel.

In the case of the trial for murder which is going on at Naples the deceased some time before his death fought a duel with a man who is now one of the prisoners. At the hearing the other day one of the witnesses, a government official, said that on the day of the duel he went with others to meet the carriages coming back, for "at Palermo every one knows everything, and the carriages returned as if from a festival, and the people waited to see them."

The public minister asked the witness how the news of the duel being about to take place was known to the public. Witness: "First by the Mafia in fixing on the place and hour. I have never seen such a duel; people went as if to a feast, and every one knew of it. Perhaps the circumstance that an officer was fighting had some influence, and that therefore the authorities did not prevent it."—London News.

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,

C. MULHOLLAND,
Independence.

COURT NOTES.

Geo. M. Gill, Superior Judge.

SATURDAY, January 23, 1892.

Annie Harry vs. Robert Harry—Filed decree of divorce.

MONDAY, January 25, 1892.

People vs. John Clarke—Issued subpoenas.

Estate of Wm. Ischinger, deceased—Filed sundry claims.

TUESDAY, January 26, 1892.

People vs. Val. Sherman—Filed subpoenas.

THURSDAY, January 28, 1892.

People vs. Val Sherman—Filed instructions of Hon. Geo. M. Gill to jury.

Matt McDonald came in from Darwin yesterday.

Jack Black arrived at Independence from Bishop last evening.

Sheriff Gorman visited Bishop early in the week on official business.

Mr. and Mrs. A. L. Conklin visited in town a couple of days this week.

Joseph Seely returned from a month's visit to San Francisco last Friday.

Messrs. A. Cohn and R. O'Neal came down from Bishop on Wednesday.

Charley Levy has returned to Bishop after an absence of over a year.

Mrs. James R. Moffatt returned home last Monday from a visit to San Francisco.

Alfred Chartz of Virginia City acted as official stenographer in the Superior Court this week.

Mr. and Mrs. John Anton and Miss Ida McCall came up from Lone Pine on Wednesday.

Mrs. John Clarke, Miss Louisa Clarke and Miss Frankie Shaw came down from Bishop on Wednesday.

There were many visitors in town this week, in fact too numerous for special mention—and Louis Munzinger from Bishop

Hon. P. Reilly arrived from San Francisco on Wednesday's train. He is conducting the defense in the John Clarke case assisted by P. H. Mack Esq. and S. G. Sneden Esq.

Mr. and Mrs. Frank Fitzgerald visited Independence early in the week. Mr. Fitzgerald was suffering from an injury received at Lookout but a few days under Dr. Woodin's care brought him around all right.

The latest news from San Francisco is to the effect that Mr. N. Raine is slowly but surely improving. He was very ill, and at one time his life was despaired of. His many friends here anxiously await the news of his being entirely out of danger.

Hon. Tenmore Coffin arrived from Carson on Wednesday's train and has been inspecting his interests along the line of the Eastside canal. We are glad to note that he is much recovered in health since his last visit here, the result of special treatment in San Francisco. He will probably remain a few days longer in the vicinity.

We have received a copy of the "Report of Work of the Agricultural Experiment Stations of the University of California for 1890." It contains much valuable information, and especially an article on alkali soils that should be studied by every farmer in the Valley. It contains information of the greatest value. The work was prepared under the direction of Prof. E. W. Hilgard.

Messrs. T. H. Watsey, H. Walton Thomas, and J. Rendry went to Keeler on a special train last Monday. The gentlemen are all Londoners and represent English capital that desires to invest in the Keeler Soda Works. If the deal is consummated the work will be greatly enlarged. A small army of men will be employed, and a daily train is one of the future possibilities.

Soil Analysis.

P. P. Keough of Bishop some time ago gathered samples of soil, leached it out with water, then evaporated the water and sent the residuum to the State University with request that it be analyzed. The following report was made by Professor Hilgard. "The deposit is soluble in water and consists chiefly of sulphates of potash and soda, the latter (Glauber's salt) predominating, considerable common salt, and a very small amount of sulphate of magnesium (Epsom Salt). Borax is present only in traces.

To Be Removed.

About a month ago a communication was addressed from this office to the Secretary of War relative to the soldiers buried at Camp Independence. The following letter is self-explanatory:

WAR DEPARTMENT,
QUARTERMASTER GENERAL.
WASHINGTON, Jan. 16, 1892

MR. I. H. MULHOLLAND, OFFICE OF INYO INDEPENDENT, Independence, Cal.: *Sir:*—In reply to your communication of the 6th instant, addressed to the Hon. Secretary of War, relative to the graves of soldiers, in the cemetery at the abandoned post of Camp Independence, Cal., I am directed by the Quartermaster General to inform you that the Chief Quartermaster Department of California has been instructed to invite proposals for the removal of the remains to the San Francisco, Cal., National Cemetery. Very respectfully,

W. S. PATTEN,
Captain and Asst. Qr. Mr., U. S. A.

The Clarke Trial.

The case of the People vs. John Clarke began in the Superior Court yesterday. At an early hour the Courtroom was crowded, even the standing room, evidencing the interest taken by the public. After the roll-call of witnesses and jurors, the box was filled and examined as to their qualifications. Three jurors were excused for cause. The prosecution excused Messrs. Matlick and Kewley on peremptory challenge, and the defense, Messrs. Lucy, Newlands, Hay and Albers. Messrs. Roeper, Moffatt and Levy were selected and sworn to try the case, and the Court adjourned until 1:30 p. m.

On reconvening after the noon recess the jury box was again filled and the trial jurors examined. R. C. Spear and R. Schober were excused for cause. The prosecution excused W. C. Watterson on peremptory challenge and the defense excused E. Robinson on the same ground. The following named jurors were sworn to try the case: H. P. Cartier, M. Castro, W. G. Bennett, Geo. A. Free, and W. James Jr. Four more names were drawn, and of these L. Munzinger was excused by the prosecutors on peremptory challenge, and John Davies by the defense. John C. Anton and L. A. Anger were sworn. Of the two next drawn J. G. Dodge was excused by the defense on peremptory challenge, and J. Shoemaker was sworn as a juror. J. C. Irwin was drawn and excused by the prosecution on peremptory challenge. A. C. Freeman was drawn and sworn to try the case, making the jury complete as follows: J. R. Moffatt, H. Levy, Julius Roeper, H. P. Cartier, M. Castro, W. G. Bennett, George A. Free, W. James Jr., John Anton, L. A. Anger, J. Shoemaker and A. C. Freeman. The Court then adjourned until this morning.

The case was resumed in the Superior Court this morning. Tenmore Coffin Esq. was regularly entered as counsel for the defense, and the prosecution called as their first witness H. C. Hartshorne, proprietor of the Bishop Creek Hotel, where the affray occurred. The cross-examination of Mr. Hartshorne was concluded at noon today and the Court took a recess until half past one.

The Sherman Case.

The case of the People vs. Val Sherman was brought up in the Superior Court on Wednesday. The following named jurors were selected: A. C. Freeman, J. C. Roeper Walter James, Jr., Geo. Hall, A. Stecker, Jeff W. Jones, E. Schober, M. McIver, R. C. Spear A. Matlick, John Bodle and Mark Hand. The following witnesses were examined for the people: V. G. Smith, A. L. McGee, James Jones, Geo. L. Drake and L. W. Allingham. No witnesses were called by the defense, and the case was submitted to the jury without argument by counsel. After being out two hours the jury brought in a verdict of assault and Judge Gill set Friday, January, 29th, at ten o'clock a. m. as the time for passing sentence. At 10 o'clock this morning the Judge sentenced defendant to pay a fine of five hundred dollars, and in default of payment of the same to be confined in the County jail one day for each two dollars of the fine, providing the time of incarceration should not exceed a period of three months.

Honor, And Life Itself At Stake.

The message of the President to Congress will have the hearty approval of every American citizen who values the honor of his country. But it is not merely national honor that is at stake in the difficulty with Chile. The protection from insult, and even the life of every American who may go outside the limits of his own country, are involved. The most civilized nations are far more influenced in their relations with other powers by the ability of the latter to punish insult and injury, than by any sentimental considerations about abstract right. The nation that is able and prompt to punish injury, no matter by whom it may be inflicted, will always be courteously treated, and its flag will be respected and its citizens protected in all countries. But in such countries as Chile the only thing that can command respect for other nations is to make the ignorant and brutal masses know that any insult to the flag of another nation or any injury unlawfully inflicted upon a citizen will at once be followed by a demand for ample satisfaction, and that there is force enough to compel compliance with the demand. Time and again Americans traveling in distant countries have been compelled to ask protection from the representatives of other nations. Such indignity as this is enough to make an American mad with shame and rage.

Dairying Danes.

There will soon start from Denmark 1000 Danes who will conduct a large dairy business on lands along the Walker River. The advance party of these people has put up two large creameries and has been guaranteed special low rates by the Carson and Colorado and the Southern Pacific railroad companies.—*S. F. Call.*

Independence, Cal.

$3000 A YEAR! I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a Year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. No money for me unless successful as above. Easily and quickly learned. I desire but one worker from each district or county. I have already taught and provided with employment a large number, who are making over $3000 a year each. It's NEW and SOLID. Full particulars FREE. Address at once, E. C. ALLEN, Box 420, AUGUSTA, MAINE.

"Of course it hurts, but you must grin and bear it," is the old time consolation given to people troubled with rheumatism. "If you will take the trouble to dampen a piece of flannel with Chamberlain's Pain Balm and bind it over the seat of pain your rheumatism will disappear," is the modern and much more satisfactory advice. 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

Our readers will notice the advertisements in these columns of Chamberlain & Co., Des Moines, Iowa. From personal experience we can say that Chamberlain's Cough Remedy has broken up bad colds for our children and we are acquainted with many mothers in Centerville who would not be without in the house for a good many times its cost and are recommending it every day.—*Centerville* (SD.) *Chronicle and Index.* 50 cent and $1 bottles for sale by

A. K. EUGLEY,
Big Pine.

We want every mother to know that croup can be prevented. True croup never appears without a warning. The first symptom is hoarseness; then the child appears to have taken a cold, or a cold may have accompanied the hoarseness from the start. After that a peculiar rough cough is developed, which is followed by the croup. The time to act is when the child first becomes hoarse; a few doses of Chamberlain's Cough Remedy will prevent the attack. Even after a rough cough has appeared the disease may be prevented by using this remedy as directed. It has never been known to fail. 50 cent and $1 bottles for sale by

A. K. EUGLEY
Big Pine.

NOTICE OF SALE OF REAL ESTATE AT PUBLIC AUCTION.

NOTICE IS HEREBY GIVEN THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the 9th day of January, 1892, in the matter of the estate of Francisco Paderes, deceased, the undersigned, administratrix of said estate, will sell at public auction, to the highest bidder, for cash, gold coin of the United States, and subject to confirmation by said Superior Court, on the 6th day of February 1892, at one o'clock p. m., at the late residence of said deceased, at the town of Lone Pine, County of Inyo, State of California, all the right, title, interest and estate of the said Francisco Paderes at the time of his death, and all the right, title and interest the said estate has, by operation of law or otherwise, acquired other than or in addition to, that of the said Francisco Paderes at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the town of Lone Pine, County of Inyo, State of California, being Lots 6 and 7 in Block No. 14, as the same are known and designated on the official plat of said town of Lone Pine, now on file in the office of the County Recorder of said Inyo county.

Terms and conditions of sale: Cash, gold coin of the United States, ten per cent. of the purchase money to be paid on the day of sale, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

YGNACIA ABECHUCO,
Administratrix of the estate of Francisco Paderes, deceased.

Dated January 12, 1892.

Buckwheat Cakes.

The old way of setting to raise over night by the use of yeast, while the cakes were light yet there was always a well founded suspicion that buckwheat cakes made in that manner were indigestible and unwholesome, because of the chemical action that takes place, so alters the flour from its original character, that the souring or decomposing process continues in the stomach, followed by dyspepsia and kindred troubles.

The new way does away with all fermentation, souring etc., and places upon the table smoking hot buckwheat cakes in 12 minutes or less. Dr. Price's Cream Baking Powder is the element that superseded the old methods. Buckwheat and all griddle cakes made with Dr. Price's Powder are not only exceedingly light and delicious, but can be enjoyed by dyspeptics and invalids with impunity. Dr. Prices Cream is the only baking powder cantaining the whites of eggs.

Women are prettier than they used to be and necessarily come higher. The dumb waiter never expects a tip.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

MY LITTLE COTTAGE DOOR.

When the stars begin to glimmer,
In the soft sky overhead,
And the daylight waxes dimmer,
And the rosy light is dead;
All the cares of day forsake,
All the toiling is o'er,
And now soon I will betake me
To my little cottage door.

There the joys of life hover,
And there is no grief or care,
And no trouble 'ere will enter,
For 'tis love that's dwelling there;
Love that fills the heart with dreaming,
Bright'ning all things more and more,
And its holy light is streaming,
In my little cottage door.

And so fondly do I cherish,
That to save from pain and care,
I would lay me down and perish
For the loved ones dwelling there;
And I pray to God in heaven,
And I pray it o'er and o'er,
That the dearest blessing given,
Enter in my cottage door.

—Atlanta Constitution.

IN HIS SHIRT SLEEVES.

A beautiful woman found dead in the gray morning on the outskirts of the town. Two laborers going to their work in the woods had discovered the body, and in their fright had thrown their axes down and beat a hasty retreat to the village, where, under great excitement, they reported the matter to the authorities.

All Brounfield was excited over the terrible news. Never in the history of the town had such a tragedy occurred. The woman was well known in the community as a young widow whose husband had led a somewhat reckless life, but who had left her well provided for at his death, which occurred after two years of wedded life.

As was most natural with the added attraction of a snug fortune, the pretty young widow was quite popular, and it was rumored that she had half a dozen suitors.

But this is in the nature of a digression. I have introduced you to the woman—dead, and the principal object of this story is to unravel for the reader the mystery of her death.

The mayor, five councilmen, the town marshal and perhaps fifty citizens of Brounfield, after they had heard the stories of the two laborers, followed them to the spot where the body lay.

It was a fitting spot for a murder. The sandy road, arched by meeting trees that shut the sunlight out, led abruptly to a covered bridge, which spanned a bleak and sluggish stream, and just fifty yards from the water, in a clump of bushes by the roadside, the body lay.

Why did the murderer leave it there? was the question we involuntarily asked ourselves as the white face and staring eyes met our gaze. Why did he not seek to conceal his crime by throwing the body in the river?

The woman had been strangled; the print of human fingers was visible on her white throat. The fingers of the right hand were closed tightly, until the blue nails seemed to pierce the bloodless palm. Evidently she had not died without a struggle.

"Look!" cried one of the men, pointing to the closed hand, and we saw for the first time that it held a little tuft of coarse black hair.

"This may be a clew to the murderer," said the mayor. "Justice Brown, you will hold the inquest. Had we not better remove the body at once to Brounfield?"

The justice assented, and we formed a little funeral procession and bore the dead woman to the town.

The two laborers who had discovered the body were held as witnesses, but the inquest developed nothing, except that the woman was fond of taking long walks in the afternoon, and that on the evening preceding her death she had been seen leaving her house by a colored woman, who testified that she saw a man, who wore no coat, join her in the little town park and enter into conversation with her. Here the witness lost sight of them and thought nothing of the incident. She could not describe the man in his shirt sleeves, for she was not near enough to distinguish his features. She remembered, however, that he was a tall man, and seemed to have a stick or walking cane in his hand.

Who could have committed the crime? Robbery was not the object, for the woman's purse, containing seven dollars, was found by her side, or rather a little satchel which she carried suspended from her neck.

My business kept me in Brounfield a week after this event, but when I left they were no nearer to solving the mystery of the murder than they were when the body was found.

I remember how, a month afterward, as I lay on my bed in a distant town thinking it over, the testimony of that colored woman at the inquest recurred to me and set me to thinking.

She had spoken of a man "with his coat off" who had stopped the woman and engaged her in conversation in the park. Had they looked upon this as a clew and followed it up?

Was there a man in that town who habitually went in his shirt sleeves? A man who had been familiar enough with the woman to address her as this man did?

The more I thought of this the more it appealed to me. I could not ridicule it into silence. It seemed to take in my mind the indefinite shape of a clew to the murder, until at last I felt confident that I could clear up the mystery in which it was shrouded.

I packed my valise and bought a ticket to Brounfield. I had yet some unfinished business there and so a good excuse for going.

Arrived there, I made inquiries concerning the murder. A reward had been offered for the murderer, but as yet he had not been captured.

My room was in the second story of the little hotel. It was a hot night in July, and although fatigued by my journey I could not sleep. It was perhaps near 12 o'clock, when the stillness of death seemed to reign in the house, that I arose and resolved to seek the balcony for a breath of fresh air.

As I walked out I saw a man in his shirt sleeves, bare headed, sitting at the far end, with his feet on the railing.

He gave an involuntary start at my approach.

"Ah!" he said, with something like a sigh, "out for a breath of fresh air, eh? It was so plagued hot in the house I thought I'd try it out here myself."

I do not know that the man's manner would have impressed me if I had not seen him in his shirt sleeves, but putting this and that together—the way he started at my approach—his nervous, jerky manner of speaking, and then—his being in his shirt sleeves—but pshaw! I wore no coat myself. Who could on such a burning July night?

I do not know whether fate or Providence led me to this man, but I do know that a half hour's conversation with him made me suspect that he knew something about the murder of that poor woman whose body I had seen on that memorable morning by the roadside!

I naturally led the conversation to the murder. He did not seem inclined to talk of it and soon changed the subject.

But I brought him back to it by easy stages until at last, with a gesture of impatience, he said: "I don't care to talk about it; the authorities are at work on the case and I guess they'll ferret out the murderer in time."

The best detectives sometimes blunder in their work. I was an amateur in the business; hence my great confidence in my theories. "A tall man," the woman had said. Here was a tall man. A tuft of coarse black hair clutched in the dead woman's palm. My friend in his shirt sleeves had just such hair. These were the mental notes I made while I was talking with him there on the balcony.

"Are you a stranger here?" I asked.

"Not exactly," he replied. "I've been in business here a little more than three months. I'm a surveyor."

We parted for the night and before I returned I decided to dismiss my foolish impression of the man and turn my attention to other matters.

But I could not quite rid my mind of the idea that in some way or another he was connected with that murder.

In the morning after breakfast he walked across the street to the postoffice in his shirt sleeves and got his mail.

I saw him a dozen times that day—always in his shirt sleeves. All that week, whenever I met the man, he was coatless. It seemed to be his habit to go that way.

I was strangely attracted to him, and the more I thought of him the more I felt convinced that he knew something about the murder.

He said he was a surveyor. Perhaps that was the reason he took long walks every afternoon? I had seen him in the park a dozen times, but he seldom wore his coat.

I sought the colored woman who had testified at the inquest. If she saw that man in the park again would she be able to recognize him?

She thought she would if she could see him standing in the same position.

I slipped a five dollar bill in her hand, enjoined her to secrecy, and obtained her promise to be in the park every evening after that until she met the man.

The next day at twilight I saw a man standing in the park with a coat on his arm. In his hand he held a heavy cane, and appeared to be contemplating some object in the distance.

While he was in this position the woman, true to her promise, passed hurriedly by, keeping her eyes fixed on him as she went.

I followed her, and when we were well out of hearing she stopped and said:

"Before God, I think it's the man I saw with Mars Huntley. I know him by his shape!"

I was wild with excitement. "Do not breathe a word of this to any one," was my caution to the woman as I hurried to the mayor's office.

"Impossible!" he exclaimed, when I laid the story before him. "That is Capt. Carlton, a surveyor, whose character is above reproach. It is true he had paid the dead woman some attention, but"——

I interrupted him with an impatient gesture. "You are bound to take this woman's testimony," I said, "and place this captain under arrest. It matters not what his character may be. The woman says it is the man!"

The marshall was called in. "Find Capt. Carlton," said the mayor, "and tell him I wish to see him immediately on business."

It was, perhaps, a full half hour before the captain put in an appearance; and when he did the mayor did not know what to say to him.

"Well," he said, with an inquiring look, "what can I do for you?"

The mayor said nothing, but looked appealingly at me.

"We should send for the woman," I said.

"What woman?" asked Carlton, excitedly.

"Why, captain," said the mayor in a nervous voice, "there is a woman here who says that she saw you with Mrs. Huntley"——

The man started at the name, and a faint pallor overspread his face, which soon changed to an indignant red. He did not wait for the mayor to finish the sentence, but stamping his foot furiously exclaimed:

"It is a lie—a black lie; and I'll strike the man or woman dead who says it!"

"Don't commit another murder, captain," I said, placing my hand on my pistol. "I accuse you of the crime!"

He sprang forward with a fearful imprecation, but drew back at the sight of my pistol, which was leveled at his breast.

By this time the office was crowded with curious citizens, who had overheard the oaths of the caged captain.

He was soon secured and taken to jail. The woman was brought face to face with him, and he cowered before her.

The lock of hair found in the dead woman's hand matched his own exactly, and finally a confession was wrung from him.

He had loved the woman, but she had repulsed him. He soon found that she loved another, and on the evening before the murder he had met her, by accident, and walked with her to the place where her body was subsequently found. In a fit of jealous rage he had choked her to death, though he did not mean to kill her.

The sound of a wagon approaching had frightened him so that he fled, leaving the body where it was found next morning.

I believe the captain is serving time in the penitentiary now.

It was the first detective work I had ever done and I hope it will be the last. I was not working for the reward, but the mayor thought I deserved it, and I was $500 better off in the bank when the case was concluded and I left Brounfield.—F. L. Stanton in Atlanta Constitution.

The Way an Artist Reasons.

Here is a characteristic story about the great Parisian man milliner: A lady of high position once ventured to remonstrate with the great man because he had charged her £120 for a ball dress.

"The material," she said, "could be bought for twenty pounds, and surely the work of making up would be well paid with five pounds more."

"Madam," replied the milliner, in his loftiest manner, "go to M. Meissonier, the painter, and say to him, 'Here is a canvas, value a shilling, and here are colors, value four shillings. Paint me a picture with these colors on that canvas and I will pay you one and threepence.' What will he say? He will say, 'Madam, that is no payment for an artist.' I say more. I say, if you think my terms too high, pay me nothing and keep the robe. Art does not descend to the pettiness of the higgler."—London Tit-Bits.

ADULTERANTS IN BAKING POWDER.

Ammonia and Alum are the Principal Adulterants Used.

[*San Francisco Pacific Medical Journal.*]

To prove the presence of ammonia in a baking powder, a very simple, but quite satisfactory test may be made by anyone over his own cooking-stove. Take a tablespoonful of the powder to be tested and dissolve it in a tablespoonful of water, place the solution over the fire and stir it while heating, then introduce your nose into the cup. The resemblance to a bottle of aqua ammonia will, in many instances, be very impressive. To detect the presence of alum would require a more critical analysis.

Probably the most nearly perfect baking powder would be that composed of pure cream of tartar, bicarbonate of soda and starch. The starch is a food, the other two ingredients when united chemically in the dough, would liberate carbonic acid gas and leave no objectionable residue.

We might appropriately introduce here some remarks on dyspepsia and outline what, in our opinion, constitutes one of its prominent causes.

The extensive hold which disorders of the stomach have secured upon the people of America has become proverbial; so much so, that dyspepsia has been designated by some as the *American Disease*. It may be met with all over our great country, in almost every household, and is becoming more prevalent day by day. It is a disease of civilization, and largely of modern civilization. The etiological factors which might enter into a treatise on the subject are numerous, but the actual effects of many often very indefinite. No one, in fact, has yet satisfactorily accounted for the great prevalence of dyspepsia in America.

But while numerically these causes may be great, it is at the same time true, that those exerting any significant influence are comparitively few. Without attempting to mention them all, there is one particularly which has been slowly, insidiously, yet none the less dangerously, exerting its influence, and to which the attention of the medical profession has not yet been carefully drawn. We refer to the constant introduction through the food, into the stomach, of ammonia.

If any one will take the pains to study the modern history of dyspepsia, he will soon discover that its march of progress has been contemporaneous with the introduction and use of baking powders. The consumption of this article has become enormous. No pantry to-day is without it. Not every brand however is impure. There are one or two worthy exceptions; but many of them are contaminated, and the most deleterious substance to be found in any is ammonia.

This ammonia introduced into the dough is not all set free by heating. According to Prof. Hilgard, University of California, "The ammonia may not assume the gaseous state further than does the water itself, of which it slightly lowers the boiling point; when present in *large* proportion, the ammonia gas itself will aid in the inflation of the dough. A biscuit hastily baked may have lost only from ten to twenty per cent of the total amount introduced into the baking powder. After cooling, the carbonic gas contained in the bread cells gradually diffuses and is replaced by air in the course of time; while the ammonia remains in absorption or solution in the water of the bread, recombined into carbonate."

So much for the presence of ammonia in some of the popular brands of baking powders now on the market, and for its retention in the bread. Now, what are some of its effects? Bartholow, classing it among the agents that increase waste, says: "The long-continued use of ammonia impairs digestion by neutralizing the gastric juice. Increased waste of tissue is also one result of its administration, manifested by pallor, emaciation and feebleness. When introduced into the blood in sufficient quantity, it damages the structure of the red blood globules, and in this way, also, it effects the nutrition of the body, besides the action which it has in common with the other articles, of increasing the rate of waste or retrograde metamorphosis." This question regarding the effect of ammonia upon the human economy is one upon which authorities do not differ, and the individual experience of every physician is in accord with the assertion of authorities. The agent is a drug, not a food; an excrement, not a nutriment. The amount received by the system through these means, while not great at any particular time and not sufficient to prove injurious, becomes both great and deleterious by being continuous. Physicians owe it to their patients and to the people generally to inform themselves regarding this matter, and without fear or favor unqualifiedly to condemn injurious preparations; and the various boards of health throughout the State, in dealing with the question of food adulterations, would do the people a great service to look well to the brands of baking powders containing ammonia and other injurious ingredients.

Business is booming at Colfax, Wash. A mill and furniture company has been organized there with a capital stock of $50,000, and the saw-mill, which has shut down for the winter, will have its capacity doubled before spring.

Enough—"Does your daughter speak the languages?" "Not to any extent. She can say 'yes,' though, in five of 'em, in case any foreign nobleman asks her to marry."

A man who has practiced medicine for 40 years, ought to know salt from sugar; read what he says:

TOLEDO, O., Jan. 10, 1887.

Messrs. F. J. Cheney & Co.—Gentlemen:—I have been in the general practice of medicine for most 40 years, and would say that in all my practice and experience have never seen a preparation that I could prescribe with as much confidence of success as I can Hall's Catarrh Cure, manufactured by you. Have prescribed it a great many times and its effect is wonderful, and would say in conclusion that I have yet to find a case of Catarrh that it would not cure, if they would take it according to directions.

Yours Truly,
L. L. GORSUCH, M. D.,
Office, 215 Summit St.

We will give $100 for any case of Catarrh that can not be cured with Hall's Catarrh Cure. Taken internally.

F. J. CHENEY & CO., Props., Toledo, O.
Sold by Druggists, 75c.

HER BODY DASHED TO PIECES.

The Awful Ending of a Life Unmarked by Happiness.

Struggling for life in midair!

That was the horrible spectacle that blanched the cheeks of hundreds of spectators at Coney Island, a resort on the Ohio river, near Cincinnati, the other day. Among the attractions advertised was a balloon ascension by Miss Frankie Lavelle, "the celebrated aeronaut." At a thousand feet above the ground she was to abandon the balloon for a parachute, to which a trapeze was attached, and on which she was to give gymnastic exhibitions while descending. What the assembled people saw was this: A thin, pale girl, weighing less than a hundred pounds, who undertook her task while almost overcome by nervousness. She made the ascent all right and at the stipulated altitude cut the parachute loose from the balloon. The former shot downward, then spread out and more slowly sought the earth. At a height of 500 feet the girl attempted to perform on the trapeze. Her tiny strength was not equal to the effort. One hand loosed its hold and then the other, and down she sped through the air to an awful death. Her body struck the ground with a thud that was heard and remarked on a mile away, and when the terrified witnesses of the tragedy rushed to the spot they found the poor girl's remains scattered over an area of several rods—here an arm, there a jawbone, and farther off bits of skull and flesh.

ANNIE HARKES.

When the fragments had been collected and the first shock was over, the inquiry came, "Who was Frankie Lavelle?" It didn't take long to obtain an answer. Her real name was Annie Harkes, and until she grew to womanhood she lived with her parents at Indianapolis. While yet hardly more than a girl the tempter crossed her path, she sinned, suffered and was driven from home. Her child was born dead in a hospital at Cincinnati, and then she sought to earn an honest living as a domestic and restaurant servant.

Some weeks ago, being out of work, she hired a bare and cheerless room, hardly large enough to hold a bed, and began anew the search for occupation. She saw the advertisement of a man who wanted a girl to make balloon ascensions. In her desperation and poverty she went to him and lied. She said she was an experienced aeronaut and secured an engagement at five dollars for each exhibition. At Coney island she donned the tawdry tights and spangles of a "performer" and started on her journey of death, weak and nerveless with hunger.

In her room were found enough worn clothes to about fill a large pocket handkerchief, and letters from several mashers and married men who had no respect for poverty and regarded virtue as an unknown quantity. Evidently the child—she was hardly twenty years of age—had had a tough time of it in this world, and perhaps that terrible fall was a happy release from a tragic existence.

China's Formidable Secret Society.

The present widespread agitation against foreigners in China is said to be directly traceable to the Ko-lao-Hui, a secret society which exercises a perfect terrorism over its members. Recently one of the rioters at Wusueh was put to torture that pain might wring from him the names of the ringleaders, but he would tell nothing. "My life," he declared, "is forfeit in any case. If I give up the names the Kolaos will kill me and the whole of my family, and wipe my name off the face of the earth. If I remain firm you will kill me, but the Kolaos will take care of my family." This terrible organization recruits members in very unscrupulous fashion. A man will go around the various kitchens selling choppers, and telling each cook that he need not pay till he has proved the wares—perhaps not for a year. Only he must sign the peddler's book. Next day the peddler arrives and shows the unlucky cook that he has signed the roll of the Ko-lao-Hui, and henceforward must obey their behests.

Plain Statements on a Tombstone.

Mr. Thomas Phillips, of Boulder, Clinton county, Ills., proposes that the world shall know for several years to come the reason of his wife's demise. He went to Centralia the other day and arranged with a marble dealer to make for him a tombstone shaped and inscribed as follows:

Mr. Phillips is a tall, thin man, with clear cut features and a positive expression which kept the stonecutter from asking questions. It will be observed from the inscription that he doesn't intend to marry again.

Tea Tasting Extraordinary.

The managing director of a big tea dealing firm, who is a tea taster and blender of twenty-five years' experience, has lately stated that he once saw a leading broker in Mincing lane have sixty teas, ranging within a penny per pound in value, weighed up in duplicate, the 120 pots numbered and mixed up, he then picking out the sixty duplicates without a single mistake.—Pall Mall Gazette.

A Wise Provision.

Dashaway—Come and take a bite with me.

Stuffer—I don't care if I do, old man. I dined with Cleverton last night and he had a necktie on that took away my appetite.

Dashaway—Then I will ask him also.—Clothier and Furnisher.

If you dislike games of cards it will greatly conduce to your comfort in society to announce that you are not able to play whist. Should you once yield you have delivered yourself up as a potential martyr, should "a fourth" be required, until death releases you.

He held four little trays in hand,
But threw them down kerplunk!
He was a baggage-smasher, and
The trays were in the trunk.

SOMETHING FOR THE NEW YEAR.

The world renowned success of Hostetter's Stomach Bitters, and their continued popularity for over a third of a century as a stomachic, is scarcely more wonderful than the welcome that greets the annual appearance of Hostetter's Almanac. This valuable medical treatise is published by The Hostetter Company, Pittsburgh, Pa., under their own immediate supervision, employing 60 hands in that department. They are running about 11 months in the year on this work, and the issue of same for 1892 will be more than ten millions, printed in the English, German, French, Welsh Norwegian, Swedish, Holland, Bohemian and Spanish languages. Refer to a copy of it for valuable and interesting reading concerning health, and numerous testimonials as to the efficacy of Hostetters Stomach Bitters, amusement, varied information, astronomical calculations and chronological items, &c., which can be depended on for correctness. The Almanac for 1892 can be obtained free of cost, from druggists and general country dealers in all parts of the country.

It pleases a man more to call himself a fool than to have another do it for him.

Sudden Changes of the Weather often cause Pulmonary, Bronchial, and Asthmatic troubles. "*Brown's Bronchial Troches*" will allay the irritation which induces coughing, giving immediate relief.

This is the season when the annual report makes itself heard from one end of the land to the other.

MRS. HENRY WARD BEECHER WRITES:

40 ORANGE STREET, BROOKLYN, N. Y.,
February 11, 1890.

I have used ALLCOCK'S POROUS PLASTERS for some years for myself and family, and, as far as able, for the many sufferers who come to us for assistance, and have found them a genuine relief for most of the aches and pains which flesh is heir to. I have used ALLCOCK'S POROUS PLASTERS for all kinds of lameness and acute pain, and by frequent experiments, find that they can control many cases not noticed in your circulars.

The above is the only testimonial I have ever given in favor of any plaster, and if my name has been used to recommend any other it is without my authority or sanction.

The longer a man lives the less condemnation he has for the suspicious fellow who mistrusts everybody.

Use Enameline Stove Polish; no dust, no smell.

Try Germea for Breakfast.

As she enters womanhood, every young girl needs the wisest care. Troubles beginning then may make her whole life miserable.

But the troubles that are to be feared have a positive remedy. Dr. Pierce's Favorite Prescription builds up and strengthens the system, and regulates and promotes every proper function. It's a generous, supporting tonic, and a quieting, soothing nervine—a legitimate *medicine*, not a beverage, free from alcohol and injurious drugs. It corrects and cures, safely and surely, all those delicate derangements, weaknesses, and diseases peculiar to the sex.

A remedy that *does* cure is one that can be *guaranteed*. That's what the proprietors of "Favorite Prescription" think. If it doesn't give satisfaction, in every case for which it's recommended, they'll refund the money. No other medicine for women is sold on such terms.

Decide for yourself whether something else sold by the dealer, is likely to be "just as good" for you to buy.

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

CONSUMPTION.

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, with a VALUABLE TREATISE on this disease to any sufferer who will send me their Express and P. O. address. T. A. Slocum, M. C., 183 Pearl St., N. Y.

THE EIGHT STAGES.

Only a baby,
Kissed and caressed,
Gently held to a mother's breast.

Only a child,
Toddling alone,
Brightening now its happy home.

Only a boy,
Trudging to school,
Governed now by a sterner rule.

Only a youth,
Living in dreams.
Full of promise life now seems.

Only a man,
Battling with life,
Shared in now by a loving wife.

Only a father,
Burdened with care,
Silver threads in dark brown hair.

Only a graybeard,
Toddling again,
Growing old and full of pain.

Only a mound,
O'ergrown with grass.
Dreams unrealized—rest at last.
—Boston Traveller.

MY STRANGE PASSENGER.

We were on our way from Hong Kong to Foochow on the coasting steamer Namoa, writes Ernest Wilkinson, U. S. N., in The Washington Evening Star, when Capt. N., my "fidus Achates" of the voyage, looked at the gathering clouds to the westward and remarked: "I hope it won't rain before we get into Amoy; we are just thirty miles away."

"How do you know the distance so exactly, captain?"

"Look at that rock, and over beyond it you can see through a rift in the clouds a little speck like a pin point on the top of that black mountain. The pin point is a tall pagoda on that high cliff, and the pagoda is as good a signboard for this town as if that whole black cliff were painted in white letters a mile high and half a mile wide—A-M-O-Y. I never see either the pagoda or the city that a cold chill does not run over me."

"Will you tell me why, captain?"

"Certainly, but it's a long story; well, here goes:

Amoy was one of the first treaty ports in China open to foreign commerce, and for a long time the noted hatred of the Chinese for foreigners was more intense than at any other port. I was then captain of a steamer on the first line plying between Amoy and the English colony of Hong Kong, some two hundred miles away.

One cloudy evening in November I went ashore in Amoy to make a few final preparations for my ship's departure the next day. While on shore I noticed that my footsteps were dogged by a disreputable looking coolie, who approached me with great earnestness in his manner as soon as we had reached a comparatively open spot, where the growing darkness shut out the teeming hordes of a Chinese city. I saw that it would be impossible to avoid an encounter if this strange follower should prove to be a highwayman.

So carrying my hand to my hip pocket, where I felt the friendly "grip" of my revolver, I waited for the man to come closer. I then saw that the coolie was in great distress, and moved by his earnestness, I stopped to listen to his tale. The man explained, in Chinese and "pidgin" English, that he had a brother in jail who was to be beheaded in two days more for capsizing in a sailboat and drowning his passenger, a mandarin's son. The mandarin, bent on revenge, had thrown the boatman into prison, where the farce of a trial had been gone through with, and the innocent man had been doomed to die. The coolie said that his family were all wretchedly poor, but that they had managed, by the sale of most of their belongings, to raise money enough to bribe the jailer to allow the prisoner to escape, and all that was necessary to save his life was to get him away on some vessel to the nearest foreign colony. The poor creature fell on his knees and implored me to save his brother's life.

He would give me anything—everything he had—only to give the hunted creature a hiding place, to save a fellow being from the headsman's ax! All this was muttered between broken sobs, and the poor man wept as if it were he himself who was only to see two more suns rise before the earth would drink up his life blood.

I felt my sympathies intensely excited, and yet I knew the treacherous nature of the Chinese and the danger in interfering with their ideas of justice, and, wishing either to test the truth of his story or to prevail upon the coolie to choose some other means for his brother's escape, I said: "I'll stow him away and carry him down to Hong Kong for five hundred taels" (about five hundred and fifty dollars), thinking that such a price would be utterly beyond the coolie's means. The poor man seemed staggered at the enormity of the sum, a large fortune to one of his class; but he rallied in a moment and said he supposed he would have to pay it; that it was a fearful sum, that he was very poor, and to raise so much money his family would have to sell all they owned; but he must save his brother's life; if the captain insisted he would have to pay it.

My sympathies were now still more keenly aroused, and seeing that the unwelcome passenger would be sent, and not caring either to break my word or to profit by the poor wretch's misfortunes, I said: "Well, I'll do it for the regular fare (about ten dollars); bring him down to the wharf at 11:30; I am going off to my ship then."

The coolie seemed overpowered with joy, and was still "kow-towing" his thanks as I moved away and he disappeared in the darkness.

I had no sooner reached the wharf, about 11:45 p. m., then I was touched by the same coolie, who now offered himself as "sampan" man. I followed him to the boat, and there saw another man as poorly clad as his brother. When we shoved off I noticed both were very clumsy with their oars, but as my ship was close to the wharf we were soon alongside.

Here I handed my overcoat to the boatman and he picked up a bundle tied Chinese fashion in a large handkerchief, and we went on board, leaving my new acquaintance in the boat. I sent my steward forward on an errand that would detain him for a few moments, and then had the coolie deposit his bundle in a small closet in the cabin and told him that that must be his brother's hiding place until we put to sea, and that he must be quick to get into it.

At a motion over the side the condemned man sprang out of the boat, which he had made fast to the gangway, and slid noiselessly aft through the cabin and into the closet. I turned the lock and put the key in my pocket.

But as he passed the cabin lamp, curiosity had led me to take a searching glance at my strange passenger, and, in spite of his unkempt hair and soiled and tattered clothes, his light complexion and refined features revealed in the coolie's brother (?) a Chinaman of the higher classes.

I then tried to scrutinize the boatman, but the man's back was to the light, and, the steward returning just then, I paid my sampan fare, and my strange acquaintance departed.

I turned in, wondering who my mysterious passenger might be, and my thoughts were not without vague misgivings of the noted treachery of the Chinese.

I woke early, and had hardly begun dressing before a herald came to inform me that the viceroy of the province desired to see me at his "yamen" at 10 that morning. This strange summons I at once connected with my harboring an escaped prisoner, and, full of vague distrust, I had almost decided either to put to sea two hours before the advertised time, noon, and so temporarily avoid any explanations, or to plead press of business, and refuse to obey an almost royal command. Disturbed by such doubts, I hardly felt relieved when another herald came to say that the viceroy had concluded, as he desired to see the ship, to visit the captain, and that my presence at the "yamen" would be excused.

Such a thing as a viceroy visiting in state a merchant vessel was almost unprecedented, and I began to fear that I was implicated in the escape of a political prisoner of high rank.

Now the customary official messengers began to pour in—first, two clad in robes of state announced that his excellency would arrive in half an hour; then four more that he was coming in ten minutes; then four horsemen, gaudily caparisoned, rode down to the wharf, where I was now waiting, to say that their master would arrive in five minutes; then a procession of liveried servants, bearing aloft on high poles red sign boards, on which all the virtues under the sun were ascribed in Chinese characters to their lord; soldiers with flags and swords and spears, men with whips and gongs to clear the way; mandarins on horseback; lictors with long pheasants' tails in their caps, and a large rabble on foot—all proclaimed that his excellency had arrived. Alighting from a gorgeous green sedan chair, borne by sixteen men in livery, he greeted me most politely and accepted my invitation to take passage in my gig off to the ship. A large portion of his escort followed, occupying a small fleet of sampans.

The viceroy was ushered into the cabin, and, strange to say, selected a chair immediately in front of the door of the closet in which the refugee was concealed.

After a few courtesies had been exchanged, I was informed through an interpreter that Prince Ichang, the leader of an insurrection, who had been captured and condemned to be beheaded, had made his escape. Suspicion, they said, seemed to point to his being secreted on board my ship; a sampan had been seen to go alongside of her the night before about midnight; it reached the ship with two boatmen and one foreigner, and returned to the shore with only one man, and he made off in great haste as soon as he had landed, leaving the sampan adrift. "Of course the captain knew nothing about the escaped prisoner, and so he could have no objections to allowing the ship to be searched."

This was subtly put. To refuse to allow it would be equivalent to acknowledging that the man was on board, and would cost me my place in a company whose interest it was to placate the unfriendly Chinese. To allow the ship to be searched involved the possible discovery of the man, and in that case his recapture and certain death, as well as my own dismissal from the company.

Either course might endanger the lives of the foreign community in Amoy, against whom the hatred of the Chinese needed only a pretext to begin a general massacre. I felt the color come and go in my cheeks, and for a moment I thought of delivering the refugee up to certain death, saying that when I took him on board I was not aware of the nature of the offense, and then revulsion of feeling came over me. I thought "this man has trusted his life in my hands and, hunted criminal that he is, I will not betray him."

All this flashed through my mind in an instant, and when I turned to the viceroy I felt the same spirit of helpless yet indomitable defiance that every true sailor feels in the fury of the storm. I said quietly: "Certainly, your excellency; my steward will turn over the keys to your servants, but they will find no such man on board my ship."

The search party went all over the ship, directed by the crew, and after probing into corners and peering in amongst the bales of silk and boxes of tea, no stranger was found. This was reported to the viceroy, who said: "You have not searched this cabin; do so." I was wild with excitement and alarm, but my relief was intense when my furtive glance showed me that the search party did not dare to ask their master to move from in front of the door. This relief was of short duration, for he again asked if they had searched everywhere. "Everywhere except in that apartment behind your excellency's chair. We will look there, too; where is the key?" I now became thoroughly frightened, and fumbling for some loophole to escape, I told the viceroy that that was a locker where I kept my wines, and—I was ashamed to confess it to so high a ruler under the "Son of Heaven"—that I sometimes hid opium and other contraband articles there. Would his excellency forgive me if I begged that that place be left unopened, as my peccadilloes, if discovered, would cost me my post as captain. "In that case," said the viceroy, "I will save you from trouble by inspecting myself; the key?"

Doubtful whether to confess my complicity or to brave it through, I thought of the mysterious nature of the whole affair, and hoped that the strange passenger might in some mysterious manner have escaped. This straw of hope that drowning desperation clung to saved the day. I reached in my pocket, and with trembling fingers pulled out the key.

The viceroy unlocked the door, opened it, and closed it hastily behind him.

My nerves were then so wrought upon that I could almost have heard the dew fall, and I fancied I heard a word within spoken very low. Then the door opened again, and there was a rustle of silken robes, the door closed, and the viceroy said in Chinese, "No one there!"

I felt my heart throb with one great bound, and things seemed to reel around me. When I recovered my composure enough to look up with pleased and grateful eyes I saw an expression I thought I recognized, and in an instant I knew what my own unstrung nerves and the regal robes had before concealed—the miserable coolie of the night before was none other than the viceroy of the province of Fuh-kied, the absolute ruler of twenty-five million of people. I had no longer a doubt that my mysterious passenger and the royal fugitive were the same, and that the viceroy himself was conniving at his escape.

The ship sailed on time, and Prince Ichang was landed safely in Hong Kong, where he lived under English protection until a severe illness let him have that privilege most mortals enjoy—of dying with his head on.

Subsequent developments pointed to the fact that the viceroy was influenced not only by personal friendship, but by an enormous bribe with which the rich prince bought his head, and that, fearing the treachery of any of his subordinates, he had planned and executed the escape entirely alone. Of my betraying him he had no fear, as the word of a "foreign devil!" would then weigh nothing in a Chinese court.

Two years afterward I received from the viceroy of Kwang Tung a gorgeous pair of vases and some magnificent embroideries, "in gratitude for past hospitalities," and I found that my coolie friend had been promoted to the government of one of the largest provinces of the empire.—True Flag.

WASHINGTON'S SINGERS.

Teachers of the New Conservatory of Music.

THEY ARE ALL WELL KNOWN ARTISTS.

A Congressional Appropriation Secured for the Institution.

The National Conservatory of Music, for the establishment of which congress at the last session made an appropriation, and which is to be located in Washington, will probably become one of the institutions of the capital city within a few months. Its success is undoubted. Washington has al-

MARIE DECCA.

ways been a musical center of importance. Many musicians of prominence give it as their birthplace or place of education. And its physical beauties have attracted to it many persons who have no concern with government affairs, not a few of whom have been musicians of note. There are, therefore, a great number of people whose interest in the proposed conservatory is direct and strong already in Washington and the actual opening of the conservatory will unquestionably attract many more.

It was through the efforts of the Washington musicians that congress was induced to act. Congressmen are rarely enthusiastic musicians. That being the case, it was difficult to arouse their interest. What was to be gained by a conservatory of music at the capital? Finally, however, they yielded and voted for the appropriation, and the musicians blessed them.

One of those who will undoubtedly play an important part in the new institution is Mlle. Marie Decca. She is a soprano and accompanied the Marine band on its recent tour. Mlle. Decca was a pupil of Mme. Marchesi. She was the only one of a class of sixteen who took the four years' course and graduated. She studied abroad for

SIGNOR MAINA.

awhile and then appeared at Covent Garden, London, under the management of Colonel Mapleson. Her first part was that of Queen of Night in the "Magic Flute." Her success was immediate and substantial.

During the two years she was with Mapleson she made tours of England and Ireland. She talks entertainingly of her experiences in the latter country. Irishmen and Irishwomen, she declares, are severely critical in musical matters. They criticize with judgment, too, she says.

At the first performance in Dublin the students of Trinity college, whose verdict is unquestioningly accepted as final by the musical public there, assembled in the gallery. The knowledge of the presence of these austere critics made Miss Decca rather nervous. But as they gave no indication of disapproval in the first few moments after her appearance, she quickly became confident and sang with such fine effect that when she made her exit the

MME. MAINA.

galleries gave a loud whoop, and demands for cheers for "the blue eyed darlin in the white frock" were responded to lustily.

Miss Decca is a member of the Marine corps and wears the insignia of the corps, an elaborate decoration of gold and silver.

The court train belonging to one of Miss Decca's costumes is of great value intrinsically and also historically. The British museum offered $3,000 for it. It is of spun silver and belonged to the aunt of the old Emperor William of Germany. In former days it was the custom for the bridesmaids to divide the silver train of the royal bride in half, one part being given to some cathedral for an altar cloth and the other kept in the family as an heirloom. The family half of this particular train was presented to Miss Decca during her stay in London. The other half is in the Hohenzollern museum. The Americans in Paris presented her with a pin, the design of which is a music staff of gold. On the lines of the staff are five large diamonds, representing in music notes the letters of her name.

There have been many fables related concerning the origin of Miss Decca's nom de theatre. One says it is derived from two Italian words, decantere and cantore, which interpreted mean "a living song of praise." This is pretty, but it isn't true. The real story is less poetical. During her early life this songstress was known in Washington as Mary Johnston. After she went to Paris and was engaged by Colonel Mapleson, that gentleman thought it necessary for her to have a stage name. Ohio, the name of her native state, was suggested, but that seemed too much like an imitation of Nevada, who at that time was very popular. While searching for a name a cablegram came to Miss Johnston announcing the death of Professor Everest, of Philadelphia, her tutor before she went abroad. He wrote the first song ever dedicated to her. The news of his death made her reminiscent. She got the old song and, humming it over, noticed that the first five notes on the staff were d, e, c, c, a, which she immediately adopted as her stage name.

Signor Maina and his wife will take an active interest in the new conservatory. Signor Maina is a native of Italy. He was a pupil of Tancioni, who was a classmate of Rossini, and came to America under the management of Mr. Strakosch. He has sung with Gerster and Kellogg, as Mephistopheles in "Faust," his voice being a powerful basso of excellent quality. He is a vocal teacher and also the leader of the choir in St. Patrick's church, Washington.

Mme. Maina was known before her marriage as Pauline Montigriffo, and received her first instruction from Barilli, in Washington. At the age of twelve she went to Milan to study with Lamperti. After five years of his tuition she made her debut in Catania, Italy. Directly afterward she made a tour through Europe under the management of Mr. Abbey. She sang with Patti, who, as a token of appreciation of her merit, presented her with a necklace containing forty-five diamonds. Her voice is a rich, full contralto. It has been heard in every country in the world except Australia.

OSKAR KRUTZSCH.

A musician of prominence in Washington is Oskar Krutzsch, who until recently lived in Boston, where he was educated in the musical conservatory. He also studied four years with W. H. Sherwood, of New York. Mr. Krutzsch is popular both as a teacher and a performer upon the piano. Among his recent compositions are, "The Heart and Hand," gavotte, a contralto song entitled, "My Heart's a Lute," and a march called "Le Regiment qui Passe." He is of German ancestry, but a Virginian by birth.

Mrs. E. M. Webber, a soprano, is also from Boston. She has been in Washington since last fall. Her voice is a clear, high soprano, and it has won for her a great amount of applause in the capital city. She was a pupil of Alexander Guilmette, of Boston. She also studied for some time with Carlotta Patti in Paris.

Tenor Herndon Morsell is a native of Washington. Fairlamb taught him and for some time he sang in Washington churches. Then he went to Milan and studied with Lamberti. After a concert season of six months in London he came to America and joined the Boston Ideals, remaining with them until they disbanded. He then went with the McCaull company

MRS. E. M. WEBBER.

and later with the Duff company. Hereafter he will sing only in concert. Mr. Morsell has composed a number of songs of much merit.

Mrs. Annie Roemer-Kaspar was born in Darmstadt, Germany. She came to America when a little girl and began her musical education in Baltimore, completing it in Germany and then returning to Baltimore, where she made her debut. Besides her own pupils Mrs. Kaspar teaches in Mrs. Somers' school, a position she has held for ten years. She is also the soprano in the E Street Baptist church. As a concert singer she is in much demand.

Washington is proud of Mrs. Annie Louise Powell, widow of Lieutenant Powell, of the army. During a western tour of the Boston Symphony orchestra, Mrs. Powell's fine contralto blended with the soprano of Mme. Fursch-Madi. Mrs. Powell also sang with Emma Thursby on her last southern tour. She also is a pupil of the great Milan teacher, Lamberti. But before going abroad to study she was taught by Signor Agramonte in New York, and while with him

HERNDON MORSELL.

was the contralto soloist in St. James' Episcopal church. She wrote a lullaby last winter and secured the everlasting gratitude of the administration by dedicating it to Baby McKee. MARGARET MANTON.

NEW ERA IN ATHLETICS.

The Physical Development of Boys and Girls.

THREE THINGS GIRLS OUGHT TO LEARN.

Prejudice Against Healthy Exercise Rapidly Disappearing.

The Town and Country club, of which Mrs. Julia Ward Howe is president, met at the summer residence of Lyman C. Josephs, of New York. Mr. John S. White, head master of the Berkeley school, New York, read a paper upon the new athletics. He said in substance that the new era of athletic training upon which we have entered bears good tidings of health and strength to women even more than men. The improvement in the physical condition of the American girls of today is as striking as it is gratifying. You no longer hear the criticism which was made twenty years ago by visitors from abroad that the women of our country are weak and inferior in stature.

Almost every girl of 16 or 17 years of age whom you meet is taller than her mother. Ten years ago it was not fashionable for a woman to have a waist of proper size; nowadays too small a waist is considered a species of physical deformity. It has often been said that American women as a rule do not walk well. Close observers will find, however, that there has been a very great improvement in this respect in the last four or five years, and the majority of our girls are ambitious to have a good figure and a graceful carriage from the physiological standpoint.

This wholesome change has been brought about by the better opportunities which women now have to indulge in physical training and exercise. One year ago the first athletic club in the world for women was established in New York city. The limit of 500 members was reached in six months, and already facilities are being added by which the membership may be increased.

The interest which American girls have begun to take in gymnastic training is at once a reflection and a counterpart of the extraordinary development of athletic sports among the young men of the country. If a girl once experiences the exhilaration which comes from physical exercise, when taken under proper conditions and in a suitable dress which allows freedom of motion, you may trust her never to injure herself by tight lacing or by wearing uncomfortable garments of any description.

There are three things which every girl ought to learn how to do—to swim, to fence, and to hold her weight easily with her arms. Lawn tennis has done more to develop among girls a taste for outdoor sports than have all other exercises combined. We sometimes hear of cases of injury from over indulgence in this sport, but where one is injured hundred are benefited. The injury is not the fault of the sport, but is due to carelessness and over exertion at improper times, a danger which should be guarded against in all exercise.

The old fashioned idea that a girl to be ladylike must not run or walk rapidly is fast disappearing. Until recently, said the speaker, we could not be said in America to have any national system of gymnastics. The system of heavy gymnastics of Dr. Winship, of Boston, and the other extreme, the light calisthenics of Dio Lewis, were not altogether successful, although the name of Dio Lewis will surely hold a very high place in the annals of physical training and in the educational system of America, for to no one individually more than to him is due the credit of stimulating a keen and abiding interest in physical exercise.—Boston Herald.

Mrs. Christiance's Ascent on a Broomstick.

Two miles east of Fonda is a farm owned by Byron Christiance. His wife, when cleaning a well stoop, fell headlong into the well, striking the water ten feet below. Fortunately she did not release her grasp on the broom she had been using, and, as it struck the water broadside, her body turned in the seven feet of water and her feet landed on the bottom. On coming to the surface she grasped a projecting stone in the shaft and stuck the end of the broom handle in a crevice. Thus gaining support, she screamed for help, but without avail. The shaft was ten feet in diameter, so that she could not get a purchase for her hands and feet on both sides.

Clinging to the stone with her right hand and resting her right foot on a projecting stone, she drew herself up to the surface of the water, getting support on the left from the broom. Then she raised the broom and stuck it in a crevice on a level with her head, getting support with her right hand and foot. Then she raised herself up as before, and in this way reached the curb and finally terra firma. Mrs. Christiance will not part with the broom, to which she credits her marvelous escape.—Albany Journal.

Equal to the Occasion.

A family of new wealth in Washington have just set up a butler. The head of the family formerly lived in Michigan, and some friends from this state have recently been visiting them. Among them was a lady who had known them for many years. One day at dinner she wanted some bread. The bread basket was within easy reach of the host, and the guest asked him to pass it to her, but he shook his head.

"Darsn't," he said grimly; "Maria's got her eye on me, and if I didn't wait for the butler she'd give me Jessie as soon as she got me alone."—Detroit Free Press.

No Use for Any of Them.

"It's funny, isn't it?" he said to his companion, as they were riding up town on the elevated road.

"What's funny?"

"That there are two thousand seven hundred and fifty languages in the world, and not one of them is good enough for that brakeman."—Puck.

NO CAR TRACKS IN LONDON.

Street Cars Are Not Needed and There Are No Surface Rails in the City.

There are no street cars run by the trolley, storage or any other electric system; no cable cars, no horse cars; not a track laid for a surface road in the city proper. Many Americans leave London without ever seeing a street car of any kind, and yet in the metropolis 1,000 street cars run daily over 120 miles of track, but they are not permitted in crowded thoroughfares; they are confined to the outlying districts.

I have only seen them in the East End. The street cars are "double deckers," and, like the 'buses, they carry more outside than inside passengers, but the number of passengers is limited. When the car has reached its limit it will take up no more passengers. Every passenger has the right to a seat, and, to use a paradoxical phrase, every Englishman stands up for his right to a seat.

Street cars are not needed in the city. Nearly all London streets are in as good condition for driving as our Central park roads. There are 8,000 hansoms, 4,000 four wheelers and 2,000 omnibuses, so that you are not obliged to walk on account of the absence of cars. The four wheeled cabs or "growlers," as they term them, are dilapidated, uncomfortable vehicles, which lack new springs and are dirty both inside and out.

The horses and the drivers are old and superannuated; they have all seen better days in private carriages or hansom cabs. You never take a four wheeler if you are alone, or if the party consists of only two persons. You must engage one if you have a trunk, but if you are going to catch a train or boat you had better allow a half hour's margin.

The London cab service is the best and cheapest in the world. The writer says this, notwithstanding that he remembers that you can hire a cab in Key West for a dime. But such cabs and such horses! The fare in a hansom for a two mile drive is one shilling (twenty-five cents); by the hour, two and six (sixty-two cents).

There are no such smart horses for public hire anywhere as the London cab horses. They go like the wind if by the course, and they go at a similar gait by the hour if you promise an extra sixpence.—Morris Phillips in New York Home Journal.

The Pin in England.

The date of the first manufacture of pins in England is shrouded in uncertainty, but it is authentically recorded that as early as 1464, when money was "tight," extensive clothworkers compelled their laborers to accept, in payment for their work, "pins, girdles and other unprofitable wares instead of money." The march of improvement had begun and kept on steadily until toward the middle of the Sixteenth century pins began to win appreciation so high that statutes were enacted protecting their manufacture, and rigid laws were passed prohibiting the importation of numerous minor articles, including pins, gloves, knives, tailors' shears, scissors and irons. Up to this period female dress was fastened with ribbons, laces, clasps, hooks and eyes and skewers of brass, silver and gold; the latter were in fact pins without heads.—Table Talk.

Wonders of Dental Surgery.

Years ago, where a few false teeth had to be inserted, the dentist put in a great clumsy plate, partially covering the roof of the mouth. At present, if there is a support to build on, we make a regular bridge, and cement it in position without any plate at all. In a week the patient forgets that he ever lost a tooth. More than that, teeth are even implanted. Suppose you go to a dentist and say you lost a tooth five or six years ago, but you want a new one implanted. He drills a hole in your jaw and takes a human tooth that has been extracted maybe months or even years previous to correct an irregularity in somebody else's mouth. He scrapes and cleans the other fellow's tooth and plants it in the hole in your jaw, and therein it grows.—Interview in Philadelphia Record.

Grief and White Hair.

The mustaches of Henry III of Navarre are reported to have become partially white in a few hours after hearing of the concession of the edict of Nemours. The hair of an English banker, owing to reverses in business, became gray in three days, according to The Encyclopedia Metropolitana. According to the same authority, a man about forty years old, who at his marriage had a dark head of hair, "on his return from his wedding trip had his hair turn so completely snow white, even to his eyebrows, that his friends almost doubted his identity." Quite in contrast is the case of a gentleman, about thirty years of age, who, losing his wife, had his black hair change to white in a single night.—Hyland C. Kirk in New York Times.

Effect of Arsenic on the Face.

The slow absorbtion of many poisons changes in some more or less modified form the complexion, but arsenic and ammonia show their effect about as quickly as any. The popular belief that arsenic clears the complexion has led many silly women to kill themselves with it in small, continued doses.

It produces a waxy, ivorylike appearance of the skin during a certain stage of the poisoning, but its terrible after effects have become too well known to make it of common use as a cosmetic.—Chicago Tribune.

A LITTLE ISLAND COLONY.

Fifty People Who Live on a Lofty Rock.

THEY LIVE WELL WITH LITTLE LABOR.

Visited Once a Year by a Magistrate to Settle all Disputes.

A few months ago the handful of people who live on Pitcairn island celebrated the hundredth anniversary of the landing of their fathers on that little rock. The world is always glad to hear of the prosperity of this people, and several other little communities inhabiting the smallest specks of land in the ocean also excite much interest.

There is one island, however, of which we seldom hear. It is Lord Howe island, the home of fifty or sixty white people, about 600 miles northeast of New South Wales. Years ago two or three families from New Zealand thought they would seek a new home.

They had heard of the profuse vegetation on this crescent shaped little island, and decided that they would build new homes there. So they went to Lord Howe island, which is only six miles long and about a mile wide, and rises precipitously from the sea to a height of nearly 3,000 feet at nearly every point. They built their huts, tilled the land, and after a while two or three other families joined them. Some of these original settlers are still living, but most of the residents are their descendants.

The island is under the government of New Zealand, and once a year it is visited by a magistrate, who settles all little disputes. It is a very easy task, for there are seldom any differences among the people. Like Pitcairn and other little island communities, they have never found it necessary to build a jail.

There were none of the higher mammals on the islands when they went there, but now there are quite a number of goats, swine and cats, which, having escaped from domesticity, have lived in the woods so long that they have become quite wild. While some of the men engage in tilling their gardens others are out fishing. A great many edible fish are caught there, and the people find it very easy to live in comfort without a large amount of labor.

They say they have not the slightest desire to return to larger communities. They do not encourage immigration because they think they and their children will need all of the 3,220 acres of the island. Sometimes a sailor from a passing ship spends a little while in the community, and has been known to carry away one of the daughters as his wife, but most of the people are born, live and die there.

They cannot travel more than a few hundred rods without seeing the sea, and of course they come to know every inch of their little world. Once or twice a year a vessel comes to them with a large variety of supplies, and they purchase with their corpa and other products the goods they need for the ensuing year. At the same time their libraries are replenished with new books, a large lot of newspapers come to their homes, and it takes them a good while to read of all that has happened in the busy world since they last heard of it.—New York Sun.

Loose the Bands of Thy Neck.

My mother used to tell a story of a curate in a Norfolk parish, where the rector was non-resident. One Sunday, just as the curate had entered the reading desk, the rector came into the church, and sent him a note to the effect that he wished to preach, but had forgotten to bring his bands. This appendage to the clerical wardrobe was quite indispensable in those days, and the only way in which the curate could help him out of the difficulty was to untie his own bands and hand them up into the three decker as soon as the rector mounted.

But when the time came, as ill luck would have it, the string of the bands got into a knot, and by one of those unaccountable coincidences that sometimes occur the singers in the gallery struck up the anthem "Loose the bands of thy neck, thou captive daughter of Zion," and as they repeated the words over and over again, and one part echoed another, "Loose the bands of thy neck—loose the bands—loose the bands," the hapless curate became more baffled in his hopeless endeavors to untie the knotted strings, and in his nervousness supposed the anthem to be directed to him. I do not remember how it ended, but probably the amusement it caused afterward may have more than compensated for the annoyance of the time.—Cornhill Magazine.

Ready Made Clothing.

I am sometimes amazed in passing the great ready made clothing establishments of Boston to note how differently they are regarded than formerly. It was less than a generation ago that they were patronized almost exclusively by workingmen, mechanics and farmers, who desired rough, cheaply made clothing. Merchants, bankers, professional men invariably left their measure with their tailors, and scorned what was familiarly termed "slop made" clothing. But a demand arose for fine grades of ready made clothing, and the alert American manufacturer was ready to meet the demand.

The demands of the customer were exacting, and to reach his high standard of excellence scientific methods were employed and competent designers. It was the old story of the relative cost of making one coat or of making 500. But there were men of peculiar shape who heretofore had been able to become fitted only by the custom tailor. He was too tall or too fat to be fitted from the ready made stock of the olden time. This difficulty was soon met and overcome until to-day, although the custom tailor has by no means disappeared, the ready made dealer has for his customers that class of men who once scorned him.—Boston Advertiser.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, FEBRUARY 4 1892

In San Francisco there is much writing and talking kept up on the subject of getting rid of political bosses. The people of San Francisco are like a tramp lying in the sun, flies swarming on mouth, nose and eyes; when the pests become unendurable he grunts, rolls over, and for a moment his torments leave him. But the instant he is free he settles contentedly to rest again, and the flies swarm upon him thicker than ever. But in this San Francisco is only a fair representative of the whole country.

It now appears that by his bill for loaning money to farmers at two per cent per annum Senator Stanford is inviting them to a Bermecide's feast. Mr. Stanford has admitted that if his bill should become a law railroad companies might borrow money on their land grants. The corporations would secure the appointment of their creatures as agents to value lands and to make loans and until every acre of such lands had been used to get money on not one dollar could ever be borrowed by the real farmer. If the hundred millions of dollars stated in Senator Stanford's bill should be multiplied by ten that and more would be absorbed by land grant companies before one dollar would ever reach the people in whose interest the bill is pretended to be framed. The bill is simply a scheme for securing money under false pretenses and will never become a law.

It is not at all likely that any legislation in favor of silver coinage will be done at the present session of Congress. The single gold standard is too valuable a privilege for the capitalists to surrender it without a struggle. The money power can secure any legislation it wants, or defeat any measure it opposes. Silver coinage would be in the interest of the masses but would possibly diminish the profits of a class. The masses hold the semblance of power, but the class enjoys the real benefit of it. But if any bill affecting silver coinage should become a law it is reasonably certain that some word or phrase of doubtful meaning meaning would be found in it that would require interpretation by a court of law. Here the class as against the mass can be tolerable certain of securing a victory. So long as the money power is combined against silver coinage it will not be resumed, though every voter in the United States who lives by toil should demand it. It is only in Congress that the politicians who follow Mr. Reed demand that the majority shall rule; outside of that they take care that the real exercise of power is limited to the very small minority who control the capital of the country.

The Chilean difficulty gave a certain class in England a chance to show once more their bitter hatred to the United States. Their papers for months past have been filled with rancorous abuse of Americans; no slander was too vile to utter and no hesitation was felt to publish the grossest lies about United States officials, not even the President being spared. This has been the unvarying course with the same class of Englishmen from the foundation of the colonies to the present day. The arrogance and stupid pride and selfishness that have made that class of Englismen detested in all other countries drove the colonists to revolt. The same vices brought on the war of 1812. The thorough beatings on sea and land inflicted upon England in both those wars compelled respect for American arms, but also intensified the envy, jealousy and hatred which burned in their hearts against the United States. At the close of our own civil war, when we had a large fleet and army ready for instant service England did not dare refuse to pay the fifteen millions of dollars damages for her hostility to the United States. And now in the dispute with Chile no chance was let slip by the English Tory press to vilify and abuse Americans and everything connected with our government. The great body of English workingmen know that the United States is the best country in the world for those who have to live by labor and they do not share the ill feeling against us of the selfish class who live in luxury, while they whose labor produces all the wealth of England are forced to grow up in ignorance, toil like slaves and live in poverty, hunger and dirt, and at last their worn out bodies are thrown into paupers' graves.

AN IDEAL.

"When I find the girl who looks like that picture I am going to marry her."

George Milman, who made this remark, and his aunt, Mrs. Henderson, were standing before a picture of hers almost beautiful enough to justify such extravagant admiration. It was called "Future," and represented at half length a girl in all the sweet freshness of budding womanhood.

"Yes," he continued, "note the characteristics of this picture and their significance and you will see why I say so. The figure is graceful, the head, delicately poised, is rather large, and the brow, of unusual breadth, is brought into full relief by the dark brown hair, brushed straight back, with its wavy abundance only slightly confined by a ribbon around the head. The eyes are a dark gray, large and at once bright and thoughtful; the mouth and chin, though marked by the tender lines of youth yet, show sufficient decision of character. Intellectuality and unselfishness are indicated, but the one characteristic most prominent brought out its ingeniousness—in the noblest sense of that often misused word.

"It is more than innocence and does not depend on ignorance. It is most often seen as a characteristic of a noble woman, and is retained by them in some miraculous way in spite of much intellectual knowledge of the world's wickedness. Such a woman as is portrayed in this picture would naturally be clinging and dependent, but finding herself without a support, or her chosen protector proving unworthy, would meet the emergency heroically and stand unfaltering. Such a woman I most admire, and such a woman, if I have the good fortune to find her, I shall certainly marry."

"But she might be the original of this picture, and yet not have the character you describe," said Mrs. Henderson.

"No, that is impossible; a woman could not look that way without being all that I have suggested."

"But if you find her you still might not win her."

"Yes I would, no matter if she was engaged to be married and her wedding day was appointed."

"It is like you to be so sure, and like you, too, to fall so desperately in love with a picture."

In this Mrs. Henderson was right; such a determination was characteristic of George Milman. Though born in this country, his father was a native German and his mother of German descent. This, with a practical American training, gave him a curious combination of German and American characteristics. His peculiarly intellectual head, so large that all his hats were made to order; some of his features, especially his brown and rather dreamy eyes, and occasionally his manners and conversation, were German, while his figure and usually his manner were American. He had the German's ideality, romanticism and love of deep thought, philosophic and speculative, with the American's keen observation, eye for the machine and practical attention to details.

His dual nature was shown in his business. He was a drummer for a large manufactory, selling to jobbing houses, and so had to take long trips from city to city. When actually at work he was all attention to business and put his whole soul into it—with distinguished success. On the intervening trips he yielded to the speculative side of his nature, spending his time in reading the best novels, histories and philosophical works from Carlyle to Henry George. He would sometimes feel and express the deepest disgust for his work, but he always remembered that it brought him a handsome income and held on to his position.

Some three months after the above conversation George again called to see his aunt, who asked him if he had yet found the object of his adoration.

"I can't exactly say that I have, but your question reminds me that I have a story to tell you, and I suppose I might just as well begin at the beginning."

"Please do. It is about that picture, I know," she replied.

"Well, you shall see," was the response, and he began:

"I was on the Nashville, Chattanooga and St. Louis train on my way to Nashville. I had been traveling twelve hours and was rather tired. I was reading the "Tale of Two Cities"—trying to read it, that is, for my mind was stranglye wandering in spite of my interest in that remarkable story—the best Dickens ever wrote. Looking up in one of these fits of inattention, I happened to notice a party which must have got on at the last station, and had taken seats diagonally in front of me. It consisted of an old lady, a young lady and a boy about seventeen, evidently mother, brother and sister. The mother attracted my attention first, and I was idly admiring her still unusual beauty, sublimated, but not destroyed by age, when the young lady turned around.

"Aunt, she might have been the original of your picture, so like she was in every detail. I was astonished and could hardly believe my eyes. I watched her quietly and studied her features until there was no doubt about it. There was the broad brow, the dark brown hair loosely confined, the dark gray eye, the sweet, firm mouth, and above all the expression of intellectuality, unselfishness and ingeniousness. I forgot the story, and I could not take my eyes off her one minute—I fear she must have noticed it."

"I know she did," interrupted Mrs. Henderson. "You must have stared her out of countenance."

"I suspect I did, and all the time I was endeavoring to realize my good fortune, and thinking how I should manage to find out the young lady's name and how I could make her acquaintance.

"After an hour's ride in this way I went into the smoking car for my cigar case, which I had left there. I was detained by a friend whom I met there and left the car just as the train was starting again after having stopped at a small station. Chancing to look to one side, I saw my new found ideal and her party just getting into a carriage, which had apparently been waiting for them. Aunt, just one thought filled my mind that I could not afford thus to loose my ideal so soon, and that unless I followed her she was lost. This was rather an impulse than a thought—there was no time for that, and I piled off after her.

"The carriage had started, and there was only one man in sight—the depot agent. I spoke to him and asked who the people who had just left were. He said that he did not know; that he had never seen them before; but I believe now that he did and that he must have taken me for a lunatic; my appearance was outlandish enough and I suspect my manner was excited. I tried to hire a horse, offered him a large price for the use of one an hour, but the fellow told me that he had none and there was none in two miles. The carriage was now almost out of sight, and still hoping to find out something about it I started out after it.

"But I did not go far before I realized that pursuit was hopeless and that by such conduct I was making myself ridiculous, and I returned to the station—then for the first time I remembered that I had left all my baggage, which was very valuable, my umbrella and overcoat, on the train, and even my hat, as at the time of the incident I was making myself comfortable in a skull cap, which was all I now had to protect my ambrosial locks from the elements.

"I was now sufficiently disengaged to find out something about the place which I had so unexpectedly visited. It consisted of the railroad station and one store, which was unfortunately closed—the agent informed me that its owner was attending a camp meeting six miles away. I questioned the agent again about the party I had pursued, but gained no further information. I telegraphed to the conductor on the train I had left to take care of my effects, which he was kind enough to do, and after twelve hours in this neglected spot, spent sitting on a barrel, realizing my ridiculous conduct and bemoaning the loss of my ideal, I took the next train and finished my journey in safety."

"Well, that is quite a story," said Mrs. Henderson, and you have seen how I have enjoyed it. Who but you would have fallen in love in such a way, and it is too bad that you lost her. But it cannot have gone very far, even with you, and you will soon find some one else."

"We shall see about that. I don't know whether it is love or not, but I believe that I shall find that girl again some day, and I am not going to marry until I do."

Two years passed during which George had been true to his resolution, and used often to say that he was waiting for his ideal. Then he was transferred by his house to the west and took up his abode in Texas.

Not long afterward Mrs. Henderson received from him a letter giving the following account of his experiences:

"I have another story to tell you, and as before I think I had best begin at the beginning. Hempstead is a nice place to live in, and I have had a pleasant time here and have made many friends. You know that I am not a society man, and steer clear of the professional Four Hundred which we find in every city. But the larger class of cultivated people I like, and go when I can to their occasional entertainments. Three months ago I went to one—it was given by a musical club, and combined a programme of the best amateur talent with social features—that I am likely to remember. For one of the last pieces was a song by 'Miss Ethel Lyndon.' It was well sung; I noticed that, but my chief interest was in the singer—in whom I recognized my ideal.

"I traced the resemblance in each particular, and tried to discover whether she was the woman I had seen in Tennessee. She was so like her I thought she must be the same, though I could not determine, but there was no doubt about her being the woman in your picture, and so my ideal.

"I asked my friend about her and discovered that her father was a prominent business man of Hempstead and had lived there for years, and that she was very popular among those who belonged to her society, so much so that half the young men of the town regretted her announced engagement and approaching marriage to a gentleman of Dallas.

"I was already in love, and you may imagine that this was discouraging intelligence. But my motto has always been 'nothing venture nothing have,' and I immediately determined to try the fortune of war, knowing that I had nothing to lose—having so completely lost my heart already—and that I might win. So when the musical programme was over I was introduced by my friend. I cannot tell you our conversation, or what she thought of it, but if I can be entertaining I was then; and I found her all I had expected her to be from her face, and became more in love than ever. I told her that I was a stranger, having recently come to live here, and she was kind enough to invite me to call.

"I had no time to lose—I could only attempt to take the fortress by storm, a dangerous thing to do, but there was no opportunity to try the safer plan of a masked seige and stratagems. I had one thing in my favor: I was on the spot and the other fellow was away.

"I soon availed myself of her invitation to call and spent a very pleasant evening—one of those 'moments of delight' that are at once so sweet and so painful to remember in less happy times.

"What made it especially pleasing to me was that Miss Lyndon seemed to enjoy it as much as I did. I remember that you have often laughed at love at first sight, but I think that my experience demonstrates its truth. And that evening suggested another question which I endeavored to solve, but could not. I will ask your opinion. Not only did I feel pleasure in being with the woman I loved, but I had also a feeling of being thoroughly en rapport with her, as if she felt the same pleasure and there was some subtle and mutual sympathy between us. Now, was that feeling a creation of my own brain, independent of any similar feeling on her part, or was it what it seemed, and could I therefore know because I experienced it that she was similarly impressed.

"It would tire you to read the details; it is enough to say that I made the most of our acquaintance. I called as often as I possibly could, oftener than I had any right to; met her at receptions and any other entertainments where she was likely to go; went with her to the theater and to the Beethoven club, at one of whose meetings I had first made her acquaintance—in short, I took every opportunity I could find or make of seeing her.

"Finally I went with her, her father and a party on an excursion in a private car to a new city, where he was working up a real estate boom.

"On our return I seized a favorable opportunity and told her that I loved her—how I did it I cannot tell even you—and of course I received the reply that she was engaged. But she said it very sweetly, and made me love her better than ever. Then I said, 'How I wish I had known you sooner,' and she said, 'I wish so too.'

"'Then, darling, if you do wish it you need not; if it can be that you love me—ah, you do, I see you do—you can marry me in spite of all.'

"'No, I will not break my promise, and I will have to give up your acquaintance unless you respect it.'

"'I promise;' I was too happy at finding out my love returned to care very much. It could not be kept of course, and I very soon broke it by asking Ethel if she did not think it wrong to marry a man who she did not love.

"'I think it is wrong to break faith with one who is faithful to me,' she said, 'and so would you if you were treated that way yourself.'

"'Yes, I know that, but as I am the one to profit by it I think that it is all right and the other fellow ought not to care. I certainly think that you ought at any rate to tell him that you love him no longer.'

"'Yes, I ought to do that, and I will; but I will offer to fulfill my promise, though it was made principally to please my parents, as I see now, and, without the love that could alone justify it.'

"This she did, and soon thereafter received a letter from her fiance, in which he thanked her for her frankness, and told her that she had relieved him from a similar embarrassment, as he had lately discovered that his affections were engaged elsewhere, but had felt in honor bound to her. Such are the curious and inexplicable workings of the human heart, but I did not quarrel with them, for they brought me my heart's desire.

"One day I asked Ethel if she had ever been in Tennessee.

"'Yes,' she said; 'two years ago in October, on a visit to my grandparents.'

"'Were you on the Nashville, Chattanooga and St. Louis train, and did you get off at Uxton station?'

"'Yes.'

"'Then you are, as I have believed, the woman I saw on the train then. Darling, I fell in love with you then, and have been hunting for you ever since.'

"'And you are the man who stared at me so hard on the train and followed me off, leaving his hat behind; I recognized you when we were first introduced.'

"We were married, very quietly, although in church, just a month before the time originally set for Ethel's intended marriage, and we are now on our wedding tour.

"So you see I did find my ideal, and have won her, and you will have to imagine how happy I am, for it is beyond the power of words to tell you."—W. P. W. in Atlanta Constitution.

MISCELLANEOUS.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a Year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing for teaching unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number, who are making over $3,000 a year each. It is NEW and NOVEL. Full particulars FREE. Address at once, E. C. ALLEN, Box 420, Augusta, Maine.

DESERT LAND FINAL
U. S. No. 15
LAND OFFICE AT INDEPENDENCE, CAL., Sept.
Notice is hereby given that Leonard of Bakersfield, Kern county, California, has filed notice of intention to make final proof on his desert land claim, E. ½ of Section No. 2 and the E. ½ of Section No. 1, Tp. 10 S., R. 34 E., M. D. M., before Register and Receiver at Independence, California, on Saturday, the 10th day of October, 1891.
He names the following witnesses to prove the complete irrigation and reclamation of said land: G. Sanger, W. Stevens, M. Naylor, all of Big Pine, Inyo county, California.
C. R.

Some mule FORTUNES made at work for us in Austin, Texas, or Toledo, Ohio. Men are doing as well. Why shouldn't you? Some over $100.00 a week. Can do the work at home wherever you are, and easily earn $5 to $10 daily. All ages, and start you. Capital not needed. We make all the work we offer. Failure almost unknown. Reader, if you want to know all about the best paying business before the public, write to us and we will send you full particulars, which you can consider at home, all for yourself, free. Address at once, STINSON & CO., Box 488, Portland, Maine.

Address, or any one in Salem, N. Y., Goodwin, Troy, N. Y., Hamilton, you may not think we can teach you quickly from $5 to $10 a day at home, or spare time, or all the time. Work sent anywhere. Great pay for all. We start you. Capital not needed. You can begin at once. Address, BARLEY & CO., Box 880, Augusta, Maine.

Rev. H. J. Winter will preach at Lone Pine on Sunday at 11 o'clock a. m.; at Georges Creek, 2:30 p. m.; at Independence at 7:00 p. m.

COURT NOTES.

Geo. M. Gill, Superior Judge.

WEDNESDAY, February 3, 1892.

People vs. John Clarke—Filed original subpoenas of Jacob Schober and John Black.

Estate of John A. Hannah, deceased—Filed appointment of attorney to represent assignee of Mary Jane Pennel, original assignement of Benjamin E. Rivers.

People vs. Val Stecman—Filed judgment roll.

BORN.

PARKINSON—At Lone Pine, January 27th, to Mr. and Mrs. Wm. Parkinson, a son.

A. O. Collins of Warm Springs was in town yesterday.

Wm. McDonald of Big Pine has been visiting town all the week.

The Mojave freighting team passed through town going south on Wednesday.

Mr. and Mrs. John Anton and Miss Ella McCall came up from Lone Pine on Wednesday.

D. J. Hession came down from Big Pine on Monday last and spent the week in town.

W. L. Hunter has returned from Ventura county. He reports having had a very pleasant trip.

It is reported that N. E. Conklin has accepted a position at Sumner and will make his home over there.

The late rains ensure plenty of foothill feed for stock cattle. With the first warm weather the weeds will begin to grow very rapidly.

To be consistent the motto on our coins ought to be changed by the insertion of the letter "r", so as to make it read, "In God We Trust."

Ranchers in this vicinity will soon commence plowing. Prospects are most favorable for an early Spring with plenty of water.

It is said that George Lewis has struck a good ore body in the Custer mine at Darwin. George certainly deserves success, and we hope the report is true.

It is a sure thing that somebody cut the tail off the hog, but as Frank Shaw treated the crowd, Pete McGinnis couldn't tell who did it. It is believed, however, that a *young* man did it.

It is currently reported that the Union Company has discontinued all operations at Cerro Gordo and that the property has been leased by F. C. Bristol to Keeler, who will soon commence work.

The Bishop creamery will undoubtedly be a "go." There is sufficient home market to make such an enterprise a paying institution, and as it is backed by energetic men, it will soon be in operation.

The condition of Mr. Reddy's health this week has been such as to require medical attendance, but he continued his case with the exception of one half day. He has a severe cold, but no serious illness is apprehended.

On the 31st ult. the Carson *News* issued an illustrated edition which contains much interesting matter in regard to the State of Nevada and Carson in particular. The proprietor of the *News* is evidently a rustler, and intends to make a success of his venture.

A shooting scrape is reported to have occurred at Sodaville on Wednesday evening of last week in which Martin Inazanovich shot and probably fatally wounded William Rosen. The affray occurred in the latter's sleeping apartment. Inazanovich has been held in $5,000 bail to await the action of the Grand Jury.

Present indications point strongly toward a transfer of lands under the Eastside canal. Mr. Coffin spent several days here procuring deeds, and in other work preliminary leading to such a sale, and the San Francisco *Chronicle* of Thursday, a week ago, contains an article to the effect that a colony will soon arrive from Great Britain, the statement being made on the authority of R. L. Paine, a most reliable man. It is said that the colonists intend to bring their houses with them, build a town, and to a great extent be independent of present residents of the Valley.

Send 50 cents to Bond & Co., 576 Rookery, Chicago, and you will receive, post paid, a four hundred page advance Guide to the Exposition with elegant Engravings of the Grounds and Buildings, Portraits of its leading spirits, and a Map of the city of Chicago; all of the Rules governing the Exposition and Exhibitors, and all information which can be given out in advance of its opening. Also, other Engravings and printed information will be sent you as published. It will be a very valuable Book and every person should secure a copy.

Mr. C. W. Reed, proprietor of the Hotel Dellone, Omaha, one of the finest new and modern hotels in the west, says of Chamberlain's Cough Remedy: "We have used it in our family for years with the most satisfactory result especially for our children, for colds and croup. It can be depended upon, besides it is pleasant to take and seems to be free from chloroform and the oily substances put into many cough mixtures. 50 cent and $1 bottle for sale by

A. K. EUGLEY,
Big Pine.

The Clarke Trial.

The above case was continued in the Superior Court on Saturday last. On calling the roll of jurors J. R. McIntyre was absent and the fact that he was ill and confined to his bed caused the adjournment of the Court until Monday. The prosecution continued their case by calling J. G. Morris to the witness stand. His examination was continued until afternoon when Jacob Schober was called and his testimony concluded that day. The examination of Joe Inman and Peter McGinnis required all of Tuesday. Wednesday forenoon was taken up with the examination of A. W. Sheets, the complaining witness. On opening the Court after noon recess Mr. Reddy, counsel for defendant, was too ill to continue the case and an adjournment was taken until next day. The cross examination of Sheets was continued yesterday morning. After completing his testimony, Dr. L. W. Allingham was called and with his evidence the prosecution rested their case. Mr. Reddy then proceeded to outline his proposed defense, and what he expected to prove. H. G. Pumbley was the first witness called for the defense. His examination was continued after the noon recess. A. Clarke was then called and the taking of his testimony concluded the day. This forenoon was occupied with the examination of Drs. I. J. Woodin and W. H. George. It is expected that the defense will conclude their evidence this afternoon, and that the arguments will begin. It is likely that the case will be given to the jury tomorrow.

Beats The World.

The following extract from the last monthly report of the Weather Bureau at San Francisco will give a good idea of the delightful winter climate of Southern California: "Precipitation fell in Washington on 25 days during the month; on 22 days in Oregon; on 15 days in northern California; on 7 days in Southern California; on ten days in Nevada; on 13 days in Utah, and on 5 days in Arizona. High winds occurred on the Washington Coast on 15 days; in Oregon on 3 days; in northern California on 12 days; in southern California on 1 day; in Nevada on 4 days; and in Arizona on 4 days. The coldest days occurred between the 12th and 16th and warmest between the 20th and 24th, with a highest temperature of 80° at Los Angeles on the 3d.

The Officers Must Fut Up

A recent decision of the Supreme Court will likely create some speculation in this county. For several years the Supervisors have allowed Assessor Chalfant to have a deputy and pay him out of the county funds. The Supreme Court has decided on a case carried up from Merced County that this course is illegal and that all county officers must pay their deputies out of their own pockets. That the law providing for the appointing of deputies and paying them out of the county funds is unconstitutional. If Mr. Chalfant engages a deputy this year he must pay him out of his salary. And after all this is done right as he knew at the time of his election what his duties would be, what his salary amounted to, and should abide by the law.

Stop Trapping Quail.

The constant trapping and shooting of quail during the last season has made a very perceptible difference in their number. Formerly flocks of quail could be seen everywhere, but now they are few and scattered and very wild. The practice of trapping the birds should be stopped. Independence is regarded as a good place to come for hunting, and during the past season several parties have come here from Carson and elsewhere for that purpose. These people patronize our hotels and livery stables and should be encouraged, but if the pernicious habit of trapping them be continued there will be no hunting.

No healthy person need fear any dangerous consequences from an attack of la grippe if properly treated. It is much the same as a severe cold and requires exactly the same treatment. Remain quietly at home and take Chamberlain's Cough Remedy as directed for a severe cold and a prompt and complete recovery is sure to follow. This remedy also counteracts any tendency of la grippe to result in pneumonia. Among the many thousands who have used it during the epidemics of the past two years we have yet to learn of a single case that has not recovered or that has resulted in pneumonia. 50 cent bottles for sale by

A. K. EUGLEY
Big Pine.

Get Your Work Done

R. W. Scott, watchmaker and jeweler, has located at Dr. Pinto's office for a short time only. Should you wish to get anything in the jewelry line now is the time. Do you want your watch or jewelry repaired? Do you want a first class pair of spectacles or eye glasses? Do you want to buy a watch or any jewelry? If so, come at once and please remember all goods warranted as represented, and also all work warranted.

Many persons who have recovered from la grippe are now troubled with a persistent cough. Chamberlain's Cough remedy will promptly loosen this cough and relieve the lungs, effecting a permanent cure in a short time. 50 cent bottles for sale by

ASSESSMENT NOTICE.

INYO MARBLE COMPANY.

Location of principal place of business, San Francisco, California. Location of works, Inyo, Inyo county, Cal.

Notice is hereby given that at a meeting of a Board of Directors, held on the 26th day of Jan., 1892, an assessment (No. 16) of Fifteen (15) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary at No. 137 Montgomery St., San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 4th day of March, 1892, will be delinquent, and advertised for sale at public auction; and unless payment is made before will be sold on Wednesday, the 9th day of March, 1892, to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.

G. W. LUCAS, Secretary.

Office, No. 137 Montgomery street, San Francisco, California.

NOTICE OF SALE OF REAL ESTATE AT PUBLIC AUCTION.

NOTICE IS HEREBY GIVEN THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the 9th day of January, 1892, in the matter of the estate of Francisco Pedores, deceased, the undersigned, administratrix of said estate, will sell at public auction, to the highest bidder, for cash, gold coin of the United States, and subject to confirmation by said Superior Court, on the 6th day of February 1892 at one o'clock p. m., at the residence of said deceased, at the town of Lone Pine, County of Inyo, State of California, all the right, title, interest and estate of the said Francisco Pedores at the time of his death, and all the right, title and interest the said estate has, by operation of law or otherwise, acquired other than or in addition to, that of the said Francisco Pedores at the time of his death in and to those certain lots, pieces or parcels of land situate, lying and being in the town of Lone Pine, County of Inyo, State of California, being Lots 6 and 7 in Block No. 14, as the same are known and designated on the official plat of said town of Lone Pine, now on file in the office of the County Recorder of said Inyo county.

Terms and conditions of sale: Cash, gold coin of the United States, ten per cent. of the purchase money to be paid on the day of sale, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

YGNACIA BRUHO
Administratrix of the estate of Francisco Pedores, deceased.

Dated January 12, 1892.

Does it Contain Ammonia?

The charge is being made that the Royal Baking Powder contains ammonia. We would have supposed that the emphatic condemnation of ammonia baking powders by the most eminent physicians throughout the land, and the fact of the three leading chemists of Minnesota making their report to the Senate Committee recently showing that bread baked with the "Royal" contained ammonia and the hostility now being manifested by the public against all ammonia and alum baking powders would have driven them permanently from the market.

In view of the fact that Baking Powder has become an indispensable article in every kitchen, it is gratifying to know that there are brands in the market to which no suspicion of any kind has ever attached. Dr. Price's Cream Baking Powder is a pure cream of tartar powder free from every taint of ammonia, alum or other harmful substance.

Dr. Price's Cream Baking Powder is reported by all authorities as free from Ammonia, Alum, or any other adulterant. In fact, the purity of this ideal powder has never been questioned.

A Welsh bard, Elwell Ap Barnard, has written a 110-verse ode to his cow. He ought to be made poet lariat.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. Use Enameline Stove Polish; no dust, no smell.

Try Germea for Breakfast.

"German Syrup"

Here is an incident from the South—Mississippi, written in April, 1890, just after the Grippe had visited that country. "I am a farmer, one of those who have to rise early and work late. At the beginning of last Winter I was on a trip to the City of Vicksburg, Miss., where I got well drenched in a shower of rain. I went home and was soon after seized with a dry, hacking cough. This grew worse every day, until I had to seek relief. I consulted Dr. Dixon who has since died, and he told me to get a bottle of Boschee's German Syrup. Meantime my cough grew worse and worse and then the Grippe came along and I caught that also very severely. My condition then compelled me to do something. I got two bottles of German Syrup. I began using them, and before taking much of the second bottle, I was entirely clear of the Cough that had hung to me so long, the Grippe, and all its bad effects. I felt tip-top and have felt that way ever since." PETER J. BRIALS, Jr., Cayuga, Hines Co., Miss.

TOWER'S FISH BRAND

"IN THE SWIM"

For sportsmen, tourists and others who spend their time in the open air, Mastiff cut plug smoking tobacco is absolutely the best. Packed in patent canvas pouches which retain the moisture and flavor. More solid comfort in one package of Mastiff than you can get out of a dozen others.

J. B. Pace Tobacco Co. Richmond Virginia.

THE FIDDLER'S DAUGHTER.

"Widder Thompson's Jim" stopped "knockin'" the strings and dropped his knitting needles in surprise, while dancers and spectators alike favored me with stares of surprised interest. In the entire assembly I noted but one exception to the general rule, 'Rinda Brisbane, "the fiddler's little ole gal," as my companion had lately termed her—my own demure little 'Rinda—gave one startled glance in my direction, and then her eyes dropped, and I could discern a wave of color sweep over her face.

She had been expecting my coming, but not so soon; and the notes of the clarinet, so familiir to her ear in the bright, beautiful days of the past summer, had been to her the first intimation of my presence.

Our eyes met, for an instant, but that was the only sign of recognition on the part of either. I restrained my desire to rush to her side, and turned my attention strictly to my duties as assistant musician. My sole business on this particular occasion was to propitiate a "stern and unrelenting parent," and I was determined to let nothing whatever swerve me from my purpose.

Old Brisbane seemed delighted with the slight assistance I offered him; patted his foot with renewed vigor, leaned his head farther to the left, and the long bow swept the strings with a multitude of grandiloquent curves and gestures. Despite the frequent occurrence of various twists and turns, not originally found in the score of the "Arkansaw Traveler," I had but little difficulty in following his version of the tune, greatly to the satisfaction of all those within hearing.

"That's what I call music!" announced one gaudily attired maiden, who had crowded up as close to my side as the spreading legs of the bench would permit. "Them kin talk about thar French harps that want tew, but, shucks! they hain't a patchin'."

"What sort of a binged ole whistle is it, anyway?" queried a bystander. "Never seed nuthin' like it afore."

"I hev," sententiously replied another. "Uncle Pete, up ter Newport hed one. Called it olymarjereen, so he did."

And so the unique remarks continued to drop around in my hearing; and the first half of the long "change" was completed. Then the "gents" took their turn at balancing and swinging, and presently something transpired that caused me to view the scene with particular interest.

In the "set" were two gaunt, overgrown youths, whom, from their general likeness to the affronted Molly Ann Meeks, I had concluded to be her brothers; and, while it is conceded as one of the unwritten laws of politeness that no "feller" shall slight a lady on the ballroom floor, of all places in the world, both of these young gentlemen, eager to take up their sister's quarrel, pointedly refused to swing the innocent cause of all this trouble and heartburning, "balancing" unconcernedly before her, and then, at the last instant, declining her outstretched hand and leaving her, with an exaggerated bow, meant to convey a world of disdain and contempt.

I could hardly have restrained my anger at this, but I saw, by the happy, careless laugh that wreathed my darling's features, that her thoughts were too full of a more delightful subject to allow passing events to trouble her in the least. Therefore I could watch the little drama with the silent amusement of an uncorned spectator.

Glancing at Brisbane, I could see that he had noted it all, and was chafing like a caged lion.

"It's them Meekses," he said. He caught my eye and interpreted my thoughts aright. "Ornery whelps! Th'ar' mad bekase my Rinda is dancin' with that feller, Ben Coffee. Jes' see how black Molly Ann looks—an' half the fellers here are mad, tew, fer th'ar' all Meekses, mighty nigh."

I nodded to intimate that I understood. I would have spoken, but in order to keep up with the violin I must needs use my breath for another purpose. Just then I overheard a loud remark, close to my elbow, from a third possessor of the Meeks physiognomy.

"In my bringin' up," he said, in loud, supercilious tones, "nobody played the fiddle but ole niggers. Nowadays the poor white trash hez tuk up ther trade."

Brisbane made a balk in time, missed two or three notes, and jumbled the rest of the bar together promiscuously. A moment later Meeks spoke again:

"Oh, yes, ole Brisbane used ter be more of a gentleman, but guzzling whisky hez about laid him out."

The violin was mute, but I kept "time" going for an instant longer.

"Got a mighty purty gal," remarked another voice.

"Oh, yes, sneeringly; "'Rinda Brisbane is purty enough, I allow, but then"——

The voice ceased, for I had whirled around and caught the speaker by the throat.

"Take Miss Brisbane's name on your tongue again and I will tear it out by the roots," I shouted, furious with anger.

Meeks shook himself loose from my grasp and stepped back a pace.

"Who're ye talkin' tew, little boy?" he queried, looking down at me from the height of his six feet four. "Reckon you must be another one of 'Rinda's sugar lumps, or you wouldn't"—

Thump! Despite his height I managed to plant a blow between Meeks' snaky eyes, and he measured his length on the floor.

Brisbane caught me by the shoulder and pulled me violently back. His eyes were flaming with anger and his gleaming teeth shone like wolf fangs in the shadow of the gray mustache.

"Stan' back, young feller," he said grimly; "this is my fight, an' not yourn. Ef they want a tussle with ther ole man, they kin hev it, I guess. Come on, ye cowardly skunks! Thar's forty Meeks tew one Brisbane, but he ain't afeared! Come tew me, an' feel the size of ole Kernul Bowie!"

I could see that his right hand gripped the handle of a knife—the blade being concealed in his sleeve. I saw Meeks staggering to his feet and the crowd closing in, and I mechanically grasped the revolver in my coat pocket.

At that moment there was a halt in proceedings. A newcomer crowded through the throng, parting them right and left; a tall, portly person whom I had encountered a few hours before and now recognized with delight—Sam Morley, the jolly hearted "justice" of Snake Ridge.

"Hold on a minute, boys," he called cheerily. "I hate to interrupt a fair fight, but I am here on special business, and I'm in a sort of a hurry to get it over with."

"Must be pow'rful pressin'," grumbled the angry fiddler.

"Quite so," replied the 'squire. "Besides, I have already got my fee—and a fat one, too, and it is only fair that I should earn it at once."

He drew from an inner pocket a folded paper, and looked at me inquiringly. "Is it all right?"

I hesitated, then suddenly I caught a glimpse of a face in the background—a rosy, radiant face, suffused with blushes—and I nodded a quick assent.

"Then hear ye, all people," shouted the jovial Morley, holding the document aloft, in full view of the puzzled, attentive throng; "I have here a marriage license, drawn with all the formalities of law, by which I am authorized to unite in wedlock Richard Sherwin and Marinda Brisbane. Are the parties present?"

With a peculiar, half frightened sensation at my heart I made a step forward, and then I felt a little, soft hand nestled confidingly within my palm.

"Anybody able to produce any half way decent objection to this match? If so, speak now, for it's your last and only chance."

Every eye was turned upon old Brisbane's weather beaten visage. In evident perplexity his eyes wandered from his daughter's face to mine, then over the assembled crowd; until, by chance, they rested upon the discolored bruise that now was plainly visible on the forehead of big Tony Meeks. Then the old man's face lighted with a smile of satisfaction.

"Go ahead, 'square," he said calmly, "Ef I hed forty gals that feller cud have his pick of the lot."

Every man in the room was perfectly cognizant of the old fellow's reasons for so saying. No reward was too great for him who had caused the downfall of a Meeks. Still, no one expressed any signs of disapproval, and when the ceremony was over, Molly Ann Meeks was the first to offer congratulations.

"Sech a surprise," she simpered, "I never was so beat in my life. And I dew hope as how Mister Sherwin will settle down somewar clus, so me'n' 'Rinda kin be together a heap."

And, freed from all fear of losing the affections of the amiable Ben Coffee, Miss Meeks insisted on "dancing the next set" with me, and took particular pains to introduce me to her numerous relations; prominent among the number was my late antagonist, who vied with his sister in extravagant congratulation on my good luck at gaining such a treasure as "'Rinda, the fiddler's little ole gal."—S. D. Barnes in The Yankee Blade.

How We Look at Things.

You and I see everything to some extent differently. You see things from the standpoint of your previously acquired groups of ideas; I from mine. Strictly, no two persons can see the same things in the same way, for it can never happen that two persons have precisely the same groups of ideas relating to any subject. These depend on our past experience, on our education, on the beliefs of our times, on our various sects or parties, on our pet theories, our interests and our desires. Here is a simple illustration: Suppose an artist and an engineer standing side by side overlooking a tract of country. What they perceive is the same; what they apperceive is wholly different. To the engineer the country presents itself as a possible line for a railroad, with here advantageous grades and there economic bridges. Before the artist is spread out a landscape, with light and shade and harmony of colors. Suppose, again, a plot of level ground in the suburbs of a city. A college student riding by apperceives it as a possible ball ground; a young girl, as a tennis court; a speculator, as an addition for town lots; an undertaker, perhaps as a possible site for a cemetery.—Professor G. T. W. Patrick in Popular Science Monthly.

AMMONIA DOES NOT LEAVE THE BREAD.

This is Proven by Actual Tests in Baking. No Sophistry Required.

The fact that scientific and medical men, and state legislatures have not hesitated to talk about the subject has challenged the attention of the public to the discussion about the effect of ammonia and alum in food products.

Aside from the claims of rival companies which have to deal with this question, there remain a few truths on which people can build their own conclusions. One of the claims made is that ammonia when used in baking powder put into bread, disappears in the baking of the bread. To be scientific, the claim is made that ammonia is a volatile salt. Medical men of repute, chemists of unquestionable standing, and practical business men who have given the matter unbiased investigation, say such is not the case. The opinions of these gentlemen have been printed. The question was of sufficient importance to warrant some of the legisletures of the country to take it up and pass upon it. Before action was taken on the matter the committees in charge called chemists before them and tests were made. In the state of Minnesota, for example, there appeared before the senate committee in charge of the investigation, Charles W. Drew, Ph. B. M. D., analytical and consulting chemist of Minneapolis; Dr. W. S. Ebermann, chemist of the State Dairy and food Commissioner of the State of Minnesota, and Prof. James A. Dodge, Professor of chemistry at the University of Minnesota. As the question was, "Is ammonia a volatile salt?" it was necessary to use in the test such baking powders as are acknowledged to contain ammonia. The list included Andrew's Pearl Baking Powder. Wood's Acme Baking Powder and Royal Baking Powder. Dr. Drew found in each a cream of tartar powder containing ammonia. He also found in the Forest City Baking Powder, an alum powder, containing ammonia-alum, and in White Rose Baking Powder, an alum-phosphate containing ammonia-alum. He stated to the committee the following emphatic opinion: "I would not recommend the use of such powders to my patients, nor would I use them in my own family." This opinion referred to the powders which had been used in making the tests. The opinion of Dr. Ebermann, who had made a personal test, in addition, was to the same effect. He went further and said that in the samples of bread made from the Royal and Rising Sun, ammonia could even be detected in the sample of bread broken when hot, by the smell, unmistakable evidence of the presence of ammonia. Prof. Dodge made six tests, and found that the Rising Sun, the Royal, Wood's Acme, and Andrews Pearl baking powders contained ammonia, and that the Forest City and the White Rose contained ammonia-alum, and found ammonia in each of the six samples of bread made from the powders named. The tests were sufficient to warrant the committee, composed of business and intelligent men, to recommend the passage of a bill which would require the manufacturers of such baking powders as contain alum and ammonia to have the fact printed on the packages offered to the public, so that the consumers could not be deceived. A very significant hint that ammonia and alum are not, when taken into the stomach, conducive to health.

The legislature of New York followed the lead on such an enactment, and the Illinois legislature discussed the question before their adjournment in the spring of '91. The question is now before the legislature of Georgia. In Minnesota, when the question was first stated the leading merchants of the two cities, St. Paul and Minneapolis who deal in food products, addressed a communication to the legislature asking it to pass the bill compelling manufacturers who make goods containing food adulterants to label cans containing the same.

The petitioners echoed the sentiment of the public in the use of the following words: "As general dealers in food products and being necessarily without the skilled information to know of the composition of special articles like baking powders, and at all times being desirous of selling pure articles of food, we believe the information such as is suggested by the proposed bill, i. e., that the cans be plainly labeled as to the nature of their contents, is most righteous and just; the consumer can thereby purchase intelligently."

This petition was signed by the following representative houses, which are as high in their commercial integrity as the representative houses of any city in the country:

London Booksellers.

Nearly every bookdealer in London is a publisher. Consequently, if you seek a particular book it is hard to procure it at once unless you know the name and location of the publishing house. There are certain dealers—notably Hatchard in Piccadilly—who will get any book that is in print and can be got; but they require time. Go into any shop and ask for an item and the chances are nine to one that the answer will be: "No, we haven't it, but we can get it for you."

In every little nine-by-four shop you hear talk about our factory." "We shall have to send down to our factory" for this article or that. This sort of thing makes even strong men very weary.

After inquiring in vain at half a dozen shops for a copy of James Whitcomb Riley's poems I made the long journey to Paternoster row and applied for the book at Longman's, the publisher. I was referred to a dealer in St. Paul's churchyard. Thither I proceeded. They were all out of the book, but could get me one. "How soon can you get it?" I asked. "In a week or ten days," they said. "Where do you have to go for it?" I asked. "To the publisher's," they answered. "My friends," said I, "I have traveled four miles for that book, and I am going to camp here till I get it. The publisher's is only one minute's walk from here—now fetch me that book!"

Very few of the second-hand book shop keepers know what they have in stock. You ask them for a certain book and they shake their heads, when the chances are that several copies of the book you want are conspicuously displayed upon their shelves. Their so called catalogues are not worth much, because they include, in most cases, only the high-priced books. The real curiosities are to be found, not in the catalogues, but upon the top and bottom shelves of the dusty stalls.—Eugene Field's Letter.

A Trick of the Trade.

There is a cruel story in circulation concerning a certain teacher in one of the public schools who has been highly complimented because of the success attending the examination of her pupils. It was noticed that her class of boys seemed to be able to solve all the problems. When a question was asked, every boy's hand in the class was raised. The principal of the school was putting the questions and the teacher would call on a pupil to make the answer. Although more than a score of questions were asked, in no instant was an improper answer given.

The principal was so pleased at the result that he made special mention of Miss Dash's proficiency as a teacher in each of the classrooms that he visited. Probably envy was caused by the fact that in no other classroom did the pupils seem to be as well up in their studies. One of the teachers, whose pupils did not acquit themselves very creditably, made an investigation, and by a judicious use of candy succeeded in gaining the confidence of one of the boys under Miss Dash's care.

"Now Johnny," said she, "how is it that all you boys know the answers?"

"We don't all know," said Johnny, munching a caramel.

"But you all put up your hands as if you did."

"Miss Dash tells us to put up our hand when the question is asked. We boys who don't know the answer put up our left hands and the boys who know the answer put up their right hands, and then Miss Dash only asks the boys who have a right hand up."—Washington Critic.

On the Grindstone.

A hundred years ago or more it was customary in some parts of New England for men and boys to wear trousers made of leather. The historian of the town of Wells, Me., remarks that such garments were not altogether satisfactory, for the rather curious reason that they lasted too long.

We remembered hearing a matron of the olden time telling a story of the two boys of one of her neighbors. They had begged of their mother that they might lay aside their leather trousers, and have a pair made of domestic cloth; but all their entreaties were in vain. She would give them no other encouragement than to promise that when the leather was worn out they should have a pair of homespun.

They endured for a long time the vexation of the unyielding garments, which promised to be as lasting as the raiment of the Israelites in the wilderness.

Finally, all hope failed the boys, and their wits came to their aid. They took to the grindstone. One sat upon it while the other turned the crank. In imagination they saw themselves already clothed in the long desired homespun.

But alas! their hopes were suddenly blasted. All at once their father came round the corner of the barn, and discovered them thus employed. They had still to wear the leather—for how much longer the historian is unable to say.—Youth's Companion.

Salaries of Some Artists.

The orchestra of the Metropolitan opera house consists of about fifty players who receive from $30 to $50 a week for playing four nights a week. Theirs is a profession of itself and differs as much from ordinary orchestral playing as etching does from whitewashing.

The members of Thomas' orchestra and Gilmore's band get from $7 to $20 a performance, depending on their skill, and $2 50 to $7 for a rehearsal. Of course the higher prices are paid out to the great soloists. These are the best paid orchestra players in America, and the chief beauty or their work is, that while these two organizations pay them a fair living, they have so much time at their disposal that they can double their salaries by playing at concerts and other like entertainments.—New York News.

Corn Fed Oysters.

Most people, when they hear of "corn fed oysters," laugh at what they take to be a little extravagance intended to convey the idea of fatness, the association of ideas with extreme fatness and corn fed hogs being natural. But corn fed oysters are as much a fact as corn fed hogs. Oyster cultivation in all the bays and sounds of the east is conducted with as much science as the cultivation of agricultural products, and in many places on the Chesapeake bay the oyster farmer every morning strews with a liberal hand upon the surface of the water covering his beds of the bivalves quantities of finely ground corn meal, which rapidly sinks to the bottom and is devoured or absorbed by the gaping shell fish, the result being an especially fat and luscious oyster.—St. Louis Globe-Democrat.

No Trees on the Falkland Islands.

The Falkland Islands have a very damp and chilly climate, and are so swept by the south polar winds that they seem always cheerless and uncomfortable. Snow may fall at any time of the year, and yet it is never really very cold. The cattle and sheep thrive well the year round without hand feeding or shelter, and the inhabitants, mostly of English or Scotch origin, have thus far found stock raising a profitable and safe investment. In such a windy climate no tree can grow, but nature has provided immense supplies of excellent peat, which serves well as a substitute for wood or coal for fuel.—Notes and Queries.

Who Would Be Grandmother?

The French actress does not seem to have learned the art of growing old. Thus there came the time in the career of the great actress, Mlle. Mars, when in the opinion of her manager (and, for that matter, her public), she ought to be cast for more elderly characters than had been allotted her. M. Scribe wrote for her a comedy entitled "The Grandmother" and read it aloud to her on the day it was completed. The title role was intended for her.

"Capital!" exclaimed mademoiselle, clapping her hands in childish delight. "Of course I shall play the granddaughter; but who is to play the grandmother?"

Absence makes the heart grow fonder, but presents causes it to glow like a full moon.

STIMULATE THE BLOOD.

BRANDRETH'S PILLS are the great blood purifier. They are a purgative and blood tonic, they act equally on the bowels, the kidneys, and the skin, thus cleansing the system by the natural outlet of the body—they may be called the purgative sudorific and diuretic medicine. They stimulate the blood so as to enable nature to throw off all morbid humors, and cure disease no matter by what name it may be called. One or two of them taken every night will prove an infallible remedy.

BRANDRETH'S PILLS are purely vegetable, absolutely harmless and safe to take at any time.

Sold in every drug and medicine store, either plain or sugar coated.

Don't expect to cure political diseases by employing ward heelers.

SOMETHING FOR THE NEW YEAR.

The world renowned success of Hostetter's Stomach Bitters, and their continued popularity for over a third of a century as a stomachic, is scarcely more wonderful than the welcome that greets the annual appearance of Hostetter's Almanac. This valuable medical treatise is published by The Hostetter Company, Pittsburgh, Pa., under their own immediate supervision, employing 60 hands in that department. They are running about 11 months in the year on this work, and the issue of same for 1892 will be more than ten millions, printed in the English, German, French, Welsh Norwegian, Swedish, Holland, Bohemian and Spanish languages. Refer to a copy of it for valuable and interesting reading concerning health, and numerous testimonials as to the efficacy of Hostetters Stomach Bitters, amusement, varied information, astronomical calculations and chronological items, &c., which can be depended on for correctness. The Almanac for 1892 can be obtained free of cost, from druggists and general country dealers in all parts of the country.

The tramp is a man who has tried nearly all the walks of life.

A man who has practiced medicine for 40 years, ought to know salt from sugar; read what he says:

TOLEDO, O., Jan. 10, 1887.

Messrs. F. J. Cheney & Co.—Gentlemen:—I have been in the general practice of medicine for most 40 years, and would say that in all my practice and experience have never seen a preparation that I could prescribe with as much confidence of success as I can Hall's Catarrh Cure, manufactured by you. Have prescribed it a great many times and its effect is wonderful, and would say in conclusion that I have yet to find a case of Catarrh that it would not cure, if they would take it according to directions.

Yours Truly,
L. L. GORSUCH, M. D.,
Office, 215 Summit St.

We will give $100 for any case of Catarrh that can not be cured with Hall's Catarrh Cure. Taken internally.

F. J. CHENEY & CO., Props., Toledo, O.
Sold by Druggists, 75c.

When a girl marries a man to reform him the devil doesn't worry.

"Brown's Bronchial Troches" are widely known as an admirable remedy for Bronchitis, Hoarseness, Coughs and Throat troubles. *Sold only in boxes.*

Their is no particular harm in riding a hobby if you do not take up the whole road with it.

Every one suffers from Catarrh in the Head. Those who don't have it suffer from those who do. It's a disease you can't keep to yourself.

Here are some of the symptoms: Headache, obstruction of nose, discharges falling into throat, sometimes profuse, watery, and acrid, at others, thick, tenacious, mucous, purulent, bloody, putrid, and offensive; eyes weak, ringing in ears, deafness; offensive breath; smell and taste impaired, and general debility. But only a few of these likely to be present at once.

The cure for it—for Catarrh itself, and all the troubles that come from it—a perfect and permanent cure, is Dr. Sage's Catarrh Remedy. The worst cases yield to its mild, soothing, cleansing and healing properties. A record of 25 years has proved that to its proprietors—and they're willing to prove it to you.

They do it in this way: If they can't cure your Catarrh, no matter how bad your case, or of how long standing, they'll pay you $500 in cash. Can you have better proof of the healing power of a medicine?

SIR HENRY THOMPSON, the most noted physician of England, says that more than half of all diseases come from errors in diet.

Safe? the battle field of life
Seldom knows a pause in strife,
Every path is set with snares,
Every joy is crossed by cares.
Brightest morn has darkest night,
Fairest bloom has quickest blight,
Hope has but a transient gleam,
Love has but a passing dream,
Trust is Folly's helpless waif,
Who dare call their dearest safe?

But thou, though peril loom afar,
What hast thou to do with war?
Let the wild stream flood its brink,
There's no bark of thine to sink.
Let falsehood weave its subtle net,
Thou art done with vain regret.
Let fortune frown and friends grow strange,
Thou hast passed the doom of change.
We plan and struggle, mourn and chafe—
Safe, my darling, dead and safe.

—Macmillan's Magazine.

TALE OF THE BORDER.

Tombstone, a mining center in southeastern Arizona, is the grave of more romance and adventure, hair breadth escapes and deeds of daring than any other region in America, perhaps. Tombstone is about sixteen miles from the Mexican boundary line, and for four or five years was the headquarters of all the leading desperadoes of the west. The four Earp brothers, toughs all; Doc Halliday, Frank and Jack Stillwell, Ike Clanton and his brother Billy, Jack McLowry and his brother Bob, Jack Ringo, Bill Dodge and several gentlemen known as Curly, Slim, Shorty, Texas, Buffalo and similar cognomens were frequently seen on the streets together. All had a reputation to sustain, and some were so eager to do themselves justice that they would not rely on the ordinary .44 caliber revolver, but had the barrels of shotguns cut off to about a foot in length, and, thus abbreviated, that terrible engine of destruction, when properly loaded, became a part of their personal adornment. There were two factions in southeastern Arizona in 1879, one being known as the stage robbers and the other as the rustlers. The Earps and Doc Halliday were the recognized chiefs of the stage robber faction, and Ike Clanton and Jack Ringo were the acknowledged bosses of the rustlers. The factions came into frequent conflict. One day the McLowrys and Frank Stillwell rode into town and put up their horses at a corral on Fremont street. Just as they emerged from the corral the Earps and Halliday confronted them, and in a minute the two McLowrys, Billy Clanton and Stillwell were dead. Word was sent to their friends, who were camped in the Huachuca mountains, and they prepared to march to Tombstone in force to clean out the Earps. The Earps recruited and fortified in an adobe building in the west end of the town. The rustlers, thirty strong, under command of Ike Clanton and Jack Ringo, marched to town and took up headquarters in a corral at the extreme end of the town.

The writer of this was the city editor of a Tombstone paper at the time, and he visited both the camps daily, and was made the medium of communication between the leaders. The rustlers circulated through the town, and the Earp, or stage robber faction, confined themselves to their camp. Ike Clanton, the rustler leader, sent several messages to Wyatt Earp, the leader of that faction, daring him to come out and show his nose. Earp sent back invitations to Clanton to come and visit him. This thing continued for three days, and at last the Earps began to get tired—in fact, their liquor was exhausted and they were on the verge of a thirst famine. Warren Earp, one of the brothers, heeled himself properly with two revolvers and a shotgun, and walked uptown one evening about 8 o'clock. He went into a saloon, took a drink at the bar and walked back to the faro department in the rear. He hadn't bucked the tiger in five days and his appetite was whetted. He sat down in front of the dealer, pulled out a handful of $20 gold pieces and coppered the queen. Just as he did so a report was heard, and Warren Earp fell off his stool dead. A bullet had penetrated his brain. When the report of his death reached his friends they rallied out in force. They were met by the Clanton party on Allen street, and an exchange of shots took place. The casualities were meager, only three killed and two wounded. The Earps retreated and skipped the town. When they had left, and there was no hope of catching them, the sheriff of Cochise county became energetic. He organized posses to give pursuit that subsequently cost the tax payers of the county $7,000. The Earps being absent, sympathy, of course, was against them, and they went to Colorado, where they remained for some time and then went to California. The rustlers then had supreme command of the tough element of Tombstone, and they held it until the leaders quarreled and gradually killed each other.

The hates of the factions in those days were something appalling. All the tough element had to take sides, but the respectable portion of the community was never bothered. The rustlers were cattle thieves. They stole cattle in New Mexico and sold them in Texas; they stole in Texas and sold in Arizona; they stole in Arizona and sold in Mexico, and stole in Mexico and sold in California. They spent the proceeds of their forays in Tombstone. They were a royal set of thieves. When they were flush they scorned to drink anything but Roeder or Pommery sec, and the markets were gutted to provide them with luxuries. The leader of the gang, Ike Clanton, was a handsome fellow, six feet high, with yellow curling locks, and a complexion, in spite of the Arizona sun and regular exposure, that a belle would envy. He was a ready and straight shooter. He faced death a hundred times and met it at last. He hated the Earp brothers with all the intensity of an unbridled passion, and loved their sister with equal force. Jessie Earp was a beautiful girl of 19 at the time. She had the courage and grace of her brothers, and was, of course, a partisan of theirs in the factional fight, without being in sympathy with their habits of life and career of rapine and murder. Ike Clanton and Jessie Earp met at a dance at Tombstone. Ike and the Earp boys were then at war and carried guns cocked and primed for each other. Between Ike and Jessie it was a case of love at first sight. Her brothers became furious when they heard it, and Virgil, the oldest of the family and the keeper of the family headquarters, wanted to turn her out of the house and disown her. But Wyatt, the brains of the family, said this would be playing into the hands of the arch enemy, Clanton. He would immediately marry her and both would be happy. This would not suit the Earps, and they resolved to keep the girl away from Clanton and prevent meeting or communication between them if possible.

The girl was a real heroine. She was educated in a California convent; and while as full of romance as an egg is of meat, she had a sense of honor that made her sustain her family in the quarrel with the faction of which her lover was chief. It was a marvel to many people why the Clanton gang did not attack the Earp headquarters immediately after reaching Tombstone to revenge the death of the McLowry boys and Billy Clanton. The reason was that Jessie was confined in her brothers' headquarters, and Clanton would not run the risk of killing her. When the Earps retreated from Tombstone they took their sister with them. This was the reason, perhaps, why Clanton refused to become a member of the sheriff's posse and join in the pursuit of his enemy. Three months later, however, when the Earps were living at Gunnison, Colo., and, of course, were running the town, their sister mysteriously disappeared one night. The result of inquiry convinced them that she had fled in company with Ike Clanton. This was pouring salt and vinegar into their festering wounds. The whole band, comprising Virgil, Wyatt and Julian Earp, Doc Halliday, Curley Bill, Sam Saunders, Texas Ike and Monroe Tucker, armed, mounted and pursued. The lovers had about four hours the start, but they were easily trailed. They headed for Arizona. They expected pursuit and lost no time. They reached Lake City, eighty miles from Gunnison, in twelve hours. Both were on horseback. From Lake City they started to Ouray, 100 miles by regular road, but, getting afraid of pursuit, they left the road and crossed over the trackless mountain, going 13,000 feet above sea level, and finally reached San Miguel—thirty hours without food.

Here they rested for two days, being convinced that the pursuit they expected was off their trail. They were to a certain extent right and to a certain extent mistaken. The Earp party went to Ouray, and finding no trace of the fugitives, became convinced that they had made a short cut to San Miguel. From Ouray to San Miguel is less than thirty miles, but the way is over a pathless, precipitous mountain, yawning gulches and impassable canyons. The Earps, however, tackled the journey and made it within twenty-four hours. They reached San Miguel about 10 o'clock in the morning, and as they rode down the winding trail the fugitives saw them. Clanton and the sister of his arch enemy had been man and wife about twenty minutes. They were married by Dr. Hoge, an Episcopal clergyman, whose name is held in grateful remembrance by every person familiar with the early days of Colorado. When the newly wedded pair saw the horsemen approach, they recognized the situation at a glance. Clanton, though as brave as any man, knew that it was hopeless to join combat with seven or eight men practiced in the use of firearms. But, being accustomed to danger, he knew how to act. He grasped his trembling bride, rushed from the cabin where they were resting and made his way to the nearest mine tunnel.

The miners were just changing shift, and were surprised at the haste of the visitors. Clanton told the miners his story as sincerely and eloquently as he could. The miners were all Irishmen, and Irishmen love lovers. They became partisans of the fugitives without thought or consideration. Clanton intrusted his bride to one of the miners, who took her into the bowels of the earth, away from all danger. Soon the Earps arrived and demanded the fugitives. The miners answered with more spirit than politeness. The Earps invited a parley, which the miners granted. The Earps said that Clanton sought to dishonor their sister because of hatred for them. Clanton, who stood in the tunnel, within easy communication, sent back word that the lady they sought to dishonor and reproach was his wife. The Earps tried diplomacy, which failed, and finally they announced their determination to storm the mine if the fugitives were not surrendered. In those days an armory was a necessary department of every well regulated mine, and the mine in which Clanton and his bride sought refuge was no exception. The miners presented arms and announced their readiness to receive an attack. The Earps taunted them with sheltering a coward, who had to seek the bowels of the earth like a squirrel to evade just punishment. Clanton sent back word that he was ready to meet any of the Earp party in single combat. The Earps held a conference, and Julian, the youngest and bravest of the tribe, volunteered to fight Clanton.

It did not take long to arrange the preliminaries. The Earp party were required by the miners to move off about a quarter of a mile and the miners in turn obligated themselves to remain in the tool house, from which the tunnel cut into the hill. When all was ready Clanton emerged from the tunnel, pistol in hand. Julian Earp was awaiting behind an ore pile 100 yards away. The two men approached each other, with pistols elevated. When they were within twenty paces Earp fired and missed. Before the report of his shot had ceased echoing Clanton fired and lodged his bullet in the heart of his enemy. Julian Earp fell dead. Clanton retired to the tunnel, and forty miners fully armed turned out and served notice on the Earp party that Clanton had proved his bravery and sincerity and they were ready to defend him. The Earps buried their dead, the good Dr. Hoge officiating at the funeral. Then the miners held a meeting—nothing can be formally done in a mining camp without a meeting—passed resolutions sustaining Clanton and ordering the Earp party to move out of town. The Earps, understanding the miners and the characteristics of the people they were dealing with, retired. When they were out of sight Clanton and his wife came out of the mine and took their departure in the direction of Rico.

The Earps, though making a promise that they should return, merely made a circuit, and rode round San Miguel, striking the Rico road about ten miles from the former place. They found fresh horse tracks on the road and concluded that those they were in pursuit of were in front of them. They followed on with haste and overtook Clanton and his wife at Rico. The Earps reached town while Clanton and his wife were at supper. When they discovered them they fired a volley through the window of the hotel. One bullet struck the bride and the husband escaped. He grasped his wife in his arms, rushed to the back yard and from there to the corral where his horses were quartered. He mounted the first saddled horse he met, and with his wife bleeding and insensible in his arms, rode into the night. It was in October, and already cold in that latitude and altitude. He rode all night, tenderly caring for the precious burden in his arms, and at sunrise next morning she died.

Two years later Ike Clanton and Curley Bill, a cousin of the Earps, met accidentally in a gambling room at Socorro, N. M. Two shots were fired simultaneously, and ten minutes afterward Curley Bill was a corpse. Clanton was uninjured. About a year and a half ago Clanton went to Phœnix, A. T. There he met Virgil and Wyatt Earp. The moment the old enemies saw each other they began to shoot. Clanton was killed, and Wyatt Earp was so badly wounded that he is no longer numbered among the desperadoes of the west. —St. Louis Republican.

Eating to Honor Somebody.

Personally, I do not much believe in dinners as a means of testifying our regard for our fellows. It always seems a trifle absurd to me, to call together a lot of men to eat in honor of somebody. The respect expressed by inducing dyspepsia may be genuine. Ovations and oysters, sympathy and soup, releves and roasts, enthusiasm and entrees, homage and hominy, compliments and champagne, may all go very well together, but for my own part I would rather be one to join in presenting my friend with some handsome and substantial token of our regard, and as for the dinner, I should prefer a sandwich and a cup of coffee in a quiet corner.—Allan Forman in The Journalist.

OLD TOWNS OF AMERICA.

Some Forgotten, Others Great and Prosperous.

A FEW SCRAPS OF AMERICAN HISTORY

Gloucester, Mass., to Celebrate Her Quarter Millennial.

SINCE the great celebration of the centennial of independence Americans have been much given to make festivals of occasions which indicated that this town or city or that church or college had reached its hundredth or perhaps two hundredth birthday. This is very well in its influence for several reasons. It inclines one to study colonial and local history, and learn somewhat more than he otherwise would know of the sturdy men and women who settled the country, and of the farseeing and self sacrificing builders of states and commonwealths, whose wise actions and brave deeds made possible the civilization enjoyed today.

It further preserves one's pride in and contentment with that which is nearest to him, and this, I contend, is a good thing, notwithstanding the remark of Emerson, that the first indication of culture and enlightenment in a man was a loss of pride in his village. I do not think that he could have referred in any way to pride in the past, but merely to the silly and false pride which incurable provincials have in local, physical or material performances. In looking at the vast houses of Boston, Chicago or New York, it would certainly indicate in any one a contracted and benighted mind if habit compelled him to contrast these palatial piles (and that to their disadvantage) with the shabby buildings which seemed great to him when he was a boy and before he had seen the world.

From local history and local biography we can get more intimate acquaintance with a people than in any other way, and so shrewd an observer and authority as

THE MAYFLOWER.

Professor Bryce in his great work, "The American Commonwealth," said that this was particularly so of the United States. So, therefore, I think it will be wise to continue these anniversary celebrations in all parts of the country. In Gloucester, Mass., one of the oldest towns in New England, preparations are already in progress for a celebration of the two hundred and fiftieth anniversary of the incorporation of that town. This place, which originally included the whole of Cape Ann, was really settled in 1624, but it was sixteen years later that it was incorporated, and took its name from the old English cathedral city, whence many of the first settlers had come. The old Gloucester of Massachusetts may seem young to the mother town which is of British origin, having been built previous to the Roman occupation. But notwithstanding this, high civilities will be exchanged between the new town and the old, and messages of congratulation will be flashed under the sea, while formal addresses will be carried across the waters.

There are several older towns than this, however, in New England, and the most notable are Plymouth, where the Pilgrims landed in 1620; Salem, which John Endicott settled in 1628, and Boston, where John Winthrop's party settled in 1630. Of Boston I need not speak. Every schoolboy knows her history by heart, and if he does not, he should waste no time in learning much more of it than could ever be hinted at in a newspaper article. Plymouth, with the rock which is the shrine of every true New Englander, needs nothing that I could say which is not more fittingly said at the New England gatherings which take place every year in every considerable settlement in America. Salem went in for religion at the beginning, as the first church organization in New England was effected there in 1629. The zeal of the people of this old town in this particular direction culminated some sixty years later, when they hanged the Quakers and burned the witches.

THE NEWPORT TOWER.

In Connecticut and in Rhode Island there are also old towns which are in a general sense of contemporary origin with those of Massachusetts. New Haven, for instance, was settled in 1638, and for twenty-four years continued to be a distinct colony; then it was united to Connecticut. And New London was settled in 1649 by the same John Winthrop who, nineteen years before, had planted a colony upon the peninsula which now is Boston. In the same year in which New Haven was settled, Roger Williams and the other gentlemen of the "Company of Providence Plantations" settled Providence and Newport, in Rhode Island. If we are to believe what some antiquarians would have us, we must think that Newport was much older than this, for the remains of the prehistoric "Old Stone Mill" in that lovely city of palatial cottages indicates to those who go deep into forgotten lore that this mill was built by the Northmen, who effected a settlement there five hundred years before Christopher Columbus crossed the ocean from Spain. However this may be, they did not stay, and, so far as we are concerned, we had as well let it rest that the Roger Williams' colonists were the first to make a town of that place.

Every schoolboy in America knows that Jamestown, in Virginia, was the first permanent town settled in any of the original thirteen colonies, and he will not hesitate for a moment in telling you that the date of this settlement was 1607. There also the first colonial assembly ever held in America was convened in 1619. And about Jamestown cluster the remarkable romances that that gallant adventurer, Captain John Smith, concocted when he was no longer governor of Virginia and admiral of New England. But Jamestown is now only a town of the past. Man has almost deserted her, and the James river has gone far toward washing her away.

Next after Jamestown in seniority comes Albany, a very different kind of place. As early as 1609 Hendrick Hudson, in his famous yacht Half Moon, went to anchor at the head of tide water of the beautiful river which bears his name. The exact point where this yacht rode at anchor is now in what is known as Broadway. During the next few years Dutch navagators visited the point several times, and in 1614, 1618 and 1623 forts were built, and from the construction of the first of these there was a settlement in what is now the capital city of the Empire State. It was first called New Orange, and this name continued until the English occupation, in 1664, when the name was changed to Albany, in honor of the duke of York and Albany, afterward James II. The city was incorporated in 1686, Peter Schuyler being the first mayor. In 1754 there assembled in Albany, at the instigation of Benjamin Franklin, the first convention for the union of the colonies.

New York city is also among the oldest towns in America. The first settlement was made in 1623, and the next year a governor was installed. Fort Amsterdam, now the peaceful Battery which faces the bay, was built, and in the same year that master hand at trading, Peter Minuit, director general, paid the munificent sum of twenty-four dollars in cash for the whole of Manhattan island. I have heard it said that if this sum, small though it seems, had been drawing interest at 6 per cent. and compounded semiannually that it would have grown to an amount equal to the present value of the land comprised in old Peter Minuit's purchase. When Charles II usurped the Dutch possessions in America he gave them away to his brother, the duke of York and Albany, and the name was changed, as was that of Albany.

The prosperous city of Newark, in New Jersey, is also old as we reckon time in America. It was settled by parties from Guilford and Branford in Connecticut, in 1666. These are among the oldest English and Dutch settlements, though Philadelphia is not far behind, as William Penn, with his grants from Charles II, arrived in 1682, and he brought colonists in such numbers and so rapidly that he soon had a city outstripping all others in America. Baltimore's first settler, a Quaker, arrived in 1662, and in 1682 he had a neighbor, one David Jones, but it was not till 1730 that a town was laid out.

The spot where Detroit now is was visited by the French as early as 1610, but it was a hundred years later that Antoine de la Mothe Cadillac built Fort Pontchartrain and effected a permanent settlement. The settlement of New Orleans was even more recent. Compared with towns of Spanish origin the settlements I have spoken of seem very new. When the Spaniards first visited Santa Fe in New Mexico in 1542, they found there a large and thriving village of half civilized Indians. How old it was is not known, but evidently of great antiquity. Exactly when the Spaniards also settled there is not known, but since 1640 it has been the capital city of New Mexico. In the old records it has the imposing title of "Sante Fe de San Francisco de Asis."

SCENE IN OLD ST. AUGUSTINE.

St. Augustine, in Florida, is the oldest town in the United States of purely European origin, as it was settled by the Spaniards under Menendez in 1565. How they who built the old fort would open their eyes if they could see what has been done there in the last few years, during which there has been waved over the place the magic wand which financial kings possess, bidding palaces to arise which are almost marvels of the world.

From this hurried sketch it will be seen that there are many places in the land not exactly young—that is, places which have, so to speak, cut their first teeth. But while pondering on such things it is well to remember that youth, after all, is the best possession of either man or state. After youth comes maturity; after maturity old age and then inevitable decay.

JNO. GILMER SPEED.

Wealthy Colored Men in Texas.

A southern paper cites as proof of its assertion that the negroes can succeed if they choose in the states where they were once slaves, the fact that half a dozen of the richest men in Texas are colored. One of them, Senator C. N. Burton, of Fort Bend county, is proprietor of his former master's plantation and several other big ranches. Fifteen years ago he sent his one time owner's widow back to her girlhood home in Virginia, and ever since has made her an allowance of $150 a month. He says that to her teaching and kindness when he was a slave he owes his present prosperity as a freeman.

Makes Up Like General Butler.

The fame and face of General B. F. Butler are familiar in other lands than the United States. Joachim Ludwig Phister, the leading actor of Copenhagen, and for more than fifty years connected with the Royal Danish theater, got the general's photograph some time ago, and delights to assume on the stage the Massachusetts man's facial appearance, squint and all.

Tough Times In Guatemala.

Late reports say that the financial condition of Guatemala is very bad. The government has paid its military and civil servants nothing for three months, food is scarce, prices high and starvation an imminent possibility.

FIGHTING GRIZZLIES.

Experience of a Miner with a Pair of Angry Bears.

THE MONSTERS NEARLY TEAR HIM APART

One Watches Over the Body Until Satisfied That Life was Extinct.

The name of a well known citizen of Humboldt county on the Russ House register a few days ago recalled to his friends the story of a desperate fight with grizzlies in the early days.

It was in the fall of 1851, and three starving men crawled through a thick growth of Humboldt county timber and found themselves facing eight monster grizzly bears. Goaded to desperation by hunger the men determined to attack the ferocious animals. The heart of Thomas Seabring failed as the little party drew near the bears, and he sought shelter by climbing a tree.

The other men, S. K. Wood and Isaac Wilson, threw prudence to the winds and advanced to within fifty yards of the bears. Wood fired his rifle and the nearest bear fell, biting and tearing the ground as though in the agonies of death. While Wood was reloading his rifle Wilson brought down a bear.

Five of the grizzlies retreated up a ravine, but one shaggy monster remained with her fallen companions. She sat erect on her haunches and turned her eyes on the men as if daring them to battle.

Wilson, awed by her aspect, ran for a tree, while Wood tried to reload his gun, but found himself unable to ram the ball down on the powder. While in this predicament the grizzly that had not fled rushed at him. Wood succeeded in getting into a small buckeye tree, and used his gun to beat the bear off as she attacked the tree with the intention of shaking him out.

IN THE JAWS OF A GRIZZLY.

While he was engaged in fighting off this bear, Wood, to his horror, saw the animal he had wounded rise and rush toward him. No blows that he could inflict on the wounded animal could check her. At the first spring she made the tree broke and the bears jumped for Wood. He gained his feet and made with all speed down the mountain, where another small tree stood about thirty yards away. He reached the tree with the wounded bear at his heels, and, seizing the trunk, he swung his body around so as to give the bear room to pass him, which she did, plunging headlong down the mountain about twenty yards.

Before Wood could, with his failing strength, swing himself into the tree the second bear bounded up and seized his right ankle. By this time the wounded bear returned, and as Wood fell she snapped at his face. He dodged, and she caught his left shoulder.

Then commenced a terrific struggle. The maddened animals tugged in opposite directions at Wood's ankle and shoulder, and he was in imminent danger of being torn to pieces. He fought as best he could, but each exertion he put forth only intensified the rage of the bears.

When he was almost fainting with pain the bear that had not been wounded dropped his ankle and trotted slowly after his companions up the ravine. Then the wounded bear let go her hold on his shoulder. Wood sank back on the ground, and lay perfectly quiet as though dead, hardly daring to breathe. The grizzly stood majestically over him, watching for the slightest movement, and snarling with rage. The pain that racked the man's frame was frightful, and he risked his life in an effort to assume an easier position.

At the first movement the grizzly, roaring furiously, rushed at him. She shoved her nose close to his face and sniffed at him, but Wood was again motionless, and the bear, raising her head, gave vent to unearthly screams.

Wood, knowing that his life depended on it, remained motionless, and the bear trotted after her companions up the ravine.

When he attempted to rise Wood found that his right hip was dislocated and his left shoulder chewed to the bone, while his clothing had been stripped from his body and his flesh had been chewed in a hundred places. Inch by inch he painfully dragged himself from the spot, until Seabring and Wilson, accompanied by David A. Buck, the latter of whom had been left to guard the camp, found him and carried him to their quarters.

At this spot the party remained twelve days, subsisting on the meat of the bear that had been killed. They were lost in the mountains, but finally Wood, despite his agony, insisted upon being tied to a horse and accompanying his friends in search for a path to civilization. During the ten days that followed, every step of the horse that Wood rode caused unspeakable torture to the rider, but Wood bore it like a martyr, and an occasional groan was all the complaint that escaped his lips.

Finally they found a road out of the mountains and reached the farm of Mrs. Mark West, thirty miles from Sonoma, where Wood was cared for, and in six weeks was able to join his friends in San Francisco.

The injuries inflicted by the grizzlies made Wood a cripple for life and eventually were the cause of his death, and it was his son who told of this fight with the grizzlies.—San Francisco Examiner.

Welcome Visitors.

First Little Girl—Aunt Maud and Aunt Clara visited us yesterday and they brought me a doll.

Second Little Girl—Aunts are nobody. Pooh! Anybody can have aunts visit 'em. We have angels, real angels, visit our house. Some were there last night.

"Angels! Did you see them?"

"N-o, I was asleep, but this morning I saw the baby they brought."—New York Weekly.

What's in a Kiss.

A convict out in Ohio, in giving his wife a parting kiss, slipped into her mouth a note, telling her where some of his booty was hidden.

A MAN, A GUN AND A MOOSE.

All Three in the Heart of the Maine Woods, and Nothing Happened.

We draw off to the middle of the bay, perhaps 600 yards across. The sun is down, and in the dusk every stump resolves itself into a deer. You see white tails and horns, and they move. But at last a stick back in the woods cracks. That's the real thing! Is it a deer? Is it a moose? Is it coming in? Another crack—then stillness. Next in the water, way out in the woods, is a black, dusky thing, really moving this time. The boat starts of its own accord to meet the black thing.

It looks now like a ram, for there is something whitish about its odd head, and it is "sloshing" through the water, making a noise you think must frighten it out. It's no deer. It's too black. You can't tell the size, for it seems indefinitely far off at a dream distance. At last it stops, and standing well out in the water begins to feed. You cannot remember how it got so, but it is now a full grown black bull moose, six feet high at the shoulder, with enormous handshaped horns and a long black pendant like a lady's boa hanging from its neck.

We are 150 yards off and the rifle is cocked without a click. A hundred yards, and instinctively and without motion your left shoulder goes forward and your right foot across the boat. Now the moose looks up, a moment's glance at the log that has not been there this summer. Shooting distance, forty yards, and of itself the rifle is at my shoulder and head low on the breech. I glance along the barrel as the white sight plays over that black shoulder.

It is a curious conflict of instinct and desire. We hunt day and night merely to see large game. Yet the gun goes to the shoulder, recognizing the common end, as if to prove you could have shot it. The moose looks up again—a longer look. As his head drops again the rifle sinks to my knee, full cock still, barrel forward.

You see a moose is bigger than a horse; it has uncomfortable horns; it's very quick on its feet; the water is shallow—in short, a gun is a weapon of defense and you rather wish it was a cannon. He stares at us now stupidly and uneasily watches our approach, thinking, perhaps—"I never saw that log before. It's a very queer log. It gets larger, but it does not move. I wonder what that shiny stick is with the round black spot in its white end. I don't like it.

"See here, moose, you're the biggest thing in the world. I guess I'll go and poke it with my horns. I can reach it in two jumps. I can't hear it, but it looks as if it could make a noise. Well, my great great-grandfather told me a stump barked at him one night and bit a round hole in him like a fly bite, only bigger and worse, and I guess I'll walk quietly out."

So the moose carefully lifted one of his big feet and put it carefully down with a great splash, then another. I can't remember the rest till he was in the woods.—Boston Post.

Baffling the Spider in Deep Holes.

In fixing the alignment of the Hoosac tunnel, in Massachusetts, at the bottom of a shaft 1,028 feet deep, the spiders prevented accurate work with plumb lines, until two cases were made inclosing the whole length of these lines. For shallow pits the spiders' webs can be broken by raising the lines and then lowering them to position shortly before fixing upon points; but in this instance the distance was so great as to require several hours before the vibration of the lines would cease, even with the bobs in vessels of mercury.

The suggestion is made that the lines might be freed from similar interferences by insulating the suspended apparatus and the bob from the earth and attaching a grounded electric light circuit to the wire, relying upon the dampness in the pit to give sufficient conductivity to the cobwebs to cause them to be seared by the escape when any cobweb connected the earth to the plumb wire.—Cor. Engineering.

The Budget and the Tower.

Those eccentric people who waste the best part of their lives in discovering utterly useless statistical facts found the Eiffel tower a perfect godsend, and even now they are not done with it. After telling us how many such structures it would take to reach from Paris to the sun, how many halfpennies piled up would reach to the top, what the tower would be worth if it were made of gold, and making a host of other equally valueless computations, these wasted geniuses have broken out in a fresh place.

One of them has discovered that the amount of the French budget, if piled up in one-thousand-franc notes, would actually reach beyond the summit of the tower. Ten million francs so piled would be one meter in height; therefore 3,500,000,000 francs—the amount of the budget—would reach a height of 350 meters, or fifty more than the Eiffel tower.—London Telegraph.

The Senses of Criminals.

It seems to have been shown that the mere senses of criminals as a class are less acute than those of normal human beings. Twice as many of them in a thousand are color blind; they have a less acute taste; their power of smell is less developed, and their hearing is not so acute. Furthermore their sensibility to pain is less, so that the malefactor is apt to recover rapidly from wounds which would be dangerous or even fatal to the honest man.—Washington Star.

WANTED THE EARTH.

A San Francisco Butcher who Dabbled in Stocks.

LET A FORTUNE SLIP THROUGH HIS GRASP

Wanted to be a Millionaire.—He Now Cuts Meat for a Living.

For a long time after the bonanza excitement the stock market in San Francisco remained quiet and inactive. More or less trading was done in Comstock shares, of course, but the market as a whole was quietly settling down to what appeared a "bedrock" basis.

The Sierra Nevada and Union Consolidated mines at the northern end of the Comstock group were at this time particularly inactive, the former selling as low as fifty cents a share. Rumors, however, began to circulate about this time of a "strike" in the north end mines, and Sierra Nevada and Union began to climb upward.

John Powers, a butcher, owned at the time of which I speak a small shop at the corner of Hayes street and Van Ness avenue, and he somehow became imbued with the idea that there was more money to be made at stock speculation than in the butcher business. Acting upon this idea Powers, by mortgaging his business and borrowing what money he could, scraped together a few thousand dollars, which he deposited in the office of a Pine street brokerage firm.

He wasn't particular, he said, as to what stock he should buy, and finally settled on Sierra Nevada as being a good purchase, leaving instructions with his brokers to buy 100 shares for his account. This was done, and Powers was duly credited with the stock, for which had been paid $24 a share.

Meanwhile the rumors came pouring in from Virginia City about the great north end strike, and Sierra Nevada began to fairly jump forward, until it was quoted at $175. This would have satisfied any ordinary man, but not so Powers. Instead of selling he gave orders to buy more stock.

In the course of the next two weeks Sierra Nevada had reached $250 per share, and Powers, with 300 shares to his credit, was in debt to his brokers about $40,000. He could have realized at this point a clear profit of over $45,000. His brokers begged him to sell, but Powers was obdurate. He was after a million, he said, and as long as his margins remained good the brokers remained satisfied.

Powers then sold out his business entirely and put up the proceeds as additional margin. He began to look up favorable building sites for the residence he intended to put up that, he asserted, would "beat them 'nob heal' affairs all holler."

Having, like a skyrocket, reached its highest point, Sierra Nevada now began to come down, at first slowly and then more rapidly even than it went up. Powers had gone to the country for a few days to look at a ranch he had intended purchasing. His brokers had wired him to return, and he had supposed that it was because his stock had reached the $1,000 limit, at which figure he had left orders to sell.

It was with a very joyous countenance that he greeted his broker, whom he met on the street.

"Well," said Powers, "have you sold the stock?"

"Oh, yes," said the broker, "we had to. You see it began to fall, and to protect ourselves we had to let it all go at 140, and you now owe us $750, which I hope you can settle."

"What?" fairly gasped the astonished Powers. "Let it go at 140? And you say I'm in debt?"

"Yes," replied the broker; "we told you to sell, but you wanted the earth, and I guess you'll have to go back to your trade."

When it finally dawned on Powers that the broker really spoke the truth he was almost overcome with grief and disappointment. He rallied, however, and if any one now wants a choice steak "Johnny" Powers, who works for a large market concern on Pine street, is just the man to go to.

He will probably tell you that he ought to be and might have been a millionaire, but the quality of the meat will be good just the same.—New York Herald.

A Point About Moving.

Here's a point that everybody who moves ought to bear in mind: Get the carpets to your new house if you have to carry 'em on your back, and get 'em put down before the van gets there. Then the driver and helper will put your stuff where you want it in the proper rooms. It's just as easy for the workmen, and if the floors are ready it will save a vast amount of bother for the family. As a rule people are so unsystematic that they pack their carpets around pictures and centre tables and the like, so that it's a day's job to get at them, and several days' job to get the carpets down, shifting heavy boxes and chairs meantime, and finally making a floor full of wrinkles and quite possibly of rents.—Interview in New York Sun.

A Curious Wind Flower.

A flower has been discovered in South America which is only visible when the wind blows. The shrub belongs to the cactus family, and is about three feet high. The stem is covered with dead, warty looking lumps in calm weather; these lumps, however, need but a slight breeze to make them unfold large flowers of a creamy white, which close and appear as dead as soon as the wind subsides.—New Orleans Picayune.

A Fair Price.

Mr. Blossom—How much did you pay for your new bonnet?

Mrs. Blossom—Only a fair price.

Mr. Blossom—Well, how much?

Mrs. Blossom—Only seventy-five dollars.

Mr. Blossom—And you call that a fair price? By Jove, it's a church fair price!—Epoch.

By corruption in politics Louisiana is brought to the brink of civil war. The leaders of one faction have bought and brought into the State large quantities of fire-arms to be used at a State election in April. Of course it is the faction who has brought shame upon the State by bribery and corruption in the Legislature, the Courts and the Executive who now threaten to openly defy the law. Decent citizens having at last become indignant under the shame brought upon them, are making an effort in a lawful way to put an end to the evil. Long success in their corrupt ways has made the corruptionists bold enough to attempt to defy law and to continue in wrong doing by open force if corruption should fail. This is ever the way with criminals. Success makes them bolder. In our own State and outburst of popular indignation against corruption led to the framing and adoption of the present Constitution. But at once the old machinery was set in motion, and it was not long until the corruptionists had control of the Courts, and all the provisions of the Constitution that had been intended to protect the people's rights were distorted and explained away, and all the work of the popular uprising was made of no effect. The great bulk of the people act in politics by fits and starts. The work of the corruptionists goes on with the regularity of the planetary motions. Our own corruptionists in the last Legislature had become so bold by long success that they threw aside all pretense of decency or respect for law, and combined to sell any kind of legislation that public robbers are willing to pay for. Our banditti are as bold as the lottery thieves of Louisiana. They differ only in the means used to accomplish the same end. The people of New Orleans set the whole world a good example of how to deal with an evil that the law had failed to remedy. Before the people of California get rid of their plunderers it may be necessary to imitate that example. But if due care is exercised in selecting men of integrity for Supreme Court Judges, and Legislators who are intelligent enough not to become the blind tools of corrupt leaders the evils we smart under may be remedied in lawful ways and without any resort to violence

The plan proposed by the majority in Congress to improve our tariff laws by amendments is wise and patriotic. It would be only stupid malice to reject what is good for no other reason than because it had originated with opponents; but it is not less stupid and malicious to ascribe to partizan motives alone the wish to reform a plain mistake or abuse. So far as English interests alone are concerned, the tariff system of that country is nearly perfect. But that system is result of many amendments and generations of experience. No sweeping and general tariff act was ever adopted by the English Parliament, the system having slowly grown to its present perfection. In the same way by experiment, by retaining what is good and rejecting what is bad, we can get a tariff system that will best suited to our needs. But endless chaos and injury beyond calculation would be the result of sweeping changes in our tariff laws every time that party majorities in Congress should change. If the Democratic majority in the present Congress shall set an example of this wise legislation, every good citizen whose judgment is not blinded by partizan prejudice will honor them for it.

When Andrew Carnegie was asked why he reduced the wages of his men at the Braddock and Homestead steel works 20 per cent, he replied that he was not running his mills for fun. But when he sent Major McKinley a check for $5,000 to help him defeat Campbell for Governor of Ohio, Mr. Carnegie said that his object was to secure a victory for protective tariff, so as to insure high wages for the working people.

No healthy person need fear any dangerous consequences from an attack of la grippe if properly treated. It is much the same as a severe cold and requires exactly the same treatment. Remain quietly at home and take Chamberlain's Cough Remedy as directed for a severe cold and a prompt and complete recovery is sure to follow. This remedy also counteracts any tendency of la grippe to result in pneumonia. Among the many thousands who have used it during the epidemics of the past two years we have yet to learn of a single case that has not recovered or that has resulted in pneumonia. 50 cent bottles for sale by

The Brilliant Student's Dilemma.

A Harvard student told me an amusing story about himself the other day. It seems that recently his mother had a young lady guest at their home on the Back Bay, and when he came from college in the afternoon he was introduced to her. At dinner also she sat opposite him at the table. He paid little attention to the fair visitor, as his mind was engrossed with a problem in his lessons. However, his brothers were as assiduous as possible in entertaining her. As it happened, the latter had engagements out that evening, and, as Mrs. A. had promised Miss B. to have one of her sons take her to the theater, it fell to the lot of my friend George, the Harvard man.

He accepted the situation gracefully, and in due time the young couple set off for the theatre. Arriving, George left his companion at one side of the lobby while he stepped up to the box office and purchased the tickets; then, turning about, he looked toward the place where he had parted from the young lady, and was surprised to see half a dozen there, and—ye gods! is it possible?—he could not tell which was his precious charge! Here was a dilemma.

George said he immediately decided that, rather than risk speaking to the wrong person, he would stand still till the young lady spoke to him. So he gazed at his tickets for what seemed to him an age, but was probably only a minute, when Miss B. came up and said, "I fear you did not recognize me." "Oh, yes—yes—" stammered George, equivocating—"yes, I did; I thought they had not given me the seats I asked for, and was considering what was best to do in the matter."—Boston Herald.

A Story from the American Indians.

Many years ago a boy found a beautiful snake, so an Indian legend runs. He kept it in a bowl of water and took notice that small feathers dropped into the receptacle became living beings. He experimented and discovered that whatever he put into the water became alive. He rubbed some of this snake water on his eyes and found that he could see things that were actually hidden in the ground. Concluding that he would make the liquid more powerful by putting more snakes into it, he hung up a number of serpents so that their oil dropped into the water. By putting some of the solution thus obtained into his mouth he could breathe fire, and by placing some of it in his eyes he could see in the dark.

At will he could transform himself into a serpent, could become invisible and could travel at an incredible rate of speed. An arrow dipped into the liquid and shot at any living being, even if it did not hit its object, would nevertheless kill it. A feather dipped into this snake water and pointed at any game would immediately start for the latter and slay it. This boy became in this manner a great wizard.—Washington Star

The Amateur Actress.

We had rather throw aside this pen forever than to write a word to discourage any woman who is conscientiously striving to earn a position on the stage; but there are other women—some in the profession, some in the audience—to whom it is grossly unfair to put forth an inexperienced amateur as a star. Consider, ladies and gentlemen, what a poor, miserable art that of acting would be if anybody could acquire it in a few lessons, in a year or so, from a private box across the footlights to the center of the stage. It takes a longer time to learn to be a carpenter or to play a piano, to be a dressmaker or to paint a picture, to be a typewriter or to cut hair properly, than amateurs who are now willing to bestow upon the art which includes, employs and dignifies all other arts from statuesque posing to wig wearing. If acting could be taught in a day it would not be so well paid nor so highly esteemed, and good acting would not be so uncommon.—Stephen Fiske in Spirit of the Times.

The Evolution of the Sword.

As men in early times fought hand to hand, the oldest specimens of the sword are short; in fact, the sword is probably but an evolution of the club, which at first made of hard wood was gradually sharpened on one and then on both sides, so as to inflict a more deadly wound. Even today we find some savage races employing wooden weapons. Wood gave way to stone, which in turn was displaced by bronze, iron and finally steel.

The sword increased in length as men became more civilized and showed a disposition to fight farther away from each other, which required more dexterity in the use of the weapon. Some specimens we have of swords of the Middle Ages are almost if not quite as long as the warriors who wielded them. During the Fifteenth century the science of fencing was invented, when the sword in the form of a rapier reached the highest point of development.—Kate Field's Washington.

Unasked Sympathy.

I cannot touch a piece of velvet with my fingers or permit the furry side of a peach skin to touch my lips without experiencing immediately a sort of cold chill all over my person. It is not so very severe, but it is unpleasant. Still I would prefer to living forever under the ban of such a chill than to be compelled to meet once a day one of those oleaginous bundles of insincerity and pretense, the unctuous and effusive chap who thinks you are not properly treated and never loses an opportunity to tell you so. Of course I am aware I am not properly appreciated, but I detest being told of the fact by another person, who never lifts a finger in my behalf, and who only wags his tongue in my favor when I am by to see him do it.—Detroit Free Press.

Helping One Another.

A seventh ward man rises in the early dawn of Monday morning and does the family washing, because his wife has an organic heart trouble. After he goes to his daily toil, with the consciousness of having performed his duty, she goes over and does the washing for the minister's family.—Springfield Homestead.

What He Hoped.

Mr. De Brute—My wife has a dog which knows a hundred different tricks. Wouldn't you like to have him?

Showman—Indeed I would. Is he for sale?

"No."

"Won't she sell him at any price?"

"No."

"Then why do you speak to me about him?"

"I was in hopes maybe you would steal him."—Good News.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write today. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars **free.** After you know all, if you conclude to go no further, why, no harm is done. Address,
E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98 100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80 100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Habhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispiracida Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieths (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieths (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the South west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah, deceased.

Dated, Independence, Cal., February 11th, 1892.

ASSESSMENT NOTICE.

INYO MARBLE COMPANY.

Location of principal place of business, San Francisco, California. Location of works, Inyo, Inyo county, Cal.

Notice is hereby given that at a meeting of a Board of Directors, held on the 26th day of Jan., 1892, an assessment (No. 16) of Fifteen (15) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary at No. 137 Montgomery St., San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 4th day of March, 1892, will be delinquent, and advertised for sale at public auction; and unless payment is made before will be sold on Wednesday, the 30th day of January, 1892 to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.
G. W. LUCE, Secretary.
Office, No. 137 Montgomery street, San Francisco, California.

COURT NOTES.

Geo. M. Gill, Superior Judge.

TUESDAY, February 9, 1892.

People vs. John Clarke—Filed verdict of acquittal.

BORN.

MAIRS—At Independence, February 6th, 1892, to Mr. and Mrs. O. I. Mairs, a son.

Ben Lisky was in town on Wednesday.

A. G. Speer visited Independence this week. Mr. Speer is a special agent for the General Land Office and was here on official business.

A social hop was given at Mairs' Hall on Tuesday evening. It was attended by all the local devotees of Terpsichore, and a good time was enjoyed.

Hon. P. Reddy went south on to-day's train and will visit Darwin. He suffered severely from the grip during the week, but he is much better to-day.

Jeweler Scott goes to Keeler to-day and will remain for a few days. If you have any repairs to be made be sure and take advantage of the opportunity.

Governor Markham has appointed A. H. Allen of Bridgeport and J. L. C. Sherwin of Benton directors of the 18th Agricultural District, to represent Mono County.

Mr. and Mrs. P. L. Carroll lost their youngest child, a girl aged five months, last Monday by scarlet fever. The funeral took place the following day. The Carrolls arrived here about a month ago from Candelaria.—*Miner.*

Bertrand Raine returned from San Francisco on Wednesday. He reports that his father's health is still in a precarious condition. He is very feeble, and though he may live for months, that he will ultimately succumb to the disease is inevitable.

Messrs. G. P. Rixford and M. Johnson of San Francisco arrived at Independence on Thursday morning, after having visited the Southern end of the Valley. Mr. Rixford is President of the Inyo Marble Company and besides, has extensive land interests here. Mr. Johnson is also interested in land and water.

The Conklin—Broder case, transferred from Inyo County to our Superior Court, came up on Wednesday on a motion for a new trial. R. S. Miner appeared for Broder and Judge Goodell for Conklin. After hearing affidavits and arguments, the case was continued by Judge Virden until the 7th of March.—*Chronicle Union.*

Emil Rudolph, a Los Angeles butcher, accompanied by A. Shannon, formerly of Bishop, arrived at Independence on Tuesday morning for the purpose of buying beef cattle. A short inquiry satisfied Mr. Rudolph that he could not buy enough fat cattle to warrant making a drive, and he returned on Wednesday's train. There are only two bunches of beef of any size in the Valley, and these have been secured by Fred Holbert. A buyer has been at Bishop during the week picking up some small lots here and there.

An important improvement has been made at the marble quarry by the introduction of a Sullivan channeling machine. The machine was put in motion about a week ago and works perfectly. By this means a channel four inches wide is cut to any depth less than ten feet. The length of the cut may be extended to any distance. The cuts are made on a level surface, the quarry being worked in benches like stairs. When a cut is made, wedges are inserted in holes drilled in the face of the ledge, and by driving these, solid blocks of marble of any required size are turned out. The orders now on file will keep the quarry working to its full capacity for the next three months. The business is steadily increasing.

Meteorological Summary.

Following is the report of the Weather Bureau Station at Keeler for the month of January, 1892.

Mean barometer	30.138
Highest barometer	30.514
Lowest barometer	29.743
Mean temperature	40.2
Highest temperature, 20th	61.
Lowest temperature, 1st	23.
Greatest daily range temp'ture, 29,	27.
Least daily range temperature, 27th,	8.
Prevailing direction of wind,	East.
Total movemement of wind,	4258 miles.
Extreme velocity of wind, direction and date,	38 miles N. W. on 17th.
Total precipitation,	0.26 inches.
Number of days on which .01 inch or more of precipitation fell,	3.
Number of cloudless days	17
Partly cloudy days	9
Cloudy days	5

H. E. WILKINSON,
Weather Bureau, Observer.

Mr. C. W. Reed, proprietor of the Hotel Dellone, Omaha, one of the finest new and modern hotels in the west, says of Chamberlain's Cough Remedy: "We have used it in our family for years with the most satisfactory result especially for our children, for colds and croup. It can be depended upon; besides it is pleasant to take and seems to be free from chloroform and the oily substances put into many cough mixtures. 50 cent and $1 bottle for sale by

Big Pine.

Favorable Comparisons.

Mr. W. L. Hunter of Georges Creek was in town on Wednesday. Speaking of his recent trip to the country south of Inyo, he said in substance as follows; Ventura, Los Angeles and San Bernardino counties were visited. He saw great improvement of land going on everywhere. The towns are keeping pace with the country, and in town and country good substantial buildings in great numbers are being built. There are abundant evidences of prosperity for all, and farmers and merchants appear to be alike doing well. Yet in the most prosperous parts visited Mr. Hunter did not see better land than much of Owens Valley. If Santa Clara, the main stream in Ventura, if the Los Angeles river, the San Gabriel and the Santa Annain Los Angeles county, and if all the water supply Mr. Hunter saw at Riverside and other places in San Bernardino county were united in one stream, they would not equal the quantity of water in Owens river. The thriving cities, towns and villages; the fine farms and beautiful orange groves, all the immense wealth of those three counties has been produced chiefly by irrigation. With the exception of citrus fruits, Mr. Hunter says all other crops in Owens Valley equal in quality, and several products are much superior to like things grown in those counties. He visited many farms and carefully examined the products. All the alfalfa he saw was far inferior in quality to that grown in Inyo county. He says he would not give one ton of the alfalfa grown upon his own place at Georges Creek for three tons of such as he saw in the other counties. Riverside is the locality most noted for the production of oranges, and there the largest profits have been realized in that business. He met Mr. J. W. Symmes there and fruit raising as a business was discussed. Mr. Symmes owns an orchard here at Independence and for years has been engaged in producing and marketing fruit, and consequently understands the subject. He is now the owner of an orange orchard at Riverside and well understands that business, also. He said that with proper facility for marketing the crop, acre for acre, an apple orchard in Owens Valley would be as profitable as an orange orchard at Riverside. Deciduous fruits of all kinds grown in Inyo far excel in quality like fruits grown in the other counties. But with all the great natural resources of Inyo county Mr. Hunter is now more firmly convinced than ever before that the present want of progress and development of those resources must continue till connection by rail with Los Angeles shall be secured. That once done, he is firmly convinced that the county would immediately experience rapid improvement, increase of population and wealth.

The following communication in regard to the soldiers' graves at Camp Independence was received this week:

WAR DEPARTMENT,
CHIEF QUARTERMASTER'S OFFICE,
SAN FRANCISCO, Feb. 4, 1892.

MR. I. H. MULHOLLAND, OFFICE OF INYO INDEPENDENT, Independence, Cal.: *Sir:*—

Your communication of the 6th ultimo, to the Hon. Secretary of War, in relation to soldiers' graves, has been referred to this office for action.

The records of the Quartermaster's Department show that nine soldiers are buried at Camp Independence, and a list thereof according to the record here is enclosed herewith.

It is requested that you will, if convenient, please inform me of the condition of the graves, whether they have headboards, etc., and what number of them can be identified by the names, numbers, or in any other way, as the places of interment of soldiers. Very respectfully,

J. G. CHANDLER,
Deputy Qr. Mr. General, U. S. A.,
Chief Quartermaster.

Following is the list forwarded from the Quartermaster's office:

Joyce, David K., January 20, 1863.
Lovejoy, Jabez F., March 3, 1863.
McGovern, Thomas F., September 8, 1866.
McManus, Owen, April 18, 1868.
Johnson, Edward, January 1, 1869.
Thompson, F. I., April 21, 1870.
Heller, Paul, April 25, 1870.
Cheny, Ezekiel, July 26, 1870.
St. Clair, Howard J., October 12, 1871.

Of these the graves of David K. Joyce, Howard St. Clair and Paul Heller will require identification by proof, which can be obtained. The others are plainly marked, though with the exception of T. F. Thomsen they are rapidly becoming obliterated. The government will take steps immediately to preserve the memory of the last resting place of the deceased soldiers, and it is earnestly to be hoped that it will be accomplished by repairing the Fort cemetery and not by removing the remains. There are other old soldiers besides those mentioned in the above list who lie buried there and it should be a matter of local pride to keep the cemetery in good condition if it is once repaired. It occupies a lovely site and could be made a place of beauty.

Child Killed By Poison.

Last Monday evening at Virginia City a child aged eight years was poisoned by swallowing morphine pills found in his mother's room. The boy was son of P. R. Plank, cashier of the Nevada Bank. Soon after he had swallowed the pills his mother discovered the fact. Two doctors were called, and everything possible was done to save his life, but it was too late. There are many homes where drugs are left within reach of children too young to know the danger of swallowing them.

The Clarke Trial.

In the Clarke case the District Attorney, having the final argument, concluded a few minutes after 11 o'clock on Tuesday. The Judge read instructions to the jury, occupying till nearly noon, and the jury were then locked up in the Court-Room. Four ballots were taken, the last being unanimous for acquittal. It is but just to say that the District Attorney, Mr. Forbes, faithfully and ably represented the people. The value of the defense by counsel for Mr. Clarke needs no other comment than a statement of the result.

Many persons who have recovered from la grippe are now troubled with a persistent cough. Chamberlain's Cough remedy will promptly loosen this cough and relieve the lungs, effecting a permanent cure in a short time. 50cent bottles for sale by

A. K. EUGLEY,
Big Pine.

LONE PINE CORRESPONDENCE.

ED. INDEPENDENT: *Dear Sir:*—Believing that this communication will be of some interest to your readers, will you please publish the same, if convenient.

A Lady's Opinion on the Matter of Equality.

Yesterday a lady entered my store and asked for 50 cents worth of alcohol; being answered that the county license on distilled liquors is ten times higher than the profits derived from the sale of the same, that I have no license and cannot sell any, she said: "Two of my children are sick and it is for a medicinal purpose."

The executive power of the county has made no exception for the sick, madam. The ordinence is imperative and operative in itself. "I don't insist, sir, upon my request; it would be a violation of law and you would be reprehensible. But I have some duties to perform; I am the acting physician of my own family and with the aid of some books on the treatment of diseases I have the satisfaction of having been successful in using alcohol internally as a stimulant and externally as a liniment; and this is the only place in town where it can be had. No power in the State has the legal right to impose a high license, equivalent to prohibition on a substance to be used for medical purposes; which is known by the highest medical authorities to be one of the best antiseptic and preventive remedies on many diseases, and curative properties on a good many others. Under the old organic law of this State the Legislature had the good sense to make exceptions to that effect, and no license was required to sell the same for medical purposes. And now under the New Constitution, which is considered an improvement on the old one, the State Legislature has made some amendments tranferring powers previously only exercised by the Legislature to the Boards of Supervisors, giving them the right to exercise some legislative powers; the change was made with good intent and considered as an improvement; but the good intent is one thing and the effects produced by such a transfer is entirely different and leaves the people without the recourse of protection from the State Legislature. All the changes made in our laws, called Acts, Amendments or Ordinances, should be made according to Article 1, Secs. 1 and 2 of the State Constitution, to improve the protection, liberty happiness and benefit of the people. but here, sir, instead of making amendments to increase our liberty and happiness, they put a restriction in the existing laws, and the effects of that execrable restriction, which is a violation of the above quoted article and sections, is apt to cause the death of my two sick children. Oh! Mr. Meysan, please fill this bottle with alcohol and I will return the same quantity as soon as I can." Just then a boy of 13 years stepped into the store, handed me a ten-cent piece and asked for some tobacco. I asked him, "for whose use is the tobacco intended?" he said, "For mine;" my answer, "I sell no tobacco to boys of your age." The boy went out and joined his companions playing in the street; there were twelve boys from 8 to 17 years of age. Pointing to the boys the lady said:

"There are some of the evils of the age; the future rulers and law-makers of the State, playing in the street during school hours, smoking and chewing tobacco, which is known and proved by the highest authorities to be a poison, which creates inevitable diseases in young people; weaknesses that are transmitted to posterity, causing premature death and a degeneracy of the human species. But when the cause of evil is known there is always a remedy for it, either directly or indirectly. In this case there are two ways of stopping the evil: First, the influence and duties of the parents; second, the authority given by law, which is mandatory to the Board of Trustees, in compliance with the Act of March 28, 1874, to enforce the educational rights of children; and by what we see in the street it is evident that the trustees are neglecting their duties, violating their oaths of office, and rendering themselves liable to the penalty of the Act."

Yes, madam, and some of the tax-payers should file a complaint in regard to it.

"Oh! sir, who of the tax-payers would be low enough and have the vileness to file a complaint when there is one hundred dollars reward to the complainant to compensate him for his despicable denunciation. There would be more dignity for a person to friendly notify the Board of Trustees that they are under the penalty of the Act of March 30, 1874, for neglecting their official duties and to try by persuasion to have them comply with the law.'

Excuse my remark, madam; I appreciate the grandeur of your views and the principle of humanity you express to keep concord among the people and to avoid creating animosities; but we know by experience that the legislative and executive powers of the State and counties are not always acting in accordance with the precepts advocated by you; and instead of employing their talents to simplify the laws down to justice and equity, they increase the difficulties; they enact some laws which create irritation and division of the people; they offer rewards to denounce in certain cases, which has a most corruptible effect. Scoundrels who have never performed an honest day's work in their lives take advantage of the same, and because of their cupidity and immoral procivities, perjure themselves for the sake of obtaining the reward offered, and the innocent in such cases are condemned for the benefit of the lowest scoundrels in society.

"It is a sure thing, sir, that a reward to denounce somebody creates more corruption in society than the act of the party incriminated. I agree with L. Copeland when he says: "He who does right for pay is no better than the one who does wrong for pay.' Virtue is its own reward."

Thereupon she went home.

C. MEYSAN.

ASSESSMENT NOTICE

LONE PINE CANAL COMPANY.

Location of principal place of business, Independence, California. Location of Ditch, near Independence.

NOTICE IS HEREBY GIVEN THAT AT A meeting of the Board of Directors, held the 6th day of Feb. 1892, an assessment (No. 2) of Twenty five (25) Cents per share was levied on the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary, at the office of the Company in Independence, Cal.

Any stock upon which this assessment shall remain unpaid on Saturday the 12th day of Mar. will be delinquent and advertised for sale at public auction; and unless payment is made before, will be sold on SATURDAY, the 2nd day of April, 1892, to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.

The Secret of Fine Pastry.

Is wholly in using Dr. Price's Cream Baking Powder. The only pure Cream Tarter Powder sold on the market. Other brands contain either ammonia, alum or some other adulterant. Ammonia or alum powders dry out, make the dough too porous, leaving a bitter taste, etc.

No agency has assisted so much toward perfection in cookery as Price's Cream Baking Powder. Its ingredients are simple and so blended as to exist in exact chemical proportions, so after use there is never any excess of either left in the food. Hence there can be no impurities whatever left in the finished food. No bitter taste, no taint of ammonia, but food raised with Dr. Price's Cream Baking Powder partakes of the natural sweet flavor of the flour and keeps moist and fresh for days. This powder possesses qualities peculiar to it alone. No other makes such delicious pastry. No other contains the white of eggs.

Algy—My boy, you look as if you had just stepped out of a fashion plate. Percy—Bless me! I knew I had rheumatism, but I didn't suppose I was as stiff as that."

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Bridges—Did Van Leer ever tell you about his family tree? Brooks—Yes; it's a chestnut.

Use Enameline Stove Polish; no dust, no smell.

LOST TIME.

Newton, Ill.

FROM 1863 to 1885—about 22 years—I suffered with rheumatism of the hip. I was cured by the use of

ST. JACOBS OIL.

T. C. DODD.

"ALL RIGHT! ST. JACOBS OIL DID IT."

"August Flower"

Perhaps you do not believe these statements concerning Green's August Flower. Well, we can't make you. We can't force conviction into your head or medicine into your throat. We don't want to. The money is yours, and the misery is yours; and until you are willing to believe, and spend the one for the relief of the other, they will stay so. John H. Foster, 1122 Brown Street, Philadelphia, says: "My wife is a little Scotch woman, thirty years of age and of a naturally delicate disposition. For five or six years past she has been suffering from Dyspepsia. She became so bad at last that she could not sit down to a meal but she had to vomit it as soon as she had eaten it. Two bottles of your August Flower have cured her, after many doctors failed. She can now eat anything, and enjoy it; and as for Dyspepsia, she does not know that she ever had it."

Doubting Thomas. Vomit Every Meal.

CONSUMPTION.

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, with a VALUABLE TREATISE on this disease to any sufferer who will send me their Express and P. O. address. T. A. Slocum, 37 Pearl St., N. Y.

IF YOU HAVE Malaria or Piles, Sick Headache, Costive Bowels, Dumb Ague, Sour Stomach and Belching; if your food does not assimilate and you have no appetite,

Tutt's Pills

will cure these troubles. Price, 25 cents.

ROSES AND LILIES.

Roses for youth with its mad ambition,
Lilies for hopes that bloom into peace,
Roses for work with its promised fruition,
Lilies when toil and striving cease;
Waxen trumpet and velvet nest,
The rose or the lily, which is best?

Lilies when days slip in dreamy fashion,
Roses when moments are glad and gay,
Roses for hearts in the maelstrom of passion,
Lilies for breasts that are quiet for aye;
Snowy trumpet and crimson nest,
The rose or the lily, which is best?

—Emma C. Dowd in Youth's Companion.

THE SNAKE CHARMER.

"An old, white bearded Hindoo, well known in South London as a street vender of pieces of scented wood, wicker baskets and other Oriental trifles, had been knocked down and run over by a butcher's cart, in the shafts of which, as is the butcherly custom, a swift trotting pony was driven by a reckless, bare headed youngster. The old man's wrist only was broken, but the shock to his system seemed likely to prove fatal at his advanced age, which rumor fixed at considerably over 100 years.

"From the moment that the old fellow was put to bed, Mascarenhas, a Hindoo attendant, was unremitting in his attention to him. He could converse with him in his own language; he spent hour after hour by his bedside and exhausted the resources of the hospital in making him as comfortable as might be. One disciple of Esculapius ventured to ask him in the chaffing style current at St. Dot's, if he had found his long lost great-grandfather. The fire that blazed from the young darkey's eyes at this was enough to warn his questioner that there was danger in pressing the point, and he dropped the subject like a hot potato.

"The old heathen had only one visitor during his four days' lingering in the ward—a young Hindoo cadger, who had roamed the streets in his company, beating a tom-tom and chanting some sort of gibberish to a melancholy tune. He claimed to be distantly related to him, but the patient received him with such undisguised dislike that he was requested after a second call not to repeat his visits, which seemed to agitate the old man excessively.

"On the morning of the fourth day the old Hindoo gave up the ghost more from old age than anything, and the customary white screen was placed around his bed, while the nurses prepared his body for the visit of the parish undertaker. A hurried inquest had been held, in which the old man's body figured as one of a batch submitted to the grumbling dozen of shopkeepers, who did duty as a jury. The coroner's order had been made out for burial, and I had fairly forgotten all about the case, when a note from Mascarenhas, delivered at my lodgings, brought me down to the hospital in eager curiosity.

"It was midnight when I reached the house surgeon's room at St. Dot's, to find Mascarenhas in a state of wild excitement, surrounded by a knot of physicians and students, whose faces wore an air of curiosity, mixed with incredulity. The Eurasian was talking volubly as I entered. In his hand he held what appeared to be a dead snake, of some non-venemous species, fangless and hoodless, but marked along the back with scales of a peculiar green luster, which glittered in the gaslight as he turned it about with eager gesticulations. Among the men he was addressing were some of the most learned and earnest of the faculty attached to the hospital, men open to conviction, but not likely to be victims of deception, even if it had been his wish to deceive them.

"'I tell you, gentlemen,' he said, in the peculiar screeching tone he always used when highly excited, 'I tell that you are about to witness a vindication of that eastern science for whose reality I have so often contended. The old man who lies in the operating theatre yonder is a Brahmin of the highest caste, as you may see by the sacred cord he wears, from which, once assumed, his compeers never part in life and death. He has been the master of mighty secrets, a serpent charmer of the most advanced order, and in his time a high priest of Mariatele. All that is involved in that description I will not attempt to tell you, lest I should convert your disbelief into ridicule. But I declare that he has proved to me his knowledge of the dread mysteries of life and death, of the power attributed in fancy to the fabled Frankenstein. I have promised you that within an hour you shall see the dead brought back to life. And for this boon, conferred upon him by my weak hands, he has sworn by his goodness and the sacred Vedas to make us partners in his knowledge. Is this mighty secret worth an hour's experiment or no?'

"'Will you kindly explain the treatment you intend to adopt?' asked Dr. McP——, a grim old Scotchman, who regarded the enthusiast with the pitying expression of one who hears the vagaries of a hopeless lunatic.

"'The talisman is here,' said Mascarenhas, holding the limp body of the reptile aloft. 'This creature, lying apparently lifeless on my palm, has existed in this state for unnumbered ages. The perfect balance of its natural juices restrains the process of decay and imparts to it a magnetic power of the highest possible order. It has been preserved in the Brahmin's family for countless generations, and used, as we shall use it tonight, to give vitality to the dead in days before your western civilization was dreamed of. It is the sacred snake of Vishnu; if others of its tribe are yet to be found they are in the possession of the members of her priesthood, and their existence is guarded from the vulgar as a dread and unattainable secret. Yet its images are worshiped to this day in countless shrines, from Calcutta to Kurrachee, from the Hindoo Koosh to Mysore.'

"'Clean mad!' muttered the old doctor.

"'If properly applied within twenty-four hours of death to a body in which no vital organic leison has taken place,' continued Mascarenhas, 'revivification is as certain as that steel strikes fire from flint. But follow me, gentlemen, and let me convince the most skeptical among you. You shall see the dead man live, move and possess his being again in renewed vigor, and the dread secret of ages, on which all the visions of the Rosicrucians and other sects of dreamers have been based, shall be mine and yours.'

"If unconvinced, our curiosity was powerfully excited. With rapid footsteps we followed the young mystic through the long, whitewashed corridors into the operating theatre, where so many suffering mortals had endured the incision of the merciful knife. On the table, illuminated by three strong argand burners suspended from the ceiling, lay the naked corpse of the old Brahmin. He wore the sacred cord alluded to by Mascarenhas, and his long white hair and beard, carefully arranged about his dusky countenance by the hands of the layers out, imparted a striking air of majesty to his aged features. Near at hand a mixture of turpentine and water was simmering in a pan upon the open fireplace, and flannel used in fomentation hung ready upon a chair back. We gathered silently around the body, and McP—— passed his hand critically from pulse to breast, and tested the rigidity of the limbs.

"'Dead as a door nail,' he murmured, and folded his arms in contemptuous expectancy.

"'Be ready to apply the flannels when I tell you,' said Mascarenhas, in a hoarse whisper. 'Now watch!'

"Slightly raising the venerable head, while we watched his motions with stifled breath, he twined the glittering length of the serpent around the dead man's neck and joined it head to tail at the nerve center atop of the spinal column. Then he withdrew a pace and waited anxiously.

"Five minutes passed without a sound from either of the party. Then the Scotch doctor broke the silence. 'What d——d rubbish!' he exclaimed. 'I was a fool to— Eh?'

"He paused, his eyes dilated with astonishment, for the dead man's eyelids trembled, and the wasted right arm moved with a convulsive motion upward, then curled round upon his breast. The bosom heaved spasmodically, and we bent forward over him in thrilling eagerness.

"We were interrupted by the tread of heavy footsteps in the corridor. The door was flung open, and the young Hindoo already spoken of burst into the room, followed by a couple of policemen, and, at a little distance, by one of the hospital sisters.

"'No knife here, gents, if you please,' said one of the constables—a sergeant. 'Magistrate's order to forbid dissection, and to have the body given up to the old man's relatives, represented by this party here.'

"Mascarenhas turned around to expostulate. His face was ashy pale, and his excitement choked his utterance. The young Hindoo pounced upon the corpse, and flung over the limbs a tattered wrapper that he had brought upon his arm. Next moment, with a torrent of exclamations in his own gibberish, he tore the serpent from the dead man's throat, and flung it scornfully upon the blazing fire. A flash, a sharp crackle, and it had vanished forever.

"The Eurasian sprang toward it with a scream such as I have never heard before or since. A moment he stood with outstretched arms and glaring eyes before the stove, then fell upon the floor in a swoon.

"For the next few minutes we were engaged in applying restoratives to the fainting man. Until he had partially recovered, and had been removed to his room, no one thought of looking to the dead man upon the table. When we at length returned to the body it had again subsided into the rigidity of death, the bent arm and the convulsed features alone testifying to the partial change that had been wrought upon it.

* * * * * * *

"'Could have done it all with a good battery,' was McP——'s comment, as we lit our cigars in the courtyard of St. Dorothy. 'Still, I should like to get one of those snakes—most remarkable electric action I have ever seen; beats the gymnotus by ten to one.'

"The next week Mascarenhas left the hospital for India. I have never set eyes upon him since."—London Chronicle.

How to Keep the Feet Warm.

Feet may be kept warm in almost any weather and with any covering. The method known to old lumbermen should be more generally employed, and would probably save many a frozen foot.

Take two bunches of common curled hair as large as the closed fist of the person whose feet are to be kept warm. A little liberality in the quantity will do no harm. Pull this out and make a pad large enough to cover the sole of the foot from heel to toe. It must be pulled out light and free from lumps and bunches. Put one of these pads in each stocking next the foot. The quantity of hair must depend to some extent on the looseness of the shoe. But whether much or little is used, the object is to cover the sole of the foot only with hair, and prevent the foot from coming in contact with the stocking. The sides and top will then take care of themselves. The writer has successfully used a bunch of hair less than the bulk of the fingers of one hand. So small a quantity is likely to be full of lumps, and does not well protect the foot; yet it prevents the foot from becoming cold enough to ache.

If curled hair is not to be had, that which can be combed from the mane and tail of the horse, or cut or pulled from the necks and heads of cattle or other animals will answer. When the shoe or boot is so tight that no space remains for the hair, remove the stocking and place the hair on the bottom of the shoe.—J. N. Semple in Herald of Health.

Barbaric Hayti Negroes.

Hayti has for nearly a century been a black independent state. The negro race have had it to themselves and have not been interfered with. They were equipped, when they started on their career of freedom, with the Catholic religion, a civilized language, European laws and manners, and the knowledge of various arts and occupations which they had learned while they were slaves. They speak French still; they are nominally Catholic still, and the tags and rags of the gold lace of French civilization continue to cling about their institutions. But in the heart of them has revived the old idolatry of the Gold Coast, and in the villages of the interior, where they are out of sight and can follow their instincts, they sacrifice children in the serpent's honor after the manner of their forefathers. Perhaps nothing better could be expected from a liberty which was inaugurated by assassination and plunder. Political changes which prove successful do not begin in that way.—J. A. Froude.

Insist on Dry Wood.

Whatever kind of fuel is used, insist upon it being good; if you burn wood, have at least half of it dry. Green wood can be burned sometimes, but never attempt to bake with it. Nothing less than a saint can keep her temper and cook breakfast over a sulky, undecided fire, when the kitchen is blue with smoke and the wood sings psalms and sheds tears.—Good Housekeeping.

Grossly Exaggerated.

The Belfast medical inspector, Dr. Stafford, asserts that the recent sensational statements regarding the Irish practice of drinking ether is "gross exaggeration." For example, instead of 26,000 gallons forming the annual consumption about Kilrea and Loch Neagh, only about 140 gallons were sold last year.

Some New Brunswick Superstitions.

A Portland lady says that her hired girl invariably puts a pin in her mouth when peeling onions, and when asked the reason, said it was to prevent her eyes from watering. It is a practice believed in among the people in New Brunswick, where is her home, and her mother, now advanced in age, thoroughly believes in all sorts of signs and superstitions. On New Year's morning she will on no account allow any of her large family of children to take any article out of the house until they have first brought something in, a stick of wood or any object, no matter how valueless. The idea is that if the new year is thus begun it will be prosperous and more will come into the house than will go out.

This woman would not, of course, think of beginning any task on Friday. It would be a long and arduous one if she did. Neither would she take a broom with her while moving the household goods from one place to another. Old brooms would be left behind and new ones bought. A cat also would be left behind while the goods were being moved. It would, however, be safe to return and bring the cat alone. To dream of passing through dirty water or that a train of cars passed the house is a warning of approaching death in the family.

An even number would never be allowed to sit down to a wedding dinner, and at a marriage the carpet would be taken up and the direction of the boards ascertained, so that the happy couple could be so placed that a crack should not run between them during the ceremony, for otherwise subsequent dissension and separation may be expected.—Portland Transcript.

A MILLION A YEAR.

Lottery and Prize Schemes used to Sell Alum and Ammonia Baking Powders.

A New York concern, manufacturers of an ammonia baking powder boasts that its yearly profits are over a million dollars. While, perhaps, none of the makers of alum powders individually can show so large earnings yet their profits are enormous.

A business so profitable, will always attract to itself those whose greed will cause them to utterly disregard the effect their traffic may have upon the health or life of others.

Alum baking powders are introduced largely by gifts, prizes and lottery schemes. A piece of glassware or china, a child's wagon, sled, a pewter spoon or some other article of attractive appearance, but of small intrinsic value or cost is given with each purchase or a number is attached to the can which entitles the customer to a similarly numbered article or to a prize of some kind. It is in some such way as this that the trade in alum and ammonia baking powders, which has now attained such giant proportions and their consumption by the public which has reached an extent which is truly alarming.

The highest authorities of all countries condemn the use of alum in bread without reserve. In America the most distinguished physicians, chemists and hygenists have declared that the traffic in alum baking powders should be suppressed by law. In England and France where the subject of pure food, and its effect upon the system, has been more fully considered and made the subject of extended experiments by the scientists, so serious a matter is the use of alum in bread or other food considered to be, that most stringent laws have been enacted to prevent it. These laws are rigidly enforced, and the sale of alum baking powders would not be permitted for an hour. Any one who attempted to make them for use in food, or attempted to use them for raising bread, biscuit or cake would suffer severe penalties.

The ill effects upon the system of food raised by alum baking powders are the more dangerous because of their insidious character. It would be less dangerous to the community were it fatal at once, for then such food would be avoided; but their deleterious action because imperceptible at first is no less certain.

The puckering effect which alum has when taken in the mouth is familiar to everyone. Physicians say this same effect is produced by it upon the delicate coats of the stomach and intestines.

What housewife would take home to her family a can of alum or ammonia baking powder if she knew it. Such powders not only undermine the system, but it is pointed out that ammonia taken into the system in even infinitesimal doses day after day, imparts to the complexion a sallow and blotched appearance.

It is safe to discard all baking powders sold with a prize or gift.

What a misnomer are the words "Absolutely Pure," as applied to baking powders. Two of the largest selling brands, one made from alum, the other containing ammonia and both of these drugged baking powders have stamped upon their labels and circulars these words absolutely pure, as a matter of fact they are "Absolutely Poor," as shown by official examinations.

A Parrot's Conceit.

My aunt had a parrot that had been taught to sing the first stanza of "There Is a Happy Land," and Polly was very proud of her voice. One day a neighbor brought over her canary to be kept while she was away from home. No sooner would the canary commence singing than Polly would bristle her feathers and cry out: "You don't sing right! you don't sing right! Hear Polly sing!" Then Polly would execute "There Is a Happy Land" to the best of her ability.

One evening my uncle, who is somewhat deaf, was telling me that there was a concert in the town hall, and he should like to go, but did not think he could hear. Whereupon the parrot shrieked: "Polly'll sing! Polly'll make you hear!" The gentleman turned courteously to her. "Thank you, Polly! I'll stay at home and hear you!" he said. She danced about her cage in delight. "Beautiful Polly! Polly can sing!" she kept saying softly to herself, with a pride in her accomplishment that was amusing to see.—Wide Awake.

A Boot and Shoe Museum.

One section of the great historical collection at Dresden is literally a museum of boots and shoes, being, it is believed, unequaled in the world as a repository for the footwear of celebrities. Among the things of interest shown are a pair of shoes worn by Martin Luther at the Diet of Worms, and the toilet slippers of the great Maria Theresa. In a sealed case are shown the boots worn by Napoleon at the battle of Dresden, and the jack boots of Peter the Great.—St. Louis Republic.

A Warm Day.

Mother—I'm afraid you'll catch cold if you sit in that draft.

Little Boy—But, mamma, I'll catch hot if I don't.—Good News.

Safe Experts.

In Cincinnati there is a man by the name of John Henry Williams, and this secluded individual sports the reputation of being "the best safe expert in the country." If one should watch him as he gracefully balances a billiard cue preparatory to making a hard shot, surrounded by the elite of social lions with eagles eyes, he would little think that this white knuckled gentleman is a man who handled iron and steel for a livelihood.

But it is so, and there is perhaps no other man in the world who can judge of the workmanship of a cracksman better than he. Almost instantly after viewing a "cracked" safe he can tell by whom the work has been done. He has been engaged in this business for many years, and quite successfully.

"Yes, the man who knows the inside and outside of a safe," said he to a reporter, "has about as much as he can do following up successful and unsuccessful attempts to "crack" them by professional burglars, for no occurrence of this kind takes place without the police sending for experts to make an examination.

"Indeed, the statements which appear in the newspapers," he continued, "after an attack on a vault or safe are always given by one of our men. The police get the credit for such discoveries, but we are content with our remuneration."—Exchange.

A Deaf Cat in High Life.

Snowball is one of the best known Angoras in the city, and although she is but 4 years of age she is the mother of seventeen kittens, every one of which has been of spotless whiteness. She weighs twelve pounds and has a tail that waves in the air like an immense banner. Her eyes are sky blue and she never heard a sound in her life. She has been thoroughly trained and knows many very amusing tricks, among which is that of fetching the ball when thrown by her mistress. She performs this with all the fidelity of a well trained retriever, and her ability as a catcher would make Buck Ewing green with envy. Her marked peculiarities are her grace and gentleness and her habit of playing with shadows.

A moving object has no attractions for her, but if a shadow is thrown upon the floor and moved rapidly about Snowball will chase it for hours with a grace and elegance of movement that would eclipse those of the finest ladies in the land. Notwithstanding her fastidiousness in other respects Snowball's appetite is gross, and she prefers raw liver to any other article of diet.—New York World.

Arago's Modesty.

Arago, the great French scientist, was never seen with a decoration on his breast. He valued honors slightly. One evening Leverrier, the astronomer, called on him on his way to dine with a minister. He expressed a wish to appear decorated with an order, to which he was entitled, having received the official notice of the honor, although he had not as yet the decoration itself.

"Open that drawer," said Arago, "and take whatever you want."

In that drawer were all the crosses and ribbons which kings and emperors confer.

While Arago wished above everything to promulgate science and to make his researches useful, he did not attempt to identify himself forever with his discoveries by writing books. He had no time for writing, but contented himself with noting the results of his work in the record of the bureau of longitude, or announcing it verbally to the academy.—Youth's Companion.

Salt Making Among the Chinese.

A wonderful example of patience in the Chinese is afforded by a consular report dealing with the manufacture of salt in central China. Holes about six inches in diameter are bored in the rock by means of a primitive form of iron drill, and sometimes a period of forty years elapses before the coveted brine is reached, so that the work is carried on from one generation to another. During this time the boring, as may be imagined, goes down to an immense depth.

When brine is found it is drawn up in bamboo tubes by a rope working over a large drum turned by bullocks. The brine is evaporated in iron caldrons, the heat being supplied by natural gas, which is generally found in the vicinity of the salt wells.

How He Sold the Goods.

"Have you got any buff trimming to go with this stuff?" asked a flashily dressed woman of an assistant in a large draper's near Regent street the other day.

"I think so, miss," answered the polite young man, taking down a piece of goods and spreading it on the counter.

"Buff! Do you call that buff?" exclaimed the woman. "That's too dark for a buff."

"But, miss, that is"——

"It's too dark! I can see it is."

"Why, of course it's dark, madam," persisted the man. "It's blind man's buff—the new shade, you see."

He sold the goods.—London Tit-Bits.

The gingerbread palm of Egypt bears seeds with mealy husks which taste very much like gingerbread. In certain localities the tree forms extensive forests and its roots spread over the ruins of Thebes, one of the largest and most splendid cities of the ancient world.

Throat Diseases commence with a Cold, Cough, or over-fatiguing the voice. These symptoms (which, if neglected, often result in a chronic trouble of the Throat) are allayed by the use of "*Brown's Bronchial Troches.*"

Is there a word in English which contains all the vowels? Unquestionably.

TOWER'S IMPROVED Slicker is the only Absolutely Water Proof Coat! Guaranteed NOT to Peel, Break or Stick. to Leak at the Seams.

There are two ways you can tell the genuine Slicker: the Fish Brand trade mark and a Soft Woolen Collar. Sold everywhere, or sent free for price. A. J. TOWER, Manufr. Boston, Mass.

Our Shield Brand is better than any waterproof coat made except the Fish Brand.

Usually it is the man of the least importance who deems it most necessary that his valuable person be protected by a pistol.

W. J. Arkell, publisher of *Judge* and *Frank Leslie's Illustrated Newspaper*, writes:

JUDGE BUILDING,
Cor. FIFTH AVE. and SIXTEENTH STREET,
NEW YORK, January 14, 1891.

About three weeks since, while suffering from a severe cold which had settled on my chest, I applied an ALLCOCK'S POROUS PLASTER, and in a short time obtained relief.

In my opinion, these plasters should be in every household, for use in case of coughs, colds, sprains, bruises or pains of any kind. I know that in my case the results have been entirely satisfactory and beneficial.

Great men owe their fame to the littleness of the rest of the world. Fame is only a result of comparison after all.

FRIGHTFUL SHIPWRECKS.

Staunch ships strike and founder, the fierce winds and mountainous waves sweep noble mariners' "hearts of oak" to shipwreck and to death, yet that does not prevent the luberliest landsman from risking his life on the stormy Atlantic in the roll of tourist or commercial traveler. But if he shall reach his destination safely he will scarcely have escaped some of the qualms of sea sickness, unless he takes with him Hostetter's Stomach Bitters, that inimitable specific for nausea. Bad water on long trips are a threat to the voyager, but this may be deprived in a great measure of its disordering effects upon the stomach, bowels and liver by the Bitters. Against the prejudicial effects of malaria, bad diet, fatigue and exposure it is also efficacious. It averts, moreover, rheumatism and kidney complaints. Don't travel on sea or land without it.

One player holds the cards; another holds the revolver. A coroner holds the inquest.

—the life that is fighting against Consumption.

Only—act promptly.

Put it off, and nothing can save you. But, if taken in time, Dr. Pierce's Golden Medical Discovery will certainly cure.

It must be done through the blood—and the "Discovery" is the most potent blood-cleanser, strength-restorer, and flesh-builder that's known to medical science. The scrofulous affection of the lungs that's called Consumption, and every form of Scrofula and blood-taints, all yield to it. For Weak Lungs, Spitting of Blood, Bronchitis, Asthma, and all severe, lingering Coughs, it's an unequaled remedy. It's the *only* one that's *guaranteed*. If it doesn't benefit or cure, in every case, you have your money back.

"We promise to cure your Catarrh, perfectly and permanently, no matter how bad your case or of how long standing—or we'll pay you $500." That's what the proprietors of Dr. Sage's Catarrh Remedy say to every sufferer from Catarrh. And they mean it.

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

I CURE FITS!

When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. Give Express and Post Office. H. G. ROOT, M. C., 183 Pearl St., N. Y.

Taking butter from milk was known in the earliest times. It was left for our time to make a milk of cod-liver oil.

Milk, the emulsion of butter, is an easier food than butter. Scott's Emulsion of cod-liver oil is an easier food than cod-liver oil. It is rest for digestion. It stimulates, helps, restores, digestion; and, at the same time, supplies the body a kind of nourishment it can get in no other way.

SCOTT & BOWNE, Chemists, 132 South 5th Avenue, New York.

Your druggist keeps Scott's Emulsion of cod-liver oil—all druggists everywhere do. $1.

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation permanently. For sale in 50c and $1 bottles by all druggists.

THE ROSE OF DAWN.

How mockingly the morning dawns for me,
Since thou art gone, where no pursuing speech,
No prayer, no farthest sounding cry can reach!
I call and wait the answer to my plea—
But only hear the stern dividing sea
(That pauses not, however I beseech)
Breaking, and breaking on the distant beach
Of that far land whereto thy soul did flee.

Do happy suns shine on thee where thou art?
And kind stars light with friendly ray thy night?
And strange birds wake with music strange thy morn?
This beggared world, where thou no more hast part,
Misapprehends the morning's young delight,
And the old grief makes the new day forlorn.
—Louise Chandler Moulton in Century.

LOST AND RECOVERED.

In the year 1859 I was employed as second mate on the ship Lady Bliss, which voyaged between the Cape of Good Hope and India ports. She was a stanch, tidy and well found craft, and Capt. Berry was part owner. I had made the trip from the cape to Bombay twice when the adventures I am about to relate had their beginning. The crew numbered twelve men, and as is usually the case a fresh lot of men was shipped for each voyage. I alone had made the three trips without a change, and this was because Capt. Berry had taken a great liking to me. I could have gone as first mate, being perfectly competent to navigate the ship, but had an operation performed on one of my eyes and did not dare to risk the responsibilities of the position. At each trip we had had a new first mate, and a strange one came aboard at Bombay to go back to the cape. He was introduced to me as Mr. Hall, but it isn't at all probable that that was his name. He was a big, strong fellow, a thorough sailor, and I had no reason to believe that we should not get along together. The captain, too, seemed to like him, and the crew as a whole was above the average.

We had been out three days before I found that Mr. Hall was a queer man. If the word "anarchist" had then been coined it was not familiar to the public. The ideas advanced by the masses today were then unheard of. The mate began a conversation which resulted in making me suspicious of him. The ship belonged to a company which owned five others. Each craft was known to be well found and well manned, and could always have its pick of men for a crew. I was more than astonished to hear Mr. Hall declare that the company was making too much money and becoming too much of a power in the land. They were building up, he declared, at the expense of the sailor. No man, firm or corporation had any moral right to so much wealth and power. God had designed that all should share alike; one man had no right to roll in wealth while another wanted for bread, and so forth, and so forth. He took the same line which all the well known anarchists and socialists have adopted and followed since, and I could not doubt that he was deeply in earnest. While the conversation led me to believe that he was holding dangerous views, there was nothing for me to worry about. As for repeating his words to the captain, the idea never entered my head.

It wasn't long before Hall sought occasion to sound me again, and I suddenly made the discovery that he had been tampering with the men. I had not seen him talking with them, but two or three of them assumed such an independent bearing that it was plain the seed had fallen on fruitful soil. The crew was made up of rovers—English, American, Dutch and Lascars. Not more than two could claim the same nationality. When we had been out five days, and during my watch in the evening, I overheard enough of a conversation between three of the men to satisfy me that Hall had deliberately gone to work to create dissatisfaction and a mutinous spirit. I had entire charge of the deck at the time, and having given some necessary order I watched and saw it obeyed in a manner to prove that there was something very wrong with the men—at least the men in my watch. Sailors always growl more or less, no matter how well situated, but, unless on the point of mutiny, are prompt to obey an order. In this case the men lounged forward in an impudent way, each one growling below his breath, and I plainly caught the words of one of them as he said:

"D——n the company! We are just as good men as they are!"

I did not let on that I heard it, nor did I reprove them for their want of promptness. Had I been sure of Mr. Hall it would have been different. If he had been talking to the crew as he talked to me then I had a matter on hand to be handled very carefully. I was vexed and worried, but decided to wait.

Next day in my watch we had to break out a cask of beef from the hold. Even with the captain on deck smoking his cigar the men lagged and exhibited their impudence. When the tackle was let down through the forehatch one of the men descended to make it fast to the cask. He fussed around for five minutes, growling and swearing, and when I swung myself down and sharply reproved him for his want of energy he ripped out at me:

"Oh, yes! We've got to break our backs to pile up the dollars for the nabobs ashore! They'd sell the heart's blood of every Jack aboard for a pound note!"

Acting under the regulations governing any ship, I should have knocked him down. I passed his remarks without a word, feeling my heart that the whole crew must be dead ripe for mutiny. I intended to go to the captain as soon as my watch was over, but I had waited too long. Just as we hauled the cask on deck Hall came out of the cabin. His appearance was a signal to the men to knock off and crowd aft. Hall walked over to the captain and calmly said:

"Capt. Berry, do you believe that one man has a right to grow rich at the expense of another?"

"W what do you mean, sir?" gasped the astonished captain.

"I mean that I am tired of watching, working and slaving for the profit of others. The company is too rich and arrogant. It has its foot on too many sailors' necks."

"Go to your cabin, sir! I suspend you from duty!" shouted Capt. Berry, who was both amazed and indignant.

"Not so fast, captain," replied Hall, smiling blandly. "We have concluded to take charge of the Lady Bliss. We have decided to strike for our rights. We have been slaves long enough."

The captain was speechless with amazement. It had come upon him so suddenly that he could not collect his wits. As he stood like one bereft of ear and voice Hall continued:

"As you are part owner you belong to the class which is eating out our lives. We have no use for you. Men, get the gig ready. Now, then, Mr. Reefer, are you with us or no?"

"Do you mean that you have taken possession of the ship?" I asked.

"Exactly."

"And what is your programme?"

"We have slaved for the company long enough. We will now go into business on our own account."

"How?"

"We have been robbed; we will rob others."

At this the crew set up a loud cheer, and it was evident that they were with him to a man. It was no time for argument—to point out inconsistencies. They had complained of being oppressed; they now proposed to oppress others. They had complained that the company was piling up money through the wear and tear of their bone and sinew; they now proposed to rob by force of arms. They had complained that the company was too rich; they now proposed to amass all possible wealth. They had declared that all property should be held in common; they now proposed to dispossess all holders not strong enough to beat them off.

"Suppose I refuse to join you?" I asked.

"Then you will be set afloat with the captain."

"I prefer that to piracy."

"Very well; you have made your own choice. Men, get ready the gig, and put in water and provisions for a week. We don't owe them any grudge."

It was folly to think of resistance, but the captain would have his say. He abused each and every one of them in good, round English, and predicted that he would be present when each one dangled at the end of a rope. They simply laughed at him, and in the course of half an hour we were set afloat. The gig was furnished with a sail and a pair of oars, ten gallons of water, a bag of bread, a few cans of meat and fruit. Each of us was allowed to make up a bag of clothing, but were refused a compass, chart, or anything else which might aid us in steering a course. Both of us were robbed of our money and watches, and the captain was even dispossessed of a finger ring. The men who had struck for their "rights" had no care for the rights of others.

It was about an hour before sunset when we were cast adrift. We had made a good 500 miles to the southwest since leaving Bombay, and were at least 350 from the Indian coast. As the breeze was from the east we headed to the south, while the ship, which had been hanging in the wind for an hour, stood to the north, her crew cheering over and over again as she laid her new course. It was a long half hour before either one of us broke the silence. One event had followed so swiftly upon the heels of another that it was hard to realize all that had occurred. I steered the boat, and the captain sat with his face in his hands for a long time. Finally he looked up and around to exclaim:

"D——n such a crew! If they had mutinied in the regular way, having some reasonable excuse, I shouldn't feel half so mean over it. To be beaten out of my ship by a hair brained fool of a mate, and that by talk alone, makes we want to kick myself."

"We stand a good show to be picked up," I suggested.

"Yes, fairly good, but as soon as the wind will allow I want to head to the southeast. We are not over 200 miles from the Malabar islands."

The Malabar group extends for 500 miles along the coast, and comprises such large islands as Lakadivh, Aucutta, Minikoi and Horsburg. Then begins the Maedivh group, and extends for another 500 miles, many of the islands being thirty, forty and fifty miles in length, with straits or channels between them. But few of them were inhabited at that time, and those only by fishermen and shell hunters.

In an hour the ship was lost to our view. I minded the boat for the first half of the night, steering by the stars and the feel of the breeze, and then turned in while the captain stood watch. As the sun came up next morning the wind hauled to the west and became fresh, and while we had to look sharply after the boat, she flew ahead at a pace which gave us an extraordinary run for the day. Only one sail was sighted, and that was too far away to give us any hope. The captain had the watch from 8 to 12, and I had been on about an hour when I heard the roar of breakers, and knew that our run was finished.

Having aroused the captain, we decided to stand off and on until daylight appeared, and when it came he recognized the island before us as that of Aucutta, the next largest of the Malabar group. We had made a safe landing before sunrise, and when we had eaten breakfast we started out together to investigate. We walked up the southern shore about ten miles and back without finding any trace of inhabitants. After dinner we headed to the north, and a tramp of six miles brought us to the limits and resulted in a strange sight at the same time. The Lady Bliss was standing down for us from the northwest, and when seen was hull above water. We found a hiding place in the bushes and watched her as she stood on. There was deep water to within a cable's length of the beach. She shortened sail, passed the corner of the island, and after running along the north shore for a mile came to anchor in thirty feet of water, and within a stone's throw of the beach. Her anchor was hardly down when we saw and heard a row on board—a free fight in which all seemed to be engaged. The result of this was that five men lowered the yawl and pulled ashore. We heard Hall and others call after them and make threats, and they replied in kind. When they had landed they declared their intention to remain, and each one spoke bitterly of the way Hall and his favorites had used them. They had not left the ship for good, but were prospecting to see if the island suited them. They had brought with them the captain's revolver and the only two muskets aboard the ship.

It did not take us above ten minutes to find out how the land lay, and we then exposed our presence and besought the men to aid us in recapturing the ship. There was but little hesitation on their part. Hall had no sooner got possession than he lorded it over the sailors in great style. It wasn't two hours before he had a mutiny on his hands, and one-half the crew insisted on his heading for the islands, that they might be put ashore. There had been half a dozen fights between the two factions, and two of the men aboard were laid up.

Capt. Berry promised the five men immunity from all punishment if their future behavior was satisfactory, and the seven of us then pulled aboard. A fight was even then going on in the cabin between Hall and his mate, and we were on deck before they knew it. It wasn't five minutes' work to secure Hall and the two men who had been most prominent, and the others then went down on their knees and begged for mercy. It was granted on conditions, and the ship was at once got under way and her course laid for the Mozambique channel and the cape. Hall alone was tried by the authorities and he was publicly hanged for his crime. He was perhaps more of a crank than a criminal, but British law stands no nonsense from any subject.—New York Sun.

And She Was Ahead.

A—Jones and his wife are a pretty good looking pair.

B—H'm! They remind me more of a tandem team.—Texas Siftings.

LIFE IN A HOUSEBOAT.

Neatness and Comfort in Floating Homes.

SCENES UPON THE MISSISSIPPI RIVER.

People Who Pay Neither Rent Nor Taxes and Have no Coal Bills.

Down by the water's edge and upon the broad bosom of the great Father of Waters are moored a number of small boats, which are literally floating homes, and invite no small amount of curiosity.

This new Venice is located near the east end of Robert street bridge, and is popularly set down as a tough village.

Standing upon the bridge, 75 or 100 feet above the water and flats, and looking down upon these unique homes, you see a desolate stretch of shore line broken by rock piles, decaying skiffs, irregular stacks of bark and driftwood, fragments of tin roofing, rotten seines, broken barrels in all stages of hoopless disintegration, and all the other flotsam and jetsam incident to the beach of a waterway with tides or a varying volume of water. In the foreground, and surrounded by this abomination of desolation, are moored the string of boat homes.

All are small, but some are larger than others. From the altitude of the bridge they look like chicken coops, or the residences of ultra-fashionable swine.

Descending from Robert street to the flats by means of a long flight of steps, the first boat approached is a small unpainted affair, stranded upon a stony strip of real estate temporarily loaned by the river. The windows are curtainless and dirty, no smoke curls upward from the stovepipe on the roof, and you conclude that it is untenanted. There is a window in the door, and a climb to the deck lays bare a bachelor's home, confessed in the comfortless interior.

A THRIFTY COUPLE.

The next boat was quite elegant in comparison. It was about thirty feet long, painted dark lavender, and had a latticed porch or veranda, without a roof, extending around three sides. A shallow flight of steps led from the ground to this porch on the deck, and pretty rustic flower pots and hanging baskets adorned the steps and hung from the lattice work. On the back porch a line full of baby garments fluttered in the breeze, and a big black dog snoozing in the sun kept guard over all. The owners of this boat are Danes or Norwegians.

The husband is a turner, and many ornamental pieces of his handiwork can be seen about the boat. His wages are $2.50 per day, and with no rent, taxes or assessments, street sprinkling or water tax to pay, and with an industrious, economical and tidy little wife, this young man is much better fixed for saving money and enjoying life than one-half of the men who get double his salary.

Following along the path the third boat is reached, and the young couple who live here are cousins of the turner's family. Such perfection of neatness in every detail of the small household it has probably never been your good fortune to see outside of a New England home. The kitchen floor was as white as soap and honest scrubbing could make it; the round breakfast table was covered by a bright Turkey red tablecloth; the small cook stove shone like a mirror, and every cooking utensil in sight was bright as a new dollar.

The second room was a bedchamber, and the same neatness was manifest in the whiteness of the spreads and pillow shams, the worked splasher and shining toilet set. Not a speck nor a spot anywhere. If you are astonished into remarking upon this high state of cleanliness the housewife, who cannot speak English readily, will point with a smile to the oceans of soft water just outside the window, and the explanation is complete, although you leave that house with your respect for the Scandinavian housekeeper raised several degrees.

The rooms of this boat are all neatly papered with a small patterned light paper and bright border of good width. The floors of the sitting room and bedroom are covered with a pretty square patterned oilcloth which looks not unlike tiling, and over this is spread a strip of bright, new ingrain carpet for a rug. In the sitting room stands a handsome hardwood swinging crib, finished to resemble antique oak, and the work of the turner next door, who is second cousin to the month old owner of the crib. Nottingham curtains as white as the bed coverings are up at the windows and looped back with bows of ribbon.

A rustic stand and flower bowl, as artistic as many which adorn Summit avenue lawns, holds a healthy species of palm, and rustic baskets filled with delicate vines fill the windows and lend an air of refinement to the room, which is strangely incongruous because of that picture of outer abominations that is imprinted upon the retina of your eyes.

In the fourth boat lives a young couple who are just beginning life. They are Danes, and have only lived on the river for one year.

Their boat also contains three rooms, but owing to limited resources they were unable to fit them up as nicely as might be desired, but the same scrupulous neatness was over everything. The owner is building another boat, which is to be forty feet long and have four rooms when completed. A boat of this size, if built by himself, will cost the owner in the neighborhood of $100. The boat now occupied by this couple was built by the man at odd times at a cost of $86.

This man, who is the janitor of a Seventh street building, has lined the walls and ceilings with thick paper, and the house is snug in the coldest weather. The small hold in the bottom of the boat has more or less water in it, and in summer it makes a very good milk house, while in winter they can keep a supply of meat on the ice without any trouble, and save money by buying in large quantities.—St. Paul Pioneer Press.

Prudence in Mourning.

The economy which is too strong to be disturbed by grief or bereavement is so akin to avarice that no one feels any self reproach for holding it up to ridiclue, although the circumstances may have to do with the saddest of events. There was once an eccentric old lady who lived in one of the seaport towns of New England, and who was renowned alike for her oddities and for what her neighbors called her "nearness." She was a widow, and had inherited not a little property from her husband, which she carefully handled and which increased in her care. It was made a matter of reproach that she did not erect a tombstone to her husband, but she always said that she could not afford such an expense.

In course of time, however, the widow made up her mind to have a tablet, and accordingly went to Boston to select it. She visited one marble yard after another, but for a long time could find nothing cheap enough to suit her. At last she came upon a large and handsome slab which was set aside to be cut down.

"You see it was spoiled," the stonecutter explained. "We began it for a man named Mark, but his wife changed her mind by the time we had got so much of the name on, and there is the whole slab spoiled."

"I'll take it off your hands," the widow said, promptly, "if you'll let me have it reasonable."

"Oh, I'll let you have it very cheap, to save the bother of having it cut over. But what can you do with it?"

"I'll use it," she answered, and at once proceeded to go into the discussion of the price.

When she had at last beaten the stonecutter down to an absurdly low figure, the widow bought the slab.

"There," she said, "now what I want you to do is to put 'the perfect man' after that word in the same sort of letters, and then the name and the date can go just there."

She indicated to the astonished stonecutter with her long finger the disposition of the inscription, and thus it came about that in a certain well known cemetery of her native city her husband sleeps under a marble whereupon the world is admonished to "Mark the perfect man!"—Youth's Companion.

Relieved.

A young woman, refined looking and beautiful, but evidently in much distress, called at the office of the postmaster of one of our large cities not long ago. For three weeks she had been expecting a letter from home with $20 in it.

On account of an imperfect direction, as it turned out, the letter had not been delivered, and the poor girl had been reduced to such straits, alone in the great city, that she was in almost a frantic condition.

The postmaster was absent, but his private secretary listened to her story, and at once sent a messenger to the delivery division to ascertain whether such a letter had been received, and if so, whether it had been forwarded to the dead letter office.

In a few minutes the messenger returned bringing the letter, which the secretary handed to the girl with the remark that if she would open it she would probably find the money.

With nervous haste she nipped little pieces from the end of the envelope, her eyes full of almost painful expectancy, and as she caught sight of the green bills she clasped both hands tightly over the envelope, and with tears running down her cheeks exclaimed, "God bless the postmaster!"

It was such a scene as does not occur every day in a business office, and as she went out there was not a dry eye in the room.—Exchange.

Politeness in Old Times.

Are we less polite than our forefathers of the good old monarchical times? Our Paris correspondent says that M. Giraudeau thinks not, but rather that there has been progress not only in personal cleanliness, but in urbanity since the Revolution. The grand lords and ladies of the court of France were slipshod and sluttish when not strutting about in fine clothes in the galleries of Versailles. Ladies out of sluttishness received visitors when they were in bed.

Manuals of politeness prescribed careful combing of the head before one dressed for a dinner party, and recommended those who felt their heads itch on no account to scratch them. Pocket handkerchiefs only came in with snuff, and were of colored foulard to hide snuffiness and dispense with frequent washing. At the court of Louis XV the nose was blown with the fingers of the left hand, because the right was used for eating meat with.—London News.

Public Vehicles in Paris.

There are few if any hansoms in Paris, the small open barouche being the favored public conveyance. To see a myriad of these flitting about at night is like looking at a festival of lanterns. In places Paris is brilliantly lighted by masses of lights, always gaslights; but in open places, like parts of the Champs Elysees, where the foliage flings dense shadows, the lamps of the cabs produce a beautiful effect. 'Buses are plenty, but lest the driver should fail to make the necessary amount of noise with his whip and voice he is re-enforced by the use of a horn fixed beneath his foot board and worked by a sort of bellows process. An expert driver is therefore able to make three sorts of noises at once. In Paris the public vehicles are too few and too slow. Paris is as far behind London in means of public conveyance as London is behind New York.—Julian Ralph in Harper's Weekly.

Did He Get One?

Puns are not to be highly commended as specimens of wit, but now and then one has a pecuniary value.

A passenger in a Pullman car was inclined to be friendly with the porter, but hadn't yet shown him the "color of his money."

"Do you enjoy your position?" the passenger inquired.

"Yes," answered the porter, "I likes de quarters heah berry much—when I gets 'em."—Exchange.

Why the Workhouse Is Unpopular.

There is a great element of consolation in the sight of sufferings greater than our own. The salt of life is to have someone to look down upon. If there are many high and mighty ones whom I envy, there are still many who are even more lowly than I. This is the reason of the unpopularity of the workhouse—that the pauper can scarce find anybody over whom he may triumph. Another name for this feeling is "divine discontent."—Murray's Magazine.

Mutual Assistance.

Scene: Medical consulting room. Shabbily dressed visitor enters.

Young Doctor—What is your complaint?

Visitor—Impecuniosity! Do be so kind, doctor, as to give me a shilling, and I'll go around and tell everybody that you've relieved me.—Fliegende Blatter.

AN INVENTIVE GENIUS.

He is Continually Chasing the Phantom of Wealth.

DEVICES THAT FILL A LONG FELT WANT

All he Requires is Capital.—A Boon to Topers.—A Liver Pad.

There was a hesitating nibble at the door knob, then the door was slowly opened and in he came, looking first at one and then the others of us, as if in search of a friendly or encouraging glance.

His clothes were old, but well brushed, and his shoes had seen their best days. He was tall, thin and a hungry looking individual, who would scarcely have cast a shadow when sidewise to the light. He had no doubt seen better days, but now he was of the class of "shabby genteel" who some way or other manage to exist on the barest pittance.

Removing an old slouch hat from his head with a spasmodic jerk, he turned to the man who was nearest the door and asked, "Is this the place where they patent gallusses and braces?"

When informed that it was he seemed pleased to think he had found the right place and asked to see the chief. Hat in hand, he sauntered up to the chief's desk, and after a few remarks about the weather he reached down in his trousers pocket and brought up a contrivance which at first glance looked like an ordinary shoe horn. With a click and a snap, however, he turned up from the small end a corkscrew.

We had all seen him before, and knowing there was fun ahead, by this time there was a general suspension of work and all were intently watching the proceedings. With the fire of genius in his eyes and a tremor in his voice he exclaimed as he held the contrivance up to view: "There's a fortune in that for somebody, but they don't seem to see it. That little thing fills a long felt void. A man always needs a corkscrew in the evening, and after he has drawn the corks and imbibed the contents of several bottles, how would he get his hat on in the morning if it were not for this little hat persuader?

"Both of these little necessaries are here in a neat and compact little device, which, if it were only manufactured and put on the market, would sell like hot cakes."

No one seemed to want to take hold of it, however, and a good thing is going begging from the lack of a few dollars to give it a start. People don't know what they are missing.

"See that?" and he held out a jackknife with a patent needle threading attachment. "Another good thing! Something which bachelors have been wanting for a long time. How many of you can thread a needle?

"You all carry a jackknife; every man does.

"With one provided with this little attachment of mine any man could thread a needle as good as a woman.

"I tried to interest capitalists in this little scheme, but it shared the same fate as the other. One man said he would take hold of it if it had bootjack and mouth organ attachments, but as it was he did not want it. Some people are hard to please, but," drawing a bundle from his coat tail pocket and waving it in the air, "I've got it this time, and no mistake.

"For a long time have I chased the frisky dollar, but it has given me the slip. Thank heaven I have at last found the way to fame and fortune.

"Gentlemen," he said, as he slowly unwrapped the package and held up to our astonished gaze a combination of straps, cords, pulleys, buckles and large red shields, "behold the greatest invention of the age! This is a combined suspender and adjustable liver pad. To show you what it is and how it works I will just slip it on over my coat. There, now, isn't that a grand thing!

"You no doubt perceive the great advantage of having the liver pad connected with your suspenders. The pad is adjustable to fit all livers.

"Any one can wear it, no matter where their liver is or where they think it is. How many people know where their liver is? Not many, I warrant you. How would a man who supposed his liver was up under his right arm manage with the ordinary liver pad? He couldn't manage at all; he would die of liver complaint in a month's time. This being adjustable can be shifted to all parts of the body; thus people can have their liver pad wherever they wish it.

"Gentlemen, think of the people walking around today suffering because they cannot cover the place where they suppose their liver to be with the ordinary liver pad. Why, it is a beautiful thing," and with a Sellerslike air he exclaimed: "There's millions in it! Gentlemen, you all being experts in this line must appreciate its many advantages and possibilities.

"Do any of you want to get rich? To any one who will kindly advance me enough to pay for my patent I will give a half interest in this, the grandest thing of the kind ever dreamed of. It's a chance of a lifetime, and you shouldn't miss it."

No one appeared anxious to invest in liver pads, either through lack of confidence or of sufficient wealth to do so, or both, and sadly taking it off and wrapping it up carefully and stowing it away he shuffled out, muttering in an undertone to himself something about "greatest invention of the age—fortune's last chance."—Washington Star.

The Papyrus of Egypt.

A curiosity in the agricultural department is the papyrus of Asia, which yielded the substance used as paper by the ancient Egyptians. For this purpose the wood of the reed stem was cut in thin slices, which were placed side by side, according to the size of the sheet required. After being wetted and beaten with a wooden instrument until smooth they were pressed and dried in the sun.—Washington Star.

THE SWIMMER OF NEMI.

White through the azure,
The purple blueness
Of Nemi's waters
The swimmer goeth.
Ivory white, or wan white as roses,
Yellowed and tanned by the suns of the Orient,
His strong limbs sever the violet hollows;
A shimmer of white fantastic motions
Wavering deep through the lake as he swimmeth;
Like gorse in the sunlight the gold in his yellow hair.
Yellow with sunlight and bright as with dewdrops,
Spray of the waters flung back as he tosseth
His head in the sunlight in the midst of his laughter;
Red o'er his body, blossom white mid the blueness,
And trailing behind him in glory of scarlet,
A branch of the red berried ash of the mountains.
White as a moonbeam
Drifting athwart
The purple twilight
The swimmer goeth,
Joyously laughing.
With o'er his shoulders,
Agleam in the sunshine,
The trailing branch
With the scarlet berries.
Green are the leaves and scarlet the berries,
White are the limbs of the swimmer beyond them,
Blue the deep heart of the still, brooding lakelet,
Pale blue the hills in the haze of September,
The high Alban hills in their silence and beauty,
Purple the depths of the windless heaven,
Curved like a flower o'er the waters of Nemi.
—William Sharp in Academy.

A Horse's Joke.

A Mansfield (O.) doctor is the owner of a horse which has a fondness for playing practical jokes. Recently the physician drove out into the country to answer a sick call. Arriving at his destination he tied his horse to a post, near which hung a rope attached to a large bell used as a dinner signal for employes on the place, and went inside. Suddenly the bell rang. The doctor and the man of the house both looked out, but could see nothing except the horse. They had hardly turned away, however, before the bell rang again, and again they looked but could see nothing.

This was repeated, and the doctor determined to solve the mystery; so at the third ring, instead of going into the house he stepped out and hid in the yard. He kept his eye on the bell rope, and in about a minute was surprised to see his horse lift up his head, smile slyly, and give the rope a good, hard tug. When the physician sprang out and confronted the horse the animal instantly tried to put on a look of innocence, but was unsuccessful.—Boston Herald.

Jewels Found in New York.

Near Lake George in New York state great quantities of small and very pure rock crystals are gathered, specimens, both natural and cut, being mounted in jewelry and sold to tourists. Many of them are whiter than any diamond and frequently as brilliant and transparent. A specimen with a drop of water inclosed will sometimes sell for as much as $30. Certain mines of them at Little Falls, N. Y., are worked by tapping the rock until a hollow sound is heard, indicating a cavity, and within such cavities the crystals are discovered, sometimes as many as a bushel. In one cavern years ago were found several tons of these quartz crystals, the sides of the cavity, thirty feet long and six feet high, being completely covered with them. The sale of such stones in that region amounts to fully $10,000 per annum.—Washington Star.

An Old Custom Done Away With.

One of the things a good many of us were taught at the nursery table was to use a bit of bread, a "pusher," most children call it, when something on our plate that ought to go on a fork would not. This was almost as sacred a tenet of table manners as that bread should not be bitten from the slice. It is something of a blow to read from presumably good authority that this is a barbarism almost as bad as eating in one's gloves. People who persist in breaking down good established laws should at least offer some good substitute; if the woman who says we must not scurry round after some slippery peas or elusive spinach with a morsel of bread, as a valuable assistant tells us what we must do, all will be forgiven.—Her Point of View in New York Times.

How Two Merchants Chose.

A merchant refused to hire as a clerk a young man whose pantaloons, he noticed, were worn at the knees and seat, because he judged that a good clerk would not thus wear his clothing. In another case a merchant chose from twenty applicants a boy who stopped to wipe his muddy feet before entering his office, and whose finger nails were clean.

"It is attention to little things that makes a good clerk," the merchant said.—Youth's Companion.

An Odd Hair Wreath.

Miss Hattie J. Chipps, who lives near Budd's Lake, N. J., has fashioned portions of hair from the heads of over 2,000 individuals into a large wreath of over 1,000 flowers and leaves. This unique oddity is composed of hair of every shade and color known to the anthropologist. The young artist spent over a year in collecting the locks of hair before commencing work on the wreath.—St. Louis Republic.

The Good Old Times.

Old Man—Talkin 'bout circuses, nuthin can come up to th' ole fashioned one ring circus, with one clown.

Young Man—Only one clown! It must have been so enjoyable.—Good News.

Two Sorts.

Hostess—Please play something classic, professor—play something pretty.

Professor—Vich vill you haf virst, ma'am?—New York Weekly.

RANG OUT LIKE A FIRE BELL.

How Smith's Repeater Made A Sensation.

FUN AT A STEREOPTICON LECTURE.

His Watch Could Strike the Hours and Minutes.

There is a certain young man of this town whose newly wedded wife presented him with a superb gold watch that not only chimed off the time when a spring was pressed but told the day of the month and the phases of the moon. It also kept good time. He was naturally proud of his chronometer, and was always ready to oblige his friends by letting them look into its intricate works, which you must admit showed him to be a young man of marvelous good temper. But this same beautiful watch was the cause of his undoing a few nights ago.

I forgot to mention that the outer case of this timepiece bore the monogram "G. W. S." in brilliants, by which you may infer that his married name was George Washington Smith.

This evening in question he and Mrs. Smith were rejoicing at dinner over the thought that they should soon see her sister, who was coming on from the west to visit them in their new home, and incidentally send on a private daily report to her mother of how George was treating Maude. They were to meet her at the Grand Central station on the arrival of the train due at half past 9 o'clock, and decided to put in the hour and a half they had to spare by looking in at a much advertised stereopticon lecture.

They went and enjoyed themselves so well that they well nigh forgot their engagement, but a picture of the St. Pancras station in London made Maude gasp convulsively: "Oh, George, do look at your watch, dear. I'm so afraid we've overstaid our time!"

George made a strenuous effort to get sight of the dial in the Egyptian darkness of the hall, but could not, and his wife noticing his difficulty said, "Touch the repeater spring, you goose!"

The lecturer had just concluded a very sad anecdote and made an impressive pause, when the hour chime in George's watch began to fairly boom out nine strokes. It had never sounded one tenth so loud before, and a nervous old lady a few seats back began to whimper "Fire!" There was a wild craning of necks in the audience, and Mrs. Smith's cheeks became so red that—as her husband told her afterward—they glowed like live coals.

George wrapped first his handkerchief and then his coat about the watch, but to no effect, for both the hour and the minute bells said all they had to say in tones that vibrated painfully through the deadly stillness of the house.

When they finally ceased the lecturer, with fine sarcasm, said, "Will the little boy please bring his gong up here and ring it in full view of the audience?"

A shout of laughter broke the strain, and under its cover George and Maude staggered up the aisle and out into Broadway. They saw in a jeweler's window that it was twenty-five minutes past 9 o'clock (they had entirely forgotten to count the repeater strokes), and just had time enough to get up to the station in a cab and meet their guest.

Mr. Smith has not worn the watch since then, and Mrs. Smith said to me the other day, "Wasn't George foolish to press that repeater spring?"—New York Herald.

A Bright Young Writer.

Miss Elizabeth Bisland, the little girl who went around the world, has done well. Her articles, beautifully illustrated, have been published right along in The Cosmopolitan Magazine, and they will be issued in book form when completed. Miss Bisland has made a contract with the magazine to go abroad for them and she is now in England, writing an article a month. She made some very valuable friends during her tour, and one of these was a noble lady who has a beautiful country seat not far from London. It is at this lady's house that Miss Bisland is stopping, and she has had, through her, the entree to the best English society. She was present at the Prince of Wales' garden party not long ago, and she is in the very cream of the swim. She is, I judge, not more than 22 years old, is a very pretty girl and is one of the most facile writers of her sex.—Cor. Cincinnati Times-Star.

Forks.

The common table fork was unknown to the ancients, nothing resembling them having as yet been found by the explorers at Pompeii or Herculaneum. According to best authority they were probably first used by the Italians about the end of the Fifteenth or the beginning of the Sixteenth century. Up to the middle of the present century the Chinese, as well as most other nations of the east, were unacquainted with the useful little table implements, the Chinese, the Japanese and the Siamese employing small sticks about the size of lead pencils in the capacity of both forks and spoons.

At first forks had but two prongs or tines, and were always made of iron. At present they may have either two, three, four or even five prongs and are made of silver and gold as well as of iron and steel. The oldest carving fork known, still preserved in the castle Pau, formerly belonged to King Henry IV of France.—St. Louis Republic.

Two beggars, named Jakubowski and Wasilewics, who for years have solicited alms before the doors of the Kief cathedral, have just retired and set up as rentiers. Jakubowski possesses a house worth 20,000 roubles (£2,000) and a sum of 66,000 roubles (£6,600) lodged at the reichsbank. Wasilewics has invested all his earnings in property, and owns two houses of the value of 75,000 roubles (£7,500) each, which he lets.—Cor. New York Post.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

FRIDAY, FEBRUARY 19 1892

The hostily of capitalists to silver is like to defeat their purpose by stopping the production of the white metal. Mills and mines are being closed because they cannot be made to pay at the present price of silver. The Douglas mill at Dayton is one of the last reported closed.

The notorious Sarah Althea Hill—Sharon—Terry is reported to be insane. She had giant passions and a pigmy intellect. Insanity is but the natural result of such utter want of self restraint, indulgence in bad temper and want of right principle as made this woman so well known.

General Alger never was in the race for the Presidency; but if he had been the record dug up by Dana, showing that he had been dishonorably discharged from the army would have sent him to the stable. It would appear that the doughty General shares the opinion of Falstaff, that discretion is the better part of valor.

A bill was recently reported to the House in favor of silver coinage. Within a few days thereafter silver was quoted lower than before. There is not the least doubt that this further decline in the value of silver is due to the intrigues of the gold men. And yet the decline will be used as an argument against the bill. This is as if a highwayman should rob a traveler and then argue that it was right to rob him because he happened to have the money or valuables taken from him.

Suit is begun by the Southern Pacific Railroad Company to drive out quite a number of settlers in Tulare county from their homes. These people have been living on their holdings for years and have expended a great deal of money and labor for improvements. It is tolerably safe to expect that the Company will in the end be declared to be the owners of the property, and the settlers must either get out of the way or pay the Company whatever ransom may be demanded. State Supreme Courts rarely ever fail to confirm whatever interpretation great corportions give of the law.

Of all the comment made about the announcement of Mr. Blaine that he is not a candidate for the nomination for the Presidency, very little of it comes from other than professional politicians. The great bulk of the people know well that it has no appreciable effect upon their welfare who the candidates for President are. The man who occupies that great office at any time has a great many offices to give, and it is the men who are hunting for office that make the great clamor about candidates. Most, if not all, the popularity that Mr. Blaine ever had is due to the fact that he is a shrewd and successful politician. The greatest political scandal ever known in the United States was the "credit mobilier". At the time that grand piece of villainy was exposed, many prominent politicians were discovered to be in it. No one had any doubt that Blaine was as deep in it as Schuyler Colfax or any of the others who were exposed. But Mr. Blaine had so managed that it could not be proven though, like Job, he escaped with the skin of his teeth. From that day till this, though his ability kept him in front as a leader, he has never been fully trusted by the great body of Republicans. But as said in "Peveril of The Peak", "When a man shows himself an able and useful partisan, his party will continue to protect and accredit him in spite of conduct the most contradictory to their own principles. Some facts are, in such cases, denied—some are glossed over—and party zeal is permitted to cover at least as many defects as ever doth charity" Mr. Harrison is regarded in Washington as a cold and unsympathetic man; but that very coldness is a merit in the position he occupies. He is deliberate and cautious in the conduct of public business and does not rashly run into mistakes. These are qualities in a President of far higher value to the country than "magnetism" or "brilliancy." The American people never have, and never will, take kindly to a candidate for the Presidency whose character is smirched. In this they are as sensitive as a young man of fine feeling would be of the character of his bride. Whatever the chance may be of the Republican party for success in the coming election, it is better without Mr. Blaine than with him. Evidently, no man in the country understands that fact better than himself.

JUDGE AND BUNKO MEN.

A NEW YORK CITY JUDICIAL OFFICER'S EXPERIENCE.

Two Smooth Tongued Sharpers Make a Sad Mistake in "Sizing Up" a Man, and One Is Arrested and Sentenced—The "Pal" Meets a Later Fate.

At the Lawyers' club a few nights ago Judge Rufus B. Cowing and Judge Henry A. Gildersleeve were spinning yarns on the queer experiences they have had with the thieving fraternity, when not known. Judges Gildersleeve and Cowing are two jolly and most entertaining companions. They are very popular wherever they go and now and then meet with a sharper who tries to ingratiate himself in their good graces to the extent of as many dollars as they may happen to have in their pockets.

Judge Gildersleeve was telling how he was approached by a bunko man a few years ago at the Pennsylvania railroad depot in Jersey City, and how he crossed the ferry with the "hand shaker," who thought he had made a great capture. Judge Gildersleeve is a famous sportsman and a sharpshooter. He has won many prizes with his rifle at national and international tournaments, and has written a dozen books on rifles, marksmanship and game, big and little. He was returning from a trip to Pennsylvania, where he had had a very pleasurable time shooting with a party of Philadelphia lawyer friends.

He had hardly got off the train at Jersey City when he felt a vigorous slap on the back.

"Why, hello, my dear Mr. Thompson. So glad to see you. Just in from Philadelphia, eh? How are all the folks at home?"

When Judge Gildersleeve got a chance to say a word he replied meekly:

"Yes, just in from Philadelphia. I guess the folks are all well. They were when I left them, anyway."

"Now, I've met you in Philadelphia, I am sure. Don't you remember me?"

THE JUDGE GETS EVEN.

Knowing what sort of a character he had to deal with, Judge Gildersleeve led him on in a modest, innocent way.

"Why, you must be mistaken," said he to the bunko man. "My name is Johnson, Joseph W. Johnson, and I keep a store in Philadelphia."

"Why, I beg a thousand pardons," and the bunko man bowed low and disappeared.

GAVE THE TIP TO HIS "PAL."

Then came the "pal," just as Judge Gildersleeve expected. He was just stepping aboard the Desbrosses Street ferry when he got another slap on the back.

"My dear Mr. Johnson, how are you and what are you doing over here? You don't remember me, but I knew you years ago in Philadelphia," and bunko man No. 2 plied his tongue in the most volable manner, Judge Gildersleeve assenting to everything he said. The bunko man had got Judge Gildersleeve to promise that he would meet him again when he saw he couldn't get him to join him in a quiet game or a liquid smile.

"Now, my dear Mr. Johnson, don't forget to meet me, will you?" said the bunko man as he stepped out of the ferry house on the New York side.

"Officer, arrest this man," said Judge Gildersleeve to a policeman standing by.

"Say, you old jay, what do you mean?" shouted the bunko man, red with anger.

"We will meet again, young man, in a short time, I hope. I will give you my name and place of business—Henry A. Gildersleeve, judge, Part 3, court of general sessions."

"What's the charge, judge?" asked the policeman.

"Suspicious character."

The next day the bunko man was sent to the island for six months by Justice Power, of the Tombs.

THE "PAL" SENTENCED.

Two months later Judge Gildersleeve had the pleasure of meeting the man who was king of the New York "hand shakers," "Kid" Miller. Miller was the man who first addressed the judge in the depot at Jersey City.

"Miller, I've met you before," said Judge Gildersleeve.

"Not guilty," replied Miller.

"Well, I got off a Pennsylvania train in Jersey City one day two months ago, with a gun and a basket and dressed in my hunting clothes. I had been on a little pleasure expedition, and you saw fit to interfere in the business of a peaceable, law abiding citizen. Your companion is now serving a term on the island, and the strangers who come to town will be better off if you follow suit. One year in the penitentiary," and the bunko king was led away, and if ever a face looked queer it was that dazed bunko man's.

The two bunko men who tried to capture Judge Gildersleeve's shekels had worked New York and vicinity for a long time, yet did not know the face of the criminal court judge. In the case of Recorder Smyth the "hand shaker" was fresh in from the Windy City, and hadn't looked the city officers over so closely as his calling would seem to warrant.

Judge Gildersleeve told me that so far as he knew he and Recorder Smyth were the only criminal judges that had ever been approached by the New York bunko men.

The only other experience Judge Gildersleeve ever had with the crooks outside his courtroom was during the Centennial in Philadelphia. He had his pockets picked while going over the exhibition grounds. He had just been made a judge of the criminal court in this city, and some of his friends, who remember how Judge Gildersleeve felt over the theft, do say that for a long time pickpockets received very little merciful consideration when they were sentenced according to the jury verdicts.—New York Herald.

A Woman's Age, Again.

Queriens—Does Miss Prym believe everything in her Bible?

Cynicus—Yes, except the entry of her birth.—New York Epoch.

What the Truffle Is.

The ancient Romans, at whose sumptuous banquets truffles played an important role, supposed that their existence was one of the material results of thunder. More modern botanists have classed it as a species of mushroom, but it can scarcely be termed such. To be exact, the truffle is a tuberculous fungus, a sort of morbid extravasation of vegetable sugars analogous to oak balls or nut galls, and doubtless originating, as these latter, by the sting of an insect.—Washington Letter.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892 and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in township No. 14 South, Range No. 34 East, M. D. M., containing 320 acres.

A undivided one-half interest of in and to that certain lode, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West seven chains and 18 10-1[illegible]; thence North-east to joining the meanderings of the bed of Bishop Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 50-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all consisting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo as the same appears by the official plat of the said town of Independence, now on file in the office of the county Recorder of said Inyo county, having been the residence of said John A. Hannah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispedada."

The certain lot, piece or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieths (12 9-20) rods south of the general corner of the North west quarter and the North east quarter of Section No twelve (12) and the South west quarter and the South east quarter of Section No. one (1) in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South six-eighty and eleven-twentieths (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South east quarter, and the North west quarter and the North east quarter of the North west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven-twentieth (44 11-20) rods; thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER,
Executor of the Last Will and Testament of John Allen Hannah, deceased.

Dated, Independence, Cal., February 11th, 1892.

ASSESSMENT NOTICE.

INYO MARBLE COMPANY.

Location of principal place of business, San Francisco, California. Location of works, Inyo, Inyo county, Cal.

Notice is hereby given that at a meeting of the Board of Directors, held on the 26th day of Jan., 1892, an assessment (No. 16) of Five (5) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary at No. 137 Montgomery St., San Francisco, Cal. Fifth.

Any stock upon which this assessment shall remain unpaid on the 4th day of March, 1892, will be delinquent, and advertised for sale at public auction; and unless payment is made before will be sold on Wednesday, the 30th day of January, 1892 to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.
G. W. LUCE, Secretary.
Office, No. 137 Montgomery street, San Francisco, California.

DESERT LAND FINAL PROOF
D. E. No. 624.
LAND OFFICE AT INDEPENDENCE, CAL., January 11, 1892.

Notice is hereby given that Noah H. Gray of Independence, Inyo Co., Cal for me, has filed notice of intention to make proof on his desert land claim No. 624, for the S W ¼ of S E ¼ Sec. 13, Tp. 11 S., R. 34 E., M. D. M., before the Register and Receiver at Independence, Cal., on Saturday, the 20th day of February, 1892.

He names the following witnesses to prove the complete irrigation and reclamation of said land: Farley McIver, Frank Lawrence and John Willert, all of Citrus and John McSweeney of Independence, Inyo County, Cal.

C. W. CRAIG, Register.

For Sale!

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,
C. MULHOLLAND,
Independence.

MONEY Beginners earn from $75 to $150 per week, and more after a little experience. We can furnish you employment, and will teach you free. You work in your own locality, wherever you live. Both sexes, all ages. We start you. No risk. Can work in spare time, or all the time. Full information FREE. TRUE & CO., AUGUSTA, MAINE.

OFFICIAL.

Notice of Forfeiture.

To Robert Lockett, or his heirs, executors administrators and assigns: You, and each of you, are hereby notified that I have expended Two hundred [$200] Dollars in labor and improvements upon the certain mines situate in the Cerro Gordo Mining District, Inyo county California, commonly known and designated as the Protection and Union Jack Mine in order to hold said mines as follows, to wit: One hundred dollars on each for the year 1891, as appears by certificate on file in the office of the County Recorder.

If within 90 days from the date of this publication you fail or refuse to contribute your proportion of said expenditures, together with the cost of publication, as co-owners, your interests in said Protection and Union Jack Mines will become the property of the undersigned under the provisions of Section 2324, Revised Statutes of the United States.

A. L. POLAND.

Dated February 16, 1892.

ASSESSMENT NOTICE

Manuelia Diez vs. A. Diez et als.—Filed interlocutory judgment.

BORN.

GILL—Near Independence, Feb. 15th, 1892, to Mr. and Mrs. H. D. Gill, a DAUGHTER.

Don't forget the dance March 5th.

W. F. Matlack visited Laws during the week.

The funniest yet—N. S. G. W. entertainment.

Crittenden Robinson of San Francisco is in town.

Dr. S. A. Chapman is at Lone Pine with a dental outfit.

P. H. Mack Esq. went to Bishop on yesterdays train.

Jos. Seeley came up from Lone Pine yesterday morning.

Hon. P. Reddy went north on yesterday's train on his way to Bishop.

Miss Lottie Armstrong of Reno has been visiting in town during the week.

S. G. Sneden Esq. has been down from Bishop all the week on business with the Superior Court.

Curtain will rise at 8 sharp. Seats are going rapidly for the N. S. G. W. funniest show on earth.

Horace Bedows of Olancha accompanied by his niece, Miss Bertha Mann, are visiting at Independence.

Mr. and Mrs. J. E. Dunlap came down from Bishop last Monday and are visiting with the family of Judge Gill.

Marshal Naylor, Perry McMurry, Henry McMurry and Mr. and Mrs. G. Rinehart, all of Big Pine, were in town early in the week.

Mrs. A. W. Ebbeshutz, accompanied by her little son, Eddie, started for San Francisco on Tuesday morning, where they will visit for a few weeks.

Mrs. A. Spencer and her nephew, Harry Preston, of West Bishop were in town today on probate business connected with the estate of A. Spencer, deceased.

John Fichman and B. F. Gray came up from Keeler on Tuesday returning next day. Mr. Gray has but lately returned from a trip to Los Angeles.

The Board of education has been in session all the week. Miss Nellie Reynolds is being examined for a primary grade certificate and Misses June Skinner and Eva McGee for graduating diplomas.

Five blocks of beautiful marble went north yesterday consigned to Marmol. They were pure white and nearly square, the largest being about six feet long by four wide and three feet thick.

The N. S. G. W. will give a social dance on the 22nd at Mairs' Hall. It was proposed to give an entertainment on that evening, but unavoidable circumstances compelled the postponement until March 5th. Don't fail to attend the dance next Monday night, however, and you will have a good time.

A large quantity of Inyo marble will be put into the building formerly occupied by the Mercantile Library, on Bush street, San Francisco. The building was bought some time ago by the telephone Company and will be remodeled within from bottom to top. The yellow and variegated marbles from Inyo make beautiful wainscoting, and the rooms in the building will be furnished with this kind. The whole amount of marble in the new Mills building on Montgomery street will cost two hundred thousand dollars. All of this is not from Inyo, however.

Messrs. Brooks and Austin arrived at Independence from San Francisco on Wednesday: The gentlemen come here for the purpose of investigating the feasibility of extending a canal to Salt Wells Valley. Mr. Brooks has made all the necessary surveys and is thoroughly familiar with the country. Mr. Austin represents capital that, if everything is satisfactory, will be employed to do the work. Of course, nothing is yet determined upon, but we hope and believe that the work will be accomplished. Lone Pine has more to gain than any other town in the Valley, and the citizens of that place should lend every encouragement to the enterprise. A definite conclusion will undoubtedly be arrived at in a few days.

No healthy person need fear any dangerous consequences from an attack of la grippe if properly treated. It is much the same as a severe cold and requires exactly the same treatment. Remain quietly at home and take Chamberlain's Cough Remedy as directed for a severe cold and a prompt and complete recovery is sure to follow. This remedy also counteracts any tendency of la grippe to result in pneumonia. Among the many thousands who have used it during the epidemics of the past two years we have yet to learn of a single case that has not recovered or that has resulted in pneumonia. 50 cent bottles for sale by

A. K. EUGLEY
Big Pine.

Brave Girls.

Fire broke out in the residence of Mr. E. J. Reynolds of Georges Creek last Thursday night. Mr. Reynolds was absent from home, and the only occupants of the dwelling were Mrs. Reynolds and her three daughters, one of them a child of ten years, the other two being older. When the fire was discovered Mrs. Reynolds was quite unnerved by fright, but the two older girls went bravely to work to save their home. Flames were bursting from the roof when the fire was first discovered. The two girls ran for a ladder that was one hundred and thirty yards distant from the building, got it in place, and managed to raise it so that the top reached the roof. Clara, aged seventeen, ran up the ladder taking an ax with her with which she cut a hole in the roof so that the source of the fire could be reached. In the mean time Nellie, her older sister, had got a bucket and was climbing the ladder with water. The brave girls managed to put out the fire and save the building. The roof was considerably injured. Mr. A. C. Stevens was at the residence of Mr. J. V. Skinner, about half a mile from the Reynolds place. He saw the flames and started to give what help he could, firmly believing that nothing could save the house. He ran as fast as he could, but the girls had put out the fire before he reached the house.

A Dose of Calomel Needed

Our local critic has resurrected his growl about the people of Inyo county. There is a little variety, however, as formerly they were accused of laziness, and now the statement is made, "That we have not prospered more in the past is largely due to the discontented and pessimistic views of our own people, who, as a rule have lost no opportunity of decrying the merits of their own home." We have lived here a few years longer than the *Index* man, and we have never yet heard a citizen say that the natural conditions of Owens Valley were not as good as any in the world. There are certain artificial evils which the people smart under and earnestly hope will be alleviated. But there is no reason why a people should be abused for wanting to better their condition. Are you bilious neighbor, that you have not one good word for the people of Inyo? Or does it exhaust all your store of "taffy" to eulogize the men who passed you in your official position, and whom you hope will maintain you there?

The Prospects.

It is now an assured fact that the ore output from Darwin will be greater this year than at any time since the flush days. The dead work in the Independence mine is now completed, and ore is now being taken out, as is also the case in the Defiance. By means of the improvements recently effected in the former mine, men can now work with no danger to their health. The water supply is sufficient for every requirment. The Promontory mine is looking very well. George Lewis has out about eight tons of ore from the Custer mine with plenty more in sight. The Pedregrinny mine is a fine paying property. Frank Fitzgerald is having a large quantity of wood hauled for operations at Modock. The Wild Rose will develop into a good property. Jack Garnets also doing well in the Monolith. Altogether, the outlook is exceptionally bright.

Profitable Cows.

In 1862 John Broder brought home from Visalia to Owens Valley a lot of cows. The animals have been kept in the neighborhood of Independence from that time until the present. About six years ago Mr. T. Webb of Independence bought the cows and owns them now. He says that since they came into his possession each one of them has not failed to produce a calf every spring, and they are all looking well now and give promise of making the usual addition to his herd a few weeks hence. Such a record could be made only where there is rich pasture and a mild climate. The cows have never been housed, and all their feed has been got on the range.

Suicide.

Last Friday Charles E. Donahue killed himself with a pistol at Los Angeles. Deceased was well known in Virginia City, having been in business there for several years; he went to Los Angeles about ten years ago, engaged in the grocery trade and built up a fine business. He was induced to enter a wholesale and retail business in the same line about a year ago, and put in all he had. The firm had reverses, and Donohue lost every dollar. Despondency led him to end his life. He had been married only about a year and left a wife with a child born January 1st.

Many persons who have recovered from la grippe are now troubled with a persistent cough. Chamberlain's Cough remedy will promptly loosen this cough and relieve the lungs, effecting a permanent cure in a short time. 50cent bottles for sale by

Did I Dream It?

LONE PINE CORRESPONDENCE.

A Lady's Opinion on the Matter of Equality.

Yesterday the same lady of last week complied with her promise and returned the bottle of alcohol she had of me. She said:

"One of my friends, a regular reader of the INDEPENDENT, after reading the last issue, said that his neighbor had some alcohol for sale; that said neighbor had a big kettle of a curious shape in which there is something like a coiled rattlesnake from the mouth of which alcohol was dropping and he being the proprietor of the same in the composition of which a large percentage of natural tobacco is used—he has a license to sell, being exempted by section 3 and 1 of Ordinance No. 43."

Oh! I see the point, madam. The law makers require no license from the producer to sell the poison which drops from the rattlesnake.

"Well, sir, I consider this another of the evils of the age. In this case our legislators fix their attention upon and admire only one side of the question; that of protection to the producer, and entirely neglecting to look on the other side and investigate the causes which bring about the destruction of many citizens with no revenue to the government. In my humble admonition could do the least good to the people I would say to the members of the Legislature, 'Be consistent, gentlemen.' Men confer upon themselves the title of the stronger half of humanity, and in that wrong spirit of arrogance the stronger half has, by tyrannical and despotic power, deprived the weaker half—or women—kind of their natural rights, privileges and immunities, which they themselves proclaim to be equally conferred upon both the weaker and stronger halves by Section 21, Article 1, of the State Constitution, which reads as follows: 'Nor shall any citizen, or class of citizens, be granted privileges or immunities which, upon the same terms, shall not be granted to all citizens.' Prepare yourselves previous to the session and have your bills ready for each necessary reform; treat directly and clearly each matter under consideration and do not, as heretofore, insert in your Acts so many equivocal points; so many sections conflicting, one with another, that there must be something besides ignorance in such legislation. Here, sir, is a specimen of it: The board of Trustees of Lone Pine School District ordered an election to be held for the purpose of voting upon the subject of issuing bonds to the amount of $7,000. Said Board did earnestly order the election believing its provisions to be in accordance with the requirements of law. I claim, sir, that the Trustees are not well posted on the school law, as said law provides as follows: Political Code, Sec. 1883. 'Such election must be held, except as otherwise provided in this Act, in conformity with Sections 1833 (et seq.) of the Political Code.' Sec. 1833. The Trustees must appoint three judges to conduct the election and it must be held, in all respects, as nearly as practicable, in conformity with the general election law, provided that no particular form of ballot shall be required,' etc. Have the Trustees complied with the above mentioned Section? I say, no; the State law has ordered the creation of necessary election precincts for the general election to give opportunity to each, and aid to maintain the right of each elector to vote; and the aforesaid Trustees have entirely denied those rights because the electors of the following precincts would have had to travel to vote at Lone Pine precinct as follows: Keeler precinct, 16 miles; Cerro Gordo, 22 miles; Olancha, 23 miles; Darwin, 40 miles; Modock, 55 miles and Panamint, 90 miles. The Board of Trustees may say that the law gives them authority to call an election and submit the question of issuing bonds, and that the law does not say anything about holding polls in each precinct in the District. Section 17 of the preliminary provisions of the Political Code states that words used in the singular number include the plural, and the plural include the singular. It should be observed that the Governor's Election Proclamation only mentions the counties and it becomes the duty of the Board of Supervisors of each county to order an election in each precinct contained therein. Under the same election law it is the duty of the Trustees of Lone Pine School District, when they decide to create expenses which shall equally upon the entire district, to order an election held in each of the six precincts contained therein; and as they failed to do so, and only ordered polls opened in Lone Pine Precinct, the election becomes null and void.

"The next question at issue is, will the Board of Supervisors ignore the fact that the amount of taxable property in Lone Pine School District, at 5 per cent., will produce less than $7,000? I hope not; but in case they do somebody will call their attention to it."

Well, madam, you should be a candidate for school trustee at our next election.

"You do not wish to insult me, sir?

No, madam; I speak earnestly. Women are eligible to all educational offices in this State.

"I believe in your sincerity; but I will never accept an office as a beggar. I am a citizen of the United States, and by natural rights women as well as men were born free. And after women have done their best, employed all their talents and energy to raise their children, with a tenderness that can be found nowhere else but in a mother's arms, after devoting their lives to the maintenance and instruction of their offspring, giving to both male and female the same kindness, and inculcating the same principles of humanity, honesty, integrity, respect and equality as brothers and sisters, the first act of those same children was to make laws under the false pretense of liberty and equality. The Constitution of the State of California, Article 1, Section 2, says that all political power is inherent in the people and by Section 21 they violate this section by denying the right of suffrage to women; but, as though ashamed of their action, the State Legislature by an Act approved on March 12, 1874, made women eligible to all educational offices. With a decisive inconsistency they enacted Section 53, as follows: Every elector is eligible to the office for which he is an elector; and no person is eligible who is not such an elector. And now, sir, when the majority of the Legislature shall have the good sense to give to women the benefit of the last Section I will accept an office and, according to the laws of equality, will help them repair the wrongs inflicted upon their mothers and sisters."

So saying, she departed.

C. MEYSAN.

Mr. C. W. Reed, proprietor of the Hotel Dellone, Omaha, one of the finest new and modern hotels in the west, says of Chamberlain's Cough Remedy: "We have used it in our family for years with the most satisfactory result especially for our children, for colds and croup. It can be depended upon; besides it is pleasant to take and seems to be free from chloroform and the oily substances put into many cough mixtures. 50 cent and $1 bottle for sale by

Misnaming Things.

The experienced huntsman in the woods never wastes time looking for bear in Bear Hollow, nor deer along Deer Creek, nor would he hope to shoot any great number of ducks on Duck Lake, for his experience has taught him that such points are always misnamed, and this lesson holds good with almost everything in life. For instance, in the case of the brands on articles of food, spices and other ground food products, the things branded or labeled "pure", "strictly pure" or "absolutely pure," are without exception the most villainously adulterated. 'Tis the wolf in sheep's clothing always.

The most brazen case is that of the Royal Baking Powder. This article is branded and paraded before the people as "absolutely pure" when it contains ammonia. You can smell it in the can and often in the biscuit while hot.

What woman would use an ammonia or alum baking powder if she knew it? They not only destroy the stomach, but ammonia will destroy the complexion.

Not so with Dr. Price's Cream Baking Powder, the only pure cream tartar powder to be obtained, and the only baking powder made by a physician. Dr. Price has devoted a life-time to perfecting this old-fashioned, indispensable article of the culinary art that has stood all the tests and remained the standard for forty years.

Whenever you read of an upward movement in stocks you may expect to hear of one or more brokers going up immediately after.

"Brown's Bronchial Troches" will relieve Bronchitis, Asthma, and Throat Diseases.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted. .....

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Use Enameline Stove Polish: no dust, no smell.

"German Syrup"

Martinsville, N.J., Methodist Parsonage. "My acquaintance with your remedy, Boschee's German Syrup, was made about fourteen years ago, when I contracted a Cold which resulted in a Hoarseness and a Cough which disabled me from filling my pulpit for a number of Sabbaths. After trying a Physician, without obtaining relief—I cannot say now what remedy he prescribed—I saw the advertisement of your remedy and obtained a bottle. I received such quick and permanent help from it that whenever we have had Throat or Bronchial troubles since in our family, Boschee's German Syrup has been our favorite remedy and always with favorable results. I have never hesitated to report my experience of its use to others when I have found them troubled in like manner." REV. W. H. HAGGARTY, of the Newark, New Jersey, M.E. Conference, April 25, '90.

A Safe Remedy.

THE OPEN DOOR.

Beating his breast on the cold window pane,
Poor little bird,
Striving the free, blessed air to regain,
Yet ever deterred;
Something invisible, pitiless, bright,
Walling him in,
Beyond it lies liberty, sunshine, light,
This in between.

Tiny, passionate, terrified thing,
Struggling in vain,
Pulsating heart and quivering wing,
Throbbing with pain;
Far too bewildered to notice the door
Spread open wide,
Only to turn, and gain freedom once more,
Naught to divide.

So we beat ever 'gainst destiny's pane,
Fear stricken bird,
Yearning for happiness, striving in vain,
Hope e'er deferred.
Doorways to peacefulness, liberty, life,
Woo our advance.
When in the midst of our toiling and strife,
God has a chance.

—M. G. McClelland in Belford's Magazine.

A TERRIBLE RIDE.

I began life on one of the big railways of the States as a "cleaner" in an engine shed.

I had been employed in the shed at Louisville for about fifteen or sixteen months when I went on my first trip as a fireman.

It was very near being my last.

I firmly believe all the years of flying about in an express since I was made an engineer have not taken as much out of me as that single turn of an hour and a half. It occurred in this way:

One evening the superintendent at Louisville received a wire from Weston, a station about seventy miles down the line, to send an engine to replace one which had broken down. He came to the shed and selected the Gen. Grant, one of the finest locomotives on the road. Then he sent word to the engineer and fireman to come on duty and start on their journey at 7 o'clock.

The driver, Ben Norris, was there in good time, and busied himself with his oil can. But Jim West, the fireman, did not turn up punctually.

At last, when it was near the hour for starting, he came in the shed.

One glance at his bloodshot eyes and unsteady walk showed me he was the worse for drink. Poor fellow! I knew the cause of this, and from the bottom of my heart I pitied him. The week before he had lost his little daughter Kate, and to drown his grief he had taken to liquor.

I knew he was perfectly incapable of going on duty, and I also knew that if he was discovered in this state it would mean instant dismissal.

There was only one thing for it—another fireman must be found immediately. If the matter was referred to the superintendent it would be all up with my friend Jim. From that moment I made up my mind to take his place myself.

I gave him in charge of one of my mates, who promised to take him home quietly. I thought that in a few hours he would have slept off the effects of the liquor, and I left word to have him come on by the night train to Weston. I had to explain matters to the engineer, but he made no objections to my plan. It struck me at the time that he took the matter very coolly; in fact, he seemed perfectly indifferent as to who went with him.

Time was up. I took my place in the cab. Norris set to work at once and we moved slowly out of the shed. We were off!

While in the station I took care to keep bending down, as if examining the fire, so that I should not be recognized. But once clear of the town I stood upright and looked around.

It was a glorious summer evening. We skimmed rapidly past meadows and corn fields, and then dashed along the bridge over the river. I began to think I would enjoy the run immensely.

I next turned my attention to the engine. As I ran my eye over the shining machinery I felt gratified to think that its neat order was chiefly owing to my care. I was proud of the Grant, and wondered if the time would ever come when I should have charge of it myself.

I was so elated that I thought my companion ought to be more lively. Ben seemed to think of nothing but his work. He stood with his hands on the throttle, and his eyes steadily fixed on the track ahead. I made one or two remarks, but he scarcely answered me. While I was wondering at his silence he suddenly appeared to rouse himself. He glanced at the steam gauge, muttered something which I did not understand, then bent down and examined the firebox.

"More coal!" he cried in a voice which almost startled me.

I complied without a word. Instead of throwing in the coal recklessly, which I knew would only deaden the fire, I piled it up carefully around the sides. Very soon the speed of the engine increased. We were rattling along at a grand rate. I examined the gauge and saw that the hand pointed to 195. I could not see the necessity for this rapid traveling.

My companion's attention was again fixed upon the road before him. Presently he turned toward me and exclaimed:

"Who says that the Grant is not the fastest engine on the road!"

"Moxley declared that the President was faster," I replied.

"Then he lied!" cried Norris. "The President faster—we shall see, we shall see!"

I thought his manner very strange, to say the least of it. But I knew his ways and said nothing. He was always considered rather eccentric. Besides, he was easily excited and could not bear to be contradicted. Still there was not a driver on the line better acquainted with his business.

And, by the way, I have forgotten to say a word as to his appearance. Well, then, he was a big, powerful fellow, with a broad, red face, with a bushy beard. It was hard to deal with such a man. If he once put his foot down there was no getting him to budge until his humor changed.

We were now coming close upon Waterford station, and had already done about five and twenty miles of the journey. Ben's eyes were still upon the track. It was all clear ahead, yet I expected to see him close the throttle and slow down while passing through the station.

But I was mistaken. With a roar and a rush we slashed right through, and the next minute we were tearing along a level stretch on the other side.

"More coal!" Not only the words themselves, but the manner in which they were uttered caused me serious alarm. I began to suspect that something was wrong. Still, if I hesitated it might only aggravate him, so I flung in a small quantity.

"Go on—go on!"

What was I to do? I didn't dare to refuse. The wild look in Norris' eyes frightened me, and I went on shoveling in the fuel. I glanced at the gauge. Great heavens! it marked 230! This pressure of steam, where no cars were attached to the engine, meant a fearful rate of speed.

The engineer's manner was strangely altered. Instead of being silent and morose, he was now excited and talkative.

"That's it!" he cried, and I could barely catch the words above the roaring of the engine. "Now we are traveling! Ha! ha! The President faster than the Grant? Not likely! I'll catch up to her yet, see if I don't!"

Shall I ever forget these terrible words! They actually seemed to paralyze me. As I stood there, clinging for support to the side of the cab, the awful truth flashed through my mind. The engineer was mad! And, worse still, he was under the delusion that the President was on in front. With this insane idea in his head he determined to try the speed of the two engines.

My first impulse when I had partly recovered from the shock was to spring forward and grasp the reversing rod. But a moment's reflection showed me that this might instantly seal my doom. Norris would have grappled with me, and if it came to a struggle I was lost. He would fling me headlong from the engine.

Then another thought occurred to me. Heaven forgive me—but I must strike him from behind in order to save my life. I looked around for a weapon. As I did so he seemed to guess what I was at, and turning round thrust his hand into his breast. The next moment he held a revolver toward me, while his blazing eyes threatened instant death if I did not desist.

After that I gave myself up for lost. Unless Providence interposed on my behalf a horrible end awaited me. Up to this I had felt the heat oppressive, but now I shivered. My hands were cold and clammy. A band of iron seemed to encircle my head.

On we tore, the engine swaying fearfully. Every moment I expected to be blown to atoms by the bursting of the boiler. Norris never ceased to rave about the race with the President. And yet, though he was so absorbed in his work, he kept his eye on me the whole time.

Then it was that an idea flashed across me. A faint hope sprang up in my mind. I must overcome him by cunning; it was the only chance.

I advanced to examine the indicator, and, though my heart sank when I saw the hand quivering at 250, I made it appear as if I were delighted.

"Good," I cried, "we'll beat her yet! But we want more coal."

I made toward the tender, placed my left hand upon a lump of coal and struck it across the back with the sharp edge of the shovel. The blow left a gash from which the blood flowed freely. I gave a cry and Norris instantly turned round.

I held up my right hand that he might see the blood dripping from it. Then I stood with my back toward him and pretended to bind up the wound. But I only wrapped a handkerchief round it, and quick as lightning drew out my pocketbook. I tore away the leaves which were written on, and placing the book upon my knee scrawled these words across the first page:

Driver mad, wire, grease rails.

Then, holding it in my injured hand, I thrust it under my jacket and returned to the engineer's side.

We were now rapidly approaching Weston, but I knew that Norris did not intend to stop. And I was right. He blew a long whistle, as if to startle the officials, and the engine shot through the station like a rocket.

But I had managed to drop my pocketbook at the side of the track.

I did not dare to look back or make the slightest sign to the Weston officials. If I had done so I certainly would have got a bullet through me. Still I fancied I had caught a glimpse of a man hurrying forward to where the book had fallen.

The suspense was terrible. Even if they noticed the pocketbook they might not be able to understand what was written inside; for it may be imagined that under the circumstances the scrawl was barely legible.

I had made up my mind what to expect. The next station was Red Fork, but fifteen miles further on. I was sure the track would be clear as far as this place, but once past it we might encounter an up train at any moment.

If the Weston people discovered my message they would wire at once to Red Fork, and there would be time enough for the officials at that station to grease a portion of the rails before we came on the scene. Should this be done on any sort of an incline the wheels would slip on the track and the engine would soon come to a standstill. It was with a thrill of joy that I remembered that there was such a piece of road just outside Red Fork station.

But if it turned out otherwise, and we passed the place without being stopped, I resolved to lose no time in grappling with the engineer. Come what might, I would spring upon him and try to wrench the revolver from his hand. The case would then be desperate; and it was as well to die in a fight for life as to wait patiently and be mangled in a collision.

When I arranged all this in my mind I endeavored to resign myself to fate. I could do no more at present. But the agonies I suffered during that short run from Weston to Red Fork I can never describe. The terrible strain of suspense, the wild rush, the swaying from side to side made me feel sick and faint. I clung on without daring to look on either hand; if I had done so I think I could not have withstood the temptation to fling myself from the engine.

It was getting dusk. I was only conscious of hedges, telegraph poles and bridges skimming past me like so many flashes. The hoarse shouts of the madman made my blood run cold. He seemed to be working himself into a regular frenzy.

Red Fork one mile ahead!

One minute more would decide the question of life or death.

I drew my breath hard; I trembled like a child. We had reached the incline. The engine went at it with a dash. I glanced out to see if any friendly figures were on the track.

Not a soul was in sight. I groaned and almost fell on the floor of the cab. The surrounding objects seemed to fade from my view, and in their place rose up a picture of the old home away in England. I saw the little cottage; I looked into my mother's face——

"Oh, thank God!"

Never before nor since did such a cry of joy escape me, for at that moment I felt the wheels of the engine slip.

Gradually the furious speed declined. Norris dashed about the cab, storming and swearing. Very soon we were almost at a standstill. The next second I had jumped to the ground.

Only just in time. The madman had turned savagely upon me, I suppose suspecting that I had something to do with the stoppage. I saw his purpose and ducked my head as a bullet from his revolver whizzed over it. Then I ran for dear life down the track.

When I was out of range I sat upon the bank, completely overcome. The reaction was too much for me, and I believe for a minute or two I was quite unconscious. But before I became insensible I heard another report from the pistol. I knew what had happened.

I was aroused by a confused hum of voices. Upon opening my eyes I saw four men standing around me. I got up at once and we hurried back to the engine.

There stood the Grant upon the track with full speed up, the wheels revolving with frightful rapidity, but without making the least headway.

One of my companions sprang on board and shut off steam. Then he came to the side, looked down, and exclaimed:

"I say, boys, Norris has put a bullet through his brain!"

I knew it.—Chatter.

AMMONIA OR ALUM

Baking Powders.

HOW TO DETECT THEM.

Ammonia and alum are the most common adulterants used in the manufacture of baking powders. The Government report shows that a large percentage of the baking powders on the market contain either one or the other or both these pernicious drugs. Ammonia particularly is in very general use.

This wholesale use in an article of daily food, of one of the most injurious poisons is simply criminal. Slow ammonia poisoning produces diseases of the stomach and is particularly injurious to the complexion. The presence of ammonia in a baking powder, however can easily be detected.

TO DETECT AMMONIA.

Mix one heaping teaspoonful of baking powder with one teaspoonful of water in a tin cup; boil thoroughly for a few moments stir to prevent burning, and if ammonia is present you can smell it in the rising steam, or place a can of the suspected powder top down on a hot stove for a minute or two, then take off the cover and smell.

TO DETECT ALUM.

Alum powder can be tested by putting a couple of teaspoonfuls of the powder in a glass of cold water. If no effervescence that is bubbling or simmering, takes place, condemn the goods and return them at once.

Dr. Price's Cream Baking Powder is reported by all authorities as free from alum, ammonia, or any other adulterant.

A Roman Method of Securing Power.

Prior to the introduction of water power mills the public mills in Rome were operated chiefly by slaves. These establishments were located in the vaults of an immense building, known as the Pistrinum, devoted exclusively to the uses of the bakers of that city. Often it happened that this slave labor was very difficult to obtain, and to supply the want the mill proprietors resorted to violent measures. They enticed strangers and ignorant persons into the building on the plea of inspecting it.

In some of the rooms ingeniously constructed trapdoors were placed in the floors. As soon as an unsuspecting victim stepped upon the trap he was precipitated to the vaults below and there imprisoned and condemned to perpetual labor. No chance of communicating with his friends was afforded the prisoner, and thus he was compelled to drudge until released by death.

This horrible state of affairs continued for many years, until it was finally unmasked by the merest accident. A lusty soldier of the guard was enticed into the Pistrinum and treated in the usual manner, but not being rendered unconscious by the fall through the trap, he drew his sword, and after killing two of his would be enslavers forced his way out of the vault. He soon laid bare the entire scheme, the emperor immediately ordered the building to be razed to the ground, and all who were proven to have been actively engaged in this murderous method of obtaining workmen were quickly executed.—Detroit Free Press.

How "Ouida" Dresses Her Heroines.

An author who fairly riots in clothes and attires her heroines in genuine "Arabian Nights" magnificence, is Ouida. Her brides travel in cream velvet and sables, and her great ladies are always drawing over white marble terraces "skirts of India muslin, Flemish lace and primrose satin." As their husbands usually own gold mines, if not principalities, it is quite unnecessary for them to hold up their frocks, and simple morning dresses of this description, or "trailing rose colored ones," with "rose colored pearl sewn slippers," are merely ordinary incidents.

One of these sumptuous ladies "seemed on fire with the superb rubies that glittered all over her, and shone like sparks of flame upon the exquisite whiteness of her skin and upon the flame colored robes that gleamed under the black shower of her laces," while on another occasion "golden tissues floated about her like sunlit air, and a girdle of sapphires flashed beneath her breast." "Sunlit air" is not bad as a toilet, especially in July and August, but when one comes to look for such a material in the dry goods shops it is surprising how difficult it is to find.—Harper's Bazar.

Plants and Animals.

Professor Stewart, F. R. S., president of the Linnean society, in a lecture, delivered in the gardens of the Royal Botanic society, London, drew attention to the curious and intimate relationship existing between some animals and plants, especially in tropical countries, where the struggle for existence is so fierce. One plant, known as the bull's horn acacia, of Central America, provides a species of ant not only with food and drink, in the shape of tiny egg like bodies upon its leaves, and a sweet liquid contained in special wells on the stalk, but, in addition, it furnishes a tenement for the ant in the hollow spines with which it is armed. In return for these favors, the ant protects the acacia from its enemies.—Philadelphia Ledger.

Why He Wanted Front Row Seats.

Manager Aronson, of the Casino, feels sure that he has at last struck the queerest reason ever yet given for a demand for front seats at a theater. "My seats must be in the front row or nowhere," wrote the applicant. "I want to study the front teeth of the actresses." The demand came from a dental surgeon, and he got them. He had, however, taken the essential precaution of sending the money for them with the bearer of the queer message.—New York Sun.

Starvation at Donner Lake.

On his arrival at Sutter's fort, my father made known the situation of the emigrants, and Captain Sutter offered at once to do everything possible for their relief. He furnished horses and provisions and my father and Mr. McClutchen started for the mountains, coming as far as possible with horses and then with packs on their backs proceeding on foot; but they were finally compelled to return. Captain Sutter was not surprised at their defeat. He stated that there were no ablebodied men in that vicinity, all having gone down the country with Fremont to fight the Mexicans. He advised my father to go to Yerba Buena, now San Francisco, and make his case known to the naval officer in command My father was, in fact, conducting parties there, when the seven members of the forlorn hope arrived from across the mountains. Their famished faces told the story.

Cattle were killed and men were up all night drying beef and making flour by hand mills, nearly 200 pounds being made in one night, and a party of seven, commanded by Captain Reasen P. Tucker, were sent to our relief by Captain Sutter and the alcalde, Mr. Sinclair. On the evening of Feb. 19, 1847, they reached our cabins, where all were were starving. They shouted to attract attention. Mr. Breen clambered up the icy steps from our cabin, and soon we heard the blessed words, "Relief, thank God, relief!" There was joy at Donner Lake that night, for we did not know the fate of the forlorn hope and we were told that relief parties would come and go until all were across the mountains.

But with the joy sorrow was strangely blended. There were tears in other eyes than those of children; strong men sat down and wept. For the dead were lying about on the snow, some even unburied, since the living had not had strength to bury their dead. When Milt Elliott died—our faithful friend, who seemed so like a brother—my mother and I dragged him up out of the cabin and covered him with snow. Commencing at his feet, I patted the pure white snow down softly until I reached his face. Poor Milt! it was hard to cover that face from sight forever, for with his death our best friend was gone.—Mrs. Virginia Reed Murphy in Century.

Interested Listeners.

An American lady who traveled alone through Europe, conversant with no language but her mother tongue, was asked on her return, "Did you really spend fourteen months in all sorts of foreign places and speak nothing but English?" "Yes," was the reply, "but I would never do it again."

A traveler in Morocco gives, in "The Land of an African Sultan," the following account of a little occurrence which took place in the Sok, or principal street of Tangier, and which goes to corroborate the evident opinion of the American tourist, that it is a serious disadvantage not to be a linguist.

A well disposed elderly gentleman was visiting Tangier some years ago, before the country was opened as it is now. He, of course, went to the Sok and was overcome at the ignorance and bigotry of its inhabitants. On returning to his hotel he engaged a guide, to whom he told his purpose of preaching a sermon there.

The guide, who knew the danger of such a proceeding, kept his own counsel, but pointed out the risk which he himself should run in interpreting the discourse. He demanded a proportionately large sum of money in payment, and this the benevolently inclined gentleman at once promised him.

Arrived in the Sok, the preacher mounted an empty case and began his sermon, and great was his delight to see the crowd gather quickly about him, as the guide interpreted his fervent sentences. Larger grew the crowd, and no one uttered a word; in breathless silence they listened to the end, and then departed, followed by the old gentleman.

Not many weeks later, a leading English paper published a long article on the missionary question in Morocco, and described the patience with which this crowd listened to a sermon on the Christian religion.

But the kindly old gentleman who preached that sermon, and afterward wrote the newspaper article, never knew that what the interpreter really delivered to these delighted Moors was a story from the Arabian Nights.—Youth's Companion.

The Opportunity Utilized.

"Prisoner," said the judge, "have you anything to say before the sentence of the court is passed upon you?"

"I have, your honor." (Turning to his lawyer.) "You slick fingered, smooth jawed puddin' head! You billy-be-dad-slammed hunk of soap fat! You said you could clear me for $25, and took your money in advance. You hain't got sense enough to be assistant janitor to a corn crib, you don't know as much law as a Texas horned frog, and you haven't the moral principle of a blind owl. Go ahead, judge."—Chicago Tribune.

Try Germea for Breakfast.

IN A DAY.

LAWRENCE, KANS., Aug. 9, '88. George Patterson fell from a second-story window, striking a fence. I found him using ST. JACOBS OIL. He used it freely all over his bruises. I saw him next morning at work. All the spots rapidly disappeared, leaving neither pain, scar nor swelling.

C. K. NEUMANN, M. D.

"ALL RIGHT! ST. JACOBS OIL DID IT."

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

To cure costiveness the medicine must be more than a purgative; it must contain tonic, alterative and cathartic properties.

Tutt's Pills

possess these qualities, and speedily restore to the bowels their natural peristaltic motion, so essential to regularity.

It looks as if the Tammany tiger had devoured the entire stock of Democratic olive branches.

A LITTLE LEAVEN LEAVENETH THE WHOLE LUMP.

A disease in one part of the body will eventually fill the whole body with disease. Every year or two some part of the system grows weak and begins to decay. Such part should be removed at once and new matter be allowed to take its place. There's no need of cutting it out with the surgeon's scalpel. Purge away the old, diseased and worn out parts with Brandreth's Pills. Then the new body will take care of itself.

Caller—Doesn't it worry you to think of your daughter on the great Atlantic Ocean? Old Lady—Dear me, no. She can swim.

FRIGHTFUL SHIPWRECKS.

Staunch ships strike and founder, the fierce winds and mountainous waves sweep noble mariners' "hearts of oak" to shipwreck and to death, yet that does not prevent the luberliest landsman from risking his life on the stormy Atlantic in the roll of tourist or commercial traveler. But if he shall reach his destination safely he will scarcely have escaped some of the qualms of sea sickness, unless he takes with him Hostetter's Stomach Bitters, that inimitable specific for nausea. Bad water on long trips are a threat to the voyager, but this may be deprived in a great measure of its disordering effects upon the stomach, bowels and liver by the Bitters. Against the prejudicial effects of malaria, bad diet, fatigue and exposure it is also efficacious. It averts, moreover, rheumatism and kidney complaints. Don't travel on sea or land without it.

There are too many people in the world who use their nest-eggs to make cake of.

The end of woman's peculiar troubles and ailments comes with Dr. Pierce's Favorite Prescription. It cures them. For all the functional derangements, painful disorders, and chronic weaknesses that afflict womankind, it's a certain remedy. It's an invigorating, restorative tonic, soothing cordial and bracing nervine—purely vegetable, non-alcoholic, and perfectly harmless.

In the cure of periodical pains, prolapsus and other displacements, bearing-down sensations, and all "female complaints" and irregularities, "Favorite Prescription" is the only medicine that's *guaranteed*. If it doesn't give satisfaction in every case, you have your money back. You pay only for the *good* you get. Can you ask more?

The easiest way is the best. Regulate the liver, stomach, and bowels with Dr. Pierce's Pleasant Pellets. They cleanse and renovate the system—thoroughly and naturally. Sick Headache, Constipation, Indigestion, and Bilious Attacks, are prevented, relieved, and cured.

"All she lacks of beauty is a little plumpness."

This is a frequent thought, and a wholesome one.

All of a baby's beauty is due to fat, and nearly all of a woman's—we know it as curves and dimples.

What plumpness has to do with health is told in a little book on CAREFUL LIVING; sent free.

Would you rather be healthy or beautiful? "Both" is the proper answer.

TO PHYLLIS, IN A GINGHAM DRESS.

Silks and satins, velvet laces,
Well accord with pretty faces;
But tho' only artless graces
Deck thy beauty, I confess
Virtues all thy form embraces,
Phyllis, in thy gingham dress.

Oh, my Phyllis! gems the rarest
Least the setting need; and sparest
Perfume breathe to heaven the fairest
Flowers—fair but spiritless
To the violet thou comparest,
Phyllis, in thy gingham dress—

Not to eye alone appealing,
Charming sense while yet concealing
Beauteous font of fragrance, stealing
From the emerald wilderness.
This is why Love touches, kneeling,
To his lips thy gingham dress.

—New York Sun.

GHOSTS AND SELTZER.

M. Majesty, manufacturer of seltzer water in the Marais, had been to a little supper given by some of his friends of the Place Royale, and was on his way home shivering in the cold air. St. Paul's clock struck 2. "How late it is," muttered the good man, and he quickened his step; but the sidewalk was slippery, the streets dark, and, besides, in that ancient quarter of Paris, which dates from the time when carriages were rare, there are numerous turns, angles, and hitching posts before the doors for the accommodation of horsemen. All these impede fast walking, particularly when one's legs are a trifle heavy and one's sight confused by the toasts of a little supper.

At last M. Majesty reached his destination. He paused before a large ornamental gate, upon which glistened in the moonlight a newly gilded shield containing a restored ancient coat-of-arms, which he had adopted as his trademark, "Hotel Ci-Devant de Nesmond. Majesty Jeune, Fabricant D'Eau de Seltz." On all the siphons of the establishment, on all the note blanks and on letter heads the venerable arms of the Nesmonds thus spread out and shone.

Within the gate was the court yard—an immense court yard, airy and light—which, when thrown open during the day, flooded the whole street with brilliancy. At the extremity of the court yard stood a vast building of great antiquity, with embellished and ornamented black walls, with balconies of rounded iron and stone balconies with pilasters, with very lofty and tremendous windows, surmounted by pediments and capitals, which arose in the topmost stories like so many little roofs in the roof, and lastly, upon the summit of all, amid the slates, with the round and coquettish dormer windows of the mansards enframed with garlands like mirrors. Added to this were immense stone steps, eaten and turned green by the rain, a meager vine clinging to the walls as black and twisted as the rope which hung from the pulley away up toward the garret, and a pronounced air of age and sadness. Such was the former hotel of Nesmond.

In broad day the aspect of the mansion was altogether different. The words "counting house," "warerooms," "entrance to the workshops," shone out everywhere in gold letters upon the old walls, filling them with life—rejuvenating them. The trucks from the railroads shook the portals, and the clerks came to the steps with their pens behind their ears to receive the merchandise. The court yard was encumbered with boxes, with baskets, with straw and with bagging. In short, the place had all the look of a manufactory. But at night, in the deep silence, beneath the winter moon, which, amid the disorder of complicated roofs, cast and intermingled shadows, the ancient residence of the Nesmonds resumed its lordly appearance. The balconies were covered with lace, the court of honor grew larger and the irregularly lighted old stairway became full of cathedral like recesses, with empty niches and dimisteps which resembled altars.

The night of which we are speaking, especially M. Majesty, thought his establishment had a singularly grand aspect. As he passed through the deserted court yard the sound of his footsteps made a deep impression on him. The stairway seemed immense and terribly difficult to ascend. It was the effect of his little supper, doubtless. Arrived at the first landing he stopped to take breath and approached a window. So much for living in an historical mansion! M. Majesty was not a poet, oh, no; but, nevertheless, as he gazed out at the beautiful aristocratic court yard, over which the moon spread a sheet of blue light, and at the noble old edifice, which had just the air of sleeping, with its roofs stretching away beneath their covering of snow, he began thinking of the other world.

"What if the Nesmonds should return?" murmured he.

At that moment the bell rang violently. The gate was thrown open so quickly, so suddenly, that the lamp was extinguished, and for several minutes, in the shadow of the gateway, there was a confused sound of whispering and of vestments rubbing against each other. People disputed, and hastened to enter. There were valets, plenty of valets; coaches with glass windows reflecting the moonbeams, and sedan chairs balanced between two torches, which flared in the draught at the gate. In no time the court yard was jammed. But at the foot of the steps the confusion ceased. People descended from the vehicles, saluted each other, and went in chatting as if they knew the house. Upon the steps silks rustled and swords clattered. Nothing but white headdresses, heavily loaded with powder; nothing but small, shrill voices, some without melody, and light footsteps. All the people seemed to be old, very old.

There were dull eyes, dim jewels and ancient brocaded silks shot with changing hues, which the light of the torches caused to shine with a soft luster, and above all floated a tiny cloud of powder, which mounted from the curled headdresses at each courtly bow, a trifle pompous because of the swords and great paniers. Soon the whole house had the air of being haunted. The torches shone from window to window, mounting and descending the winding stairways until even the dormer windows of the mansards had their sparks of fete and life. The entire Hotel of Nesmond was illuminated as if the setting sun had flooded it with its brilliancy.

"Great Jove! they'll burn the house down!" cried M. Majesty. And, recovering from his stupor, he strove to shake the heaviness out of his legs and descended quickly to the court yard, where the servants had just kindled a rousing fire. M. Majesty approached and remonstrated with them. The servants made no reply, and continued to talk in low tones among themselves without the least vapor escaping from their lips in the icy gloom of the night. M. Majesty was uneasy, but one thing reassured him, and that was that this great fire which flamed so high and so steadily was a most singular fire—a flame devoid of heat which sparkled but did not burn. His fears having been tranquilized, the good man descended the steps and entered his warerooms.

These warerooms, which were on the ground floor, must formerly have been magnificent reception salons. Particles of tarnished gold yet glittered at all the angles. Mythological paintings adorned the ceiling, surrounded the mirrors and floated over the doors in vague colors, somewhat soiled, like souvenirs of departed years. Unfortunately there were neither curtains nor furniture. Nothing but baskets, great boxes filled with siphons, with pewter heads, and the dried branches of an old lilac bush which still hung in inky blackness behind the windows. M. Majesty on entering found his warerooms full of light and company. He bowed politely, but nobody paid the least attention to him. The women, in their satin cloaks, on the arms of their cavaliers, continued their ceremonial affectations. They promenaded, chatted and separated. Truly, all the old marquises seemed to be perfectly at home. A little figure paused, all in a tremble, in front of a painted wall. "That's me exactly! Look at my portrait!" and she gazed smilingly upon a Diana on a panel, slender and pink, with a crescent on her forehead.

"Nesmond, do come here and look at your arms!" And everybody laughed as they saw the arms of the Nesmonds stamped upon some bagging with the name of Majesty underneath.

"Ah! ha! Majesty! They still have majesties then in France?" And there were endless gayeties, little fife like bursts of laughter, uplifted fingers and affected speeches.

Suddenly some one cried out: "Here's champagne! Here's champagne!"

"No, it isn't!"

"Yes, it is—it's champagne! Come, countess, let's have a bumper."

It was M. Majesty's seltzer water they had mistaken for champagne. They found it a trifle flat, but they drank it all the same, and as these poor ghosts were not strong in the head little by little the weak seltzer water animated them, excited them and put them in a frame of mind for dancing.

Minuets were organized. Four good violins that Nesmond had brought in his train began one of Rameau's airs, simple and melancholy in its vivacity. It was a sight to see all these old women turn and salute their partners gravely, keeping time with the music. Their attire seemed to grow young again, and so did the gold embroidered waistcoats, the brocaded coats and the shoes with diamond buckles. The panels themselves appeared to revive on hearing the ancient melodies. The old mirror, inclosed in the wall for 200 years, recognized them also, and scratched as it was and blackened at the corners lighted up softly and sent back to the dancers their images somewhat dimly, as if melted by regret by all these elegancies. M. Majesty felt himself out of place. He got behind a box and looked on.

Little by little, however, the day broke. Through the glass doors of the warerooms the good man saw the court yard grow lighter, then the tops of the windows, then all one side of the salon. As the brightness increased the figures faded and were confounded together. Soon M. Majesty saw only two violinists lingering in a corner and evaporating as the light touched them. In the court yard he could still see, but very vaguely, the shape of a sedan chair, a powdered head adorned with emeralds, and the last sparks of a torch thrown by the servants upon the flagstones, which mingled with the light of the wheel lanterns of a truck at that instant coming through the open gate with a tremendous clatter.
—Alphonse Daudet in Chicago Mail.

The Latitude of a Place.

That the latitude of a place is not constant has long been suspected, but it was only at the end of 1889 that systematic observations, carried out at some of the observatories of Central Europe, clearly established the fact by eliminating all chances of error in instruments and observers. Professor Helmert reported in No. 2,963 of the Astronomische Nachrichten that the latitudes of Berlin and Potsdam, which had shown no perceptible variation during the first six months of 1890, in the third quarter of that year increased at first and then diminished, the movement continuing till January, 1890.

In Berlin and Potsdam this decrease amounted to from five to six inches, and this variation was confirmed by observations at Prague and Strasburg, the results at the first three observatories agreeing to within one-tenth of a second. According to The Scottish Geographical Magazine the subject is to be discussed at the meeting of the commission for international geodesy, to be held in Freiburg, when, it is to be hoped, arrangements will be made for a strict examination of this phenomenon.

Bill Moore, a farmer of Atchison, Kan., wanted to dig a well, so he plowed a lot of land and planted it in oats. Every day he watched the oats, observing the spots that showed the greatest moisture. Finally he selected a spot and sank a well. At twenty-four feet he had a fine stream of water. It is said to be the best well in the county.

A METAL EATING PLANT.

One of the Stanley Expedition Makes the Discovery.

PHENOMENON IN THE VEGETABLE WORLD.

Fire will not Consume It.—It will be of Great Commercial Value.

Professor Schelwisch, the well known naturalist of Bavaria, while traveling with the Stanley expedition in the heart of Africa for the purpose of studying the flora and fauna of the dark continent, was the first white man to discover this strange plant.

One day while resting at a small village near the foot of Mount Milosis, in the Umbopo region, Professor Schelwisch noticed a plant with a peculiar steel colored foliage, and on examination it was found that the shrub, although growing like other plants from the soil, was practically composed of iron. The leaves, though very thin, were bent with great difficulty, and the twigs and branches resisted pressure with a force about equal to the same amount of iron, and to secure a leaf it was found to be necessary to separate it from the bush with a file.

While Professor Schelwisch was digging at the base of this plant for the purpose of making an examination of its roots, the natives crowded around him in great numbers, gesticulating in a menacing manner. The professor desisted from his work and the interpreter was sent for. He explained that this was a holy tree and worshiped by the natives in their fetich religion as a God plant, and that to dig one up would bring ruin and desolation upon the whole village and surrounding country.

Professor Schelwisch offered to buy the plant, and, taking out a handful of copper coins, gave them to the savages, who gladly accepted the money and distributed it among themselves. The professor then returned to the work of digging up the unique plant, but had not made any great progress when the natives again set upon him. Through the interpreter the professor informed them that he had legally bought the plant and intended to remove it. As soon as this message was made known to the savages every one who had received a coin came and dropped it in the hole at the base of the shrub. Professor Schelwisch allowed the coins to remain in the hole and walked away toward the mountain to hunt another specimen.

ITS STRANGE PROPERTIES DISCOVERED.

Next day, as the party were preparing to continue the march, the professor was curious to know if the coins had remained undisturbed during the night by the superstitious natives, and on approaching the metal plant was astonished to find it had changed its color completely. Instead of being a beautiful steel color, the stem, leaves and what was exposed of the roots presented the appearance of newly coined copper coins and glittered in the morning sunlight like polished gold. Upon examination it was ascertained that during the night the strange plant had absorbed nearly all the copper coins, with the result of completely changing its color. What was left of the coins in the hole showed that they were more than half eaten away or absorbed by the roots of the metal plant. Not only was the color changed, but the texture of the plant had undergone a similar transformation. It was found that the thin ivy shaped leaves were now easily bent around the fingers, would retain any shape given them and could be readily cut with an ordinary pair of scissors.

Professor Schelwisch succeeded in surreptitiously securing several branches of this wonderful metal eating plant, and was also successful in obtaining a good photograph of it. No further trace of the existence of the metal plant was found until the expedition reached the Uniamesi country, when at the base of the Nkomabakosi mountains a perfect forest of this curious plant was found. This being an uninhabited region no difficulty was encountered in securing specimens to take back to England.

FIRE DOES NOT AFFECT IT.

While in this locality ample opportunity was afforded the members of the expedition to make an exhaustive study of the habits and peculiarities of this most remarkable of all species of the vegetable kingdom. By a series of carefully conducted experiments it was found that this plant would feed on any kind of metal placed at its roots and in a few days take on the characteristics of that metal, and in the case of the softer metals often but a few hours were required to effect a complete metamorphosis of its fiber and color.

Being curious to know how fire would affect a growing plant of this species, preparations were made for the test. Large quantities of seasoned wood were procured and piled in a long row covering about thirty of the metal plants and a fire kindled at the windward end. Stanley and his entire party watched the experiment, and had the satisfaction of demonstrating that, beyond the blackening of the foliage by smoke, the intense heat to which the metal plant had been subjected had done no harm to the plant itself. At the expiration of a week it was found that the rain had removed nearly all traces of the fire and the plants were apparently as healthy as ever.

The roots present peculiarities not found in other plants. They branch out from the trunk on all sides like a vine and are usually from six to eight inches beneath the surface of the soil. Regularly at every seven or eight inches the root branches and at this juncture grows a peculiar pair of round, slightly concaved discs, hinged together like the shells of a clam at the point of juncture with the root. These discs leave their convex sides outward and usually remain above half open until they encounter metal or metal ore, when they gradually close around it and a process supposed to be similar to electro-plating goes on, the metal being rapidly absorbed by the plant.—Philadelphia Times.

Resemblance of Married Couples.

It has been observed in the case of mature married couples who have lived together for a long period of years, harmonious in thought and feeling and subject to the same conditions of life, they acquire a strong facial resemblance.

The Photographic society of Geneva, Switzerland, took the photographs of seventy-eight couples to see to what extent this facial resemblance prevails. The result is that in twenty-four cases the resemblance in the personal appearance of the husband and wife was greater than that of brother and sister; in thirty cases it was equally great, and in only twenty-four was there a total absence of resemblance.—Exchange.

Mrs. Binks (angrily)—Call that an argument? Oh, get out!

Mrs. Winks—Don't you say "get out" to me.

Mrs. Binks—I address the expression not to you but to your argument. I do not ask you to get out—to get out of the room, or the house, or the town, or the country, or the planet, or the universe. Do I make myself plain?

Mrs. Winks—You couldn't possibly make yourself any plainer than you are naturally.

The Warrant Was Not Served.

"The worst scare I ever had," remarked Superintendent of Police Colbert, "was one night when Quigley, John Lowe and myself sneaked into a boarding house without the inmates knowing of our presence. We went up stairs into the room of a boarder for whom we had a warrant to wait for his coming. He was likely to be in some time between 12 and 3, and was said to be a very slippery citizen. We kept very quiet, as we didn't want any one to know we were there. A large coal oil lamp was burning in the room, and instead of putting it out, John Lowe, who had a skin coat, undertook to shut off the light by holding the coat around it. Pretty soon Lowe fell asleep. We woke him up and he promised not to do so any more. But the promise was hardly cold when we heard him snoring.

"This was worse than ever and enough to wake up every one in the house. We punched him, and as he awoke, with a start, he pitched over and the lamp came to the floor with a crash that, in the dead silence of the night, could have been heard half a mile away. There was nothing for it but to rush out of the room and down stairs into the street. As I went down stairs I felt awfully queer. My hair was standing straight up, and I was expecting at every step that some one would take a crack at us, thinking we were burglars.

"The next day the papers all had a sensational account of an attempted burglary, and one or two of them spoke of the inefficiency of the police. As for us we said nothing."—Indianapolis Journal.

London Life in Elizabeth's Time.

In Elizabeth's time the ordering of the household was strict. Servants and 'prentices were up at 6 in the summer and at 7 in the winter. No one one on any pretence, except that of illness, was to absent himself from morning and evening prayers; there was to be no striking, no profane language. Sunday was clean shirt day. Dinner was at 11, supper at 6. There was no public or private office which was not provided with a Bible. In the better classes there was a general enthusiasm for learning of all kinds. The ladies, imitating the example of the queen, practiced embroidery, wrote beautifully, played curious instruments, knew how to sing in parts, dressed with as much magnificence as they could afford, danced the coranto and the lavolta as well as the simple hey, and studied languages—Latin, Greek and Italian.

The last was the favorite language. Many collected books. Dr. John Dee had as many as 4,000, of which 1,000 were manuscripts. They were arranged on the shelves with the leaves turned outward, not the backs. This was to show the gilding, the gold clasps and the silken strings. The books were bound with great care and cost; everybody knows the beauty of the type used in the printing.—Walter Besant in Harper's.

Making a Fuss.

Many years ago a prominent clergyman was consulted by the ladies of his congregation about certain clerical work in which they were interested. Smiling at their earnestness, he said: "That's right, ladies; make a fuss—make a fuss! That's the only way to get work done in this world! Set about it yourself and make a fuss while you do!" And so it is. Thinking about wrongs and sighing over them never mended one. But the people who exert themselves to right the wrong, making a good stir about it while they do, and worrying at other people to exert themselves, too, will often force the other people into activity in sheer self defense.

The other people would like to sit quiet and take it out in sighing, but these energetic fussers will not let them. At last, to get rid of the agitators, they rouse up, go to work with a will, and accomplish what is asked of them for the sake of the peace they obtain thereby. But whatever their motive, all mankind has the benefit. It is not only well to get wrongs righted, it is also well to get sluggish people stirred up occasionally.—Harper's Bazar.

Big Chance for Improvement.

First Arctic Explorer—I say!

Second Arctic Explorer—Say on.

"I say! We're in a box."

"Jesso."

"We'll have to wait for a rescuing party."

"That's it."

"One will come I suppose."

"Yes, they always come—but not always on time."

"I say!"

"Well?"

"Don't you think the present style of arctic exploration might be improved?"

"Perhaps so. What would you suggest?"

"I think the rescuing party ought to go ahead."—New York Weekly.

Dickens' Sons.

Three sons of the great author of "Pickwick" are still living. Charles Dickens, his father's namesake, is editor of All the Year Round, and is known to American audiences for his readings from his father's works. Alfred Tennyson Dickens is a merchant in Melbourne, and the youngest member of the family, Edward Bulwer Lytton Dickens, is a sheep farmer and a new member of the New South Wales parliament.—Exchange.

All Bad.

It is never safe to study the opinion of the multitude. "What do folks say about me?" asked an old lady who had been largely unfolding a budget of scandal. "I s'pose there's some bad mixed in with the good!" "Well, there," said her frank neighbor, "I do' know's there's any good spoke of to mix it with."—Youth's Companion.

The Queen's Oysters.

The queen is remarkably fond of oysters. All the shells which make their appearance on the royal table are sandpapered and polished so brilliantly as to glisten almost like mother of pearl.—London Tit-Bits.

HARVESTING THE HOPS.

Busy Days and Merry Evenings of the Pickers.

AN INDUSTRY OF GROWING IMPORTANCE.

An Outing Combined with Money Earning.—The Evening Dance.

THERE is but one form of employment that combines social features and wage earning in as pleasing a combination as hop picking, and that is the gathering of cotton. But while the latter is the work of the lowest classes in the south, mostly in deed being done by negroes, and takes place beneath a torrid sky, the former is the common pursuit of all residents in certain localities, and falls in a delightful season of the year. From the middle of August until the last of September, among the Catskill mountain regions of New York, through central Ohio and other middle western states and along the western slopes of Oregon and Washington the graceful hop vines are yielding up their riches. The pale green worn all through the heat of summer has changed to a deep brown, and thousands of busy figures are stripping the light cones from the delicate, waving stems.

The west is rapidly becoming the leader in the production of this important crop The long valleys of the Pacific slope are being studded thickly with hop poles, and the annual output will soon exceed that of the famous hop regions of the Empire State. Clear skies, pure air, no fogs and few heavy storms are essentials to perfection in hop growing, and in these the Catskill region excels. But the same conditions are found combined with cheaper land in the newer states, and the advantage is increasing the production there.

When the hops are ripe they must be gathered at once, as their condition is easily injured. Hence the pickers are in demand in large numbers, and in the hop regions there is little else thought of for three or four weeks by rich or poor.

At the hop farm piles of cakes, pies and bread have been prepared, for each is anxious to set the "best table," not only because of rivalry, but because of the necessity of winning a good name from the pickers in case of a scarcity of hands. For once beggars are welcome to those who are more blessed with worldly comforts. The hop growers are anxious for all to come, as there cannot be too many hands employed in the harvest.

In many families, even those well to do, the annual hop picking is looked forward to as an outing equal in interest to a trip to mountain or seashore. And when the time arrives there is a family exodus to the fragrant fields. Father, mother and children work together, and even the white haired grandmother can sometimes be seen sitting in her easy chair between the rows, her head shaded by overhanging festoons of vines. Soothing is the fragrance of the waving tendrils, imparting healthful tints to tired cheeks, and inducing a pleasant drowsiness and a grateful sleep that puts new life into the workers, and makes them dream for months after of the sweet scenes among which their lot for a time was cast.

Scattered among the long rows of slender poles upon which the hop vines are trained, the pickers wait for the "pullers" to do their work. These are usually the regular farm hands and go from pole to pole, pulling each one from the ground and cutting the hop vine near the root. The tops are thrown down for the pickers to denude of hops, while the poles, when stripped, are piled for use next year, when the roots shall have sent up another crop of vines. The process of picking is by no means as easy as huckleberrying or grape gathering. The hops must be carefully taken from the stems and no mixture of leaves is allowed.

As the hops are picked they are put in boxes, though many of the workers first throw them in sacks, baskets or even open umbrellas. The main box is divided into four compartments, each holding eight bushels. There are four pickers to a main box, each having his division to fill, and the number of boxes picked by a person depends on the size and quality of the hops and the picker's ability. When four young people get by themselves they are apt to be a long time filling the compartments, but good workers can average from two to four boxes daily.

Each main box has a "tender," who is also the "puller," and has for his duty the pulling of the poles, stripping vines, seeing that the hops in the box are free from leaves and stems and that none are wasted.

IN THE HOP FIELD.

He also records the amount of work done by each picker, and so regulates the wages paid. When a box or compartment is filled the contents are sacked by the tender, the picker holding the sack. Every handful is carefully inspected, and woe be to the picker who has slighted his work and dragged off leaves, stems and hops recklessly. Once sacked there is no more handling of the product in the field, and wagons haul the yield to the great barns for storage. The "setting," consisting of three rows on each side of the box and six poles from the end, having been completed, the box and attendant pickers are moved forward and another "setting" is begun. So, with merry jest, good natured rivalries and sharp repartees, the work goes on, the pickers looking forward eagerly to the noonday meal.

It is one of the gala hours of the day, the dinner time. The bracing air of the hills, the pleasant exercise, the laughter and the high spirits of the company are all conducive to appetites well calculated to strike terror to the hearts of the housewives. Selecting some shady spot beneath a grand old tree, or in a cluster of woods near sparkling waters, the table is spread on the sod and the pickers gather around, chatting, gossiping and laughing as they literally devour the feast of goodies provided. In some localities where towns or settlements are near the hopyards the pickers take their own dinner, in which event the noonday meal is likely to assume the character of a picnic feast to which each contributes his or her share. In any event it is a feature of the day and the buxom, round cheeked boys and girls look forward to it with pleasure.

Not so rapturously do they consider it, however, as one other period of the day—the evening. When the nimble fingers have completed their day's task of stripping the hops from the fragrant vines, and supper, made healthful and pleasing by the abundance of great bowls of bread and milk, has been eaten, the young people prepare for the real enjoyment of the year. For weeks and months they have looked forward to the picking season, and an elaborate programme of sport is prepared in advance, to be partaken of alike by the workers on two or three farms if near enough for the purpose. Each night is a festival by itself.

On many of the hop farms are great barns, with luxurious lofts and wide, far-reaching beams and bins. Lanterns are hung here and there to the timbers, and upon an inverted hop box a fiddler takes his seat. The boys and girls, young men and women, in homely clothes, but with light hearts and graceful, if robust, bodies, troop into the building, prepared for the dance. There are no fancy figures or elaborate marches. Such good old fashioned melodies as "Money Musk," "Jersey Boys" and "Down the Middle" are the fiddler's delight. His resonant voice wakes the echoes among the rafters and startles the swallows from their perches in the gables as he sings out, "For'ard four," "Balance to the right," or, most delightful of all, "Swing yer partners an promenade all." The society youths of the metropolis might find much to criticise in bearing and gesture, but no swell ball on the avenue ever awakened happier hearts. As the hours go by the older persons who have been sitting around the edges of the whirling circle commence one by one to take a hand in the fun, and at last there is scarcely a foot that is not keeping step to the music nor a hand that is not bobbing rythmically in time with the tune.

But dancing is not the only method of passing the hours. Sometimes there is no fiddler obtainable and games are resorted to. With innocent abandon the boys and girls take naturally to the "kissing games," and never tire of their amusement. "Post-office," "Snap and catch 'em," "Forfeits"—who that was brought up in an eastern country neighborhood can forget them? The delicious feints of skill or the possi-

THE DANCE IN THE BARN.

bilities of chance that brought the shy lovers together was like a providence to their innocent hearts, and they took it as an interference with their rights that the crowd should applaud the eagerness with which the swain pressed his lips to his sweetheart's cheek in full view of the audience.

Songs would follow, and gathered on the moonlit side of the building, with bunches of odorous hop vines for couches, the sweet if not trained voices made as delightful music as any prima donna ever gave to a crowded opera house. To those who heard it it was the acme of melody. Doubtless it was really crude and ill rendered, but it came from the heart. The repertoire is not usually a large one. The favorite is likely to be "Nellie Gray" or "Juniata." As some sweet girl voice leads the chorus in the latter:

Juniata, Juniata, let me linger by thy side;
Nita, Juniata, be my own sweet bride,

many a young lover is likely to look with more fervor into his sweetheart's eyes and half whisper the words after the singer. Gospel hymns follow, and as the moon sinks low in the west the tenderness and even sadness of the selection deepens.

But there is work to do on the morrow. Clear brains and quick fingers are needed, and by midnight the lanterns are extinguished and the pickers have retired to slumber—some in the barn, others in spacious farmhouse bedrooms, while many wish no better resting place than a bed of hop vines, with a canvas on poles above for protection from the dew.

Invalids who for weeks have sought in vain the presence of "nature's sweet restorer, sleep," are sometimes able to find a blessed unconsciousness by resting their heads on hop pillows. But what is that to the experience of those whose beds are made of the fragrant vine itself, whose nostrils drink in the potent influence of the plant, and upon whose tired foreheads beats the soporific power as a benediction and a gift? It is the essence of healthfulness personified, and the happy workers who enjoy it have for naught a delight that many would give small fortunes to attain.

There are nearly 100,000 acres devoted to hop culture in the United States, about one-half being in New York, while the Pacific slope comes second in acreage. The rapidly increasing market for the product, not alone in the manufacture of beer and ale, but in many articles of food and for medicinal purposes, continues to make the business profitable. Those who deal heavily in hops say that at fifteen cents a pound there is a good return to the farmer. At that price he can pay the pickers fifty cents a day and board them; in some cases even more.

CHARLES MOREAU HARGER.

New Verse for England's Anthem.

Much to the astonishment of those who knew the democratic and radical views of Henry Labouchere, that gentleman sometime ago offered, through the columns of his paper, the London Truth, a prize for the best "additional stanza for 'God Save the Queen' from an imperial federationist standpoint of view." Here is the winner:

Far o'er the rolling main
Echoes the royal strain—
God save the Queen!
One great united band,
Pray we through every land,
God guard our empire grand,
God save the Queen!

MAPLE SYRUP AND SUGAR.

A Larger Output than is Generally Supposed.

HOW TO CARE FOR AND TAP THE TREES.

Apparatus for Cooking the Sap.—Old Time Methods.

There are a good many interesting features about the maple sugar product, the dealer said to a reporter. It is a deal more extensive than most people imagine. Although the foolish people of the country are cutting for firewood every year thousands of trees that would yield a handsome revenue if rightly managed, the product is still more than 60,000,000 pounds a year, or say nearly one-fourth as great as the product of cane and sorghum sugar of the whole country. Vermont alone produces about 4,000,000 pounds yearly, of which the largest part comes to New York city. Although no record of the amount handled in this city in a year is at hand, it is safe to say that more than 12,000,000 pounds is received here every season.

Next to Vermont comes New York as a sugar producer. Ohio, Michigan, Wisconsin and New Hampshire follow. The hard or sugar maple flourishes best in a cool climate, the Western Reserve in Ohio being the best sugar region of Ohio. Taking one thing with another the Western Reserve people have the sugar business in better shape than any other people in the country, for they have learned how to cultivate and improve the sugar bushes. New trees are planted as fast as the old ones die. Care is taken in planting these trees to place them so they will produce the most and the best quality of sap, and when the sap is obtained it is boiled in an apparatus especially well designed to produce clean and pure sugar.

If farmers only knew it they could get more money out of an acre of sugar trees than out of any grain crop raised on the same land. The best sugar bushes are on fairly moist land that slopes to the south. An acre of land will support thirty healthy trees. A much larger number will thrive on an acre, but the larger number will produce less sugar than thirty will. I am not sure but twenty-five would be a more profitable number to put on that space, for it is well known that the quality of the sap from trees standing too close together is thin. Even when trees are thick, if the soil is moist abundant sap may be had, but the sap is like the milk from slop fed cows. It takes between four and five gallons of good sap to make a gallon of sirup in a proper apparatus, and a gallon of sirup will make eight pounds of sugar. But where the sap is thin it will require double the amount—sometimes more than double—to produce the same quantity of sugar.

In a well ordered bush of thirty trees to the acre the product, taking one year with another, will run not much below ten pounds of sugar to the tree. The ordinary bush that receives no care and is tapped in ignorant fashion, will produce no more than three pounds to the tree. The product of the well ordered bush can be set down, therefore, as 300 pounds of sugar to the acre, for which the farmers can get at the very least ten cents a pound right on the ground where it is made. If he got $10 or $12 an acre for hay from the same ground, or say $15 for oats or wheat, he would think he was getting rich hand over fist. At the same time the labor of making the crop of sugar would be much less expensive than the work of making a crop of oats.

The best apparatus for making maple sugar from the sap is the modern condenser used in making condensed milk. On the Western Reserve they have a condensed milk factory where milk is handled during the regular milk season. Formerly this factory stood idle in cold weather until say the 1st of May. But now along at the end of February the farmers begin to tap the trees in the sugar bushes. The taps are iron spiles driven into a half-inch hole. The sap runs into covered pails made for the purpose. It is gathered from the pails into milk cans and driven from the bush to the factory, where it is weighed in as milk is. The sap is then boiled in a vacuum condenser. It comes out the most beautiful sirup imaginable. The farmer gets his proportion of this sirup less a percentage for the boiling. The sirup sells readily at the factory at $1.50 a gallon. Ordinary sirup brings from $1 to 1.10.

The modern sugar bush, if of any extent, requires quite a little capital. The spiles are steel tubes, and the pails are useful for nothing else. A house must be built to cover the boiling pan. The boiling pan must be set in a brick furnace in such a way that no direct flame reaches it—in fact it ought to be set in a sand bath, so that the sirup can never burn. There must be a big tank in this house to hold the sap, and a number of tin pipe lines should be laid from it to other tanks at convenient points in the bush, so that the sap can be run, instead of carried, into the house. It is customary to gather the sap in barrels placed on a sled, which a horse draws through the bush, but this is wasteful, for much sap is spilled by the jolting and frequent rehandling. One inventor proposed to run pipe lines to all the trees, but that scheme was a failure.

There are trees that yield as high as twenty pounds of sugar in a season, and that average for many years at a stretch from twelve to fifteen pounds. There is one tree at Preston, Pa., that has been tapped regularly every year since 1790. Sugar from it was sent to Gen. Washington, and the family owning it have made a like present from it to every president since his time. It is the patriarch of maples. The ordinary maple, however, is good for twenty-five seasons, after which it should be used for firewood. Meantime a new one to take its place should have been raised.

Of course, the manner of gathering the sap and boiling it has been greatly improved since the days when trees were tapped by gashing them with an ax and allowing the sap to flow from the gash over a chip into a trough made from a log. There are no spruce and birch and hemlock leaves and twigs in the modern sap, and no sap bugs and flies to be skimmed out. The sirup is now well nigh as colorless as the sap itself, but somehow the old heads like me do not find it quite so much to our taste as it was in the old days. The marketable value of the old sort is less, but there was something about the leaves and twigs that are so carefully excluded now that did not hurt the flavor a cent's worth.—New York Sun.

EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.

FRIDAY, FEBRUARY 26 1892

And now the railroad people themselves laugh at our contemptible State Board of Railroad Commissioners. When the Board was organized nearly twelve years ago, the railroad officials laughed at the people; now it is the Board that it is laughed at. This Board was a useful tool to the railroad Companies till the spirit of political activity that gave it existance again died out. Now the Companies have only such use for the Board as a dog has for a post when he pauses for a moment beside it and lifts his hind leg.

Respectable Republicans in Pennsylvania have organized to secure the election of decent men to the Legislature, so that Quay may not again be able to secure a seat in the United States Senate. This strong and influential body of Republicans accuse Quay of all manner of corruption, and claim that the only use he ever made of his position in the party has been to promote his own personal ends. But Pennsylvania is not the only State that suffers in a similar manner. It is the general practice now to have paid tools in every county who manipulate the county conventions and bring about the election of such Legislatures as the last that met in our own State, and made California eminent among States where corruption reigns supreme. In California, as in Pennsylvania, relief is to be had by respectable men uniting to keep party management out of the hands of notorious scoundrels.

As long as United States Senators get their offices through Legislatures, just so long will the office be, what in most cases it now is, an affair of buying and selling. The price usually paid for a seat in the Senate is big, but it is not fairly divided. The office belongs to the whole people of a State, and the purchase money ought to go to all, share and share alike. Instead of this the men who are sent to the Legislature act like hogs and keep it all. Most of the men who buy seats in the Senate have got rich by means differing only in name but not in nature from swindling. They do not pay immense sums for those seats merely for the fun to be had in the Senate. In fact, the Senate is not a funny place, nor the members funny men. They are there purely for "business", and said "business" is their own exclusively. A seat in the Senate having becomes a matter of money and not of merit, not a few of the members of that august body are so grossly ignorant of all that men occupying such positions should know, that intelligent Americans are ashamed of them. The change in the method of electing Senators ought to have been made years ago, but better late than never.

The census report shows that all the farms in Illinois are, on an average, mortgaged to the extent of over forty per cent of their value. When a farmer has to pay forty per cent interest out of every dollar his farm produces, he is little better than a hired laborer, and it will not be long till the mortgage holder will own the farm in name as well as in fact. Illinois is considered one of the most prosperous States in the Union, and it is safe to say that farmers there are at least in no worse financial condition than farmers in other western States. This enormous load of debt and interest will account for the wonderful political changes that have swept over the western States within the past few years. When men, in spite of their hardest labor and most careful management find themselves getting poorer year after year, it is inevitable that they should become dissatisfied with the management of national affairs But when the farmer finds that he is sinking deeper in debt each year, and at the same time sees enormous fortunes—millions of dollars in many cases—piled up in a few years by parties engaged in favored industries, the dissatisfaction becomes a flood of indignation that effects sweeping changes very rapidly. The farmer has listened for long weary years to the promises made him, that by favoring certain industries, his own fortune would be improved Instead of those promises being realized in Illinois—the typical farming State—farmers find themselves crushed under a load of debt that they have ceased to hope will ever be lightened. Greater political changes than any yet seen are very likely to sweep over the whole country.

Where Napoleon's Friend Was Found.

On the voyage in a frigate from Alexandria to France Napoleon said to those who were in his confidence:

"I am taking two very different chances. If this vessel is captured by the English and I am thrown into an English prison I shall be in the eyes of France a common deserter, a general who left his army without authority to do so.

"But if I reach France in safety, subdue the factions, take command of the army and carry out my plans for the nation's good, I shall win the blessings of our fellow countrymen.

"I will not be taken by an English vessel. If we encounter one we will fight as long as possible, and when the enemy begins to board us we must sink the ship."

This desperate plan was received in silence and with evident disapproval, except by Gaspard Monge, who said, when it appeared that no one else was going to speak:

"Yes, general, you have stated the situation exactly. If what you suggest happens we must sink the ship."

"I was waiting for this proof of friendship, and I charge you with executing the plan," replied Napoleon.

Not long afterward an alarm was given, and every one hastened to his post to defend the frigate against an approaching English vessel. It was soon discovered, however, that the vessel was not English nor unfriendly.

"Where is Monge?" inquired Napoleon. "Find him and tell him that the danger is past."

Monge was found at his post by the powder magazine with a lighted lantern in his hand.—Youth's Companion.

The Kind Hearted Apple Woman.

There is an old apple woman who does business on a Wall street corner who deserves a medal for one of the best natured dispositions in this town. The other day a coal wagon, one of the big ones drawn by three horses hitched abreast, drove up to her corner and slowly and clumsily backed up against the curb. Then the driver swung his horses around so as to give another team a chance to get through the street. Round came the heavy animals, not with very much speed, but with a momentum which proved disastrous to the proprietress of the stand and her goods. Down she went, while a good share of her apples went tumbling after her.

Luckily she was not much hurt, but as she reclined on the pavement she saw one of the horses add insult to injury by opening a vast mouth and closing it upon the biggest apple on the stand. Then up rose the old woman in hot haste. But not to seek vengeance. Instead, she picked up two more apples and hospitably handed them to the two animals which hadn't helped themselves. And what is more, she looked as if she hadn't a grievance against anybody in the world.—New York Times.

One Way to Fix Up an Old Room.

If you are repairing an old house and wish to have one or two striking and effective features, choose a room for a den and have the whole of a windowless side finished with drawers, cupboards, nooks and pigeon holes. Shut in some of these with stained glass doors, drape others with real silk or blue and white porcelain tinted crapy goods. Leave a gallery along the top for busts, pottery or unframed paintings. Cover the floor with matting and rugs. If possible place low seats in the windows for plants or books. Select wrought iron frames for hanging lamps, with a copper candlo stick placed here and there for pick up use.

An old portable clothes closet may be converted into a corner shrine for such a room by being covered with dark red plush, in which is kept some family heirlooms or a beautiful vase. A few odd bamboo pieces of furniture will best harmonize with the rest of the room, or stiff carved chairs in dark mahogany. An old fashioned desk, such as was in constant use in New England years ago, or any antique table or stand will find a suitable abiding place here.—Brooklyn Eagle.

The Trouble With the Pepper.

The late P. T. Barnum, being a pronounced joker, turned also his witty faculty to use. When he told the Adirondack landlord, with great solemnity, that he hesitated to find fault with anything about the hotel when so much was agreeable, he was urged by the landlord by all means to be frank and do so. "Well," said Barnum, "it is only one thing; I have discovered with regret that your pepper is half peas." The landlord declared it could not be; but, on being assured that Barnum knew pepper as well as ginger, he wrote a caustic letter to his grocers about sending him such stuff. They, knowing doubtless who the real complainant was, wrote back that if he would spell "pepper" he would find half of it composed of p's, and that that which they sold had only the amount the orthography required.—Printer's Ink.

An Important Translation.

Of the Papyrus Ebers, the important medical manuscript which George Ebers, the well known German Egyptologist and novelist, acquired at Luxsor eighteen or nineteen years ago, only fragments—the chapter on diseases of the eyes, for instance—have, with Professor Hirschberg's help, yet been translated. Ebers shrank from translating the whole, on the ground that medical knowledge was requisite for the task. He expressed this opinion when he and Ludwig Stern edited the manuscript in 1875. A complete translation has now been made by a Berlin medical man, Dr. Heinrich Joachim, who learned Egyptian for the purpose, and has been working at the translation for several years. Thanks to his labors, the oldest medical work in the world is now accessible to all who can read German.

Joachim thinks that it was written at latest 1550 years B. C., but that parts of it are of still older date. It consists mainly of recipes, interspersed here and there with proverbs. In some passages advice as to the examination of patients is given; in others the prognosis indicated by certain symptoms is stated. The treatise shows that palpation of the abdomen was practiced by the old Egyptian physicians.—Berlin Cor. London Lancet.

A Young Diplomat.

Mrs. Brown—I'm afraid to let you have a bicycle.

Little Johnnie—Don't feel that way, ma. Even if it did kill me, remember that it would be the last thing I ever asked you for.—New York Epoch.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write today. I promise you my special personal attention. I undertake to help teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn three thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I do not ask you to leave your home, each district or county. I have already taught and provided with employment a large number who are now doing well, making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why, no harm to drop out. Address, E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY, the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah, deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south west quarter of Section No. 10, and the North-east quarter of Section No. 15 all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest in and to that certain lode, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North-east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 38 10-[illegible]; thence North-east following the meanderings of the bed of Cook Creek along its North branch to Edwards street, in the town of Independence, thence follow said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, containing what is known as the Reddy Lot.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo as the same appears by the official plat of the said town of Independence, now on file in the office of the county Recorder of said Inyo county, having been the residence of said John A. Hallnah, deceased, at the time of his death.

Lot Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Preciada lode."

That certain lot, piece or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and ninety-twenty-(12.9.20) rods south of the general corner of the south west quarter and the North-east quarter of Section No. twelve (12) and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and seven-tenths (68 7-10) rods; thence West twenty-three (23) rods; hence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North-East quarter and the South-east quarter, and the North-west quarter and the North-east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-one and eleven-twentieth (41 11-20) rods; thence East eighty (80) rods to the place of beginning, containing thirty acres. Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at George's Creek, Cal., and must be delivered at place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the Office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER,
Executor of the Last Will and Testament of John Allen Hannah deceased.

Dated, Independence, Cal., February 11th 1892.

ASSESSMENT NOTICE.

INYO MARBLE COMPANY.

Location of principal place of business, San Francisco California. Location of works, Inyo county, Cal.

Notice is hereby given that at a meeting of the Board of Directors, held on the 26th day of Jan., 1892, an assessment (No. 16) of fifteen (15) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin to the Secretary at No. 137 Montgomery St., San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 4th day of March 1892, will be delinquent, and advertised for sale at public auction; and unless payment is made before will be sold on Wednesday, the 6th day of January 1892 to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.
C. W. LACY, Secretary.
Office No. 137 Montgomery street, San Francisco, California.

DESERT LAND FINAL PROOF
I. E. No. 621.

LAND OFFICE AT INDEPENDENCE, CAL.,
January 14, 1892.

Notice is hereby given that Noah H. Graham of Independence, Inyo Co., California, has filed notice of intention to make final proof on his desert land claim No. 621, for the S W ¼ of S E ¼ S. 12, T. 13 S., R. 34 E., M. D. M., before the Register and Receiver at Independence, California, on Saturday, the 24th day of February, 1892.

He names the following witnesses to prove the complete irrigation and reclamation of said land: Foley McIver, Frank Lawrence and John Wilfert, all of Citrus and John McSweeney of Independence, Inyo County, Calif.

C. W. CRAIG, Register.

For Sale!

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,

C. MULHOLLAND,
Independence.

MONEY Beginners earn from $75 to $85 per week, and more after a little experience. We can furnish you employment, and will teach you free. You work in your own locality, wherever you live. COURT NOTES.

Geo. M. Gill, Superior Judge.

SATURDAY, February 20, 1892.

Estate of Ben. F. Thebair, deceased—Filed final account and discharge of administrator.

TUESDAY, February 23, 1892.

Estate of A. Spencer, deceased—Filed petition for probate of will.

WEDNESDAY, February 24, 1892.

J. E. Reynold vs. T. B. Scovil—Filed orignal summons.

Annie Harry vs. Robert Harry—Entered decree of divorce.

P. Reilly vs. W. F. Matlack, administrator—Entered decree.

A. Stecker vs. A. Fife et als.—Issued subpoena. Filed affidavit of J. C. Crocker. Notice of motion for change of venue.

C. Mulholland will start for Los Angeles Sunday.

If this isn't Spring the coy maiden cannot be very far off.

Jack Wilson came up from Lone Pine to day and will be in town a few days.

Who wants to buy two tons of fine winter apples in lots to suit? Don't all speak at once.

J. C. Crocker returned from Kern county last Saturday. He visited Independence a few days this week.

James Rambo came down from Bishop on Wednesday to accept a position as clerk in the store of A. W. Edeshuz.

A match race of two-year-old fillies by Albenton, 4023, is to come off at Independence on the 17th of Ireland.

On next Friday evening a closing entertainment will be given at Independence school. Admission free, and all invited.

The old concrete flooring in the jail corridors has been removed, and a new floor of shellcrete substituted. The work was completed early in the week.

Last night a huge prairie fire raged on the plains north of town. The billowy flames rolling and darting in the still dark night presented a grand spectacle.

Mrs. Thos. Williams of Big Pine passed through town yesterday on her way to Lone Pine where she will visit a few days. Miss Matilla Moysan accompanied her.

Kirman and Rickey have been buying stock cattle in the lower end of the Valley lately. They purchased the Gomez cattle and are now negotiating for another lot.

Sheriff Gorman has begun the work of constructing the new flue in the north-west corner of the Courthouse. It will be built directly from the ground, where a firm foundation will be built.

The N. S. G. W. gave a social dance Monday that was well attended, and serves as a straw to indicate what a success the entertainment of the 5th will be. Don't fail to secure your seats in time.

The young shade trees in the Courthouse yard have been trimmed up. They have made a very thrifty growth and when in bloom a few weeks hence will present a beautiful appearance.

The entertainment on Tuesday evening last at Lone Pine was well attended. Everybody seemed to enjoy themselves, and a splendid collection was secured for the "New Church" fund.

Mrs. N. E. Conklin, accompanied by Miss Edith Burgess, of Bishop will start to Bakersfield on Sunday to join her husband, where they expect to make their home. Will Yancy will take them to Mojave in a private conveyance.

A Grand Leap Year Ball will be given at the opening of Carrisco's new hall at Lone Pine on Monday evening next. The very best music has been secured, and the floor is new and first class. A cordial invitation is extended to every one. Don't fail to attend it.

At the recent meeting of the County Board of Education, Miss Nettie Reynolds passed a successful examination for a teacher's certificate. Miss June Skinner and Miss Eva McGee, both being under age to apply for a certificate, passed the examination very creditably and were awarded diplomas.

Attention is directed to the advertisement of Kinsley & Mead in this issue. Their freighting team makes regular trips to Mojave, hauling freight to and from all points in Owens Valley. The team passed through town yesterday going north loaded with ten tons of freight. They give prompt and careful attention to all orders entrusted to their care, and in patronizing them you patronize yourself as all the freight money is left in the Valley.

The Committee in charge of the N. S. G. W. entertainment have made a change in their plans and have determined to give their dramatic performance and ball at the Agricultural Pavilion instead of at Mairs' Hall, as first contemplated. A fine new stage, with all necessary appurtenances, will be provided. The management has determined that this performance shall excel any heretofore given and are working unceasingly to that end.

Mr. C. W. Reed, proprietor of the Hotel Dellone, Omaha, one of the finest new and modern hotels in the west, says of Chamberlain's Cough Remedy: "We have used it in our family for years with the most satisfactory result especially for our children, for colds and croup. It can be depended upon; besides it is pleasant to take and seems to be free from chloroform and the oily substances put into many cough mixtures. 50 cent and $1 bottle for sale by

A. K. EUGLEY,
Big Pine.

CUTTING AFFRAY

AT KEELER LAST NIGHT. NO SERIOUS RESULTS.

Last evening about 7 o'clock the telegraph operator at Keeler wired up that a man named Charles Hassell had cut and seriously wounded L. Briggs. Immediately upon receipt of the news Under Sheriff Dave Holland started for the scene of the difficulty. In the meantime Sheriff Gorman sent the following message:

INDEPENDENCE, Feb. 25 h.—To Thos. Boland, Keeler—Hold the prisoner till Dave arrives. J. S. GORMAN, Sheriff.

At 6:20 this morning the following message was received:

KEELER, Feb. 26th—To J. S. Gorman, Sheriff—Man broke jail last night at 7:30. Cut not serious. Injured man refuses to enter complaint. Shall I hunt him up?

D. HOLLAND, Under Sheriff.

Sheriff Gorman immediately sent the following message:

INDEPENDENCE, Feb. 26 h.—To D. Holland, Under-Sheriff—Arrest the man if possible to find him in County and bring him up. J. S. GORMAN, Sheriff.

As near as can be ascertained the facts are as follows: The crew employed at the Marble Quarry we paid off yesterday and some of the men went to Keeler and began drinking. A dispute arose between Hassell and Briggs which resulted in the cutting. Immediately upon the receipt of Sheriff Gorman's first message Hassell was arrested and locked in a box-car. Learning that the Sheriff was coming down, and desiring to get Hassell out of the way, his friends burst open the car and he skipped out in the night.

The Sherman Case.

Hon. Geo. M. Gill in a letter published this week in the *Index* gives his reasons for not interfering in the Sherman case. During the year in which he has served as Superior Judge of Inyo county Judge Gill has established a reputation of being an upright, painstaking and conscientious magistrate, and whatever action he may take is certain to be the result of careful consideration. In this case he is far better qualified to pass upon the merits of the subject under discussion than we are, and therefore any comment upon his letter would be out of place. We do hold however, that the *Index* should have been guided by the same thought. The people of Inyo county know George Gill well enough to accept any statement he may make without explanation from a comparative stranger. To class Val Sherman with a red handed murderer like W. T. C. Elliott is an insult to every man and woman who signed the petition for Sherman's pardon, for no man in Inyo county would claim a friendship with such a man as Elliott. And we are further certain, and indeed it is plain from the letter, that Judge Gill never intended to cast such an aspersion on Sherman or his friends.

Will Help Us.

The last issue of the Los Angeles *California Farmer* says. "It is almost a certainty that in the immediate future a new railroad will be built into this part of the State from Salt Lake. This will involve the outlay of millions of dollars, a large part of which will come here. This railroad will open up a section of country rich in mineral wealth and also in its agricultural resources. Here will be an outlet for much of our products, a base of supplies for some commodities not produced here, and a stimulus to the establishment of many manufactories in this city." The other papers corroborate this opinion, and it is generally believed that the work of construction will commence as soon as Spring opens. It is intended to have the road in operation in time for the World's Fair. The building of this road will very much lessen rail connection between Owens Valley and Los Angeles.

To Be Removed.

Copies of proposals for bids for removing the bodies of the United States soldiers buried at Camp Independence have been received at this office, where they will be furnished to any person desiring to bid. The remains will be taken to the national cemetery at San Francisco. A strong effort was made to secure an appropriation for repairing the Camp Independence cemetery, but there is no fund that could be used for that purpose. On arriving at San Francisco the bodies will be reinterred with military honors and the graves properly marked and recorded. It will require considerable effort to locate some of the graves, but there are old residents and former soldiers here who will remember them. The proposals will be opened at the office of J. G. Chandler, Deputy Quartermaster General, at San Francisco on March 17th, 1892.

A Good Season Assured.

Frank Fitzgerald came in from Modock on Tuesday's train, the object of his visit being to procure a big team to haul ore from Modock to Keeler. He confirms the report published last week of the good prospects for lively times in mining circles for the coming season. J. J. Gunn has a lot of ore ready for shipment at the Minnietta mine, and no team to haul it. Neil McLean has taken a contract, which will keep him busy for some time, to haul wood for Fitzgerald's mill. The Snow's Canyon mill is to be removed and with the addition of new pans and settlers fitted up in first-class shape. The new road completed to Wild Rose will open up a fine mining property there. As before stated, the prospects at Darwin are better than for many years past.

School Subscription.

The change in the method of collecting taxes has caused the present term of school to be shorter than usual. Mr. Oman, the teacher of Independence school, will, if parents so desire, continue to teach after the close of the present term on next Friday. To keep the school running it would be necessary that enough pupils should attend and subscriptions be collected as would afford reasonable compensation to the teacher. All parents or guardians who want school to continue are requested to give notice to Mr. Oman at the school.

Investigating.

Messrs Brooks and Austen have spent the last week investigating the Stevens Ditch and Lone Pine Canal, and the lands covered by those irrigating works. They have had several conferences with the owners of the two properties relative to purchase, but no definite conclusion has yet been arrived at. Whether or not they take hold of the work of extension, the canal will be extended to Lone Pine. The present owners of the Lone Pine Canal are all energetic men who have sufficient means to prosecute the work. They own five tracts of land that will be irrigated by the canal, and with the water will become valuable properties. This alone is sufficient incentive to prosecute the work vigorously, which they are now doing. In the event of the new company taking it, however, work would be prosecuted on a far more extensive scale, and a correspondingly greater property developed. There is undoubtedly an era of prosperity in store for Lone Pine. In fact the outlook for that place is at present brighter than for any town in the Valley in view of the fact that most of the outside investments of capital are being made in that end of the county.

No healthy person need fear any dangerous consequences from an attack of la grippe if properly treated. It is much the same as a severe cold and requires exactly the same treatment. Remain quietly at home and take Chamberlain's Cough Remedy as directed for a severe cold and a prompt and complete recovery is sure to follow. This remedy also counteracts any tendency of la grippe to result in pneumonia. Among the many thousands who have used it during the epidemics of the past two years we have yet to learn of a single case that has not recovered or that has resulted in pneumonia. 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

Many persons who have recovered from la grippe are now troubled with a persistent cough. Chamberlain's Cough remedy will promptly loosen this cough and relieve the lungs, effecting a permanent cure in a short time. 50cent bottles for sale by

A. K. EUGLEY,
Big Pine.

Can't Cook as Mother Did!

How many a young wife's heart has been saddened by hearing the above remark! And yet how often the words are true; especially when cake, pastry or biscuit are in question! The reason is plain, yet it is "like telling a secret."

Our mothers used and are using Dr. Price's Cream Baking Powder. They cannot be misled into using any of the ammonia or alum powders. No dyspepsia no sallow complexions, when mother did the cooking.

The first symptoms of ammonia poisoning, says a New York paper, which appear among those who work in ammonia factories, is a discoloration of the nose and forehead. This gradually extends over the face until the complexion has a stained, blotched and unsightly appearance

Dr. Price's Cream Baking Powder is the only pure cream of tartar powder that contains the whites of eggs.

Dr. Price's Cream Baking Powder is reported by all authorities as free from Ammonia, Alum, or any other adulterant. In fact the purity of this ideal powder has never been questioned.

They have at last found a way to prevent sea-sickness. Any passenger who is sick will be charged double fare.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

After a long and exciting struggle with Ben Butler the grip is able to be about again.

MANY SUCH.

A group of mechanics was seated in the engine-room when one said: "How was it, Tom?" "I was caught up, slapped 'gainst the ceiling and whirled down to the floor. I lay there like one dead, and every muscle was sprained! I was cured in one day." What cured him?

ST. JACOBS OIL

with equal facility and certainty has cured promptly and permanently worse cases. Here is one after suffering half a lifetime.

14 Sumner St., Cleveland, O., Aug. 11, '88.

In 1861 sprained my arm clubbing chestnuts; could not lift my arm; constant pain until 1880, when St. Jacobs Oil cured me.

JACOB EIZENSPERGER.

"ALL RIGHT! ST. JACOBS OIL DID IT."

CONSUMPTION.

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, with a VALUABLE TREATISE on this disease to any sufferer who will send me their Express and P. O. address. T. A. Slocum, M. C., 183 Pearl St., N. Y.

Vile cod-liver oil has lost its vileness in Scott's Emulsion and gained a good deal in efficiency.

It is broken up into tiny drops which are covered with glycerine, just as quinine in pills is coated with sugar or gelatine. You do not get the taste at all.

The hypophosphites of lime and soda add their tonic effect to that of the half-digested cod-liver oil.

Let us send you a book on CAREFUL LIVING—free.

SCOTT & BOWNE, Chemists, 132 South 5th Avenue, New York.

Your druggist keeps Scott's Emulsion of cod-liver oil—all druggists everywhere do. $1.

MASTIFF PLUG CUT IS ON THE

If you are willing to pay a few cents more for a strictly Pure Tobacco, try Mastiff Cut Plug. It is worth all the difference. Packed in patent canvas pouches.

J. B. Pace Tobacco Co., Richmond, Virginia.

It is for the cure of dyspepsia and its attendants, sick-headache, constipation and piles, that

Tutt's Tiny Pills

have become so famous. They act gently, without griping or nausea.

VANITY.

The moth was beautiful—so bright
That, while the sunbeams played at seek
And hide among the roses white
And red, like blushes on the cheek
Of beauty yielding soft assent
To some low love-tone's sweep awaking,
He, in his gay attire content,
And many a knightly courtesy making,
Seemed, as he passed, on mischief bent,
If not on absolute heart breaking.

The roses, gentle and polite,
Bowed distantly, as maidens do
Who still maintain their dowered right—
The manner's old, but good as new;
A mere acquaintance, that was all,
Related to the village miller.
They held him in their graces small
As any other lady killer,
Or animated dandy doll,
And scion of the caterpillar!

The moth danced gayly on his way
Nor other fellowship desired,
Till, where a group of pansies lay,
In regal elegance attired,
He paused and looked, like one amazed,
Upon their bright and sunny faces;
Their elfish hoods and dimples dazed,
And dulled and dimmed his gaudy graces;
Abashed, eclipsed, benumbed, he gazed,
Then dropped and died in their embraces
—W. S. Snyde.

THE UNLUCKY STONE.

From my earliest recollection we had traveled, traveled the world over, it seemed, my mother and I. We had no kith nor kin but one another, so can the world wonder that we were all in all to each other? My mother's face, although the sweetest and gentlest of faces, was always sad, even gloomy at times. She always wore the deepest of mourning for my father, although I could never get her to mention him. And after several inquiries I ceased to trouble her, for such a look of pain and agony would come over the dear features at the mention of Robert Radcliff. The only jewelry she ever wore consisted of two rings, a plain gold wedding ring and a beautiful opal set in a heavy band of gold. Through Asia, Europe, America, and even to Africa and Australia, we had made our way. And whenever in a crowd or conversing with a stranger I would notice my mother looking at her opal ring, which she wore on the third finger of the right hand.

One summer we had wandered through Russia, had spent some time on the Rhine, and finally brought up in a little town among the mountains of Switzerland. Here my mother was taken ill with a general decline of the heart, as the village doctor called it. I was very much frightened and wanted to telegraph for a celebrated man from Paris, but she said: "No, Carl, do nothing whatsoever. My time has come, and I must have you to myself for the few hours left me."

I would not believe it. It did not seem possible that God could take her from me.

"Mother," I said, controlling my emotions for fear of making her worse, "you imagine that you are much worse than you are. You are looking better than I have seen you for some time. Your cheeks are bright red."

Ah, what a fool I was! Death's very sign I took to be the hue of returning health.

"Carl, I have no time to waste in useless words," she said. "Come and sit by my side and learn why your mother's sad face has darkened your young life. No, do not interrupt, my boy. I know how much you think of your mother. Sixteen years ago, when you were a child of 4, we lived in a beautiful country home in the north of Ireland. Your father was of that country, you know." I did not know, for she had never told me anything about him; but I did not interrupt, and she continued: "Well, one night I waited and waited for Robert to return. He had gone to the neighboring village to buy new carriage horses. The wind blew a gale, and the rain fell in torrents. I walked the floor in an agony of fear till 12 o'clock, then called a faithful old servant and told him to harness and to go with me to look for his master. He thought me crazy, but did as I told him. Put another pillow under my head, Carl. There, now I can breathe easier.

"We found him, my son; found him all bloody and beaten to death. Foully murdered."

Her face was ghastly, and although shaking in every limb I managed to give her some drops the doctor had left so that she was able to continue. "I cannot tell you more of that dreadful time except that there never was the slightest clew to the assassin. We never knew that he had an enemy in the world. It was not robbery, for his watch and a large amount of money were not touched. You will find papers telling you all of that. My part is what I wish to tell you now. I lived with you alone in the old home for one year. One night I fell asleep in a chair by the hearth, and had the strangest of dreams. I dreamt a voice said to me:

"'Take thy child and the opal ring and travel the world over, and when thou dost find thy opal turnest a blood red then thou willst be in the presence of thine enemy and thine husband's murderer.

"When I awoke I pondered on it for a while, but came to the conclusion that it was the result of a fevered brain. The next night I had the same dream, and again the next. I then took it as my mission in life to find the man who had foully killed my Robert. I awoke from my apathy, sold the place, and taking you with me started on my pilgrimage. You know the result. Never has my ring changed color. Now, Carl, I am dying, and into your hands I consign this ring, and I ask you by the memory of your murdered father to find the person and bring his crime home to him."

Saying this she placed the opal, with its fine red lines, upon my finger, and then lay back exhausted.

"I promise, mother, never to give up the search while there is breath in my body," I said, intending to find the assassin by modern means instead of superstitious, but I would not pain her by doubting her dream.

Three days she lingered, during which time she told me of her financial standing, and that she did not know of a relative in the world. The third night she passed away, leaving me alone in the world with a terrible void in my life and an unutterable grief. I saw her buried in the little Swiss burial ground, and then returned to the inn and looked my future in the face. I had £50,000, no friends and a veritable vendetta. A week later I started for Paris, stated my trouble, and had the best detectives to work up a hopeless case. In London I did the same, and then crossed the ocean and followed the same course in New York. The opal ring I wore, but seldom looked at it. I made several pleasant traveling acquaintances, and had a number of invitations to visit in Washington, Baltimore and other cities in the States. I refused them all, and went west to San Francisco, staying there until Jan. 1, when I returned to Washington, where I ran across one of my traveling friends, Ray Carrington.

I refused all overtures to go into society or to visit Carrington, but when I was taken ill and threatened with pneumonia my friend had me removed, against my wishes, to his home, where a tall, stately lady smiled graciously upon me, and where I had all the care and devotion possible during a serious illness. This lady, who was Ray's mother, was an angel of mercy to me, a homeless wanderer. One day I was lying on the sofa deluged with shawls, wraps, etc., reading my correspondence from the foreign police offices. Nothing had really been done, although a man had been sent to Ireland. So many years had passed they could hold out little hope to me.

A rap at the door, and "May I come in?" from Ray.

"Of course," I replied. "Why do you ask?"

"Because I have brought you a visitor," he said, as he entered with his arm around a beautiful young girl, whom he introduced as his sister Lilian.

I told her she was very kind to visit an invalid, and wondered what they would think if they knew I was hunting down a murderer of sixteen years ago. Many happy days passed in spite of illness and vendettas. They insisted upon keeping me for a ball in honor of Lilian's twentieth birthday. I found resistance useless, so yielded with as good grace as possible, although I knew such gayeties were not for me, and my mother's death was too recent not to destroy any desire for such pleasures.

However I staid, and on the evening of the ball arrayed myself in my dress suit and descended to the ballroom, which was beautifully decorated with tropical plants and lovely ferns. Lilian was receiving her guests by her mother's side. She was dressed in a gown of silvery fabric, which made her look more than ever like the beautiful fairy she was. I easily mingled unnoticed in the crowd.

As I gazed on that brilliant scene I wondered what the dear mother was thinking as she looked down from her home on high. I thought of the little grave in the far away country, of the vendetta left me as a legacy. Ray broke in upon my meditations, and finding it impossible to persuade me to dance said: "Well, do take Miss Van Dyke into supper and relieve me."

I complied, and upon entering the supper room removed one glove, as my hand was warm. Upon doing so I glanced at the opal ring, and to my horror noticed that it had become a blood red. What could it mean? I glanced around the room and noticed only a dozen people, but these brilliant society people of Washington. What had they to do with my opal turning red? I must be mistaken. No; it was a deep blood red. I noticed Ray's uncle among the crowd—a tall, dark man, conversing with a lady; and I mechanically watched him leave the room, then glanced at my ring and, great heavens! my blood seemed turning to ice, for the ring had resumed its original color. I escorted Miss Van Dyke back to the ballroom and delivered her to a partner. Then I sought an introduction to Ray's uncle. "Mr. Radcliff," he exclaimed, and I saw him start, "where was your home, if I may ask?" "In the north of Ireland," I replied, "and my father was Robert Radcliff." I noticed my ring had again become red, which fact dispelled all doubt from my mind. Notwithstanding how ridiculous it seemed, I continued, "Mr. Carrington, I would like a few words with you privately."

"Not to-night," he stammered, "but to-morrow at 10 a. m." "Very well," I replied, and then sought the smoking room to be able to think. Lilian's uncle. She to whom my heart had gone out was the niece of the murderer of my father, for I had faith that I had found the man. I retired that night to get little or no sleep, to wonder what I should say and do to Howard Carrington, and what motive he could have had for such a deed.

The next morning I called at his residence promptly at 10 o'clock, and was told that the gentleman was not yet up, had not answered when he was called, and must be very tired. A horrible suspicion came over me, and I told the man to come with me, for we must break in the door.

We easily did so, and there, with his head on his arm, leaning on his desk, was Carrington. Then to our horror we saw a stream of blood on the floor and a revolver near it. We went to him and found him dead. The bullet had done its deadly work. On the desk lay an envelope addressed to Carl R. Radcliff. I opened it and read:

"Mr. Radcliff—You have tracked me at last. How I cannot imagine, for I never supposed there was a single clew. Now I know my time has come. I am tired of being hounded by remorse, and should have made way with myself before long anyway. I killed your father nearly seventeen years ago in Ireland. I had fallen passionately in love with your mother long before she knew of your father. She rejected me with scorn because I drank. When she married Radcliff I was wild with jealousy. Still I never should have done him harm if it hadn't been for meeting him that dark night all alone. I was mad with drink, and the deed was done before I realized the crime. I have never since touched a drop of liquor. No one suspected Mr. Carrington, the tourist, of such a deed, and after some time I came here to my friends. Now you know all—H. C."

I never told my friends of this letter or of the crime. They thought it temporary insanity. I now felt free to offer myself to Lilian, and to my joy and astonishment was accepted. Eighteen months from the time of her uncle's death Lilian became my wife. I have always worn the opal ring, which has never changed its color since it showed me my father's murderer.—L. M. A. in Boston Globe.

AMMONIA AND ALUM IN BAKING POWDER.

How to Detect Them.

In view of what the Minnesota Senate has done, it is hoped that legislative bodies in other states will soon take up the subject of food adulteration. The subjoined list of baking powders containing ammonia and alum, compiled from official reports and published in a recent number of the *Scientific American*, is given below. "It deals in a direct manner with an evil which must be cut down" said the *Chicago Tribune* in commenting on the *Scientific American* report. Following is a partial list of

AMMONIA AND ALUM BAKING POWDERS.

Compiled from Official Reports.

Powders marked with a star seem to have a general sale, as they are mentioned in at least two of the reports.

*ATLANTIC & PACIFIC.	*ROYAL.
CROWN.	SILVER STAR.
*DAVIS' O. K.	*SNOWDRIFT
GEM.	STAR.
*KENTON.	STANDARD.

There are, in addition to the foregoing list from the *Scientific American*, a number of such powders sold in the western that were not found in the eastern stores.

Following is a list of the most prominent:

ANDREWS' PEARL,	Contains Ammonia. (C. E. Andrews & Co., Milwaukee.)
ACME,	Contains Ammonia. (Thos. Wood & Co., Philadelphia.)
BON BON,	Contains Alum. (J. C. Grant Baking Powder Co., Chicago.)
CALUMET,	Contains Alum. (Calumet Baking Powder Co., Chicago.)
CLIMAX,	Contains Ammonia. (Climax Baking Powder Co., Indianapolis.)
FOREST CITY,	Contains Ammonia Alum. (Vouwie Bros., Cleveland.)
HOTEL,	Contains Ammonia Alum. (J. C. Grant Baking Powder Co., Chicago.)
HERCULES,	Contains Ammonia. (Hercules Baking Powder Co., San Francisco.)
ONE SPOON, TAYLOR'S	Ammonia Alum. (Taylor Mfg. Co., St. Louis.)
RISING SUN,	Contains Ammonia. (Phoenix Chemical Works, Chicago.)
ROYAL,	Contains Ammonia. (Royal Baking Powder Co., New York.)

Ammonia and alum are the most common adulterants used in the manufacture of baking powders. The Government report shows that a large percentage of the baking powders on the market contain either one or the other, or both these pernicious drugs.

What woman would use an ammonia or alum baking powder if she knew it? Such powders not only undermine the health, but ammonia gives to the complexion a sallow or blotched appearance. The presence of ammonia or alum in a baking powder, however, can easily be detected.

To DETECT AMMONIA.—Mix one heaping teaspoonful of baking powder with one teaspoonful of water in a tin cup; boil thoroughly for a few moments, stir to prevent burning, and if ammonia is present you can smell it in the rising steam. Or, place a can of the suspected powder top down on a hot stove for a minute or two, then take off the cover and smell.

To DETECT ALUM.—Alum powder can be usually detected by putting a couple of teaspoonfuls of the powder in a glass of cold water. If no effervescence, that is bubbling or simmering, takes place, condemn the powder and return it at once.

In Mental Ruts.

"The monotony of certain lines of business and slight use of the mental faculties consequent upon a familiarity of a simple, unvarying routine," said an observant gentleman, "soon gives a stolid, apathetic, half idiotic cast to the human countenance. Take anybody who has little or no variety in his daily life, and in a short time his face is as blank as a piece of putty.

"A wooden impassiveness of feature takes the place of what we term expression, and the intellectual powers relapse into that dormant state that characterizes alike the savage and the idiotic. You will see the same thing in the idle, listless man about town, who is too lazy to work or think, and hasn't enough energy or even inclination to be bad. It is irritating to talk to such people. The restless, nervous man of keen intellectual edge who comes in contact with them chafes inwardly and sometimes outwardly.

"Half the trouble and friction that arises between individual members of the great, active, hustling public and officials of various lower grades is from this very fact. Neither the offender nor the offended understands the seat of the difficulty in dealing with each other."—New York Herald.

Anthracite in Mexico.

The authenticity given by L. B. Howard to the previously reported discovery of a large deposit of anthracite coal in Sonora, Mexico, is of great importance. Mr. Howard, who has just returned from a careful inspection of the properties, brings specimens of anthracite coal whose value is apparent to any one who has used the product of the Pennsylvania mines. The mines are so near the Gulf of California and at the same time so near a railroad that with the construction of a few miles of track the question of transportation facilities would be disposed of. Mr. Howard is confident that the coal could be laid down in San Diego, if brought by water around the peninsula, for $5 per ton. The discovery is of interest and importance, not alone to San Diego, but to the entire region west of the Missouri river.—San Diego (Cal.) Union.

Large Landowners.

There is only one landed proprietor in England posessed of more than 100,000 acres in one county, there being three in Ireland and no less than fourteen in Scotland. In England the Duke of Northumberland is proprietor of 186,616 acres in Northumberland. In Ireland Mr. Richard Burridge is proprietor of 160,152 acres in Galway, the Marquis of Conyngham 129,846 acres in Donegal and the Marquis of Sligo 122,902 in Mayo.

In Scotland the Duke of Argyll is proprietor of 168,315 acres in Argyll; the Earl of Breadalbane, 234,166 acres in Perth and 204,192 acres in Argyll; Mr. Evan Bailie, of Dochfour, 141,148 acres in Inverness; the Duke of Buccleuch, 253,719 acres in Dumfries and 104,461 in Roxburg; Mr. Donald Cameron, of Locheil, 109,574 acres in Inverness; the Earl of Dalhousie, 136,602 acres in Forfar; the Duke of Fife, 139,829 acres in Aberdeen; the Duke of Hamilton, 102,210 acres in Bute; Sir George Macpherson Grant, 103,372 acres in Inverness; Sir James Matheson, 406,070 acres in Ross; the Duke of Richmond, 159,952 acres in Banff; Sir Charles Ross, 110,445 acres in Ross; the Earl of Seafield, 160,224 acres in Inverness.

Last, but not least, the Duke of Sutherland, with no less than 1,176,454 acres in Sutherland, so that his grace is possessed of very nearly the whole county, the total area of which is 1,297,846 acres.—London Tit-Bits.

Japanese Mirrors.

Some Japanese mirrors are supposed to possess a magic quality, which has rendered them objects of superstitious reverence for centuries, and, in fact, it has even puzzled modern science not a little. When a strong beam of light is so reflected from one of them as to be thrown upon a screen there appears upon the screen an image in delicate tracery perfectly reproducing the pattern engraved in relief on the back of the mirror, which of course is altogether hidden from the light. Inasmuch as the face of the mirror presents a surface that is perfectly smooth apparently the reason for this phenomenon is difficult to find. Its cause, however, is simple enough. The preliminary operation of polishing the face consists in scoring the cast disk with a sharp tool in every direction.

The thicker portions, where the ornamentation in relief is on the back, offer more resistance and the result is a corresponding inequality of the polished surface. This inequality is not sufficiently marked to be visible to the naked eye, but it is enough to turn the rays of light, and thus the pattern of the engraving on the back is reproduced on the screen in the manner described. These so called magic mirrors are so highly valued that they sell from ten to twenty times the price paid for ordinary ones.—Washington Star.

Indians of Welsh Extraction.

The three tribes on the Fort Berthold reservation are included in the nine tribes in the United States that have never been at war against the government. Of these three the Mandans are the smallest, numbering a little over 200, smallpox having almost destroyed them about 1853. But they are the most interesting. There is a story to the effect that they are descended from some Welshmen, who sailed west from Wales in the Eleventh century and were never heard of afterward.

The story is that this party reached the mouth of the Mississippi and worked their way up that river. Of course I take no stock in this story, but it is a remarkable fact that many of their words resemble the Welsh language, and they are of a much lighter complexion than Indians usually are. There are full blooded Indians almost white among them.—St. Paul Globe.

The grapple plant of the Kalahari desert is said to be a real vegetable curiosity. In its general appearance it looks more like a star fish than a plant, and each ray or arm is tipped with barbs, which, when fastened to the wool of sheep, have to be cut out, that being the only way of removing them.

For Throat Diseases and Coughs, "*Brown's Bronchial Troches*," like all other *really good* things, are imitated, and purchasers should be careful to obtain the genuine article prepared by JOHN I. BROWN & SONS.

We have not treated Chile illy,
Have done her no unkindly act,
Yet, really, very illy Chile
Is treating us, and that's a fact.

Use Enameline Stove Polish; no dust, no smell.

Try Germea for Breakfast.

Test the seams of your Water Proof COAT Before Buying.

POUR some water in the sleeve holding the end tight as here shown or anywhere else where there is a seam, and see if it is water tight. There are goods in the market that look very nice, but will leak at every seam. We warrant Tower's IMPROVED Fish Brand Slicker to be water tight at every seam *and everywhere else*, also *not to peel or stick*, and authorize our dealers to make good any Slicker that fails in either point. There are two ways you can tell the Genuine *Improved* Fish Brand Slicker.

PRICE REDUCED TO $1.00.

One of the highest offices in the gift of the Government is that of watchman in the Washington Monument.

FRIGHTFUL SHIPWRECKS.

Staunch ships strike and founder, the fierce winds and mountainous waves sweep noble mariners' "hearts of oak" to shipwreck and to death; yet that does not prevent the luberliest landsman from risking his life on the stormy Atlantic in the roll of tourist or commercial traveler. But if he shall reach his destination safely he will scarcely have escaped some of the qualms of sea sickness, unless he takes with him Hostetter's Stomach Bitters, that inimitable specific for nausea. Bad water on long trips are a threat to the voyager, but this may be deprived in a great measure of its disordering effects upon the stomach, bowels and liver by the Bitters. Against the prejudicial effects of malaria, bad diet, fatigue and exposure it is also efficacious. It averts, moreover, rheumatism and kidney complaints. Don't travel on sea or land without it.

Like a true gentleman, after seeing his friends seated at Albany, Senator Hill proceeded to take his own.

THE REV. MARK GUY PEARSE WRITES:

BEDFORD PLACE, RUSSELL SQUARE, LONDON, December 10, 1888.

I think it only right that I should tell you of how much use I find ALLCOCK'S POROUS PLASTERS in my family and amongst those to whom I have recommended them. I find them a very breastplate against colds and coughs.

The young man who is engaged is usually a person to be avoided. He is too complacent for this world; but after he is married awhile he is less self-possessed.

The smallest is the best in pills, other things being equal. But, with Dr. Pierce's Pleasant Pellets, nothing else *is* equal. They're the best, not only because they're the smallest, and the easiest to take—but because they do more good. They cleanse and regulate the liver, stomach and bowels in a way the huge, old-fashioned pill doesn't dream of. Think of trying to *regulate* the system with the ordinary pill. It's only good for upsetting it.

These are mild and gentle—but thorough and effective, no pain—no griping. One little pellet for a laxative—three for a cathartic. The best Liver Pill known. Sick Headache, Bilious Headache, Constipation, Indigestion, Bilious Attacks and all derangements of the liver, stomach and bowels are prevented, relieved and cured.

Put up in sealed vials—a perfect vest-pocket remedy, always convenient, fresh and reliable.

They're the *cheapest* pill you can buy for they're *guaranteed* to give satisfaction, or your money is returned. It's a plan *peculiar* to Dr. Pierce's medicines.

You pay only for the good you get. Can you ask more?

"August Flower"

"I inherit some tendency to Dyspepsia from my mother. I suffered two years in this way; consulted a number of doctors. They did me no good. I then used your August Flower and it was just two days when I felt great relief. I soon got so that I could sleep and eat, and I felt that I was well. That was three years ago, and I am still first-class. I am never without a bottle, and if I feel constipated the least particle a dose or two of August Flower does the work. The beauty of the medicine is, that you can stop the use of it without any bad effects on the system. When I was sick I felt everything it seemed to me a man could feel. I was of all men most miserable. I can say, in conclusion, that I believe August Flower will cure anyone of indigestion, if taken with judgment. A. M. Weed, 229 Bellefontaine St., Indianapolis, Ind."

WHY NOT?

I sometimes wonder (if it be a sin
 I pray our gracious Lord to pardon me)
Of that strange creed the people harbor in
 An eastern country, if it may not be
As true as strange. There are so many creeds,
 So many "I believes;" yet who dare say
There are too many, if each fit the needs
 Of some poor soul to help it on the way?

Or claim that one, and one alone, is right?
 They are all bound in one great brotherhood,
And in two words, it seems to me, each might
 Its teaching to the world express: Be good!
But this belief is strangest of them all,
 That when the chief of angels downward fell
From his high seat above, and by that fall
 Became a monarch of the souls in hell;

That, though God cast him from his lofty place,
 In awful justice for his punishment,
Yet is he bending from his throne of grace
 In tender patience till the fiend repent;
Until his angel nature come again,
 Then will the gracious words of "I forgive,"
Fall on the fires of hell, a cooling rain,
 And every tortured soul shall drink and live.

Then hell and earth and heaven shall be as one
 In love and peace and holy blessedness,
Each warmed and lighted by the shining sun
 Of endless day, the sun of righteousness;
Such is their creed. What think you, ye who hear,
 That they blaspheme? Perhaps; but, tell me, who
Can know these things? However it appear
 I sometimes wonder if it is not true.

—Harriet F. Blodgett in New York Sun.

ALMOST OUTLAWED.

Hartman was by no means a bad man. Youth, love and opportunity made him a criminal. That pocketbook full of bank bills had been left in the counting room. There was no one present, and the young man had thoughtlessly seized it.

All that had happened more than four years ago.

Strange that no suspicion had fallen on him! It is true, he enjoyed the confidence and favor of his employer, but also a happy chance had a good deal to do with it. It happened that just at that time an office boy had been detected in some misdemeanor and forced to leave.

Naturally, of course, he was suspected of having committed the theft likewise. An able young lawyer had been retained to investigate the case, and he was not a little chagrined at his failure to discover the perpetrator.

Hartman experienced a moment of relief, but only a moment, as a burden as of lead seemed to weigh on him.

Might not some new clew be found, some unforeseen occurrence throw light on the matter? The torture lasted for four horrible years. The very thought of it made the perspiration start on his forehead in the coldest days.

Why did he not invent some pretext for going abroad? He was often on the point of doing so, but the fear of arousing suspicion by any singularity of conduct prevented him from putting this idea into execution. So he lived on with this threatening specter ever before his eyes, unable to dispel it or to hide himself from it.

"The others"—he would not even to himself use a more definite expression—"are in jail for their wrong doing—do they suffer more? They are deprived of freedom indeed; the blow has fallen heavily upon them with the sentence of the court; but afterwards there is peace around and within them."

To accuse himself? That would be foolish. Chance had favored him hitherto; why should it not continue to do so?

So more hoping, more trembling.

Hartman had become by his misdemeanor, strange to say—a dilettante in matters of law. He had furnished himself with a book on the criminal code and the criminal procedure, together with various commentaries. These books formed his favorite reading after shutting his door at night. With a hasty eagerness he devoured their contents.

As a chess player would treat an interesting problem, so he treated his case. Mitigating circumstances, the chances in a trial, everything possible and impossible that a layman could extract from this juristic material, were brought into action. More than once he caught himself declaiming a brilliant defense in a loud tone, and then he would listen anxiously; somebody might have heard him.

Hartman had also his favorite chapter, which treated of the statute of limitation. There he read: "The prosecution for crimes that are punishable with no more than three months' imprisonment must begin within five years, etc."

Although he knew the passage by heart, yet he read it again every day, as if its contents might have changed in one night.

Four years and a half have passed; six months more, and he will be free, legally free. The voice of conscience would soon learn to be silent when the pressure of anxiety should be removed. Six months—why should they not pass as a moment; why might not a miracle happen, and time for once, just once, make a leap?

The almanac became, from that time on, his best friend. He could sit bent over it for hours, counting first the months, then the weeks, then the days again and again. In the middle of the night the thought would strike him that he had made a mistake in counting; the lamp was quickly lighted, and his work began anew.

Time never passes slower than when one counts the minutes. It seemed to Hartman sometimes as if it stood still, or as if the minutes grew maliciously to hours, the hours to days.

If he only could spend a few hours in sleep! The thought led him to buy opium, and now many a day and almost every night was passed in artificial slumber. A moment of relief came, when he awoke and realized that so and so many hours had passed.

The continual excitement could not fail to undermine even such a powerful constitution as Hartman possessed. With every day that brought him nearer to the longed for goal, he grew feebler and paler. It seemed to him as if his limbs were lead, as if his head were too heavy to bear. He dragged himself heavily from the sofa to the chair, from the chair to the sofa. When pain in the back seized him he called a physician.

"You are going to have a severe sickness," was his decision.

"Of what kind? Be perfectly frank, I am alone in the world, and must make my arrangements."

"Well, the symptoms look like typhus."

Hartman's face became even paler than before; his eyes stared with the expression of horror upon the speaker.

"A slow fever, in which one does not lose consciousness; is it not so, doctor? Certainly so?"

"If my fears are likely to be realized, I could wish the contrary. The fever begins violently, you are delirious at the crisis, and the worst is over, when you recover consciousness."

To be delirious! Hartman shuddered. To be delirious, not to be master of his thoughts and words, to betray his secret motives, in spite of himself to reveal that with which his mind had incessantly occupied itself—no, for heaven's sake, anything but that!—"I want no sister of mercy, no attendant; look after me at intervals of several hours," he said, turning to the physician.

He smiled at the notion.

Hartman determined not to fall sick; he struggled terribly, and fought with all the strength he had left against the approaching foe.

There he lay shaken by the fever, but still conscious.

"That's the nurse, that's the chair, now I am stretching out my hand, I know exactly what I am doing," he repeated ten times every hour.

"And if it turns out otherwise, would they give any weight to feverish dreams? Nurses, who have to hear so many things, will not notice it at all.

"I have not committed the theft; I know nothing about it. That I will keep repeating to myself continually; perhaps that will influence the delirium. They say the mind runs usually on things that are the farthest removed from the normal thinking, but my thoughts are still perfectly clear."

Then a veil fell over the reality. Instead of the Sister of Mercy, the attorney in his black gown and cap stepped into the room, took a chair and sat down before the bed. Through the sharp glasses the still sharper looks were incessantly directed upon him. Like glowing steel, they bored themselves into his brain.

"You will be delirious, my boy," said the attorney, and nodded his head.

"I shall not," thought the sick youth and clung to his bed.

Day after day the tormentor sat there, staring at him, and listened. Then more and more of his colleagues came, also judges in their robes, and all seated themselves in long rows before his bed. Breathless they listened; one gentleman, old and hard of hearing, always kept his hand at his ear. "Now he will be delirious," they whispered at times. There was a deafening ringing in Hartman's ears.

He felt a terrible rage against the black assembly.

He had a mind to put out his tongue at them and to call: "Wait, if you will, you fools, you will not hear one syllable from me; I shall remain mute as the grave." But he controlled himself and remained quietly lying.

The faces, in close array, drew nearer and nearer to him. Now the nearest were already sitting on the edge of the bed, and now even on his body. They put heavy ice cold law books on his head, heaping them up to a crushing burden. One kept striking him with an invisible hammer on his forehead and crying out madly: "Won't you rave now, won't you?"

It became insupportable. He struck out and shrieked so that the landlord came hurrying up the stairs and looked through the chink of the door, and the attendant drew back in terror, and the physician stood helpless for a moment.

With the greatest effort the feverish patient raised himself and cried loudly and distinctly: "Wretches, you think I would rave and betray myself. Now, just to defy you I shall not do it. See, with a clear mind, to spoil your pleasure, I say it frankly: I stole the money from the merchant Hellwig in his office the twenty-fifth of March, I, Conrad Hartman."

As if relieved, he sank on his pillow. From this moment a sensible improvement was noticed.

The nurse told incidentally about the strange occurrence, the landlord spoke of it, and so it happened that the young attorney had the satisfaction, before the expiration of the period of limitation, of redeeming his previous failure.

The first caller which the convalescent received was the attorney. Without surprise, cold and quiet, he received him and made his confession.

Afterwards he tried several times to drink off his medicine with one draught, but he was prevented from doing so.

So he was able, after a few weeks, to exchange the sick chamber for the prison cell.—C. Shotler in Five Stories a Week.

Behind the Times.

Miss Choteau (from St. Louis, examining Cleverton's Ascot)—Did you tie that yourself, Mr. Cleverton?

Cleverton—Certainly.

Miss Choteau—That's just like you slow New Yorkers. If you lived in St. Louis you could buy your neckties already made.—Cloak and Suit Review.

She Was Ready for Him.

Mr. Winks (solemnly)—A noted physician says that deadly bacteria lurk in bank notes, and that many diseases, especially smallpox, are spread in that way.

Mrs. Winks—Then, dear, you had better give me all you nave at once. I've been vaccinated, you know.—Chatter.

A Bad Habit.

He attempts to kiss her and she jumps away.

"Oh, Matilda!" he cries, reproachfully.

"Forgive me, Gregory. I hoped that I had got over that bad habit of seeming to shrink at such times—with you, at least."—Philadelphia Times.

Insulation Perfect.

Smith (in a terrific storm of thunder and lightning)—Jones, this is getting dangerous. Have you any metal about your clothes?

Jones (always impecunious)—Not a dime.—Chicago Times.

A DESERT SANDSTORM.

Experience of a Party of Travelers in Sahara.

A TERRIBLE NIGHT IN A STRANGE PLACE.

An Awful Combination of Wind and Sand that but few Animals Survive.

On our journeying from Wargala to Golea we were struck by one of the storms. We left that luxuriant group of oases, of which Wargala is the chief town, and resumed our way along the wild desert, following the dry bed of the Wad Mia. Though it was October, no rain had yet fallen, so that the earth still lacked her winter mantle of green. The conformation of the land during the first five days was a variety of firm, pebbly and sandy ground, while a mountain range leads directly to El Golea.

In all parts the firm soil appeared to be excellent for culture if it could only be watered. Tracts of sand of the color of iron rust were to be noticed along the Wad Mia, denoting the existence of some ferruginous spring. The spot where we encamped in our sixth stage was a sea of sand, interspersed with dunes rising from thirty to forty feet. One mount, seventy feet high, probably formed by a whirlwind, was noticeable above all at a certain distance from us. Several long and straight eminences, four or five feet high, with a striking similarity to waves, were to be seen.

Flamingoes gazing at us from the tops of the dunes were the only signs of life the region presented. This bird, the vulture and raven are the only winged creatures seen in the Sahara outside of the oasis. They fly in flocks in the wake of the caravans in expectation of prey, and are often regaled by the death of camels or slaves, as the caravan owners never take the trouble of burying them.

During the preceding nights the sirocco had been blowing hard, without, however, causing much disturbance. But now an atmospherical revolution broke upon the camp. A fearful bluster aroused us from sleep and terrified the horses. Blast followed blast; our tents were terribly shaken, while the wind grew rapidly to the force of a cyclone. The horses were neighing and the camels groaning. Everybody was awakened, and all were obliged to take a frantic hold of the tents from the interior. Some tried to get out to pitch the tents more securely, but could not stand the whirl of sand. Showers of sand were beating upon our tents like a heavy rain. The more courageous men were swearing against the impertinent element which had interrupted their sleep and was blowing down their flimsy shelter. Others were terror stricken, fearing imminent destruction. All were clinging desperately to their tents to prevent them from being carried away, but in spite of their efforts all the tents, one after another, were blown down. Each man underneath grasped frantically at one side of his canvas house and rolled it around his face for protection against the sand. The camels, despite their groaning, were little injured by the gritty whirlwind, and seemed to be quite accustomed to it.

Their incomparable vital strength enables them to stand the sorest privations and the severest weather. They live, indeed, day and night in the open air, and are fed and watered only every three days, thus becoming inured to every hardship and stress of weather.

The horses felt the violent pelting of the sand quite differently. As they are standing up they offer more hold to the fierce wind, and can resist less than the camels, which always lie when at rest. They became distracted and flung frantically against their invisible provoker. The officers shouted to the horsemen to mind their horses, but no one dared move. Finally several horses broke loose, and blinded by the sand ran among the tents, tumbling against the men and falling upon them.

Screams and struggles ensued, increasing the disorder and confusion in the camp. Those who knew not the cause of these cries were prompted to go out and see what was happening. Finally the horses got up unaided and were captured by some of the Arabs, who, better accustomed to this hurricane, were groping and crawling along with their faces covered with a drapery. The cadi commanding the Arabs, seeing that we could not be qualified as "warriors of the desert," as we were unable to brave that unexpected enemy, ordered his men to look to the horses until the tempest ceased.

After two hours of struggle calm succeeded in the atmosphere and peace in our camp. I went out to see the effect of the storm. The dawn which faintly appeared through the dust clouded space threw a gloomy light upon the camp, revealing the overturned tents with the human forms underneath like white shrouds covering corpses. The sand was heaped up against their bodies, and had filled all the interspaces between the men lying under the same tent, almost leveling a surface smooth as a table at the height of their shoulders.

I went up to the animals and found the horses sniffing and sneezing, while the camels a little farther on were lying partly covered with sand in perfect quiet. They seemed to have bravely borne the brunt of the storm. Enveloped in their drapery the Arabs were sitting on the ground with legs drawn up and their bodies leaning upon the backs of their camels as upon a pillow. One of them hearing me raised his head and unrolling his drapery gave me a long look. "Have you not been frightened?" I said to him. "At what?" he answered, as if astonished at my question.

"At what?" I repeated, amazed. "At what has just happened, of course."

"The roar of the ghabilih (sirocco) and the groan of the camel are two sounds familiar to us since birth," he answered.

Dumfounded at such stoicism I returned to my tent, wondering what such a people would not be able to endure. They are truly hardened and toughened in every respect; deaf to the sufferings of others, dumb to their own, inured to fatigue and insensible to hardship.

When I arose at daylight and looked around I could scarcely realize that I was awake. The plain wore quite a different aspect. These large waves of sand that I had noticed the previous day had disappeared. A dune, fifteen feet high, had also been removed, and several of the eminences had been reformed a few miles farther on.

Many tents had been torn, and the sand had penetrated through every fissure and hole in the knapsack, and even into the gunbarrels. The pack saddles and loads of provisions had disappeared almost entirely beneath the sand. Several boxes weighing eighty pounds had been rolled a distance of 300 feet and partly broken. However, aside from the three men who had been stumbled over by horses and wounded, no one felt any serious consequences from the tempest. Two horses were found to have lost an eye from being struck by coarse grains of sand.—Algiers Cor. Louisville Courier-Journal.

Mr. Childs and Lord Sackville.

Lord Sackville, who will be remembered as the late British minister to the United States, and also as an indiscreet letter writer, and who eventually, not being persona grata to this government, was requested by it to accept his passport, has made a claim for rent for the site at Stratford-on-Avon of the magnificent fountain erected by Mr. George W. Childs, of this city, in memory of Shakespeare. Lord Sackville does not display in this matter that generous or even just appreciation of the fine spirit of international fraternity which inspired Mr. Childs' gift which the British press and public have so commonly exhibited.

A due regard for that spirit, a proper reverence for the memory of Shakespeare, would have prevented his lordship making a claim which seems, at the best, selfish and sordid, and which is not entirely free from the suspicion of having been actuated by a desire to retaliate for his summary and humiliating dismissal by this country. It is not at all improbable that his lordship, regarding Mr. Childs as a representative American, makes his claim for rent for the site of the memorial fountain to the end that he may thereby express his lack of regard for this country generally. Whether this be true or not, it is most gratifyingly true that Englishmen of the highest estate in statesmanship, literature, art and society fully recognize the admirable spirit of Mr. Childs' gift, and with unstrained generosity express their admiration of it and their indebtedness to him for it.—Philadelphia Telegraph.

A Volcano Serving as a Lighthouse.

News brought down to Port Townsend by officers and passengers on the steamer Arago confirms the reports as to Mount Bogoslov being in a state of activity. About two months ago there was a violent earthquake on all the islands in the Aleutian group, and soon after Bogoslov, which is on Oumnak Island, began emitting steam and smoke and fire and lava. Bogoslov has been an active volcano since 1796, when the island upon which it is situated is said to have risen from the sea.

Although always marked on charts as extinct several times in the past year smoke and steam have been issuing from the crater, and from its original height of 1,369 feet the volcano has been eaten down to 884 feet above the sea level. Professor Elliot, of the Smithsonian Institution, has visited the island upon which the volcano is situated, and has made important scientific investigations. The flare of fire thousands of feet in height can be seen at night issuing from the mountain.

Mount Shishaldin, which is 5,952 feet high, on Analga Island, is emitting steam and smoke, and, it is thought, will soon be in a state of eruption. This mountain can be seen at sea for nearly 100 miles, and will be of great good to navigation if it should become active, as the pillar of fire can be seen for a great distance, and will serve as a guide through the dangerous Oumnak Pass.—San Francisco Chronicle.

Fare Reckoned a New Way.

Sir Rowland Hill's great discovery of the value of simplicity in vast undertakings seems to have produced little impression as yet upon those who have the management of our railways. In Paris the directors of the queer little line which runs right round the city inside the fortifications, and forms a means of communication between all the great termini, have just made a considerable advance in the right direction.

For the future the fares will be reckoned by the number of stations one passes in traveling. For the first two stations the fare will be twopence; beyond these it will be threepence. One has only to remember that first class is just double the price of the ordinary or second class, and that return ticket are issued for a fare and a half, and one can by looking at a plan see at a glance what one has to pay. Why not try some such plan on the District railway in London.—London News.

A Remarkable Old Man.

A remarkable feat by a remarkable man was lately achieved in this section. It is said that Stiles McMalon, 94 years of age, recently walked from Montpelier to Elmore pond, a distance of twenty miles, before 2.30 p. m. He refused several offers to ride, intending to make the journey on foot. He stopped at George Mower's, at Worcester, ate breakfast and then pursued his journey. He took dinner at Helen Wood's, at Elmore pond, after which he started for Morristown to visit some friends living there, making twenty-four miles, if he made these last four miles on foot. He says he never had a doctor in his life, nor wore glasses, and that he can hear as well as he ever could. His residence is said to be in Barre.—Hyde Park (Vt.) Citizen.

Horse Car Conductors Going to College.

Mr. Leslie P. Strong, who spent his vacation as a horse car conductor, returned to the polytechnic school at Worcester on Tuesday. Mr. Arthur Jones, who has been a conductor on the Worthington street line, has returned to college, and Mr. Walter Ross, formerly of this city, who spent the vacation as a horse car conductor here, is taking a short rest in Hinsdale. He will return to Amherst college.—Springfield (Mass.) Homestead.

Across Florida by Water.

Capt. A. Cook, of the Disston dredge boat which is cutting a canal from Hart lake to the Econlockhatchie, expects to complete the canal by Jan. 1, and then a rowboat may be taken by inland water from the mouth of the St. John's to the mouth of the Caloosahatchee.—Cor. Savannah News.

The world's stock of diamonds has increased enormously in the last fifteen years. In 1876 the output of the African mines was about 1,500,000 carats; last year it was over 4,000,000, and the great "trust" which controls all the principal mines assert that they have 16,000,000 carats "in sight" at the present time.

THE MOON'S INFLUENCE.

A Writer Recalls a Warning of the Astrologers.

AN ERA OF AWFUL SUFFERING AND DEATH

Disastrous Floods, Earthquakes and Life Destroying Epidemics.

Within two short years the pseudo scientists and would be "smart Alecks" have allowed their opinions to undergo a radical change. In predicting the ultimate fate of the earth they no longer calculate that the sun's fires will gradually burn out, and that the temperature will cool until the enlarging glacial zones drive shivering humanity towards the equator, where the remnants of the mighty nations will be crowded out of existence or perish from excessive cold. Neither do they profess to believe now, as they once did, that our water supply will eventually become exhausted. We are no longer hounded to death with the idea that the surface of the earth is diminishing and that the earth will subsequently be devoured by the restless roll of the ocean. The astrologer who a few years ago warned us of the impending danger to which we were being subjected on account of the perihelion of Uranus, Saturn, Neptune and Jupiter is, however, now in his element. It was in 1880, I believe, not farther back than 1878, at any rate, that this occult seer promised us fifteen years of suffering and death. Counting from the last date given, the time during which the atmosphere, according to his opinion, will reek with baleful influences, is not finished by over three years. Hear what the communer with the unknowable says in regard to "Perihelion and Pestilence:"

TRYING TIMES.

"During the fifteen years following the year 1880 the vitality of every living thing will be put to a severe and trying ordeal. Evidence in abundance points to great disasters in the immediate future.

"There will be excessive heat, unexampled cold and a prevalence of flood and disaster in all directions. We do not write to alarm any one, nor to make a sensation. Readers can judge for themselves what importance to attach to the subject. That the conjoint perihelion of all the large planets of the solar system, one of which, Jupiter, is 1,000 times larger than our earth, must disturb our atmospere and temperature very considerably is probable, that this disturbance must be injurious to health and life is certain, and that these periods have hitherto been pestilential is a matter of record. How much we shall suffer during the next twelve or fifteen years depends very much upon how nearly we live in accordance with the laws of life."

In the estimation of the superstitious (the majority of the human race come under that heading, education and boasted Nineteenth century enlightenment notwithstanding) the prophecies of this unknown seer have, to a degree at least, been startlingly fulfilled. Surely we have had atmospheric disturbances enough to be considered verifications of the wildest imaginings of this "prophet of evil."

The most disastrous floods and most violent tempests of the last thousand years have occurred since the "Perihelion and Pestilence" prophecy appeared in The Science of Health. Earthquakes have claimed 60,000 victims, and other disasters twice as many more. Seven comets "shook their fiery manes" during the season of 1881, followed immediately by a period of red suns and blue moons. What effect, if any, the extraordinary aspect of our sun setting in a sea of fire, or of the moon hiding her face behind a cerulean veil, has on terrestrial inhabitants the writer will not attempt to say; that in her normal condition she exerts a mighty influence for weal or woe he does not doubt.

THE MOON AND THE SCIENTISTS.

The great scientists and astronomers concur in the opinion that only the ignorant common people believe the moon to exercise an influence over human affairs; only to tell us on the next page of monstrous tides invisibly put in motion and induced by the very agency sneered at in a preceding chapter. That our attendant satellite does exert a powerful influence over our little globe may be inferred from what we know of its tide producing power alone. As our planet sweeps along at an unthinkable rate of speed it is drawn toward the moon very perceptibly, enough to produce tides on opposite sides of the earth's surface at the same time.

If these great mountains of water can be put in motion by the "pale white orb of night," why should we not attribute it to minor influences, even though they be of a detrimental or pestilential character? Denying the truth in the case can never help matters. "But how can the moon be the cause of tides in America and in China at the same time?" some one says. According to the best authority on the subject of tides, that part of the earth's surface which is turned away from the moon or sun has a smaller degree of attraction than the side next the luminary exerting the "pulling" power; thus, in effect, leaving the water behind, and producing a tide on the opposite, as well as upon the side acted upon directly by the force of gravity.

The moon is now 240,000 miles away; geologists and astronomers tell us that there was a time when it was only 40,000 miles distant, only one-sixth of what it is at the present moment. The tides of today average all the way from three to fifty feet. Say that they are now three feet at the Eads jetties at the mouth of the Mississippi; what would be the result of the moon being brought five-sixths nearer, or back to the old mythical 40,000 mile mark? Instead of tides being three feet at the mouth of the parent of waters, they would rise to a height of 648 feet! The whole of the Mississippi valley would present the appearance of a vast beach; St. Louis would be covered out of sight, and waves forty-eight feet high would flow through the streets of Chicago into Lake Michigan! The writer is not an astrologer, astronomer or soothsayer; he knows nothing of "divinations" or black art; does not even profess to believe that we are on the eve of a pestilential visitation, but will not deny believing in moon influences.—John W. Wright in St. Louis Republic.

Time Works Wonders.

Miss Eligible (whose mother is a she dragon)—You've no idea, Mr. Desirable, how mischievous I was when I was small. Why, mamma, you remember how people used to fight shy of you because I was always sure to be with you and make things disagreeable?

Mr. Desirable—The deuce! Why, the situation is just reversed now, isn't it? That is—I mean—that—a——.—West Shore.

A Queer Condition.

Somebody challenged Jones to fight a duel.

"Well, it's a go," replied that cheerful lunatic; "but only on one condition. You know how near sighted I am. Well, to make things equal I insist that I shall be placed ten paces nearer my opponent than he is to me, for the fellow's got an eye like a hawk."—Judge.

Pins and Needles.

Miss Matoika Gay, one of the leading belles of Richmond, Va., claims to be a direct descendant of Pochahontas.

Mme. Carnot, wife of the president of France, is said to have taken a great fancy to Amelie Rives-Chanler. She considers her the most charming American she has ever met.

The Empress Augusta led a useful and reasonably happy life for nearly sixty years in the atmosphere of courts, and remained unworldly to the last. She was 79 years old, and until the death of the aged emperor had never manifested any marked physical feebleness.

Miss Eva M. Brown, only daughter of John Brown, of Harper's Ferry fame, is the private secretary of Henry H. Faxon, of Quincy, Mass., and has the management of the Quincy political temperance bureau.

D. is not quite 4 years old, but he is very fond of hearing "The Lady of the Lake," and can repeat several stanzas of the poem. The other day he was overheard to say to himself—he was somewhat noisy with his toys—"That makes more racket than 'The deep mouthed bloodhound's heavy bay.'"

Lady Alice Stanley, who accompanied her father, Lord Stanley, on a trip across the continent, reports that the Blackfeet Indians have a captive white child—a little girl not more than 9 years old—in their tribe. Lady Alice heard that she was the child of an officer in the United States army, who was killed, and she begs the government to rescue her.

Lightning Put an Angel on a Portrait.

A portrait of the late John Taylor, which J. H. Smith has on exhibition in his store, attracts many visitors daily, and has caused a great deal of discussion. The portrait formerly rested on the mantelpiece at Mr. Smith's residence at Mount Olive. Recently, during a heavy storm, a lightning flash struck it. The frame was demolished, but the flash left on the portrait a clearly defined picture of an angel with outstretched wings overshadowing Mr. Taylor's head, the arms encircling his neck and the right hand holding a bunch of flowers. The pose of the angel suggests protection and benediction. The dark line showing the lightning's journey along the cardboard turns abruptly just above the face of Mr. Taylor, giving the spectator the idea that the angel changed the lightning's course.

Superstitious people consider it as an indication that Mr. Taylor is in heaven, but Mr. Smith explains the phenomenon by saying that the picture of an angel exactly like that which appears on the Taylor portrait was on the back of a photograph near by. He believes that by some electrical freak the picture of the angel was photographed over the portrait. The affair, however, has caused a great deal of comment, and people for miles around come to see the picture.—Atlanta Constitution.

Visiting the Library.

A visit to the partially completed Congressional library is quite amusing. Not that there is much that is interesting in the shapeless tangle of brick and stone, but it is the instructions visitors get at the gate that are amusing. When one goes in at the wide gate through the board fence on the East Capitol street side he is not apt to notice a little old man that sits in a little house just inside the gate. If one doesn't notice him the old watchman will stop one with an imperative "Hey, there!" One stops, and in the richest sort of an Irish brogue is told: "Now, yez can go in and look about as much as yez loike. But there is some things yez mustn't do. Don't talk to any of the men. Don't go on top of the walls, and don't go inside of the building anywhere. An' don't yez ask any of the men questions. Moind that, now, and yez can see all ye plase."—Washington Post.

He Must Get Married.

Attorney Arthur S. Fisher, of Rockford, is a candidate for matrimonial honors. He is a member of the Owl club, a society of Ogle county bachelors, and his doom was sealed at its picnic on Aug. 15. During the day came the election of officers. Among the officers is one called "the $10,000 beauty of the club," and he who is elected to this office must marry within a year and withdraw from the society. The charm has never failed to work yet, and every man who has been elected to the office has been married within the year. Every other officer is elected by acclamation, but this one is elected by solemn and sacred ballot. When the ballots were counted it was found that Mr. Fisher was the doomed man. The good natured attorney made a pleasant speech, and tried in his clever way to turn it off as a joke. The sequel has never failed to occur.—Chicago Herald.

All That is Needed.

In our physical needs we want the best of anything required, and we want all that is required to be done, to be done promptly and surely, and those in pain, especially, will find all that is needed in what is herein recommended. Mr. T. J. Murphy, 61 Debevoice pl., Brooklyn, N. Y., says: "Having been afflicted with sciatic rheumatism for some time past and finding no relief, I tried St. Jacobs Oil, which I found very efficacious."—Miss Clara Alcott, Mahwah, N. J., writes: "I bruised my limb and it became greatly swollen and stiff. I used two bottles of a patent liniment which did not relieve me. A physician was called who ordered the limb to be poulticed, and he gave me medicine internally, without benefit. I then got a bottle of St. Jacobs Oil, which cured me. It acted like magic."—Mr. Lorenzo Buck, Bancroft, Shiawassee Co., Mich., says: "I had chronic rheumatism for years, contracted during the war. After sitting or lying down, at times, I could not get up, from stiffness and pains. At work my strength would give out, then I would pass through a sickness of several weeks. I had to walk with a cane and was at one time so ill I could not lie down without terrible pains in back and limbs. I tried St. Jacobs Oil; next morning got up out of bed without assistance. To-day I'm a new man and walk without a cane."—Mr. A. H. Cunningham, Perryopolis, Fayette County, Pa., writes: "My wife was sorely afflicted with lame back for several years. She used innumerable liniments, but experienced little relief until St. Jacobs Oil was used. I can confidently say we owe her cure to its wonderful effects and would not keep house without it."

MOHAMMED KAHN, PENSIONER

Peculiar Career of a Native of Afghanistan.

HE CLAIMED TO BE A WEALTHY NOBLEMAN

Serving as a Soldier of Uncle Sam in the Civil War.

"I will never forget," said a former clerk of the house committee on invalid pensions, "one case that came before me for report. The bill had been introduced by the Hon. J. Proctor Knott. The applicant had been rejected at the pension office, then presided over by Bentley.

"The applicant was an oriental named Mohammed Kahn. He had been brought to this country in 1861 by Goodyear, Buchanan's minister to Persia, and Goodyear dying soon after he was thrown on his own resources in a country of strangers with a strange tongue and strange manners. A recruiting sergeant got hold of him and enlisted him in a Massachusetts regiment soon after the first battle of Bull Run.

"Being an ignorant man, the sergeant thought he was an Indian and enrolled him as such, of the Blackfeet tribe, and named him John Ammahoe. He was sent to the front, and was wounded in one of the battles of Jackson's 'Italian' campaign. He was separated from his command, and a wounded colonel of a Pennsylvania regiment, mistaking him for a negro, took possession of him, registered him as a contrabrand and made of him a body servant. The colonel got a leave of absence till his wounds were healed, and carried Ammahoe with him to Carlisle, Pa., where he remained six months.

"Deserting his master he enlisted under the name of Mohammed Kahn in a Pennsylvania regiment, and was severely wounded at Gettysburg. He was then discharged, though by some mistake he was borne on the rolls of both regiments as a deserter. Half a dozen claim agents had tried to get a pension for him without avail. He drifted from Boston to New York, to Philadelphia, to Washington, and at least a score of surgeons had reported that he was disabled by gunshot wounds.

"One day he approached Mr. Knott and related his story. He claimed to have blue blood in his veins, and asserted that he had been of the household troops of the Persian emperor, having been recruited in Afghanistan, whence came the finest cavalry of the East. He was an expert swordsman and the blood in his veins was of the Hotspur order. Knott is a man of gorgeous imagination, and no doubt, as the poor fellow recited his pathetic story, visions of the wondrous clime of the sun rose before him.

"His mind was carried back to the days of Tamerlane and Saladin, or Solyman the magnificent, and the Mamelukes, that nearly wrested victory from even Napoleon's veteran columns. He introduced a bill for Ammahoe's benefit and it came before me. Daily he besought me to look into his case. I thought he was some worthless negro, too lazy to work, and put him off.

"One day, however, I took up the papers and soon became absorbed in the military history of the fellow as it was sent to the committee from the adjutant general's office. I asked him to relate the story of his life. He claimed that at home he was a nobleman, and that he was the owner of vast estates in Afghanistan. 'Why do you not return there and enjoy your patrimony, instead of waiting here for a miserable pension?' said I.

"He answered, 'I have eaten hog and I have got drunk; they would execute me at home if I should return.' I made a favorable report on his case; the bill passed and he got his pension."—Louisville Courier-Journal.

Propulsion by Jets of Water.

Alexander Vogelsang, a resident of Brooklyn, thinks he has discovered the secret of the successful propulsion of ships by jets of water. The real loss in all jet propulsion has been, he says, that as the direction of the jet has always been in a straight line in an opposite direction to the vessel's way the jet cannot find a fulcrum close to the discharge to act against except the peripheral part of said jet. It has occurred to Mr. Vogelsang to use two or more jets, the nozzles pointing in an opposite direction to the vessel's way, and to make these jets revolve around a common axis in circular paths like the tips of a screw propeller.

The object was not to allow the jet time to give velocity to the water acted upon and so to find a solid fulcrum for the entire area of the jet close to the discharge. The inventor is sure that this will prove the most economical and efficient method of propulsion yet known. Screw steamers can be readily altered without disturbance of the hull.—Boston Transcript.

Ought to Be Careful.

I was over in Hoboken the other day, and while wandering around I saw a painter finish painting an awning post and hang up a placard with the word "Paint!" on it, so that all might read. It wasn't two minutes later when a man came along and backed up against that very post and rubbed away at it for three or four minutes before he discovered that he had struck it rich. Then he yelled out in great indignation:

"Why didn't you hang up a sign here?"

"Isn't there a sign right there before your eyes?" asked the painter.

"Yes, but it only says 'Paint.' How did I know whether it was fresh or dry?"

People ought to be more careful about these things. A grocer in Avenue B must have thought so, too, when he put out a dozen boxes of blackberries and placarded them, "Genuine Black Berries."—New York World.

The Limit.

Daughter—Why is it, ma, that a honeymoon is supposed to last only three months?

Ma—At the end of three months the quarterly bills come in.—New York Weekly.

This Is an Optical Joke Only.

"Miss Henderson laughs just like a man."

"Too bad. I hate a woman who is guilty of manslaughter."—New York Sun.

A Degeneration.

She—Have a good time abroad?

He—No. Paris is getting vulgar and tiresome, there are so many of my own countrymen there.—Harper's Bazar.

Not a Confirmed Habit.

Tenant—But does the chimney always smoke like that?

Landlord—Oh, no! Only when there's a fire in the grate.—West Shore.

Indeed!

Jack—A friend in need is a friend indeed.

Tom—Um—ye-es—if he doesn't need too much.—New York Herald.

INYO INDEPENDENT.

Wm. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, MARCH 4 1892

Senator Stanford has written to a friend that "so far as the Central and Southern Pacific railroad companies are concerned they cannot derive any benefit from this bill (the Stanford land bill), as their lands are all covered by a mortgage." This mortgage is in the form of bonds, which may be purchased in the market. If the Government loans money at 2 per cent, would not the company, which has to pay about 6 per cent interest on bonds, find some way to convert 6 per cent bonds into 2 percents, the security in each case being the same. Mr. Stanford also says: "It is a query in my mind whether all the patrons of railroads are not interested in reducing the burdens and expenses of the transportation companies, for I do not see how the roads can avoid looking to the public for means to meet their necessary expenses. In the end it is largely the patrons of a railroad who have to bear its operating expenses." The query in Mr. Stanford's mind exists also in other minds. The assertion that in the end it is largely the patrons of a railroad who have to bear its operating expenses will not be contradicted by any patrons of the Southern Pacific system. No man is so unreasonable as to ask the railroad companies to do business at a loss. When a snowstorm in the Sierra Nevada Mountains costs the company $100,000, the patrons of the road know that in the end they have to make the loss good to the company. They do not ask to be relieved of this obligation. But there is a kind of operating expenses which are not so willingly borne. The public do not exactly see why they should be charged rates of fare and freight to enable the owners of one system of roads to accumulate private fortunes aggregating $100,000,000. They do not see why the cost of running a political campaign should be borne by patrons of a road. Neither have these patrons been able to see the justice of being compelled to pay money for the purchase of legislative bodies and courts. These are matters upon which Mr. Stanford, or some of the men who have charge of his political conscience, can throw considerable light. That the patrons of a railroad must, in the end, bear the operating expenses of a railroad will be conceded; but why should these patrons bear the operating expenses of a political campaign, the principal object of which is to elect a railroad magnate Senator?

Andrew Carnegie was interviewed at New Orleans last week with reference to matters political and otherwise. Carnegie is dead sure that Harrison will be the Republican candidate for President and will be elected in spite of all the Democrats can do. Speaking of the effects of the McKinley Act, he says it has been a blessing, not only to the manufacturers, but to the working men as well. A person is absolutely indecent when he speaks in this way. There is no doubt but that the iron and steel makers have been greatly benefitted, but the result has been the reverse with the men they employ. Carnegie himself has reduced the pay of his men since the law went into effect. He now holds a detachment of the Pinkerton standing army at the Homestead steel works in order to maintain submission to the cut in the pay of his men. He will probably give Harrison a twenty-five thousand dollar check, in case he gets the nomination, as part payment for the benefits he derives from the McKinley Act. Governor Campbell's question remains unanswered. During the campaign he gave a list of two hundred firms who had reduced the wages of their men, and asked for a list of five firms whose protection had been increased who had raised the pay of their men.

A party of prospectors, under the leadership of Thomas L. Doran, recently left San Francisco with the object of finding the long lost "Peg leg" mine in the Colorado desert. The party intended procuring pack animals and equipments at San Diego and thence strike out for the desert. It is composed of practical miners and is under good leadership. There is a fascination in the search for "lost mines," and men will brave hardship of every sort, even risk of death from thirst or starvation, in the hope of finding properties of such fabulous richness. Another party, having a clairvoyant for a guide has been organized in St. Paul to seek a lost mine in Nevada. A large sum of money is being embarked in this visionary undertaking.

A FIGHT TO THE DEATH.

A FIERCE AND BLOODY KNIFE DUEL IN A MOUNTAIN TOWN.

It Was the Culmination of a Long Standing Feud, and Was Precipitated by a Cur Dog—Sanguinary Results of Unbridled Ferocity.

It was Saturday and "trading day," and the little mountain town was filled with scores of both white and colored people from up and down the valley. There was considerable drinking, but everybody seemed good natured to me. I could not see the slightest sign of uneasiness, but by and by the captain came to me as I stood in front of the postoffice and said:

"Looks mighty like thar' was gwine to be bloodshed yere!"

"Why, everybody seems peaceful and serene, so far as I can see."

"Yo' doan' know these folks. See that yere gatherin over by the harness shop? That's the Jackson crowd. See that other gatherin over by the drug store? That's the Berry crowd. They're jist eyin each other like two bulldogs, and a leetle mo' whisky'll bring on a fout."

"Is there any feeling between the two crowds?" I asked.

"Powerful bad. I dun goes cl'ar back to the wah. The Jacksons was Union and the Berry's was Confed. Thar was houseburnin and robbin and shootin, and they doan forget. It's the fust time the two crowds hev bin in town together fur more'n a y'ar, and I doan like the looks of things."

"Can't the officers of the law keep them quiet?"

"Officers of the law! Why, man, if them crowds were to break loose fifty officers of the law couldn't prevent bloodshed!"

The leaders of the respective factions were men who must have been mere boys when the war broke out. Each had about a dozen adherents, who were all more or less closely related.

HOW THE FIGHT STARTED.

They did not seem at all anxious for a conflict and might have gone their ways without a blow but for the action of a dog. He was a mean looking cur and belonged to the Jacksons. In wandering around he got into the Berry crowd and one of the men sliced about six inches of his tail off. The dog rushed back to his master, while the Berry crowd mocked his yelps of pain and fright.

All of a sudden Steve Jackson stepped to the middle of the street, flung down his hat and shouted:

"Tom Berry, ef yo' hain't a coward, come out yere and fight me!"

The challenge was instantly accepted and within sixty seconds a ring was formed and 300 people were looking on. The men were pretty evenly matched as to height and weight and age. It was not to be a battle with fists, but with long, keen hunting knives, and you could tell at a glance that it was to be a fight to the death. At first there was much jostling and moving about, accompanied by shouts of encouragement to the men, but after a few moments it was quiet—painfully quiet. I think there were at least thirty women among the onlookers and fully that number of boys and girls from ten to eighteen years of age.

BOTH DUELISTS KILLED.

It was the first and only time I ever saw men fight with knives, and it was a horrible thing to see. As soon as their friends fell back they rushed upon each other with the greatest fury. Each griped the other with his left hand and stabbed and thrust, and each was wounded four or five times before they broke loose. Not a person in the crowd spoke above a whisper. Every eye followed the men as they feinted and dodged like prize fighters, and men and women shivered and gasped for breath as one or the other of the knives drank blood.

The road was dry, but without dust. Presently it was dyed with blood. The men slipped a little now and then as they dodged about. Blood ran off their finger tips, down their legs. I trembled like a leaf. I felt a horrible disgust, and yet I could not move away. I felt I must see the end.

When the fight had lasted a quarter of an hour, and one man had eight stabs and the other nine they suddenly clinched each other, as at first. Neither uttered a cheer, curse or groan.

They stood square up to each other, and hacked and cut and thrust until both sank down from sheer weakness. Jackson died within ten minutes; Berry lived about thirty. The one had thirty-three wounds, the other twenty-eight. As they were picked up by their friends and carried into the drug store to breathe their last, the hogs running about the village came and disputed with the dozen dogs over possession of the blood pools.—Detroit Free Press.

A Boarding School Supper.

A teacher in a large boarding school for young ladies used to jest over a pupil whose appetite at table caused her neighbors serious alarm. It was the custom to have hot raised biscuits twice a week for supper, and this girl, after eating six one evening, gave her teacher and doctor a very bad night indeed. It never seemed to enter anybody's head that hot yeast biscuit was the food above all others to cause morbid appetite and bilious attacks. Yet the supper of hot biscuits and cheese with honey or preserves is one of the institutions of boarding schools, and worse fare for growing girls it would be hard to find.—Shirley Dare's Letter.

A Well Superstition.

One of the comparatively modern superstitions of the eve of All Saints is found at the bottom of old and abandoned lime kilns. Just where it began nobody can tell with certainty, but in all probability Ireland has the best claim to it. At all events, it used to flourish in that country some years ago. A girl with no beau or a girl with too many beaux is puzzled to find out who is the lucky chap destined to become her husbond. In such a predicament all she has to do is to arm herself with a spool of strong thread and start off after dark on the eve of All Saints to some old lime kiln reputed to be the abode of evil spirits.

Standing alone on the edge of the deep hole, the candidate for matrimony repeats the Lord's prayer backward. Then she takes the end of the thread in her left hand, and after tossing the spool into the chasm before her, patiently waits for a bite. Soon she will feel three pulls and she must politely ask his satanic majesty to be kind enough to tell her the name of her future husband. A voice below will pronounce the name.—Galig-

LONE PINE, CAL.

—THE FINEST—

WINES,
BEER,
LIQUORS,
& CIGARS.

This Saloon is conducted in a strictly first-class manner, and every attention tendered my patrons. FRED. BURCKHARDT,
jl2-tf Lessee.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn three thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars FREE. After you know all, if you conclude to go no further, why, no harm is done. Address,
E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 58 10-0; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hallhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispicada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieths (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah, deceased.
Dated, Independence, Cal., February 11th, 1892.

Sunday School at Lone Pine at 10 a. m.; Independence 2:00 p. m. Georges Creek, 2:15 p. m.

Rev. H. J. Winsor will preach at Lone Pine on Sunday at 11 o'clock a. m.; at Georges Creek, 2:30 p. m., and at Independence at 7 p. m.

N. S. G. W.

Where? When?

To-morrow evening.

At the Agricultural Pavilion.

For particulars see the advertisement.

The Independence school closes to-day.

F E. Densmore Esq. visited Keeler on Sunday last.

L. A. Anger has purchased the Thiebaut place about four miles north of town.

Jeff Zeigler and Al. Staudinger came up from Keeler on Tuesday's train, returning to-day.

John Shepherd has a fine lot of young mules in his corrals feeding them preparatory to making a drive to the San Juaquin valley.

Charley Williams went to Olancha early in the week to take charge of the Laird cattle recently purchased by Kirman and Rickey.

Meetings of the Directors of the Lone Pine Canal Company and the Stevens Ditch Company were held at Lone Pine last Monday.

The Sierras received a new coating of the beautiful during the week. There was also quite a fall of snow on the Inyo range. No lack of water this year.

There will be no school for the next six months at least, and the children will have a good opportunity to forget what they have learned in the past six months.

The local wheat crop last year was wholly inadequate to supply the home market. A large quantity of flour must of necessity be imported from the Lower Country.

A letter from C. Mulholland states that he arrived at Mojave in good shape. Miller's stage line makes good time and every possible comfort is provided for passengers.

Jose Lopez was examined last Monday on a charge of insanity and committed to Stockton. Under Sheriff Holland and H. Levy started below with him on Tuesday.

Owens Lake is higher this season than for several years past. The cause is attributed to the exceptionally heavy snows which fell in the Sierras during the last two years.

A letter from George Lewis states that he has 200 sacks of ore ready for shipment, which he expects to forward on Monday. Also that he will soon begin jigging about 70 tons of screenings.

Hon. P. Reddy has been appointed to represent Inyo county as a member of the State Miners' Association. At the same time Frank Fitzgerald was appointed Vice-President for this county.

The Carrasco Brothers opened their new saloon at Lone Pine last Monday evening with a Leap Year Ball. Quite a number of Independence people went down, and all report having had an enjoyable time.

The measles are epidemic at Lone Pine. Eighteen cases were reported last Monday, all of them being children. With prompt medical attendance and the exercise of proper care no serious consequence need be apprehended.

The Holmes mine of Candelaria last year produced 309,144 ounces of silver, which should have had a market value of $409,960, but owing to the outrageous discount on the white metal there was a loss of $96,580.

To-day being the the close of the present term of school, an entertainment consisting of addresses, recitations and songs will be given at the school house this evening. Parents should manifest their interest in the advancement of the children by attending.

Peter Gallagher received a very painful wound at Panamint about two weeks ago. He was joining a giant powder cap to a piece of fuse, when the cap exploded, blowing off the thumb and fore-finger of his left hand. The injured man came in to Lone Pine for treatment.

The Supervisors of Tulare county have decided, in defiance of the decision of the Supreme Court, to authorize the Assessor of that county to employ fourteen extra deputies. If the County Treasurer pays the warrants for the salaries of these extra deputies some political opponent may make it interesting for his bondsmen.—*Times*

L Briggs, the man who was cut in the affray at Keeler last week, was in charge of the new channeling machine at the marble quarry, and until he is able to return to work the machine must necessarily remain idle. The injured man is at Lone Pine receiving surgical treatment, but in all probability he will be able to go to work again in a few days.

Mr. and Mrs. John Barnes will give their customary annual ball at the Lake View Hotel, Keeler, on Wednesday evening March 16th. This will be the 7th affair of the kind, and Mr. Barnes says that this occasion will eclipse all its predecessors. The 17th of March being the grand rallying day of the sons of the Green Isle, a jolly time may be expected.

Mr. C. W. Reed, proprietor of the Hotel Dellone, Omaha, one of the finest new and modern hotels in the west, says of Chamberlain's Cough Remedy: "We have used it in our family for years with the most satisfactory result especially for our children, for colds and croup. It can be depended upon; besides it is pleasant to take and seems to be free from chloroform and the only substances put into many cough mixtures. 50 cent and $1 bottle for sale by

A. K. EUGLEY,
Big Pine.

Railroad Extension.

At a meeting of the stockholders of the Carson & Colorado Railroad Company held at San Francisco last week a new organization was effected for the avowed purpose of extending the road to Mojave. Mr. Yerington said several years ago that D. O. Mills was anxious to extend the road but that Nicholas Luning and other share holders were averse to investing more money. Mr. Mills now owns a controlling interest and his confreres are with him in the matter of extension. Judging from comment we have seen in San Francisco and Los Angeles papers it is altogether likely that the work will be pushed to an early conclusion. It was a matter of self preservation on the part of the C. & C. people which determined them upon this course of action. The Denver, Rio Grande and Western Railroad has determined upon extending to the Pacific Coast. Their choice of routes lay between going through by way of Pioche, Belleville and Owens Valley, and the old emigrant road by the Resting Springs to Barstow. If they should determine upon the former route the C. & C. might as well pull up its rails. It is to head off such a possibility that determined the owners of the Carson & Colorado to extend their line. A conference of the Denver & Rio Grande managers is to be held at Los Angeles next week and the route they will take will be resolved upon then. It is impossible to overestimate the benefits which a railroad connection with Mojave will confer upon this county. Miners, farmers and stockraisers will all be benefited; and the one industry which more than all others will be made highly remunerative is that of fruit growing. Los Angele will afford a steady and profitable market for all the fruit, and particularly apples, that can be produced here. We can only hope, "God speed the good work."

A New Storage Reservoir

During the greater part of last week Messrs. Austen and Brooks were engaged in running surveys and making estimates relative to building a storage reservoir in the mountains south of Lone Pine. There is a creek which comes out of the Sierras about eight miles south of that place and empties into the head of the lake and to store its waters a dam will be built. On Tuesday morning Mr. Austen started for the scene of operations with a crew of ten men who were to be put to work shoveling. The outfit comprised cooking and sleeping tents, bedding, provisions and everything needful for a permanent camp. The work will be prosecuted vigorously that the water may be used for irrigating purposes this season. At the point of leaving the mountains the stream attains considerable proportions; but as from there to the lake the country is sandy the stream dwindles away and sinks in the sand. To prevent this loss flumes and water-tight carrying ditches will be constructed. With a proper system of works enough water can be obtained to irrigate several hundred acres of land. San Francisco parties own several desert land locations between Lone Pine and the lake and it is presumed that the work is being done to irrigate this tract. Mr. Austen is negociating with the Stevens Ditch and the Lone Pine Canal Companies and it is highly probable that he will ultimately secure the interests of these corpocations. With the completion of the Lone Pine Canal and the storage reservoir now under construction a large tract of the very best quality of land will be brought under cultivation. Mr. Austen speaks in the highest terms of the courtesy and accommodations tendered him by the people of Lone Pine and vicinity.

A Runaway.

Last Monday Christobal Carrasco and his father came to Independence with the insane man, Jose Lopez. It was necessary for Chris to remain until the next day, and in the evening the elder Carrasco started to return to Lone Pine with the team and buggy, which belonged to J. G. Dodge. About four miles south of Independence there is an old wagon road leading into a wire fence. It being dark the team took the road without the driver perceiving it, and ran against the fence, forcing their way through. The animals became frightened and ran through the fence again, where the buggy was left in a sadly wrecked condition. One horse is severely cut by the barb wire, the other being injured. The driver was not hurt.

Under-Sheriff Holland brought Harry Haskels, the knife wielder, up from Keeler last Friday and lodged him in the county jail. Witnesses were summoned, and depositions taken on Tuesday, and Haskels was released from custody, there not being sufficient evidence to hold him. The injured man, L. Briggs, states that he believes the cutting to have been an accident and declares that Haskels was not to blame for what he did. The fact is, the whole affair was a drunken row, and none of the participants know just what did happen.

Shakespeare gives the following excellent advice:

"Melancholy is the nurse of frenzy,
Therefore, they thought it good you hear a play,
And frame your mind to mirth and merriment,
Which has a thousand harms and lengthens life."

Don't fail to profit by it and attend the entertainment at the Pavilion to-morrow night.

No healthy person need fear any dangerous consequences from an attack of la grippe if properly treated. It is much the same as a severe cold and requires exactly the same treatment. Remain quietly at home and take Chamberlain's Cough Remedy as directed for a severe cold and a prompt and complete recovery is sure to follow. This remedy also counteracts any tendency of la grippe to result in pneumonia. Among the many thousands who have used it during the epidemics of the past two years we have yet to learn of a single case that has not recovered or that has resulted in pneumonia. 50 cent bottles for sale by

A. K. EUGLEY
Big Pine.

Many persons who have recovered from la grippe are now troubled with a persistent cough. Chamberlain's Cough remedy will promptly loosen this cough and relieve the lungs, effecting a permanent cure in a short time. 50cent bottles for sale by

A. K. EUGLEY,
Big Pine.

$3000 A YEAR! I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a Year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. No money for members successful as above. Easily and quickly learned. I desire but one worker from each district or county. I have already taught and provided with employment a large number, who are making over $3000 a year each. It is NEW and SOLID. Full particulars FREE. Address at once, E. C. ALLEN, Box 420, AUGUSTA, MAINE.

HIGH APPRECIATION.

It pays to make honest, pure goods. Take the success of Dr. Price's Cream Baking Powder that has maintained its standard for purity and excellence for the past forty years. It is the oldest and now the only Pure Cream Tartar Powder to be obtained. Dr. Price has spent almost his whole life perfecting it, and enjoys the distinction of being the only physician that has devoted his time entirely to perfecting the articles of human food that bear his name—a name and a reputation synonymous with pure food preparations throughout the land.

Here are the indorsements of the United Cooks and the Pastry Cooks' Association of the United States. What higher praise. Its officers, whose signatures are given, are all men who have given dignity and character to their profession. Members of these associations are the chefs and cooks of the leading hotels, restaurants, clubs and private families, and certainly no higher commendation could be found for an article of daily use in the practical culinary art, like that of baking powder. Here is what they say:

This is to Certify, That the Cooks of this Association, and its members, have used Dr. Price's Cream Baking Powder and recommend its use in preference to all others.

For quick raising and fine cakes, pastry, etc., it has no equal. It is free from ammonia, lime or alum. The most perfect Baking Powder made.

"A great invention has been made by Dr. Tutt. That eminent chemist has produced

Tutt's Hair Dye

which imitates nature to perfection; it acts instantaneously and is perfectly harmless." Price, $1. Office, 39 & 41 Park Place, N. Y.

Mildest, purest and best smoking tobacco made. Does not bite the tongue. Mastiff gives more solid comfort in one package than you can get out of a dozen others. Packed in canvas pouches.

J. B. Pace Tobacco Co., Richmond, Virginia.

A FACE.

Hast thou eaten of pomegranates that thine eyes
Hold the look of one who ever faintly sighs
For a land of blessed shadow, strangely sweet,
Where a king in days long vanished stayed thy feet?

Hast thou eaten of pomegranates that thy mouth
Bears the stain of that rare fruitage from the south?
Is it that which through thy pulses soft has stirred,
O'er thy cheeks its red wine flooding at a word?

Some day as we stand a dreaming there shall ring
Clang from silver bitted horses of the king.
We shall turn to give thee question, wonder eyed,
But to find that thou hast vanished from our side.

O'er the belted bees' sweet humming there shall fall
Far and near throughout the morning tender call,
As we wander, heart a hungered, for some trace
In the meadows and the pastures of thy face.

Mourning Ceres long went calling, worn and faint,
Till at last the gods gave answer to her plaint;
But for us no sleepless Ida watch doth keep,
All the old gray gods of Hellas lie asleep.

Back the silver bitted horses ne'er shall bring
She who ate of red pomegranates with the king.
—Overland Monthly.

A WITCH BEWITCHED.

A water lily fell at Mona's bare feet. She knew quite well what it meant. She knew whose boat was coming around the bend in the river, but she did not stir nor look up. She was leaning against the old oak tree at the water's edge, and idly picking to pieces a spray of goldenrod. The sunbeams sifted through the tree and flickered over the dusky head, slipped down past the lowered lashes, kissed the dimples on the bare elbows. The oars in the water ceased their regular plash and the boat glided up to where she stood.

The bits of goldenrod floated by on each side.

"An', Mona, did ye have no greetin' for me? Why did ye come?"

Mona drops the last scrap of flowers and looks at him.

"Is it that you think I have come here to you?" she laughs. "Gerald, sure ye don't think that?"

"And why not?" he says, in an injured way. "I told ye Sunday I was goin' to the Shallows; didn't I ask ye thin to come down?"

"Perhaps," she says. "I have forgot. I came down to pick the cress; 'tis busy I am."

So she flashes one glance at him and picks up her basket, as yet empty.

"Cress! Why, Mona," he says, "come, get ye into the boat. This cress is not half so lush as some a bit further. Come on," he urges.

Mona hesitates, and swings the basket up and down. Back across the green slope of land she looks, across the stile and just beyond the hill, where a faint film of smoke creeps up curling from the little chimney barely visible.

Gerald follows her gaze. "Come, Mona," he says. "They won't miss ye."

"Well," she says slowly, "well." In reality she is longing to go, but of course it would not do to let him see it. "Ye needn't help me. I can get in."

Lightly he dips his oars, and they glide down the river. Mona laughs.

"They will be after me soon," she says. "Aunt Mollie will be a-callin' me, but she won't know; will she, Gerald?"

"No, colleen," answers Gerald in delight at the smiling face she turns to him. He rests his oars in the oarlocks and lets the boat drift.

"Mona," he says, bending toward her, "Mona, listen"——

"An' won't I catch it, too!" she says with a peal of laughter, as though catching it would be a festive occasion. "Here's the place; yes, Gerald?"

"Yes," he answers moodily. "Wait, I'll get the stuff; ye needn't move."

She catches hold of the bending branch of willow and draws the boat close in shore. One small bare foot swings back and forth in the water as she balances herself on the prow and hums softly to herself. She knows he is angry; she guesses what he had started to say to her a moment ago, but what does she care for that? The lips are demure and serious as she thanks him, but the violet eyes are laughing.

"Gerald," she says, when the oars commenced to move, "Aileen's here."

"Aileen?"

"Yes. She has the chance to see us now while Lady Lindores is at home. She is still my lady's maid, ye know, Aileen is, and it's myself would like to be in her place."

"Mona! Ye would like to go away from—from Kilgarnock?"

"Yes," she cries, "surely."

The boat's keel ran up to the landing place. She jumped out and then turned away with the basket in her hand. One glance she gave him over her shoulder.

"An' would ye care, Gerald?"

"Faith, 'tis not the likes of me she would be afther plasin'," he said to himself as he watched the little figure trip up the green sward and over the stile.

He forgot about the fishing expedition he had planned. He leaned back in the boat and fell to thinking. All the witches in the world are not yet suppressed; there are still some few left to tangle up the senses of a man and leave him in bewilderment. The witch in Kilgarnock must have taken up her abode in Mona Carey's small head. To torment the lads of the village, to beguile and capture each unsuspecting heart, were accomplishments in which long practice had made her perfect. There seemed such a sunshiny atmosphere always around her that it made her as dangerous as she was lovable and winning.

Unlucky Gerald! All her life he had known her, even back to the time when she had begun to talk in broken baby phrases.

Although he was years older than she Mona treated him in the same careless, laughing way in which she did all the other suitors. And though not one of them could boast of any especial mark of favor, yet each one believed himself to be ahead in the race—each one except Gerald Shearn. Daily he questioned himself, tried to understand her; "but no," he thought bitterly, "it's an omadhaun I am; she laughs at me."

With all the love of his passionate, Irish nature he loved the maid, worshiped pretty Mona, who would look at him so roguishly from under long lashes and would not listen. And now he heard her voice calling:

"Lightfoot, Lightfoot, come up, come up; come to me, accushla!" and the tinkle of the cowbell echoed back again. He pictured her sitting on the little stool and milking the cow; he knew how she would look—he had often watched her. The sleeves of her frock would be pushed up over her round arm; the dark rings of her hair would lie loosely over her head and float against the dull dun of the cow's side. He imagined he could hear her talking and cooing to old Lightfoot, who seemed to him so unappreciative.

He remembered Aileen. She and Mona were about the same age, but so unlike in appearance that kinship would have never been suspected. While Mona was rather below the average height Aileen was above it; Mona's curly tresses were black as midnight, and Aileen's bronze gold.

It had been a proud moment to them all when my Lady Lindores sent for Aileen to come to the "big house," as the tenantry all termed the great stone mansion, and prouder still when my lady made known her wishes that Aileen should accompany her as maid.

Not a throb of jealousy quickened Mona's pulses at Aileen's good fortune. She rejoiced with her cousin, and was unfeignedly glad. And now my Lord and Lady Lindores were home for a short while after a year of absence, and Aileen was back once more in the home of her childhood. With tears of delight her mother and Mona greeted the traveler, her father surveyed her with complacent pride and approval; to them she was more beautiful than ever.

The month drew to a close. The "big house" would soon be empty again and silent. The days had been busy ones; new cottages had been erected, new barns and buildings; the wide estates had been refenced and improved. And now all would be quiet till winter, when it was expected that the mansion would be filled with a merry crowd of guests and the logs would blaze on the hearths, making Christmas cheer.

My lord and lady, alike beloved by their people, had been planning some amusement for them as an appropriate and welcome wind up of the work. The wide new barn seemed particularly adapted for the purpose, and Lord Lindores announced that here he would give a dance and bountiful supper.

Mona slipped down to the river, in glee at the good news Aileen had just brought to her. She swung herself up to a limb that reached half way over the water, and scrambled recklessly out upon it till the bough swayed.

"Gerald!" she called, looking eagerly down the river. "Hi, Gerald!"

He was not in sight, but she thought he would probably be just around the bend, fishing. In one moment the familiar faded red boat came swinging around.

"Come here, Gerald, jist as quick as ye can!" she calls quivering with excitement and splashing the water below with impatient heels.

"Comin'," he answers. "Shure, Mona, what is it? Is the cow after dyin'? Or the pigs stole? Tell it, colleen."

"The cow!" she says, her eyes dancing; "oh, Gerald, it's me feet I can't kape sthill long enough to spake wid me tongue. The dance we're goin' to have in the new barn to-morrow night; ye didn't know that now? I have come jist to tell ye uv it."

"And is that all?" says Gerald, as he rests his oars and looks at her surprised. "An' I thought, Mona, ye had a thing to tell and afeard the news. A big bite I lost, too, for whin ye called so fast I didn't bide to finish."

"Well, ain't ye glad now, Gerald, for me to tell you?"

"Faith an' I knew that same already. It was no news to me, Mona."

Mona's red lip pouted.

"Go back thin, Gerald, to your fishin'; 'tis not for me to bother ye."

Gerald surveyed her with an odd expression on his face.

"Look, Mona," he said, drawing a little bundle from the pocket of his corduroy tousers. "See what I am goin' to ask the purtiest gurrl in Kilgarnock to wear to-morrow night." And he carefully unrolled a wide pink silk handkerchief and held it up for Mona's inspection. The little maid clasped her hands in admiration. She had nothing like it and never doubted that it was intended for her.

"'Tis beautiful, shure, Gerald."

He craned his neck around to one side to behold the kerchief from her point of view.

"Yes," he said calmly, and then folded it up very carefully in its tissue wrappings and put the bundle back into his pocket.

"Good-by, Mona," he called, bending over his oars again.

She did not answer, but stared rather blankly at the little boat till it disappeared.

"Indade, thin, I don't care if it's not for me. I wouldn't have it," shaking her head and speaking emphatically, "I wouldn't have it at all, at all."

She climbed off her perch a little more slowly than she had mounted it, and began to sing a gay little carol. A bird in the tree caught the notes and burst into responsive song. Mona ceased suddenly.

"Oh, hush, ye bird!" she cried, impatience in her voice, and then as she turned to go deliberately pushed a helpless little frog into the water.

When the next evening came the barn was full of life and laughter. As Mona with her uncle and aunt entered the little yard gate the plank-plinkety-plank of the violins came floating out to them, mingled with the shuffling of many feet.

"Oh, make haste!" she whispered to herself, and could not keep her feet in the sober pace that suited her aunt's calm step. The lanterns hung down from the doorway and windows, wide flags floated from the roof and streamers and folds of bunting swept across the walls and ceiling inside.

Mona had spent an hour about the adornment of her small person, but she need not have lingered. There were many feet bare besides her own, many other dresses old besides hers. Around her neck was a string of yellow beads, and a yellow sash of Aileen's around her waist.

They pushed their way to a seat, and Aunt Mollie fanned herself vigorously. Mona gazed around with interest. There was Mollie Stewart, and there was Maggie Tully and Annie Kavanagh. All these girls, as well as the lads, were on hand, but where was Aileen? She had said she was coming. Mona looked in one direction and then another, and at last there sat Aileen close to a window, and near by stood Gerald, gazing at her. Mona turned a little pale. She did not see Patsy and Barney and Farron edging up to her; she never even thought of any of them. In her eagerness to make no mistake she stood up on tiptoe to see the better. Yes, it was Aileen, and now Gerald was leading her out to dance. The pink silk kerchief was round her neck. Something seemed to shoot across Mona's eyes with a blinding pain. When Barney begged her to dance she answered a little sharply, and he went away again.

"It is too warm here, aunt, just now," she said to Mrs. Kelly.

"Go stand in the cool a while, child," said her aunt. "There's Aileen comin' over here; bide a bit."

But Mona was gone. Not under the trees did she stop, not by the little gate. Swiftly she passed out the side way, over the dusty road and into her own yard. Here she paused a moment, and catching her breath with something that sounded like a sob passed around the tiny thatched hut, and so over the stile to the river. Down on her face upon the grass she threw herself, careless of the yellow sash of which she had been so proud; the yellow beads burst their string and some rolled down the bank into the river. She lay very still and quiet, so quiet that a nightingale gave her no heed and began to sing. A whippoorwill called on the opposite bank, and far off in the woods came the answer of his mate. The gleaming moon rolled slowly into view and silvered each branch and blossom.

The birds sang on, but Mona heard them not. She was thinking—one hand on the heart that beat so fast, the other arm pillowing her head. She did not try to analyze her feelings; she would not have known how. There was a dull ache in her breast, and memory was torturing her.

"Holy mother," she began, whispering, and could get no further.

"She will not help me now; I am too bad, too bad at all."

She thought how unkindly she had always treated Gerald; she had laughed then to herself.

"Och, wirra, wirra," she ejaculated. And now Aileen had taken him; it was Aileen's fault, not Gerald's; how could she do it, how could she?

And wear his kerchief—the prettiest girl in Kilgarnock—those were his words, and now she knew what he had meant. Oh, why had not Aileen staid away! And now Gerald was gone from her entirely.

Slowly she made up her mind that she would be brave; no one, not Aileen nor Gerald, should ever know the truth. Gerald should never know she was sorry now, and so he would be happy. She murmured him a farewell in soft Irish words, "Gerald, anoon ma Gerald."

The slow tears trickled down her cheeks and gleamed upon the grass like diamonds. The moonlight lay over the prostrate figure in broken patches. Gently the breeze lifted and let fall again each dark ring of silky hair curling over her head and down to the white neck that shone all the whiter.

The moon reached the middle of her jeweled course. The nightingale sang, all unconscious of the silent grief beneath him. The lashes lay over her flushed cheek like a dark shadow; in very weariness and worn out with her misery she had fallen asleep.

The bird at last hushed his sweet treble and flew away. He had heard a hasty step over the grass. But Mona heard not, saw not. Somebody came down to the river bank almost on a run, and stopped short at sight of the little figure lying there so motionless. He knelt down beside her. With a quick eye Gerald noted the tear stained cheek, the parted lips, whence came a long drawn sobbing breath.

Without a word he gathered her up in his arms, asleep as she was, but Mona stirred and then started from him wide awake.

"I—you—oh, Gerald!"

"They are all ahunt for ye," he answered. "Ye have scared the heart 'av me. An' why did ye come down here?"

"Don't," she whispered, trying to remember her resolution. "I will go back now." She stood up and then swayed a little, dizzily.

"Mona, mavourneen!" said Gerald, holding her close.

She struggled to release herself, and stood back from him pitifully defiant.

"Ye shall not touch me!" she cried. "Go back to Aileen; go back to her and spake your words. Tell her that same mavourneen story; she will believe ye. Let me pass; I can go home; I'll not need"— but the proud curve of the lips weakened, and the eyes commenced to brim with tears. She turned away her head and tried to spring past him. Gerald stood motionless at first, looking at her in surprise, and then he caught her by the arm.

"Mona, stop a bit," he said, almost sternly. "What is this come to ye? What av Aileen to me? Are ye dhramin', child?"

"Let me go," she whispered; "let me go."

"No, I'll not let you go. Spake to me, Mona. What is it? Nay, ye cannot go. Tell it to me!"

She faced him then, and her eyes flashed through the tears.

"An' ye would talk to me, would ye? An' ye would wait for me to market; an' ye would sing to me under the thatch at night; an' ye would tell me ye love me! Och, it is not thrue at all, at all. Ye know I am speakin' but the truth, an' ye will make me say it. Ah, but the heart av ye is black. Aileen is there dancin' to-night; Aileen is there waitin' for ye with your kerchief round her neck—the pink kerchief ye showed me and said 'twas for the purtiest gurrl in Kilgarnock; go to her, go!"

The little figure was quivering with wrath and emotion; then she remembered all at once that she had broken her promise to herself, but having broken it she was not going to yield an inch.

"Shure, 'tis not that I care for ye; 'tis the base desate I hate. Let me pass now, if ye plase!"

"An' I don't plase, Mona," he said. "Is that all? Now ye shall listen to me. Ye would never hear to me afore, Mona; 'tis not my fault. I do love ye, an' ye wrong me when ye say no. Shure, mavourneen, I love the very ground ye walk on, and the sound of your voice is a music to meself. The kerchief—aroon, are ye angered with the poor, pretty thing? See, I have it yet for the purtiest and smartest gurrl in Kilgarnock. An' won't ye wear it now? I knew not even did Aileen wear one, an' 'twas not mine she had on her neck. Aye, bide your head; 'tis here on my heart is the right place for it. No tears, Mona; Mona, mavourneen; 'tis all right now. An' won't ye wear the poor kerchief, colleen?"

He drew it around her neck, and held the ends close up under her chin. Presently she looked at him, shyly, from under lowered happy lashes.

"Ah, Gerald, 'tis too beautiful for me!"—George Wilson Prescott in Times-Democrat.

THEY NEVER FAIL.

J. N. Harris, 3 Fulton Market, New York City, says:

"I have been using Brandreth's Pills for the last ten years. They are a wonderful medicine. There is nothing equal to them as Blood Purifiers and Liver Regulators. But I wish to state how remarkably they cure rheumatism, and how easily; I was afflicted by rheumatism of the legs. My business (wholesale fish dealer) naturally leads me to damp places. I was so bad I could not walk, and at night I suffered fearfully; I tried Balsams, Sarsaparillas and all kinds of tinctures, but they did me no good and I was afraid of being a cripple. I finally commenced using Brandreth's Pills. I took two every night for ten nights, then I began to improve. I continued taking them for forty days and I got entirely well. Now, whenever sick, I take Brandreth's Pills. They never fail."

Write your name in kindness, love and mercy on the hearts of thousands you come in contact with year by year, and you will never be forgotten.

A man who has practiced medicine for 40 years, ought to know salt from sugar; read what he says:

Toledo, O., Jan. 10, 1887.

Messrs. F. J. Cheney & Co.—Gentlemen:—I have been in the general practice of medicine for most 40 years, and would say that in all my practice and experience have never seen a preparation that I could prescribe with as much confidence of success as I can Hall's Catarrh Cure, manufactured by you. Have prescribed it a great many times and its effect is wonderful, and would say in conclusion that I have yet to find a case of Catarrh that it would not cure, if they would take it according to directions.

Yours truly,
L. L. Gorsuch, M. D.,
Office, 215 Summit St.

We will give $100 for any case of Catarrh that cannot be cured with Hall's Catarrh Cure. Taken internally.

F. J. Cheney & Co., Props., Toledo, O.
Sold by Druggists, 75c.

That which is good to be done cannot be done too soon, and if it is neglected to be done early it will frequently happen that it will not be done at all.

FRIGHTFUL SHIPWRECKS.

Staunch ships strike and founder, the fierce winds and mountainous waves sweep noble mariners' "hearts of oak" to shipwreck and to death, yet that does not prevent the liberliest landsman from risking his life on the stormy Atlantic in the roll of tourist or commercial traveler. But if he shall reach his destination safely he will scarcely have escaped some of the qualms of sea sickness, unless he takes with him Hostetter's Stomach Bitters, that inimitable specific for nausea. Bad water on long trips are a threat to the voyager, but this may be deprived in a great measure of its disordering effects upon the stomach, bowels and liver by the Bitters. Against the prejudicial effects of malaria, bad diet, fatigue and exposure it is also efficacious. It averts, moreover, rheumatism and kidney complaints. Don't travel on sea or land without it.

To be able to sit on the fence is political talent. To know just when to get off is genius.

Irritation of the Throat and Hoarseness immediately relieved by "*Brown's Bronchial Troches.*"

Soon we will look in vain, in any spot,
For what
Can not

By dropping dimes or nickels in the slot.

The Anarchist is a man who cannot stand other men's prosperity.

Many a life has been lost because of the taste of cod-liver oil.

If Scott's Emulsion did nothing more than take that taste away, it would save the lives of some at least of those that put off too long the means of recovery.

It does more. It is half-digested already. It slips through the stomach as if by stealth. It goes to make strength when cod-liver oil would be a burden.

Scott & Bowne, Chemists, 132 South 5th Avenue, New York.

Your druggist keeps Scott's Emulsion of cod-liver oil—all druggists everywhere do. $1.

CHARITABLE DENTISTRY.

It is not known throughout this section that there is one man in the dental profession who has made enough money out of dentistry to be able to establish a Dental College that he has named Leek's Dental College, wherein any and all dental operations are performed and only the cost of the material used, in each operation, is charged the patient. It differs from the other Dental College in this respect, that no student is admitted except he has practiced dentistry five years or graduated from some reputable Dental College, consequently only good fair work is allowed to leave its doors.

While the other college charges the same, just the cost of material used, the work is done by green students, and many times probably serious diseases are transmitted by unclean instruments, split and broken jaws received from awkward force applied while attempting to extract the most simple tooth. This philanthropist in the dental profession is Dr. Geo. W. Leek of 6 O'Farrell street, S. F., and the college he has established and opened many months past under the instruction of able professors, with himself as president, is located in the Donohoe building, 1170 Market street, opposite 6th street, occupying the front rooms while the other college occupies the rear room on the same floor. The doctor says that he does not teach dentists who are taking a course in his past graduate college, how he extracts teeth painless by the use of his local application to the gums. That method is a secret not known to the world and will not be made known for a few years. The poor of this community can now afford to get good dental work done by visiting Dr. Leek's College at 1170 Market street, S. F.

There's danger in a cough—more than ever when your blood is "bad." It makes things easy for Consumption. But there's a cure for it in Dr. Pierce's Golden Medical Discovery. A positive cure—not only for Weak Lungs, Spitting of Blood, Bronchitis, Asthma and all lingering Coughs, but for Consumption itself in all its earlier stages. It's reasonable. All these diseases depend on tainted blood. Consumption is simply Lung-scrofula. And for every form of scrofula and blood-taint, the "Discovery" is a certain remedy. It's so certain, that its makers *guarantee* it to benefit or cure, in every case, or the money is refunded. With a medicine that *is* certain, this can be done.

There's a cure for Catarrh, too, no matter what you've been led to believe. If there isn't, in your case, you'll get $500 cash. It's a bona-fide offer that's made by the proprietors of Dr. Sage's Catarrh Remedy. There's risk in it, to be sure, but *they* are willing to take the risk—you ought to be glad to take the medicine.

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

I SHALL BE SATISFIED.

After the toil and turmoil
And the anguish of trust belied,
After the burden of weary cares,
Baffled longings, ungranted prayers;
After the passion and fever and fret,
After the aching of vain regret,
After the hurry and heat of strife,
The yearning and tossing that men call "life;"
Faith that mocks, and fair hopes denied,
I shall be satisfied.

When the golden bowl is broken
At the sunny fountain side;
When the turf lies green and cold above
Wrong and sorrow and loss and love;
When the great dumb walls of silence stand
At the doors of the undiscovered land;
When all we have left in our olden place
Is an empty chair and a pictured face;
When the prayer is ended, and the sigh is sighed,
I shall be satisfied.
—London World.

OLD MEEK AVENGED.

At Meyer's Cross Roads, Tenn., a deserted shanty marks the spot where there once flourished a great commercial emporium. This busy mart of merchandise was presided over by a wheezing old fellow who was known as Meek Bender. His whole life seems to have been a continual round of apology. His fear was not of a drought, which might injure trade, or of an overflow of the creek, which might wash his house away, but that he might at some thoughtless time wound the feelings of his fellow man. His name was John, but his habit of extreme care, his manner, which had been refined into gentleness and then softened into timidity, brought to him the name of Meek. His business was good, for there was no other store in the community, yet he was always hard pushed. The fact is he was too timid and too much afraid of giving offense to refuse credit, and when credit had been given he was too gentle to ask for the money which was due him. Even people that were regarded as strictly honest were not slow in imposing on old Meek.

The back room of Meek's store was the wet day gathering place for the neighborhood. Contracts for the year were drawn up there, and many an old score had been settled in that dingy back room. When the weather was cold and when the fire burned low no one would offer to go out and bring in wood from the rick, a short distance away, but some strapping fellow would call old Meek, no matter how busy he might be.

"Here, old boy, you will have to calk up this room to keep the fire from getting out if you don't mind."

"Gentlemen," he would reply, in a most apologetic manner, "you must really excuse me. You'll pardon me, won't you? I will do better in the future."

One day 'Lige Parker came into the store, and calling old Meek aside said:

"Meek, I've got to have $25."

"'Lige," Meek answered, with embarrassment, "you know that if I had it you could get it."

"What, haven't you got it?"

"Not to save my life, 'Lige."

"Oh, come now, Meek. Who ever hearn of you bein' out o' money? The rest of us mout be hard up, but you air allus fixed. Let me have twenty-five."

"'Lige, I lent the last cent I had this very mornin'."

"Go and look in the drawer, Meek. I reckon you'll find some sneakin' round in thar."

"I took out the last cent, 'Lige."

"Wall, dang it, go an' look when I tell you."

'Lige followed him to the money drawer. The old man pulled the drawer open and said, "Thar now, 'Lige, don't you see thar ain't none?"

"Thar ain't none, sho 'nuff. Who did you lend it to?"

"I don't like to say, 'Lige."

"Oh, it's all right. What difference can it make?"

"None, only I don't like to be tellin' who I lend money to."

"Come, tell me. I won't say a word about it."

"Not a word, 'Lige?"

"Not a single word."

"Wall, I'll tell you, jest to 'commodate you, but please don't mention it. Jim Henly come to me this mornin' an' lowed that he must have twenty-five, an' I let him have it, although I've got a bill that I must pay this week or shut up the house."

"Jim Henly, eh? W'y, he oughter have plenty money. He's got some colts that he can sell any time fur a good price. Say, when he pays you back will you let me have the twenty-five?"

"Of course, 'Lige, you know I'll let you have it as soon as I get it."

That afternoon 'Lige met Jim Henly in the road. "Hello, Jim, which way?"

"Oh, sorter ridin' roun' for my health, as the feller 'lowed when he was gittin' outen the way of the sheriff."

"Didn't know but you was goin' over to old Meek's."

"Wall, I didn't know but I mout ride over that way befo' the thing is done with."

"Goin' to pay him that money, I reckon."

"What money?" Jim asked in surprise.

"The twenty-five you borrowed from him."

"How the devil do you know I borrowed any mony from him?"

"You won't say nothin' about it, will you?"

"No. Go ahead."

"Wall, I was over to the store this mornin', an' the old man was sorter complainin' about a bill he's got to pay or shut up the house. Said he needed the money he let you have."

"Ah, ha, the old fool is paradin' it 'round that he let me have a few dollars, is he?"

"Not particularly paradin' it, Jim. He 'lows that he needs the money, an' I reckon he do. Don't say nothin' about it, but if you can raise the money, w'y go an' give it to him. Wall, so long."

It was a chilly evening. A number of the "boys" sat in old Meek's back room playing cards.

"You've got me faded now," said Alf Moore, bunching his cards. "Got me down whar the ground is mighty rocky. Hello, Jim Henly, how air they comin'? Squat and take a hand."

"Whar is old Meek?" Henly asked.

"Gone out to git some wood, I b'lieve."

Meek came in and put a back log on the fire.

"W'y, howdy, Jim," said the old man, as he brushed off his sleeves. "Sorter chilly an' saft outside."

Jim stood looking at him. After a while he remarked, "Yes, a little chilly, but not as much so as it will be if people don't stop talkin' about thar betters."

"Anything wrong, Jim?" the old man asked.

"Yes, thar is. Thar's a blame sight wrong."

"What is it, Jimmy?" the old man asked, almost affectionately.

"Why, it's this, an' I want you to understan' me when I say it. If you don't stop blowin' an' a-snortin' about lendin' me that money I'll shut off your air. Oh, you needn't try to look like a sick kitten. You've been talkin' about me, an' you know it; an', more'n that, I don't intend to let you lie out of it. Don't say a word, you old blatherskite. The tongues of old fools have caused me enough trouble lately—caused me and my wife to part—shut up!"

Old Meek had attempted to say something.

"Jest stan' thar an' take your medicine, as I am a mind to give it. You have been playin' the hypercrit with us long enough, an' me for one ain't goin' to stand it no longer. Don't say a word, I tell you—don't open your chops. You git about ever' cent that's made in this neighborhood, an' then when a man wants a little accommodation you go around an' blow about it."

Every one gazed at Jim, but not a word was spoken. The violence of Jim's temper was well known. No one moved except Alf, and he, taking out his buckhorn handle knife, began to cut off a chew of tobacco.

"Yes," Jim went on, "we've been thinkin' all along that you was so harmless when we mout 'a' knowed that you was a snake in the grass. What, you will say somethin', whuther no! By G—d, I'll show you!"

He snatched the knife out of Alf's hand, and, so quickly that a wide awake eye could scarcely follow his motion, stabbed the old man.

Jim sprang through the door and disappeared in the darkness. They took old Meek from the floor and tenderly placed him on the bed.

"Alf," said the old man, "I've bled on your hand, but I couldn't help it, Alf."

* * * * * * *

The boys were in the back room of the store sitting up with the old man. Several days had elapsed and a physician who had just left thought he might recover. He was resting quietly; the boys were playing cards.

"Gentlemen"——

"Want anything, Meek?" Alf asked.

"No, I don't want nothin', an' above all I don't want to interrupt the game, but I jest wanted to tell you that I believe that I am dyin'."

"Oh, I reckon not," Alf replied, getting up, but when he reached the bedside the old man was dead.

* * * * * * *

"Who's thar?" Jim called, opening the door and gazing into the darkness.

"Alf an' the boys," came the reply.

"What do you want, boys?"

"Come out here."

"What's up?" he asked when he came to the gate.

"Jestice."

"I don't understand."

"But you shall. Meek is dead."

"I understand."

"Cy, hand me the rope," said Alf.

* * * * * * *

The men that were putting the grave clothes on old Meek the next morning could look through the door—the door through which he used to bring in wood—and see Jim hanging from a tree.—Opie P. Read in Arkansaw Traveler.

Soldiers' Indian Hardships.

In a land of leeches you should think twice before wading in water. Otherwise you may emerge with a shaggy covering of jet black. Something like this has happened to two British warriors in India, Privates Speed and Davis, who, having left Bareilly for a day's sport and lost their way, were fastened upon by the leeches in the pools which they had to cross barelegged. The two soldiers wandered about hopelessly for nine days. Bareilly is near the jungles of Nepaul, the favorite home of the tiger; but before the nine days were out Davis and Speed would have given a year or two of their lives for the sight of an honest wild pig.

It is a marvel that the two did not die of hardship. The heat in upper India in July is simply terrific. Yet the two survived it, exposed to the sun's rays during the day, sleeping in the open air at night. Not a village did they come across, not a human being, for the whole region was submerged by the yearly floods. They began by catching butterflies, and they finished off by being found nine-tenths dead beside the metals of a railway line. The first solid food they had in nine days was two "chupatties." A chupatty is a wheaten cake, not unlike a Scotch bannock. There's nothing about the restorative "pig," but doubtless it came in time.—London News.

The Muskroot for Cholera.

The Russian government has sent several physicians to Asia Minor to make experiments in the treatment of cholera with ferula sumbul, or muskroot, a plant which grows in Turkestan and which possesses certain anti-spasmodic properties. It formerly enjoyed quite a reputation in Germany and Russia as a remedy for cholera, but has fallen out of use in recent times. Even its name is now unknown to most practitioners in those countries, although the plant is still regarded popularly as an efficient diarrhœa medicine.—Chicago News.

Food for Mastication.

Accepted Suitor—And did you return all the rings to the gentlemen to whom you have been engaged?

She—Why do you suppose I became engaged so many times?—Epoch.

THE FUTURE IS BRIGHT.

Mr. C. Wood Davis is an Optimist and Statistician.

CROP FIGURES FROM ALL OVER THE WORLD

He Prophecies a Good Time Coming for America's Agriculturists.

Pioneering is in the blood of C. Wood Davis, the writer on economic subjects, and particularly on the food supply of the earth. He was born in New Bedford, Mass., of a Plymouth colony line of ancestors, followed the sea, then sought wealth in the mines of California, was in the service of the Michigan Central railway until 1863, when, with General Fremont, he went to Kansas and began service with the old Kansas Pacific. In 1866 nervous prostration drove him to his farm near Solomon City, Kan., where he sank the first salt well west of the Missouri river, as in his railway connection he had made the first freight and passenger tariff and time card used in the same territory. He moved from Saline county to Sedgwick in 1870, where he built the first house south of the Arkansas river in Kansas, outside of what is now the city of Wichita. The lumber was hauled 125 miles by wagon, and he still resides in that house.

Railroading, cattle handling and coal mine development at intervals occupied his time until 1883, when he returned to his ranch, and was led by the unprofitableness of his farming operations to investigate the question of the world's food supply, present and prospective, relatively to population, without any other object than that of determining whether or not he should continue his business or seek some pursuit more profitable than farming. At

C. WOOD DAVIS.

first he had no thought of publication, but later gave his work to the press and was astonished to find himself famous almost in a day.

His articles were quoted everywhere, and he found himself overwhelmed with orders for more matter. He had collated his statistics so carefully from official reports, specially gathered figures furnished by American consuls and ministers in almost every civilized nation, as well as foreign embassies, that he was recognized as being admirably equipped for the unique line of discussion he followed. The Arena, The Review of Reviews and other leading magazines have contained articles from his pen, and it is stated that the recent exhaustive leader in the New York Sun on the world's food supply was written by Mr. Davis.

The most remarkable feature of his discussions is that he found not a reason for discouragement and complaint, such as the Farmers' Alliance and other agricultural organizations advance, but cause to believe that the farming world is on the brink of the most successful period of the nation's history. Calculating the food supply of the civilized world he prophesied that wheat would bring a vastly higher price than it had reached last July. So convincing were his figures that upon the strength of them millions of bushels that would have been marketed were held in the farmers' granaries, and the Alliance throughout the western states exerted its power to induce its members to wait a few months before disposing of their crop. Men hailed the modest farmer living in an unpretentious home as a deliverer, and he was urged to take the stump, to run for office, and indeed to follow the usual public career of the average reformer.

He refused and continued as before to enjoy with his sweet faced wife the comforts of home. He is emphatically a student, believes earnestly what he sends forth and is content to occupy his present position as a magazinist and an economist rather than seek more gaudy but less enduring fame.

Mr. Davis' theory can be best summed up in the following paragraph from a recent article from his pen:

"Given a bread eating population—the world's—increasing at the rate of 14 per cent. in ten years and an acreage in grain and potatoes increasing at the rate of 7 per cent., it is only a question of time when scarcity and high prices will result. * * * The impossibility of making good the deficit in the world's food areas while population continues to increase at the present rate assures the prolonged continuance of such prices and high prices for farm products that the farmer will not be compelled to labor fourteen to sixteen hours a day. He will build better houses and granaries and share the good things of life."

Mr. Davis is personally a thorough gentleman, and impresses one as a man who has spent more time with the study lamp than among men. His predictions as to increased wheat prices have in Kansas markets been already partly fulfilled and have gained for him the attention of many who would not appreciate his elaborate world statistics. Mr. Davis has counted among his intimate friends many prominent characters. With General Fremont he was as familiar as a brother, while of today's notables he probably knows as many as any man in the state.

C. M. HARGER.

Few well authenticated cases of extreme old age are found that compare with that of Mother Bennett, who lives near Greenville, Ala., and whose age, by the best of witnesses, the family Bible, is 115 years. She did not unite with any church until in her 112th year, and was then immersed according to Baptist rites by a young minister scarcely 22 years of age.—Cor. Philadelphia Ledger.

Miss Maria Bowen Chapin is announced to be the editor of Near and Far, a journal to be started in the interest of the Working Girls' clubs.

The Cabman Was Afraid.

Mr. Walter Besant tells the following story of a disputed cab fare: "A friend of mine drove from Piccadilly to some place in the suburbs outside the radius. On getting down he tendered three shillings and sixpence for his fare—this was a little over the proper fare. The driver wanted five shillings. The passenger refused. 'I'd like to fight you for it,' said the driver. 'The very thing!' cried my friend, who had never in his life put on a boxing glove, and was almost as ignorant as Mr. Pickwick even of the fighting attitude. 'The very thing! Capital! We'll have the fight in the back garden, my brother will look on, hold the stakes and see fair play.' The cabman got down slowly.

"'I was pleased,' continued the narrator, 'to discover that he appeared almost as much afraid as I was myself, perhaps—if that was possible—even more. He followed into the back garden, where there was a lovely little bit of turf, quite large enough for practical purposes. I placed my five shillings in my brother's hands, took off my coat and waistcoat and rolled up my sleeves, all with an appearance of cheerful alacrity.' 'Now, my friend,' I said, 'I am ready as soon as you are.' The anxiety of the moment was, I confess, very great. But it decreased as I watched the man's face express successively all the emotions of bounce, surprise, doubt, hesitation and abject cowardice. 'No,' he said, 'gimme the three and six; I know your tricks, both of you. I've been done this way before.' And so, grumbling and swearing, he drove away."

A Reminiscence of Carlyle.

Mr. Robert Harrison, who has been librarian of the London library for more than thirty-four years in the course of his presidential address at the Librarians' conference at Nottingham, gave some interesting reminiscences of Carlyle, who was accustomed to frequent the library. He said: "Carlyle often visited the library. His conversation was most amusing, full of extravagant and exaggerated statements, and always ending with a loud laugh, apparently at himself. He used the library books extensively for his later works, and was guilty of the reprehensible practice of writing on the margin of the books. I must admit that his remarks were never meaningless, but chiefly consisted of corrections of date or errors in the text.

"One remark of his, however, which was pretty well known, was a criticism. It occurred in Charles Dibdin's collection of songs, the last page of which contained the ordinary version of 'Rule Britannia.' At the foot of this boastful song Carlyle had written 'Cock-a-doodle-doo,' with a small forest of notes of exclamation after it. In a case like that the librarian would be a martinet, indeed, if he effaced from the book an expression so characteristic of the man of genius who wrote it."—Pall Mall Gazette.

The Cultivation of English Walnuts.

Great success is being made with the cultivation of English walnuts in California. It is believed that they can be produced profitably in the eastern states as soon as more experience is had in the fertilizing of the flowers. This is always a great difficulty, and it has been found on the Pacific coast that a very effective remedy for it is to plant among the trees black walnuts, or even the common butternuts. They are all cousins and the plentiful pollen of the butternut or black walnut trees fertilizes the blossoms of the English walnuts, which would not otherwise be impregnated.

Before very long this country will be shipping English walnuts abroad, and the same is likely to be the case with almonds. Of the latter very big crops are now produced in California and Arizona. They require a dry climate. East of the Rocky mountains they do not do well, because of the frosts and dampness.—Washington Star.

Didn't Lose Much.

One day a gentleman named Fleming called on Mr. C——, and both being members of the same society the conversation drifted in that direction.

"You were not at the last meeting," said Mr. C—— to Fleming.

"No," replied the latter, "I was unavoidably absent. I have lost my wife."

Now Mr. C——, who was somewhat deaf, failed to hear the last remark, and said, emphatically, "Well, you didn't lose much!" referring, of course, to the meeting of the society.

When Miss C——, who was present, explained the situation, her father was overwhelmed with shame, and made most humble apologies. Fleming understood at once, and had no thought of being offended, as Mr. C—— was known to be scrupulously polite and tenderly considerate.—Harper's.

The Food Supply Is Measureless.

The fundamental mistake out of which grew the gloomy doctrines of the older theorists was in measuring the possibilities of production by what they knew of soil culture. Science had not revealed to them that, aside from proper temperature and moisture, the essential factor in vegetable production is plant food; that this may be given to the plant without the aid of the soil; that what they understood by soil fertility is a comparatively unessential factor of agricultural production; that, in short, the possibilities of the food supply in the future are measureless.—Professor Atwater in Century.

Point for Wheelmen.

Wheelman—I believe I'll give up bicycling. I am as careful as can be, but every now and then some accident happens. This is the second time I've been arrested and fined for running into people.

Business Man—I'll tell you how to manage. Just you get a job as bill collector. Everybody 'll dodge you then.—New York Weekly.

Corroboration.

"Lighthouses are very expensive," remarked Mrs. Dimling, looking up from a government report.

"Yes, any theatrical manager will tell you that," replied her husband.—Detroit Free Press.

THE VERMIFORM APPENDIX.

Part of the Human Structure That Often Goes Wrong.

AN ORGAN THAT IS USELESS AND HARMFUL

Where Indigestible Remnants of Food Sometimes Lodge and Cause Death.

With the appearance of cherries, plums, raspberries and the like upon the fruit stands there arises in the minds of all persons, not especially parents, a morbid interest in the appendix vermiformis, or vermiform appendix. This interest almost dies out during the winter, when the vermiform appendix has only oranges and collar buttons and shirt studs to bring it into prominence. But with the coming of the fruits with small seeds the vermiform appendix becomes a stock topic of conversation, and lays low many a victim among the budding male youth of the land.

Nobody can be quite certain that he has a vermiform appendix unless he gets something the matter with it. For the doctors have dissected people in whom there was no trace of a vermiform appendix. This, however, is rare, and most of the human beings who read this article may have the proud assurance that it tells of something in which they have a part.

Those who hold to the evolution theory have no difficulty in accounting for the vermiform appendix. They say that it belongs to a class of rudimentary structures left in the bodies of all organized things by the process of evolution. There are certain muscles in the human body which have no use at all, but simply stand as remnants of muscles which are developed and are useful in the bodies of some animals of the lower orders. The human animal has developed into an environment in which these muscles are no longer useful. In the course of ages they will disappear. Now they are still represented in a shriveled and innocuous state.

So it is with the vermiform appendix, according to the evolution scientists. There was a time when it was developed and had an important place in the economy of life. It still exists in some of the lower animals in its complete form. In the human animal it is shriveled and is no longer useful.

On this last point all are agreed. It does no good. It does much harm. In fact, it never does anything unless it does harm. That is why some pathologist a few years ago gave it the name of "death trap." And "death trap" it is now called when the doctors descend from the mist enshrined heights of Latin and Greek medical terms to the ordinary language of laymen.

The "death trap" is a small, worm shaped tube, the opening of which is of about the diameter of a goose quill. It is of variable length in different human beings. Sometimes it is six inches long, and sometimes it is but three inches long. It extends from the cæcum, which is the technical name for the upper end of the large intestine. It leaves the cæcum at a point near the valve through which the contents of the small intestine are discharged into the large intestine. Over its mouth there is sometimes a valve and sometimes not. Generally the valve is imperfect and only adds to the danger of the "death trap."

It is found in most men and animals, except the orang outang and the wombat. Sometimes it curves directly back from the cæcum. Again it winds around the ilium, and again it extends along the colon.

To grasp fully the danger of this useless tube, which is blunt at its other end, some explanation about the cæcum is necessary. The cæcum is a sort of expansion of the upper end of the small intestine. It is about two inches in diameter, and receives the discharge of the same intestine. Therefore all the indigestible matter that enters the stomach lodges in the cæcum on its way out of the system. As the opening to the cul de sac, known as the "death trap," is just there, some of this undigested matter may enter the "death trap," and may remain there.

If you can imagine the stomach as being no longer useful and shriveling up from inactivity, that part of it which lies above the valves which open from the æsophagus would form such a cul de sac. This is what has happened to the cæcum. Part of it has shriveled and the vermiform appendix is the result.

When the indigestible remnant of the food has entered the cæcum from the small intestines it stops there for a little while and then passes on. But the cæcum is a sort of stagnant reservoir. Now the digestive apparatus of a healthy person may be strong enough to push from the stomach and from the small intestines not only all indigestible matter, but also all germs of disease, all dangerous microbes which may have entered at the mouth with the food. But here in the cæcum they stop for a moment.

The mouth of the death trap is open, and through unusual pressure or through an accidentally favorable position of the vermiform appendix these germs or a part of this indigestible matter may enter the vermiform appendix.

The vermiform appendix is lined with a mucous membrane, but it differs from the rest of the intestinal canal in having only a few very feeble muscles. It is therefore unable to eject anything that may enter it.

Say that an orange or cherry seed is passing through the system when this canal is constipated. It may be pushed into this cul de sac, to remain there never to leave until the surgeon's knife reaches it.

And, staying there it may do no harm. A sac may be formed about it, and it may even do good in preventing anything else from passing up into the death trap. But again it may cause death. For an inflammation may set up about it and communicate to the cæcum and to all the other adjacent parts. Or it may set to work to push itself out with the aid of this ulceration, and may penetrate the wall of the appendix and produce peritonitis and death.

To this form of danger boys between ten and twenty years seem to be most liable. In younger boys or in men and in all females the danger is not so great because of the different formations of the appendix.

But seeds are not the only dangers, or even bits of foreign substances, such as pins, needles, buttons and so on. The germs which have been mentioned form the most serious danger. Several high medical authorities, writing on the appendix, have said that its part in the causing of disease and death has been much neglected, and one German writer calls attention to the fact that in his own experience of 300 bodies examined every third body showed traces of present or past inflammation of the appendix, while 5 per cent. showed present inflammation. Other observers have found the percentage even greater.—New York Sun.

Too Deliberate.

"Jimpson is very deliberate in his movements."

"Yes; it takes him an hour to get a ten minute walk."—Harper's Bazar.

Beecher's Home Life.

Home was always the place, whether in early or later life, where the noblest and best parts of his character were the most thoroughly developed and best understood. There he never failed to reveal himself in his best and happiest moods. Unless out of town which was not often in our first ten years—he was seldom absent from the home table. Then, as far as possible, he put his daily cares to one side. Between his private home life and his public life there could be no comparison, even in earlier life. Mr. Beecher at home was the playmate and companion of the young; the devotedly loved father; the thoughtful, tender, loving husband, and, in later years, the kind and cheerful master of his farm; happy himself and making his dependents and all around him happy.

He was an entirely different person there than when in his study—silent, grave almost to sternness, if interrupted; wholly absorbed in the subject before him. Occasionally we accepted an invitation to dinner or tea—more frequently in later days. He always enjoyed the visit and loved the friends he met on these occasions. But, returning home, the moment the door closed there were but few occasions when he would not say with a smile: "Well, we have had a pleasant evening. I am glad we went; but, after all, there is no spot like home."

Then, as children and grandchildren grew up around us, if we returned before they retired there was always pleasant or amusing talks; and at morning or midday meals there would be no limit to the pleasure he tried to give to all. In his spare moments the little ones were given unrestrained liberty. But when no more time could be spared, with a pleasant smile he would say, "There, that will do," and with a parting or good night kiss he turned to his desk, and all understood that "play time was over."—Mrs. Henry Ward Beecher in Ladies' Home Journal.

A Legend of Loch Maree.

The most interesting of the islands in Loch Maree is by no means the biggest, but it differs entirely from the others in its varied vegetation. There is a romantic legend in connection with this island. In olden times a Norwegian prince and princess lived there happily. In time of trouble the prince went forth to war, leaving his island to be guarded by his wife. It was agreed that when he was in sight of home on his return a white flag should be hoisted if all was well; if not, a black one. Time passed, and the princess became jealous of his long absence. When his boat at length appeared in the loch a black flag was hoisted, and when he landed he found his wife lying, as if dead, on a bier, she having feigned death to prove his love.

Heartbroken at the sight, the prince unsheathed his dagger and plunged it into his breast. A thud, and he lay dead at her feet. Horrified at the sight she grasped the dagger from his breast and took her own life. They were buried in this romantic spot, foot to foot, with the hilt of a dagger engraved on their tombstone. Since then the landowners of the neighborhood have had the right to bury on the island, and some of the graves are of curious unhewn stones. This island burial is quite common in Scotland. It is a delightful idea that the dead should rest in peace, surrounded by beautiful scenery, and far enough from human habitation to do no harm to the living.—London Queen.

A Queer Business.

There is a queer little establishment in one of the big blocks up town, where a queer old man does a queerer business. Perhaps there is not another establishment similar to it in the city. This old man and his granddaughter make a comfortable living supplying odd buttons to any one who has lost one from a coat, a gown, a cloak or any article of clothing. Who has not at various times lost a button and been much annoyed visiting tailor shops or dry goods stores in trying to supply the deficiency? And then after spending much time how many persons have not given up the hunt in disgust and paid for an entirely new set of buttons for the garment, all because they could not find one like the ones which already adorned the articles.

The business of this old man and his granddaughter is to supply this missing button. He has regular places where he collects these odd buttons. He visits dressmakers, clothing shops, tailors and junkmen, and they all save the buttons from cast off garments for him. They are glad to get an exceedingly small price for them, because it is all clear gain. The old man takes them to his shop, sorts them out, and he and his granddaughter supply them to people needing odd buttons.—New York Tribune.

A New Chum for Bluefish.

Many lovers of the sport of chumming for bluefish are deterred from indulging in it by the difficulty of getting a supply of menhaden and the tediousness of preparing the bait for luring these fish. To such we suggest a more economical plan, one easily followed, which we have found efficacious, not only for attracting the fighting blues, but for weakfish and other species. Buy a gallon demijohn and fill it with crude menhaden oil, which can be bought at any of the oil stores. When on the fishing ground, which is presumably one of the shallow (5 to 15 feet) bars or swims where these fish resort, pour now and then a pint of the oil over the bow until a "slick" is formed on the tideway, which is best when gentle or slow, as it is at the Great Kills and other points.

We warrant the efficacy of this method. It has yielded us excellent results, and we have killed many a leaping blue when no indications of their presence existed before our "slick" was in working order. Another advantage, and to many a very important one, arises from the soothing effect of the oil upon the troubled waters. It will chasten them so that those with weak stomachs can fish without qualm or distress.—American Angler.

Diamond Cutting.

Diamond cutting and polishing form an interesting but difficult art. Very few expert cutters are found in the world, although our modern system is as old as 1456, when Louis Bergnen established a trade in Bruges. From that time until quite recently the best diamonds were all cut in Amsterdam, where today many of the finest cutters and polishers carry on their business. Since this early date improvements have been made in the trade, such as the invention of machines for simplifying the work, but the general principles of the art remained practically unchanged.—George E. Walsh in New York Epoch.

Where Gypsies Are Found.

The majority of the Scottish gypsies have emigrated to America, where they have spead over a vast tract of country. Here they have gradually become lost to view as a distinctive race. In Europe they are found in the greatest number today in Hungary and Wallachia, where there are about 500,000.—George E. Walsh in New York Epoch.

"SOME DAY."

What will Happen in the Dim, Distant Future.

"AMBER" TELLS WHAT SHE WILL DO.

She Will Join the Humane Society and Revolutionize Civilization.

"Lives there a man with soul so dead" who has never indulged in dreams regarding his own particular "some day?"

Some day he is going to take a new deal and be a right good fellow. He is going to join the church and get ready to pass in his checks when the grim old conductor, death, calls them in for the last station. He is going to be amiable to his wife and family, commencing Monday morning and keeping it right up until the next Sunday after midnight.

Oh, yes, indeed, there is no doubt about it—the "some days" hang for all of us like ripening plums on the tree of life, and we mean to pick the branches clean before we die. As for me, behold a few of my own fast mellowing "some days."

Some day I am going to earn $10 over and above grocer bills, and shoe bills, and coal bills, and I am going to join the Humane society and make things lively. I shall take my stand on a street corner and arrest every brute who overloads a horse and every created being who abets him in doing so. The able bodied people who crowd into street cars and expect two half dead rats of horses to drag them up a slippery grade; all men who leave nose bags on their horses above a reasonable length of time, shall be whisked away together to Joliet, and made to put up and take down stove pipes for a solid year.

Some day the cab driver shall find himself without a whip, the dude shall be forced to drive his nag without a high check rein, and the half grown boy who yanks his horse's bit so constantly as he drives through town shall find himself directly in front of a strong man's boot.

Some day the woman who knows no more about bringing up children than a cat knows about Beethoven shall find herself childless and back in school to learn the rudiments of hygiene, physiology and common sense. She who feeds a baby strong tea and coffee, she who allows a growing child to sit up till midnight, she who takes a 2-year-old to the matinee and slaps it because it is afraid, she who puts French heels or laced corsets on her young daughters and provides wine and high seasoned food for her sons, shall go back and start from a protoplasm to see if she can sprout a soul if God gives her another chance.

Some day tardy justice shall overtake the "masher" and I'll be there to see! His soul, like a filthy rag, shall be cast into refuse, and all the bats and crows and carrion birds that inhabit his brain shall be let loose and fly away like a screaming brood of night before the dawning of the day. What will be left of him then? Just as much as is left of a chicken when a cyclone strikes it, or of a dandelion when the prairie fires overtake it.

Some day I shall attain unto sufficient moral courage to refuse to be "pumped" by wily enemies.

Some day I shall cut my last wisdom tooth and sit with the wise on pedestals of peace, from which my own folly shall overthrow me no more forever.

Some day I shall understand why I hated "Dr. Fell."

Some day I shall not only know enough to go in, but to stay in when it rains.

Some day I shall decide that it is not worth while to sow wheat on rock or try to draw water from dry wells. In other words, I shall give up trying to cultivate uninteresting people merely to keep up a social farce.

Some day I shall learn that honesty is vastly better than policy, and shall cut loose from conventionalities and formalities that fetter the soul.

Some day I shall find that one tried and true and faithful friend, who tells the truth and does not flatter, is better than a whole palace car full of sycophants and honey tongued praisers who ride at your expense and make your vanity their treasurer and purse carrier.

Some day I shall sing at the funeral of a woman who chews a toothpick on the public street.

Some day I shall dance on the grave of the car driver who is always dreaming of his best girl while I hopelessly signal him from the "upper crossing of an intersecting street or from the middle of a long block."

Some day I shall find a comrade brave enough to join me in a veritable dress reform and wear "leglets," though onlooking men go mad with glee.

Some day I shall meet the female gum chewer alone upon a windy sea, and there'll be only one of us left to buy a tolu stick at two for a cent, while the sad and subsequent years of time roll by.

Some I shall go to the theatre and find that my press tickets call for a seat where I can both see and hear, and when the fiend enters who always arrives late a special band of imps shall meet him and bear him straight to tophet.

Some day I shall have an answer ready for my adversary and not wake up in the night to regretfully remember what I might have said to confound him.

Some day I shall forget the word microbe and remember no more the bishop bacteria, whose advent among the sons of men has wrought disaster to my mucuous membrane.

Some day I shall know why more honor was awarded Nellie Bly than is awarded the every day heroes and heroines who struggle against odds and more than circumnavigate the globe in their weary round of hopeless care.

Some day I shall be a little child again, in purity, and candor, and truth, and find myself, perhaps, in heaven.—Amber in Chicago Herald.

A Mongolian Newspaper.

The oddest journal in the metropolis is the so called newspaper published by the Mongolians of Mott street. It is written with a camel's hair pencil upon vermilion paper and is pasted upon the wall of No. 16 of that thoroughfare and on the two large telegraph poles which stand between Chatham square and Pell street. All day long it is read and studied by the almond eyed crowds. Even in the evenings a belated laundryman can be seen running his eyes over its tea chest characters.

Yesterday I was one of the throng, and, thanks to a friend who is a good Chinese scholar, was enabled to get a fair knowledge of the day's issue. There was a considerable similarity between it and our own dailies.

There was the latest proclamation from the emperor of China, a communication from the embassy at Washington, a letter from the consul, an account of an anti-Chinese outrage in Idaho, a news item of a flood in China, a dozen of "want ads.," a few laundries for sale, a death notice and a call for a meeting of some benevolent society. The editors were called scribes, and write at the order of their customers, charging a good figure for their skill with the brush. The favorite editor is said to make as high as $20 a day, but beyond his editorial work he writes cards, literary compositions and prayer tickets for his customers.—New York Star.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.

FRIDAY, MARCH 11 1892

For a prohibition State the number of "drunk and disorderly" cases appearing in the police courts of the Kansas cities is rather startling. The article sold in the drug stores there must be an undiluted form of chain lightning.

An exchange, speaking of the ill effects of the high tariff policy of the Republican party upon agricultural pursuits, very truly says: "No people can maintain their liberties where tenants outnumber freeholders, and where agriculture does not recieve a just share of the wealth it creates."

After much backing and filling by the police and authorities of San Francisco, Policeman Harper, who shot De Greayer at Golden Gate Park, has been held to answer without bail by Judge Rix. A stricter examination of cases of this kind, where policemen are too handy with their guns, would save many a murder in the future.

A strange bit of news comes from Eau Claire, Wisconsin. A Federal marshal has arrested the proprietors of a pearl button factory at that place for violating the contract labor act. What strange things happen in this sublunary world. The tariff tax on pearl buttons is 400 per cent of their import value, and still those who are engaged in the business want to import pauper labor to manufacture buttons. What a great and glorious and shool of a thing the McKinley Act is for helping American laborers. Charge them four prices for buttons, and hire foreign pauper labor to make them. Of course McKinley and Reed ought to be elected President and Vice President. They also ought to run on a pearl button platform.

In imitation of the United States Germany adopted a McKinley tariff bill not long ago. As a result, mobs in the streets of Berlin have been assailing the kaiser with imprecations and the police with cobble-stones because they cannot get work nor bread. They have been singing the "Marseillaise," the chant of radicalism and revolution all over Europe and are muttering about dynamite and the French Reign of Terror. The increased tariff on breadstuffs is the iniquity that specially meets their condemnation. This recalls the Corn Law riots in England and the famine in Ireland when the Tories of Great Britain ruled the United Kingdom with a protective policy. Parliamentary reports of those days tell of half-naked women hauling coal carts in the depths of mines, and of thousands of children being born under hedgerows to an heritage of shame and toil at sixpence a day. Cobden and Bright and Daniel O'Connell broke the back of the accursed sytem, and now the Berlinese are stoning the police as a protest against medieval paternalism. Either the kaiser or the tariff will have to go.

There is something decidedly interesting in the character and career of Mr. Andrew Carnegie, the Pennsylvania iron baron. From having been an office boy to Col. Thomas A. Scott he managed to drift into the protected iron industries of the Keystone State. The largesses of Republican congresses to these interests have been so prodigious that if a man away back in the war happened to invest fifty cents in any of the iron plants, his chances of turning up a millionaire were good. Andy went through this magical process of transmutation, which discounts the Aladdin lay-out just ninety-three and one-third per cent. He not only emerged a millionaire from an ordeal which tried the souls of the consumer and the workman, and left the manufacturer not only with his withers unwrung, but in the primest of all possible conditions, but he was able to tell the Hon. Wm. L. Scott, of Erie, that he had made $1,800,000 in the year 1887 through protection run mad. What colossal sums he has made since, the Lord only knows. The only conspicuous things about Mr. Carnegie are that he has endowed a number of libraries, in this country and Scotland, and has made more exactions on his workmen, especially since the passage of the McKinley bill, than any manufacturer in America, if we can judge by the number of strikes reported in his works. Carnegie is one of those amiable people who want the earth, with an occasional contribution in the way of an ostentatious donation to take the edge off of his acquisitiveness.

This Saloon is conducted in a strictly first-class manner, and every attention tendered my patrons. FRED. BURCKHARDT,
jl2-tf Lessee.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to betify any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why no harm is done. Address,
E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 58 100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 89-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hallnah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine twentieth (12 9-20) rods south of the general corner of the North west quarter and the North east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South six-eight and seven-twenti ths (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods; thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah, deceased.

Dated, Independence, Cal., February 11th, 1892.

ASSESSMENT NOTICE.

INYO MARBLE COMPANY.

Location of principal place of business, San Francisco, California. Location of works, Inyo, Inyo county, Cal.

Notice is hereby given that at a meeting of a Board of Directors, held on the 26th day of Jan., 1892, an assessment (No. 10) of Fifteen (15) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary at No. 137 Montgomery St., San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 4th day of March, 1892, will be delinquent, and advertised for sale at public auction; and unless payment is made before will be sold on Wednesday, the 30th day of January, 1892 to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.
G. W. LUCE, Secretary.
Office, No. 137 Montgomery street, San Francisco, California.

DESERT LAND FINAL PROOF.

D E No. 513.

LAND OFFICE AT INDEPENDENCE, CAL.,
Sept. 31, 1891.

Notice is hereby given that Francis A. Leonard of Bakersfield, Kern County, California, has filed notice of intention to make proof on his desert land claim No. 513, for the E. ½ of Section No. 2, and the W. ½ of Section No. 1, Tp. 10 S., R. 34 E., M. D. M., before Register and Receiver at Independence, California, on Saturday, the 10th day of October 1891.

He names the following witnesses to prove the complete irrigation and reclamation of said land: G. Sanger, W. Sanger, A. P. Smith and M. Naylor, all of Big Pine, Inyo County, California.

C. W. CRAIG, Register.

Snug little FORTUNES made at work for us in your town. Address at once, STINSON & CO., Portland, Maine.

$6000.00 a year is being made by John R. Goodwin, Troy, N.Y., at work for us. WEDNESDAY, March 9, 1892.

Manuella Diaz vs. A. Diaz et als.—Filed admission of service. Attorney, P. W. Forbes.

Estate of Henry J. Evans, deceased—Filed notice of motion.

Susan E. Williams vs. Thos. Williams—Filed summons.

DIED.

MEE—At Independence, March 9, 1892, Martin Mee, a native of Ireland, aged 49 years.

Go to Keeler on Wednesday next.

Georgia Minstrels will be here a week from to-day.

Jake Tracey and W. H. Uihemeyer came down from Big Pine on Wednesday, returning next day.

P. W. Forbes Esq. started for Los Angeles on Wednesday. He expects to be gone about three weeks.

Independence is the proud possessor of a new barber. He is located at the old stand joining Irwin's saloon.

The family of N. E. Conklin have arrived here from Inyo, and will make Summer their future home.—*Gazette.*

F. E. Russell of Davisville, Yolo county, accompanied by Mrs. W. S. Enos, arrived at Independence on Tuesday.

Thomas Boland, B. F. Gray and E. J. Reynolds came up from Keeler yesterday to attend the funeral of Martin Mee.

According to a standing arrangement between the Lodges, the Odd Fellows fraternity will hold their annual celebration at Bishop on the 26th of April.

Under the direction of Sheriff Gorman a new flue has been constructed in the northeast corner of the Court House. John McSweeny acted as boss mason.

Don't forget that Ireland's natural day will be celebrated at Keeler on Wednesday evening next by a grand ball at the Lake View Hotel. Independence will be well represented.

Encouraged by the success of last Saturday evening, the N. S. G. W. will give another theatrical presentation at the Pavilion on Monday evening, April 4th. Full particulars next week.

Arlie Mairs is getting around again. His right shoulder and neck were badly hurt, and he carries his arm in a sling. It will be some time before he entirely recovers from the effects of his injuries.

O. I. Mairs will start for Mojave to-morrow en route for Los Angeles. Mesdames Jiggens expect to accompany him and will go from Los Angeles to Benecia, thence to Detroit, Michigan.

Fred Holbert arrived at Independence yesterday with about one hundred and fifty head of fine beef cattle. Most of them were bought of N. T. Piper of Oasis. He started today with them for Mojave, where they will be shipped to Los Angeles.

The dramatic entertainment at the Agricultural Pavilion on Saturday evening last is spoken of by all who attended it as being very entertaining and amusing. The scenic effects and stage properties were the most expensive and handsomest yet seen in the county. Another entertainment will be given April 4th under the same management which will be eagerly anticipated.

Every housewife should call and examine a new line of kitchen utensils lately received by L. Wood. It comprises a complete assortment of "Dresden" ware; steel, blue and white enameled. It is cheaper than agate ware and of far neater appearance. Also a lot of "Royal" baking pans of various sizes. These pans have a metallic cover, ensuring an evenness of heat that cannot otherwise be had. They are especially valuable for roasting meats of all kinds. Call and examine them.

The Georgia Minstrels and Jubilee Singers will be at Independence next Friday evening, March 18th. New plays, new songs, new dances including the famous skirt dance by Carmencita Jr. If you don't see it now you will miss the chance of a lifetime. A charming soubrette has been secured at great expense for the occasion. Highly amusing, instructive and entertaining. Box sheet will obened on Tuesday at 8 o'clock a. m. Come early and avoid the rush. Tickets at popular prices.

"I have just recovered from a second attack of the grip this year," says Mr. Jas. O. Jones, publisher of the *Leader*, Mexia, Texas. In the latter case I used Chamberlain's Cough Remedy, and I think with considerable success, only being in bed a little over two days, against ten days for the first attack. The second attack I am satisfied would have been equally as bad as the first but for the use of this remedy, as I had to go to bed in about six hours after being "struck" with it, while in the first case I was able to attend to business about two days before getting "down." 50 cent bottles for sale by

Bi Pine.

Obituary.

Martin Mee died at the Normon House, Independence, on Wednesday at 12:30 p. m. About two years ago he was afflicted with a stroke of paralysis, the left side being affected. He only partially recovered, and for several months past has been at Independence for treatment. He was able to get around and at all times maintained a cheerful demeanor. It was only a matter of time, however, when a second attack must come. He got up on Wednesday morning feeling very well, and sat in Murphy's blacksmith-shop for quite a while, seemingly better than he had been for some time past. About ten o'clock the fatal stroke overtook him. He was assisted to his room, and Dr. L. L. Woodin was called in. Every human aid was given, but all proved useless. His naturally strong constitution struggled bravely with death, but the end was inevitable. He died without regaining consciousness. The funeral took place yesterday under the auspices of Inyo Lodge No. 221, F. & A. M. Martin Mee had been a resident of Inyo county for about a quarter of a century and was known to all as a gentleman of the finest sensibilities and an honorable, good man. He was exceedingly kind hearted, and generous to his heart's core. And when that brave heart was stilled in death a spirit of the truest, noblest form was wafted to its heavenly home.

Set Out Apple Trees.

Another carload consisting of 650 boxes of apples came in on the N. C. & O. yesterday from W. M. McClelland, consigned to the Germain Fruit Company of Los Angeles.—*Reno Gazette.*

These apples are raised at Susanville, Lassen county; are hauled 30 miles by freight teams, shipped 80 miles over a little narrow gauge railroad, then forwarded about 800 over the Southern Pacific to their destination. If the Honey Lake people can make money raising and shipping apples with these disadvantages what a success the industry should be here in Owens Valley, where the distance to Los Angeles is but 240 miles. Of course this presupposes railroad connection with Mojave; but as this is likely to be completed in the near future large orchards should be set out that they may be in bearing when the work is completed.

Meteorological Summary.

Following is the report of the Weather Bureau Station at Keeler for the month of February, 1892.

Mean barometer.....29.954
Highest barometer.....30.318
Lowest barometer.....29.587

Total precipitation, 0.19 inches.
Number of days on which .01 inch or more of precipitation fell, 5.
Number of cloudless days.....8
Partly cloudy days.....11
Cloudy days.....10

H. E. WILKINSON,
Weather Bureau, Observer.

Mining Items.

The following extract from a letter received from Darwin yesterday will be of interest. "The mines are looking much better than they have looked for two years. The old Promontory mine is showing up a fine body of ore. Five men are at work there. James Shields is working the Relief mine and has a good showing. He expects to put five or six men to work in a few days. Mr. Daley is going to work the Wayback mine about five miles east of Darwin. George Lewis is working the Custer mine, but as he allows no visitors in the mine, I cannot tell you how it looks. Charles Richardson is running a tunnel in his mine, the Crested Butte, and expects to strike the ledge at a depth of five hundred feet." All of which is very encouraging.

Prosperous Honey Lake Valley.

Honey Lake Valley, Lassen county, is enjoying a boom, the result of push and enterprise. Large storage reservoirs have been constructed to irrigate a large tract of land, and a new city, Amadee, is rapidly growing. Nine years ago we drove cattle over the same land, and it was as barren a spot as could be imagined; and the creek from which the water is taken would not compare with the smallest stream in Owens Valley. Restless energy and capital will work wonders, however. And the managers of the concern know how to advertise, as witness the local and Reno papers. They don't expect the local editors to boom them and live on climate while doing it.

Messrs Cage & Sherman of Alexander, Texas write us regarding a remarkable cure of rheumatism there as follows: "The wife of Mr. Wm. Pruitt, the Postmaster here had been bed-ridden for several years. She could get nothing to do her any good. We sold her a bottle of Chamberlain's Pain Balm and she was completely cured by its use. We refer any one to her to verify this statement." 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

There is no danger from whooping cough when Chamberlain's Cough Remedy is freely given. It liquefies the tough, tenacious mucous and and aids in its expectoration. It also lessens the frequency and severity of the paroxysms of coughing, and insures a speedy recovery. There is not the least danger in giving it to children or babies., as it contains no injurious substance. 50 cent bottles for sale by

40 years the standard.

A Pure Cream Tartar Powder — ROYAL, Contains Ammonia. — TAYLOR'S ONE SPOON. Contains Alum and Ammonia.

Dr. Price gives larger and fuller cans than those of any other Baking Powder manufacturer.

Above cut represents the comparative size of one pound can each "Dr. Price's," Royal" and "Taylor's One Spoon." These cans were set side by side, then photographed down in exact proportions to admit the plate in this space. Ask your grocer to set a one pound can of any other brand alongside 1 lb. Dr. Price's Cream Baking Powder, and observe the difference, as illustrated above.

Adulterated powders may usually be detected by their heavier bulk, as shown by the small cans, and these scantily filled, often containing a circular to help fill out the cans. It is a singular fact that many of the ammonia and alum baking powders are advertised as "Absolutely Pure," All official examinations prove that it would be safe to reject all powders labeled absolutely pure.

The economy in using Dr. Price's Cream Baking Powder does not consist alone in the fact that much larger and fuller cans are given, but Dr. Price's is a stronger, purer and more wholesome baking powder than any other known. Does better work, and goes farther, hence more economical in every way.

What woman would use an ammonia or alum baking powder if she knew it? Such powders not only undermine the health, but ammonia gives to the complexion a sallow and blotched appearance.

Dr. Price's Cream Baking Powder is reported by all authorities as free from ammonia, alum, lime, or any other adulterant. The purity of this ideal powder has never been questioned.

There is a man who should be killed,
And sadly laid away;
That is the man who rustles with
His bill when at the play.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

We always hate too see a man "act the hog" at the time when we, ourselves, are endeavoring to appropriate the lion's share.

WILD COREOPSIS.

A sea of blossoms, golden as the glow
Of morning sunlight on a wind rocked bay,
Beneath the breeze of this rare autumn day
Heaves in soft undulation to and fro.
Like incense, floating o'er the marsh below,
Come fragrant odors of the late mown hay.
Beyond, in harmony of green and gray,
The graceful tamaracks tower in stately row;
And wading through the shimmering waves with song
Upon his lips a fair haired youth I see,
Who swings off the saffron blossom bells.
Back roll the years—a melancholy throng,
And I behold in sea girt Sicily
Theocritus amid the asphodels

—Congregationalist.

RACHEL'S EXPERIMENT.

"I wouldn't have believed it of you, Rachel," said Mrs. Edmonstone plaintively. "No, I wouldn't, not unless Betsy Tacker, the manty maker, had told me; and Betsy she never told a lie no more than George Washington did."

"Why, mother, what are you talking about?" questioned Mrs. Thomas Edmonstone, untying the elder lady's bonnet strings and relieving her of a splint basket, a black silk bag, a waterproof cloak and an umbrella.

"And I've come to see if it's true," added the old lady.

"If what's true, mother?"

"That you said you wished there wasn't no such person as m—me!" faltered Mrs. Edmonstone.

"Mother, you know I never could have said such a thing," cried out Rachel.

"Well, it wasn't quite exactly that; but Betsy Tacker she heard you say you wished there wasn't no such thing as a mother-in-law."

"Oh!" cried Rachel, with a hysterical little laugh, "I plead guilty. I did say that. But, oh, mother! it was under such strong provocation, and I never meant you. How could I, when you have always—always been so good to me?"

"I knew it couldn't be true," said Mrs. Edmonstone, settling herself in the easiest rocking chair and nodding her cap strings comfortably. "But how came you to make that ex-tra-or-dinary speech, Rachel, about mothers-in-law in general?"

"It was Tom," said the young wife. "He was so aggravating!"

"Thomas always was aggravating," said Mrs. Edmonstone, stirring the cup of tea that Rachel had brought her. "And what was it about now? The breakfast cakes?"

"Oh, you remember about the breakfast cakes, don't you?" said Rachel, with merry mischief sparkling in her eyes. "No, it wasn't the breakfast cakes this time; it was the shirts."

"The shirts!"

"Well, you know he said it was such a wasteful, extravagant proceeding to buy shirts ready made," explained Rachel. "He said the linen was poor, and the work regular slop shop style, and he declared you always used to make his shirts at home, every stitch, before he was married."

"So I did," acknowledged Mrs. Edmonstone, with a groan. "But that was in the old times, before you could buy such a good article as they have now."

"Yes, but Tom don't make any allowance for difference in times and customs," sighed Rachel. "He wanted home made shirts, and home made shirts he would have!"

"And you made 'em?"

"Yes, I made them."

"You were a great goose," reflectively spoke Mrs. Edmonstone.

"And—and Tom swore dreadfully the first one he put on"——

"I don't in the least doubt it."

"And he said they set like meal bags, and that they twisted his neck around as if he had just been hanged, and grasped him on the shoulders like a policeman! Oh, I can't tell you what he didn't say!"

"Bless me!" said Mrs. Edmonstone.

"He told me his mother's shirts set like a glove, and fitted him perfectly—and why couldn't I turn out a shirt like those? And it was then, mother dear," suddenly flinging her arms around the old lady's plump, comfortable neck, "that I lost my head, and told him I wished there wasn't such a thing as a mother-in-law in the world! And Betsy Tacker sat in the sewing room altering over my dolman in the spring style, and I suppose she must have heard me."

"Don't mind it, my dear," said Mrs. Edmonstone.

"No, I won't," protested Rachel. "But, oh, those shirts! I've been ripping them apart and sewing them together again, and rounding off a gusset here and taking in a plait there, until I've got so that I dream of 'em at night, and the more I try 'em on the worse they fit, and the more unreasonable Tom becomes. 'My mother never made such work of it as this!' says he."

"Thomas forgets," observed Mrs. Edmonstone severely.

"And I'm sure if things go on like this," added Rachel, pushing her short brown curls off her forehead, "it'll end in a separation on account of 'incompatibility of temper.'"

"No, it won't, my dear," said the mother-in-law. "Here, get me the pattern and some shirting muslin and a pair of scissors."

"What are you going to do, mother?" eagerly questioned Rachel.

"I'm going to make Tom a shirt. But don't you tell him, Rachel. We'll see whether it's Tom or the pattern that has altered."

Once more the mischevious light came into Rachel's bright blue eyes.

"I wish all the world was mother-in-laws," she cried gleefully. "Why, why didn't I think of this before?"

"One can't think of everything, child," said Mrs. Edmonstone consolingly.

Thomas Emondstone welcomed his mother cordially when he came home from business.

"I'm so glad you've come," said he. "We can have some of the nice old fashioned dishes now. Rachel can't seem to get the hang of them, although she has always had your book of recipes to guide her."

"Rachel's a good deal better cook than ever I pretended to be," said Mrs. Edmonstone. "They have patent egg beaters and cream whippers and raisin seeders, and all that sort of thing, now that they didn't have in my day. I never tasted nicer bread than Rachel makes, and these popovers are just delicious."

"You're just saying that to encourage Rachel," said Mr. Edmonstone, with an incredulous smile. "Things will run smooth now you've come. That's one comfort."

"Oh, I shouldn't think of interfering in Rachel's kitchen," said the old lady.

"Please do, mother," coaxed the wife, not without a certain quiver in her lip. "Do let Tom have a reminiscence of the old days while you are here."

"Well, just as you children say," conceded the mother-in-law good humoredly.

She remained a week at her son's house, during which period of time Tom was all exultant complacency.

"This," said he, "is something like living. I feel myself a boy again when I taste these apple fritters."

"They're not bad," said Rachel, who had made them with her own skillful hands. And she helped herself to a little of the sauce.

"And why don't you learn my mother's knack of making such pie crust as this?" demanded Tom. "There is no dyspepsia here!"

"I'm glad you're pleased," said Rachel, with a guilty glance at her mother-in-law.

"Oh, by the way, Tom, the last of the set of shirts is finished now. Will you put it on to-morrow?"

"I suppose so," ungraciously uttered Tom. "Will set like fury, I dare say, like all the rest of them!"

"You might at least give it a trial."

"Didn't I say I would?" still more ungraciously. "Those shirts will be the death of me yet," he added turning to his mother with a groan, while Rachel sat steadily observing the pattern of the table cloth.

The breakfast sat smoking on the table next morning when Mr. Edmonstone came into the room twisting himself as if he were practicing to be a human corkscrew. Mrs. Edmonstone glanced timidly up at him.

"Don't it fit, Tom?" she questioned.

"Fit! Just look at it, will you?" he retorted. "Fit! Hangs like a window curtain around my neck—pinches my wrists like a pair of handcuffs! I feel as if I were in a strait jacket"—writhing impatiently to and fro. "Oh, I might have known it beforehand—you haven't an idea what the word fit means. I wish, mother, you could teach this wife of mine how to make a decent shirt!"

"Thomas," said Mrs. Edmonstone solemnly, transfixing him with the glistening spheres of her spectacle glasses, "you're not very polite. I made that shirt."

"You, mother!"

"Yes, I myself. Just as I used to make shirts for you in the olden times that you're always sighing after. I've been working at it ever since I've been in the house. Throw away the pattern, Rachel, and don't waste any more time trying to make your husband's shirts," she added. "It's an economy of time and temper, as well as of money, to buy them ready made. It's Tom that's in fault, not the work. And as for the cooking you've been praising up so eloquently all the time I've been here, I haven't touched a pot or a pan. It's all her—your wife's work. So much for imagination. Oh, you needn't hang your head so sheepishly—you're neither better nor worse than other men," went on Mrs. Edmonstone. "And I never saw the man yet that didn't need to hear a wholesome truth now and then. You've got the best and sweetest little wife in the world."

"Mother," pleaded Rachel, trying to put her hand over the old lady's mouth, but Mrs. Edmonstone resolutely persisted.

"And it's my advice to you to try and treat her as she deserves."

"I—I don't know but that I have been rather cranky of late," said Tom self consciously, "now that I come to think of it."

"Cranky! I should think so," said the old lady. "I'm sure I don't know what the world's coming to. Here's little Georgy toddling around with his wooden cart. The first you know he'll be telling his wife about the wonderful successes his mother used to make in this, and that, and the other thing. We've all got to come to it."

"And Georgy 'll be right," said Tom, who after all had a magnanimous streak through him. "What a crab I've been all this time. Hang the home made shirts! I'll buy 'em out of the store next time! Kiss me, Rachel—and you, too, mother! And be sure you let me have a dish of scalloped oysters when I come home to dinner." The oysters Rachel cooked.

He ate his breakfast and departed. And when he was gone young Mrs. Edmonstone looked with shining eyes at old Mrs. Edmonstone.

"Oh, what a nice thing to have a mother-in-law!" said she fervently.—Shirley Browne in Fireside Companion.

A Handy and Useful Scrap Basket.

A new variety of the ever useful scrap basket will be warmly welcomed by people obliged to live in rooms so small that every inch of space is valuable. It will also be a great convenience to travelers and persons intending to spend a few weeks in the scantily furnished rooms of summer hotels. Credit must be given to the brains of somebody on the other side of the ocean, for this device is not a "Yankee notion."

The foundation is one of the folding lattice work flower pot covers—the more substantial the better—and a large bag of silk, cretonne or any strong material. Open the cover to its full size, and cut a pasteboard circle to fit the bottom exactly. Cover both sides of the pasteboard with silk or cretonne—or whatever material has been selected—and around this gather a bag twice the length of the height of the cover.

Turn the top of the bag over the width of two inches, hem it, and above the hem make two rows of stitching half an inch apart, through which run ribbons in opposite directions to draw up the bag. Loops of "baby" ribbon sewed flatly on the outside of the bag just at the top of the cover and slipped over its ends serve to hold it in place. To pack it, take the bag out, roll it up over the pasteboard bottom and close the cover. Both will then occupy a very small space. These baskets can be made very ornamental, as well as useful, by gilding the lattice work cover and using some pretty shade of surah silk or satin for the bag.—New York Tribune.

The Art of Feeding Horses.

An English veterinary surgeon recommends that those who have charge of horses should be taught that the stomach of a horse is not like the rumen of a cow, a mere receptacle for food, but an essential organ of digestion for a limited capacity, which does not need to be crammed in order to perform its proper functions, and that it cannot be so treated without danger to the animal; and that the teeth of the horse are provided for the purpose of masticating the food, and that the food which does not require mastication should be sparingly, if ever used. He further recommends that no horse be put to work immediately after a full meal, and when a horse has done a heavy day's work it should be allowed to stand in the stable until it is cool and comfortable before being fed. A little water may be given, and if a little good hay be put into the rack it will occupy his attention, and besides requiring proper mastication will further have the effect to slightly stimulate the stomach to secretion, and prepare it for the reception of the feed which is to follow. Should a horse require more food than usual to supply the extra waste of tissue caused by hard work, give it by all means, but let it be in excess in its albuminoids, and let the horse be fed oftener and not increased quantities at a time.—Horse and Stable.

By Hammer and Hand All Arts Doe Stand.

The Blacksmiths' cup, which formerly belonged to the Blacksmiths' company, of England, was a tall cup of silver 11½ inches high, without a cover, the bowl engraved with the arms of the Blacksmiths' company and decorated with tooled granulated ornaments, the stem formed as a figure of Vulcan standing by his anvil, on which is engraved the motto, "By hammer and hand all arts doe stand," and round the brim inscribed, "The gift of Christopher Pym, upon his admission to the place of clerk of this company." The hall mark upon it is of 1655.

The cup was in the famous collection of Ralph Bernal, and afterward passed into that of Mr. Dexter, and is described and engraved in Cripps' "Old English Plate." It weighs 30 ounces 4 pennyweights. It was recently sold and brought £535. When sold in the Bernal collection in 1855 it was bought for £37 10 shillings by Gen. Lygon, who sold it to Mr. Dexter for £25, but in Mr. Dexter's sale, in 1872, it sold for £367 10 shillings.—Jewelers' Weekly.

Which Is Your Right Hand?

An anatomist told me the other day that I could not tell him which was my right hand. I immediately held out my right hand, but he objected. He said that he did not say that I could not show or extend my right hand, but that I could not tell him which was my right hand—that is, that I could not describe it in words, so that one who had never heard of the distinction we make between the right and the left hands would be able to find it. I thought that would be easy enough also until I took time to think the matter over, then I gave it up, for, on the outside of the human body there is nothing to distinguish the right hand from the left. No one can describe it in words so that an ignorant person (one not knowing the distinctions we make) can find and locate it.—St. Louis Republic.

Russhi's Modest Start.

John Russhi began his career as a waiter ten years ago in Delmonico's. In a year he managed to save $500. Among the guests he was accustomed to wait upon was Russell Sage. One day after Mr. Sage had finished an unusually hearty meal he became quite talkative. Russhi mentioned that he had saved $500, and timidly asked if Mr. Sage could suggest a good way to invest it.

The financier thought a while, and taking a small piece of paper from his pocket wrote the name of a certain stock upon it. Russhi's $500 soon grew to $5,000, and so on. He still works as a waiter, and it is safe to say that none of the people who order him about is aware that he possesses so much money. —New York Telegram.

One Hand Washes the Other.

Plymouth, Mich., has three factories turning out toy air guns. Several shrewd and far seeing manufacturers of glass eyes are said to own stock in these concerns.—Minneapolis Tribune.

Cause and Effect.

It is an accepted axiom of logic and philosophy that every effect has a cause. In our national legislative halls there has been a fracas both distressing and disgraceful. Columbia blushed rosy red to the roots of her luxuriant hair, and the American eagle was seen to put his head under his wing. That was the effect. Now for the cause. Lard seems to have made all the sputter, but to find original cause philosophy suggests deeper study. It will be remembered that certain demoniacs requested at one time to be domiciled in the bodies of a lot of hogs.

They rushed down a steep place into the sea. A pig cannot swim. If he tries to do so he cuts his own throat, but may it not be possible that a few of them scrambled out? The law of heredity is a fact, a physiological verity. I have always held that pork (at least some pork) was full of evil spirits. Now lard is a product of pork. All men are influenced by their environment, more or less. Congressmen are only men, so that it is just possible that the primitive cause of all this trouble can be traced to those devil endowed swine from the sea coast of the Gadarenes. Put the blame just where it belongs.—Pittsburg Dispatch.

Each Wanted the Earth.

Several people have been accused at different times of wanting the earth, but only within a few months has the demand for it become so great that the contestants have taken the matter into the courts. In the operation of a telephone system or an electrical railway line considerable expense is saved if the earth can be used for the return circuit. Generally the telephone companies have been first in the field, and have taken the earth for their own use.

When the electric railway came, however, and also took the earth, there was music in the telephones of a sort not at all pleasing to the subscribers. The leakage of current from the railway line raised havoc with the feeble telephonic current. In a great number of cases the telephone companies have appealed to the courts to "make the electric railways stop using the earth," but it has generally been held that the fact of prior possession avails nothing, and any one who wishes may have the earth to use. The telephone companies will generally construct complete metallic currents to get rid of their trouble, and leave the electric railways in serene possession of the earth.—Engineering News.

What Laughing Is.

A solemn professional donkey abroad announces that "laughter is really nothing more than disorganized breathing. When you are excited to a fit of laughter you hold your breath and then it suddenly bursts out, causing eccentric sounds as it passes the organs of the voice." Let us wait now until the next profound idiot discovers that breathing is merely disorganized laughter.—Chatter.

A man who has practiced medicine for 40 years, ought to know salt from sugar; read what he says:

TOLEDO, O., Jan. 10, 1887.

MESSRS. F. J. CHENEY & CO.—Gentlemen:—I have been in the general practice of medicine for most 40 years, and would say that in all my practice and experience have never seen a preparation that I could prescribe with as much confidence of success as I can Hall's Catarrh Cure, manufactured by you. Have prescribed it a great many times and its effect is wonderful, and would say in conclusion that I have yet to find a case of Catarrh that it would not cure, if they would take it according to directions.

Yours truly,
L. L. GORSUCH, M. D.,
Office, 215 Summit St.

We will give $100 for any case of Catarrh that cannot be cured with Hall's Catarrh Cure. Taken internally.

F. J. CHENEY & CO., Props., Toledo, O.

Sold by Druggists, 75c.

"German Syrup"

A Farmer at Edom, Texas, Says: "We are six in family. We live in a place where we are subject to violent Colds and Lung Troubles. I have used German Syrup for six years successfully for Sore Throat, Cough, Cold, Hoarseness, Pains in the Chest and Lungs, and spitting-up of Blood. I have tried many different kinds of cough Syrups in my time, but let me say to anyone wanting such a medicine—German Syrup is the best. That has been my experience. If you use it once, you will go back to it whenever you need it. It gives total relief and is a quick cure. My advice to everyone suffering with Lung Troubles is—Try it. You will soon be convinced. In all the families where your German Syrup is used we have no trouble with the Lungs at all. It is the medicine for this country." John Franklin Jones.

G. G. GREEN, Sole Man'fr, Woodbury, N.J.

Cod-liver oil suggests consumption; which is almost unfortunate. Its best use is before you fear consumption—when you begin to get thin. Consumption is only one of the dangers of thinness.

Scott's Emulsion of cod-liver-oil makes the thin plump, and the plump are almost safe.

Let us send you a book on CAREFUL LIVING—free.

Bagley—There is a man who made a success of life after having met with failure. Brace—Most anybody could do that if the failure was any good.

A VERY COMMON WANT.

"Out of sorts," "distrait," "the blues," these are familiar appellatives for uncomfortable, undefinable sensations, accompanied with lassitude, nervousness, indigestion. Poverty of the blood, to remedy which an effective stomachic persistently used is the paramount need, is conclusive evidence that the system is insufficiently nourished because—and for no other cause where organic disease does not exist—the food is not assimilated. Reinforce the flagging energies of the stomach, reform an irregular condition of the bowels, keep up a healthful secretion of the bile with Hostetter's Stomach Bitters. For over thirty years this popular medicine has supplied the common want of the nervous invalid, the dyspeptic and of persons deficient in vitality, an efficient tonic. To its powers of imparting strength is attributable its efficacy as a preventive of malaria and la grippe. Thoroughly effective is it too for rheumatism, kidney complaint and neuralgia.

The man who shows too much of a Christian spirit is apt to get stepped on.

RUSSELL SAGE, THE WELL-KNOWN FINANCIER WRITES:

506 FIFTH AVENUE,
NEW YORK CITY, December 20, 1890.

For the last twenty years I have been using ALLCOCK'S POROUS PLASTERS. They have repeatedly cured me of rheumatic pains and pains in my side and back. Whenever I have a cold, one on my chest and one on my back speedily relieve me. My family are never without them.

The greatest social bore is the man who has not had the grip. He has nothing to talk about.

A woman "run-down," overworked, weak, nervous and debilitated—that's a woman that Dr. Pierce's Favorite Prescription is made for. It gives her health and strength. All woman's weaknesses and all woman's ailments are cured by it. It's a legitimate medicine—not a beverage; an invigorating, restorative tonic and a soothing and strengthening nervine, free from alcohol and injurious drugs. It imparts tone and vigor to the whole system.

For all functional irregularities, periodical pains, organic displacements and uterine diseases, it's a positive remedy.

And a *guaranteed* one. If it doesn't give satisfaction, in every case, the money paid for it is refunded. No other medicine for women is sold on these terms. That's because nothing else is "just as good." Perhaps the dealer will offer something that's "better." He means that it's better for *him*.

I CURE FITS!

When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. TO THE SEED DANDELION.

In a merry mood you blossomed,
Little ball of silver gray;
You were golden then and cheery
As the eye of winsome day.

Then the earth was bare and blighted,
And the fields were brown and sere,
And you came with looks delighted,
Happiest thing of all the year.

Now the fields are pied with daisies—
Woods with blossoms overrun,
And you stand the ghost of springtime,
Shining wanly in the sun.

But you chose the noblest mission,
Gave your cheer when earth was cold,
And when days were poor and barren
Freely scattered all your gold.
—Youth's Companion.

THE BALL DRESS.

"You are invited to the regiment ball, my dear," said Mrs. Ackland as her daughter entered the room, her dripping waterproof and umbrella giving evidence of a sturdy battle with the storm that could be plainly heard even through closed shutters and dropped curtains on that upper floor. "The most polite letter from Col. B——, and knowing that I forsook society long ago. Mrs. Col. B—— will take you with her own girls; it is really charming of her. Here is the ticket."

The elderly lady's frail fingers drew two elegant squares of pink and gold pasteboard from an envelope as she spoke. But the girl, having hung the waterproof in an adjacent kitchen, and perched her umbrella where it could drip harmlessly into the stationary tubs of said kitchen, did not even pick them up.

"It would be better to publish the fact that I have retired from society also, mamma," she said, a little sadly.

"You!" cried her mother. At 20, Effie?"

"It comes to that when one has one black frock," said Effie, "and that patched at both elbows."

"You could go in white," said her mother. "You look very girlish. Gentlemen admire white, or used to. White and a few flowers and no jewelry—no one could find fault with that style. The greatest heiress in Boston when I was a girl was known for her simplicity—always white."

"I fancy I should be if I went in a sheet and pillow case costume," said Effie. "Really that would be the only white one I could manage. That poor old white dress that still exists in your memory is short in the waist, shorter in the skirt, won't meet in the belt, and has a sleeve that would not go over my wrist. I've grown a great deal in five years, mamma."

"Is it five years since you went to your cousin Jennie's wedding in it?" cried Mrs. Ackland. "Dear, dear, how time flies. Couldn't you make over one of my old silks?"

"I should be a laughing stock, mamma," said Effie. "Well, I can live without going to the ball, though I should enjoy it very much."

"The daughter of Capt. Ackland ought to have opportunities," said the widow. "How you are to marry if you never meet any one I cannot think. A pretty girl like you was never meant to be a spinster and work for her bread."

"Things point in that direction now," said the girl. "Typewriting is not a lively amusement, and I am as likely to marry as I am to go to China. Don't sigh so bitterly, mamma. It would only make you lonelier if I went to the ball, and I should be up late and make mistakes next day—lose my place, perhaps. I'll write a very polite regret when I get some fine note paper. Now, let us have tea."

The little brown teapot, the two blue cups and plates to match, were soon on the table. Effie Ackland had a way of making excellent little dishes out of next to nothing—it was very convenient under the circumstances—and though the girl pined for something besides the daily routine of typewriting and evenings spent in listening to her mother's reminiscences of former grandeur—for Mrs. Ackland had been a belle and a beauty and an expectant heiress when she married the dashing young captain—it was the mother who bemoaned herself.

At last, tea being over, it was discovered that the storm had passed, and that moon and stars were shining, and Effie declared that she would run down to the little stationer's and get some note paper of the proper sort on which to reply to the kind invitation and offer of the colonel and his lady.

It was a quiet neighborhood and very late, and Effie wrapped herself in a thick cloak and tied a little blue hood over her head and ran lightly down stairs and down the street toward the stationer's shop. However, when she reached its door she found it closed. The old woman who kept it had expected no customers, and had retired early. Effie knew of another shop of the same sort a few blocks further on which was always open late, and turned her steps that way—at least she intended to do so. But there are still portions of New York city where it is very easy to lose one's self, and besides Effie was not an old resident of that part of the town. Somehow she missed the right corner, crossed the street at the wrong angle, and shortly discovered that she was lost.

It was a gloomy and unpleasant street in which she found herself, and the girl was somewhat frightened. However, she decided that the best thing she could do was to keep on walking until she came to a decent shop or met a policeman of whom she could ask the way. She acted on this resolution with her usual promptitude, but for a long while she went on seeing nothing but liquor or cigar shops and meeting not a solitary guardian of the peace, and came at last to an old building with a blank wall in the center of which an arched gate stood open.

Just as she stood opposite this gate two drunken men came howling down the street, and in terror of them she stepped beneath the arch. They passed without seeing her, but before she dared to venture out a light shone in her face, and turning she saw a figure in black, with red shoes, a red cap, horns, hoofs, a long tail, which he carried over his arm, and in his hand a great paper parcel—in fact, Satan as we see him portrayed in ancient pictures, acting for the nonce as messenger boy.

Startled beyond expression, Effie was about to fly, when the demon spoke.

"Well, mamselle, I've been waiting for you a long while," was his characteristic remark. "I came so far to save time. Won't you get a roasting!"

Then he tossed the parcel into her arms, turned and fled.

Effie fled also. What the demon had given her she did not know, but she quite mechanically clutched it as she flew along the lonely street, and by mere accident took the right direction and found herself at the corner of an avenue she knew. She arrived at her own door just in time—at least so her mother declared—to save that lady from going out of her mind with terror. She had no paper, but she had the parcel which the demoniac personage had crammed into her hands to prove that she had not merely imagined the meeting with him, and now she unfastened the many pins that held it, unfolded the paper and sundry muslin wrappings within, and behold—a dress—the loveliest ball costume of golden satin and black lace that could be imagined!

The demon had presented her with a dress in which to attend the ball.

"What does it mean?" she ejaculated. "Really I feel as if I was out of my mind!"

"It must be providential," said the mother. "Try it on, my dear."

Effie obeyed. The costume fitted her perfectly.

"You look like an angel," said the mother.

"But the demon said I should have a good roasting," said Effie.

"It was only a man in some queer dress," said the mother.

"Of course," said Effie. "At least, I suppose so."

"And now you can go to the ball," said the mother.

"Shall I dare? Will I not find my costume vanishing, like poor Cinderella's, in the midst of my dance with whatever stands for the young prince at the officers' ball of the regiment? I doubt if it will be here in the morning; besides I ought to advertise it, 'If the fiend who presented a young lady with a black lace ball dress in a dark alley on the night of the —th will kindly call,' or something of the sort."

"Oh, we will look into the papers, of course," said the mother. "But I don't believe we will find anything—fate intends you to go to the ball."

So it seemed indeed.

Effie went to the ball and her dress was pronounced charming. In passing I will mention to the reader that it was there that she met the gentleman who afterward became her husband, and that much happened and all good fortune came to her through the demon's gift of the ball dress.

No one ever advertised for the dress, and it hung in Effie's wardrobe until her wedding day. She never wore it again, and never expected to solve the mystery that surrounded it.

Effie had married a rich man and lived in very elegant style, and a man servant was one of the necessaries of the household. Mrs. Ackland, who lived with her daughter, suggested a Frenchman, and having advertised for such a person a candidate presented himself. He had but one reference, but that was a good one.

"I will tell you the reason I have no more, madam," said he. "I have had my ambitions—desired to go upon the stage. I even obtained a position—I played a demon in the last act of a great spectacle at the —— theatre. There were seventy-five demons—it was glorious. But alas! I got into difficulties there through my good nature. The renowned Senora V—— had been playing at the theatre, and left behind her a lace dress. She telegraphed that she would send her maid for it, as she was to wear it that night. Every moment was precious, and the old lady who had charge of me had sprained her ankle. 'My friend,' she said to me, 'if you would but go down the long stairs and to the end of the passage, and wait with the parcel until Mlle. Fanchon, the senora's maid, comes for the dress you will save us all much trouble—you will not be wanted for an hour.'

"I obliged her, of course. I even went into the damp alley of the back entrance and waited there. I was kept a tremendous time, and when at last a young woman rushed in I gave her the parcel like an idiot—without asking who she was. I gave it to the wrong woman. Fifteen minutes after the real maid arrived. Oh, there was a row! All I was worth would not have paid for the dress. But I was dismissed at once. I deserved it. It was the act of an idiot. How well do I remember what I said to her—'you'll get a roasting, mamselle. Well, it was I who got the roasting. At first they accused me of stealing the dress, but"——

"I am sure you tell the truth," said Effie, and engaged the man at once.

That day Senora V—— was astonished by receiving a box which contained the long lost dress uninjured.

A letter which was inclosed told the story in full, but without giving any names, and Camille—the new waiter—never guessed that the liberal gift he received at Christmas time was offered, not to the accomplished waiter, but to the demon who had brought about so much happiness by his gift of a ball dress.—Mary Kyle Dallas in Fireside Companion.

Compensation.

"I am sorry for you, Walty," the kind hearted surgeon said, "but the thumb will have to come off."

"My hand won't be of much account, will it, doctor?" inquired Walty tearfully.

"You will have your four fingers left, but you will not be able to grasp anything firmly."

"I can't help papa pull plantains out of the front yard nor weed the garden for mamma, either, can I?"

"I am afraid not, my boy."

"Whoopee! Cut 'er off, doc!"—Chicago Tribune.

JOY CAME FROM SORROW.

The Tragedy and Romance of the Czar's Wedding.

SLEW HIS ELDER BROTHER BY ACCIDNET.

He Marries the Dead Man's Promised Bride.—A Happy Union.

The preparations now being made throughout Russia for the celebration of the silver wedding of the czar and czarina recall to mind the singularly sad circumstances under which it was contracted. No wonder that the massive and striking features of Alexander III are often darkened by a gloomy and unhappy expression. For his marriage followed one tragedy and his accession to the throne another. Of the latter it is unnecessary for me to speak here, for the circumstances of the terrible assassination of Alexander II, the Liberator of the Serfs, just ten years ago, are still so fresh in people's minds that it would be superfluous to reiterate the familiar details of the catastrophe. Of the sad events which led to the present emperor's marriage, however, far less is known.

The czarina was the betrothed—almost the widow—of Alexander III's elder brother, Nicolas. The latter died on the eve of the date appointed for his marriage from the effects of a blow struck during the course of some rough horseplay by the present emperor. Husband and wife met for the first time at the deathbed of the Czarowitz Nicolas, who was brother of the one and the fiance of the other. A little more than a year afterward their wedding took place at St. Petersburg.

THE CZAR AS A BRIDEGROOM.

It is impossible to conceive a greater contrast than that which existed between the two brothers, who were exceedingly fond of each other. Nicolas the elder bore a striking resemblance to his beautiful mother. He possessed the same delicate, clear cut and refined features and the same slender, elegant and graceful figure. His physical graces were on a par with those of his mind. Witty, clever and sparkling, his kindly epigrams and his charming verses remain to this day as an illustration of his brilliancy of intellect. He was an ideal lover and under the circumstances it was not astonishing that his betrothed, Princess Dagmar of Denmark, the younger sister of the Princess of Wales, should have been passionately devoted to him.

While the education of Nicolas was almost entirely foreign, that of Alexander was left to Russians, his principal tutor having been the fanatical and bigoted Pobiedonostzew, who, today, as procurator general of the holy synod, is the moving spirit of all the Jewish and Catholic persecutions. Uncomely and uncouth as a lad, surly tempered and dull witted, Alexander experienced the treatment of the ugly duckling, and was perpetually being slighted, not alone by his own family, but even by the court dignitaries and officials, in favor of his elder and far more popular brother, and I can well remember the disagreeable surprise and widespread apprehension which was created both in Russia and abroad when it was realized that he had become heir apparent to the crown of "all the Russias."

Betrothal in the Greek church is not a mere engagement in the manner that Anglo-Saxons understand it, but a solemn ceremony performed in church and almost as binding and important as that of marriage itself. It was not, therefore, as mere fiancee but almost as wife that Princess Dagmar was summoned in all haste from Copenhagen to Nice late in the spring of 1865 to attend the deathbed of her imperial lover. Her grief was intense, and she only parted from the medallion containing her dead lover's hair and portrait which she wore around her throat when she donned her wedding dress on the day of her marriage to Alexander III. The latter, too, appeared during the whole period preceding the wedding to see his dead brother's specter arising perpetually between himself and the fair lady whom the exigencies of national politics—but not love—required that he should lead to the altar as his bride. For during the entire courtship—if courtship, indeed, it can be called—he avoided ever being en tete-a-tete with the princess or even meeting her

THE CZARINA WHEN A BRIDE.

except on official occasions. It was to his younger brothers, Wladimir and Alexis, that he left the duty of representing him at all other times by the side of his future wife.

It is surprising that a marriage thus contracted under the very shadow of death should have resulted in such unalloyed domestic bliss. There is no royal or imperial couple in Europe whose relations toward one another have been so unclouded since their marriage. The czarina has learned to love and admire the sound and sterling honesty of her huge, burly and rather narrow minded husband, and is wholly wrapped up in him—never leaving him, and acting as his guardian angel. That her affection and devotion is returned with interest by the czar is conclusively shown by the fact that he alone of all the princes, either past or present, of his house has maintained a strict and honorable observance of his marriage vows.

A Dog's Mission.

One balmy afternoon in June Hans Cordova, a wood chopper in the forests in the southern part of Louisiana, wandered off in the woods to take the life which God had given him. His was a hard lot. His wife was ill, and the meager pittance which he earned with the ax was expended to buy the medicine which she needed, and now, with starvation staring him in the face, he was about to take his life.

After walking a considerable distance into the forest Hans began making preparations for his entrance to that "bourne from whence no traveler returns." While on his knees commending himself to his God, he heard a low whine, which suddenly changed to a growl, as his dog, a great shaggy deerhound, bounded past the kneeling man after a "cotton tail," which had just disappeared down a small hole under a fallen tree, and Hans, forgetting everything in his eagerness to catch the rabbit, scooped up handful after handful of earth from the hole, until, after dislodging a large, flat stone, he came to a small cavity in which rested a moderate sized strong box, of an old pattern, and, better still, inside the box was found between four and five thousand dollars in Spanish doubloons.

How it got there and to whom it originally belonged is a mystery Hans has been unable to solve. Although a very moderate fortune, it restored him to his old time prosperity, and today the laziest and most important member of the family is Jack, the old deerhound; and as Hans remarks to his visitors, that "Jack is, indeed, a dear, dear hound."—New York Journal.

Willing to Pay for Good Advice.

When D. K. Tenney was admitted to the bar he was one of the "boys." He enjoyed a good time as well as any one, and many good stories are told about him. It is said that on one occasion he went to a country dance near Madison and became smitten with one of the country girls. He danced with her nearly all the evening, regardless of the fact that a certain six footer in the room kept watching him threateningly. Finally a friend approached.

"Dan," he said, "do you see that big fellow on the other side of the room?"

"Yes."

"Well, he's going to lick the life out of you."

"What for?" asked Tenney.

"You've been dancing with his girl all the evening."

"I didn't know it. What shall I do?"

"Well, if I were you I'd put on my coat and make a sneak for home. I'd get away from here just as quick as I could."

The embryo lawyer said never a word, but reached down in his pocket and pulled out a two dollar bill.

"What are you doing?" asked the friend.

"Take it."

"I don't want any money."

"Take it," repeated Tenney. "I've taken $5 for a blamed sight worse advice than that."—Milwaukee Wisconsin.

Explosions.

Of the present most celebrated explosives in use, or proposed for service, what is known as blasting gelatine contains the largest percentage of nitro-glycerine, viz., eighty-two parts, with eight of gun cotton; then dualine, eighty parts nitro-glycerine and twenty of nitro-cellulose or gun cotton; dynamite, seventy-five parts nitro-glycerine and twenty-five of infusorial earth; Atlas powder, seventy-five parts of nitro-glycerine, twenty-one of wood fiber, five of carbonate of magnesia and two of nitrate of soda; tonite, 52½ parts gun cotton, 47½ of nitrate of baryta; rackarock, 77.7 parts of chlorate of potash and 22.3 of nitro-benzol; rendrock, again, is a composition of forty parts nitro-glycerine, forty of nitrate of potash, or soda, thirteen of cellulose and seven of paraffine; giant powder, thirty-six parts nitro-glycerine, forty-nine nitrate of potash, or soda, eight of sulphur and eight of resin or charcoal; mica powder, fifty-two parts nitro-glycerine and forty-eight of pulverized mica.

The Love of First Loves.

The truth is, to be spoken flatly and with confidence that it is the truth, that a man who does not love his first loves all his life long makes a great mistake and does injustice to his own past. But, of course, he is to love them as they were. The affection they inspired in him, when they did inspire it, is a part of himself for all time, and they, as they then seemed, are a part of him too, and it is as idle for him to try to eradicate them from his actuality as for the leopard to attempt to change spots with the Ethiopian. That he should love what they may become with the lapse of years is manifestly inexpedient and unreasonable, as well as usually improper, if for no other reason because

One must not love another's.

—"The Point of View" in Scribner.

Our Aberrant Capital.

The capital of the United States has been located at different times at the following places: At Philadelphia from Sept. 5, 1774, until December, 1776; at Baltimore from Dec. 20, 1776, to March, 1777; at Philadelphia from March 4, 1777, to September, 1777; at Lancaster, Pa., from Sept. 27, 1777, to Sept. 30, 1777; at York, Pa., from Sept. 30, 1777, to July, 1778; at Philadelphia from July 2, 1778, to June 30, 1783; at Princeton, N. J., from June 30, 1783, to Nov. 20, 1783; at Annapolis, Md., from November, 1783, to November, 1784; Trenton, N. J., from November, 1784, to January, 1785; New York from Jan. 11, 1785, to 1790, when the seat of government was changed to Philadelphia, where it remained until 1800, since which time it has been at Washington.—St. Louis Republic.

Paper from Spider Webs.

George West, of Ballston, is in possession of a curiosity in paper, sent him by a friend in Hong Kong, China. It is a sheet 11 by 14 inches, made from the web of the "sacred white spider" of the Flowery Kingdom. It is as light as air and almost as transparent, but is also beautifully printed, containing about two columns of matter, giving in English the story of how "Midshipman Copplestone was Presented at the Court of Pekin." Americans know much about paper making, but it is safe to say that there is not a spider web paper factory outside the almond eyed kingdom.—St. Louis Republic.

Colored Glass.

Colored glass, by reason of its beautiful color, is introduced wherever a place can be found for it. One of the latest caprices in glass is to give it a diamond quilted appearance. This is found in lamp shades, flower receivers and in the little fairy lamps that are in such general use. Town drawing rooms and boudoirs are kept in half light as more becoming. To enter at twilight a room in which the only light is a wood fire, with here and there fairy lamps shining in the darkness like glow worms, is to get the benefit of a very picturesque effect.

A Deep Lake.

In the Cascade mountains, about seventy-five miles from Jacksonville, Ore., is to be found the Great Sunken lake, the deepest in the world. It is said to average 2,000 feet down to the water on all sides. The depth of the water is unknown. It is about fifteen miles long and four and a half wide.

CULTIVATION OF RICE.

Water Plays a Big Part in the Raising of the Cereal.

A GROWING INDUSTRY IN LOUISIANA.

Some of its Drawbacks—How the Fields are Kept Flooded.

"Tell you something about rice in Louisiana?" repeated Andrew C. Wilkinson, the owner of a large rice mill in New Orleans, where the rice grown on his plantation is cleaned, at the Gilsey House. "I see that the papers have just found out that Englishmen are trying to buy up and form a trust of the rice mills in the south, although the agents have been down there for something over six months. Nobody is quicker than John Bull to scent a bargain.

"New Orleans is the chief rice milling city of America. Fifty years ago we did not have such a thing as a rice mill, but now we have sixteen, working 220 rice pounders and employing more than 1,200 men. Louisiana has always been known as the Sugar State, but we also want to add to it that of the Rice State of the Union.

"How is it cultivated? Well, the first necessity of profitable rice culture is a comparatively level piece of land, properly prepared for the seed. This field must be located so as to be conveniently irrigated from the prairie reservoir or the flume in the levee. Highland rice does not pay in Louisiana, the only profitable rice being that grown in water. Water is the first and last want of sprouting, growing and ripening rice. Before the ground is ready for the seed it is divided up by a system of little sublevees and watering ditches. It is then planted in drills dug by machines—or rather I should say that the machine is the proper way to do it, but the seed is frequently broadcasted with us in Louisiana.

"Then comes the most delicate part, in the water manipulation. After the seed is planted the soil is thoroughly saturated with water to sprout it, but the water is at once taken off when the seeds have evenly germinated, and kept off until the tender shoots of the plant rise two or three inches above the ground. You can easily see that the young plants may be either drowned out or dried up by the least inattention in regulating the flow.

On the other hand, with too much water, crawfish invade the fields and devour the delicate plants, while with none at all, rice caterpillars cut them down and kill them. If you neglect the main flume you not only risk the total loss of your crop, but by permitting the water to get ahead of you there may come a break in the levee, and away go your cattle and crops.

"The most expensive part of rice growing comes when it is about a foot high, after it has been liberally watered; I mean the grassing of the rice. You see, the laborers wade through the rice, pulling up and throwing into heaps all the weeds and water grasses they find. This grassing costs on an average about four dollars an acre, and after that is over the rice planter has but little to do except to give it plenty of water. One peculiar thing about irrigation is that the heads of the rice plants never fill out, no matter how much water you give them artificially, unless there are plentiful rains.

"One feature of rice cultivation would be great fun to city sportsmen, but is a terrible nuisance to us. I mean the birds. Talk about your ducks and geese hiding the sun. Perfect clouds of rice birds, English sparrows, summer ducks, rail and other fowl of the air and water, come to see if they can't harvest our crops for us. From daybreak to dark a perfect fusilade from the guns and old muskets is heard in hundreds of square miles of country. Over in this field you hear the shrill shouts of creole farmers shrieking out Sunday school language in French patols; from the next probably the deep chested whoop of negro field hands, and in another the hoarse yells of the new American rice growers—those who have come from the great northern wheat fields. It is scream!—pop!—whoop!—bang!—boom!—in the noisiest battle from dawn to dark that you ever heard.

"The rice birds are our worst enemies, and while we kill millions of them, left to manure the fields, other millions come in to take their places. The ravages of the rice birds some years are fearful, the crop being almost a total loss. Perhaps now that the Yankees are coming down to grow rice they may invent some machine that will either destroy the birds or keep them away.

"As soon as a pale yellow tint appears over the level heads of the opening grain the water is carefully drawn off, the fields being drained as thoroughly as possible, and the work of harvesting is begun. The dried sheaves are carted direct from the field to the steam thresher, where the grain is prepared for market.

"The profits in rice planting, with good luck, will in a few years make any man rich. The yields on good lands in Louisiana give from fifty to seventy-five bushels to the acre. Rice is a plant which is generous to the attentive and industrious farmer, but it resents neglect more than any other cereal. A man can cultivate fifteen to twenty acres of rice land, and if strong and industrious he can easily secure from 1,000 to 1,500 bushels of rice, worth at present prices about a dollar a bushel. The work is not hard, except during grassing time, and, as good living is cheap with us, a small rice farmer can easily save one-half of his gross income.

"The cultivation of rice in Louisiana is still in its infancy. Many of the hundreds of immigrants are yearly turning their attention to rice, and at the present rate of increased acreage Louisiana will be able to supply the entire country with this most valuable cereal."—New York Telegram.

Mackerel from the Pacific.

A new industry which is springing up in Southern California is mackerel fishing, and is thus described by The Los Angeles (Cal.) Times. Last year W. H. Maurice, a produce jobber of this city, started some men to catching mackerel off Catalina Island and salting them. About twenty barrels were put up, and these, utilized as samples, made such a favorable impression that it was determined to put up a supply for the trade this year. The season's pack already has commenced at Catalina, and it promises to be very successful. The only trouble with the fishes is an embarrassment of riches.

The schools of fish encountered are so vast that it is impossible to draw a net around one, and as only a portion is included in the sweep they get started on a run like a flock of sheep, and the major portion escape. When a small school is encountered the seining is more successful. This season's pack will be from 500 to 1,000 barrels of fish, and Mr. Maurice expects to supply orders as far east as Denver, and possibly Kansas City. The fish are said to be very fine, ranking with the imported brand "bloater mess," and averaging one and three-quarter pounds each, dressed. Very few of that choice brand reach this coast through the dealers, and those which do are sold at a fancy price—about twenty-five cents a pound. The average supply of this coast is rated as No. 3, and commands at wholesale from $24 to $25 a barrel.

Not Eager to Save Life.

Every season regularly some event happens on the Norman or Breton coast which brings into relief the apathy and indifference of the bathing box owners when any of their customers have the misfortune to be in danger while swimming. This time the perilous adventure of M. Edmond Haraucourt, poet and dramatist, is a case in point. M. Haraucourt, while swimming lately, was carried a long distance away from the shore by the current.

The waves were running high at the time, and everybody gave the swimmer up as lost. His mother and friends who were watching him battling for life with the surge begged and implored the owner of the bathing boxes to send out a boat to the rescue. This the man refused to do steadfastly, alleging that, as there was no chance of saving M. Haraucourt's life, it was useless to run the risk of having the boat dashed against the rocks. In the meantime, thanks to his strength and skill as a swimmer, M. Haraucourt was enabled to get near the foot of the cliff, where he was thrown by the surge on the shore, which he had not hoped to reach again alive.—Pall Mall Gazette.

Played Pocahontas' Racket.

Ah Wing, a Chinese cook on a whaler, recently arrived here from Sitka with his Indian wife. The story of how he came to wed his Alaskan bride reads like the romance of Pocahontas and John Smith. The whaler on which Wing cooked was wrecked on the Alaskan coast and Wing escaped to the ice, where he was found by Indians. They treated him kindly and fed him so carefully his suspicions were aroused, and he learned from the chief's daughter that he was to be barbecued for a big feast.

He made love to the damsel, and on the fatal day when he was brought out to be killed the daughter pleaded for his life, which her father granted. They were married and lived some time with the tribe, but Wing grew tired of walrus meat and escaped with his wife in a whaler. He is now tailoring in this city, his wife helping him, as she has become an adept with the needle. She shows signs of consumption, however, due to indoor life, as she can not be induced to venture on the street, being afraid of the noise and bustle.—Cor. St. Louis Globe-Democrat.

An Interesting Discovery.

According to a London paper, "a discovery of considerable interest for archæologists was made at Conflans during the cutting of a railway from Argenteuil to Nantes. One hundred and eighty-five plaster tombs of the Merovingian epoch were found. The skeletons in them are described as being in a state of perfect preservation. One of the tombs contained two skeletons, one placed on the top of the other. An official commission of the department of the Seinetet Oise has gone to Conflans to visit the cemetery and to insure the preservation of the historical curiosities it contains."

We were shown a curious cucumber last evening that had grown in the garden of Mrs. Annie Barnett, Dilworthtown. There were three small ones firmly grown together with a fourth one growing out and almost up straight from the others. It was an oddity sure and attracted much attention.—West Chester Republican.

While a roofer was at work on the roof of a school at Greenville, L. I., the other day he was overcome by the heat and rolled down the roof and over the edge. His suspender strap caught on a hook in the roof gutter and kept him from falling to the ground. He hung in mid air until his fellow workmen rescued him.

Dr. George F. Root, the composer of "Rally Round the Flag, Boys!" and a hundred other famous songs, celebrated the seventieth anniversary of his birth in Chicago recently. He wrote the famous song on the morning following Lincoln's second call for troops.

"Florida on Wheels" is the name of an interesting collection of the wines, woods, fruits, etc., of the Flowery state now on its way to the yet unlocated World's fair in Chicago. The exhibit is contained in a handsome railway car that goes from place to place.

Count von Moltke will be 90 years old should he survive until Oct. 26, and the German emperor says the day shall be kept as a national holiday. Von Moltke went into the military business in the Copenhagen barracks at the age of 12 years.

BEES AT CAMP MEETING.

How a Couple of Roguish Boys Amused Themselves.

FUN WITH VISITORS FROM THE CITY.

A Nest of Angry Bumblebees Placed in the Pathway.

One hundred bumblebees and 4,000 people were at camp meeting in Murdock Grove, Ills. Excursion trains had brought strangers from miles around. The great tent could not hold half the people, and in the path leading to it thousands strolled all day, a constant procession coming and going through the woods. At the edge of the path, and not six rods from the tent, five boys found a bumblebees' nest. Here was a chance for fun. They shoved sticks into the nest until the bees were mad enough to sting even Lily Langtry. The youngsters then hid behind a large oak tree. Along this path, within a foot of this nest, passed the people. An old farmer came along eating crackers and cheese. He looked as innocent as a spring pullet.

Buzz! Buzz!

"Jerusalem! Guess I'd better jog along! Whoa! B'gosh! Whoop!"

He darted into the woods rubbing his left ear. The boys behind the tree dared not laugh aloud. Soon came a Frenchman, an artist from Bloomington, walking slowly. His mustache was waxed artistically.

Buzz! Buzz!

"Zut! Ze bird! Ze bug! Ze bee! Ze devil!"

He leaped for the woods, striking right and left. The flesh under his right eye puffed up. An interval of several minutes, then came a German horse doctor from Decatur. A meerschaum pipe stuck out of his coat pocket.

Buzz! Buzz!

"Yau! Yau! Yau! Nein! Mine Gott!"

He waddled into the woods, sat down on a log and pulled a stinger out of his neck. All was quiet until there came two dudes with eyeglasses, dainty canes, cigarettes and sickly grins at pretty girls. They were chattering like monkeys.

Buzz! Buzz!

"Bah Jove! Wun Chappie! Wun Chollie, wun! Bah! Bah! Bah!"

They did not stop until they reached the well, where they thrust their burning hands into a pail of cold water. The boys now threw a few sticks at the nest to keep the bees in fighting trim. Next came two lovers, a coachman and a servant girl from Rock Island. Her pouting lips were murmuring softly very near his face.

Buzz! Buzz!

"Holy Muldoon!" she yelled, springing into the arms of her lover, who carried her swiftly into the depths of the forest. Her upper lip was badly swollen. The bees seemed more savage than ever. Along came a city woman, gayly dressed, her pretty little nose stuck away up in the air, as if she despised everything rural. Her skirts were lifted just enough to display a foot of which any woman might be proud.

"Buzz! Buzz!"

She jumped two feet straight into the air, clutching at her nose, clutching at her ankle. "Ouch! Shoo! Scat! Police!"

Services in the tent were nearly over now. The presiding elder thought he noticed too much commotion outside the tent. He walked down toward the boys behind the tree. He weighs 200 pounds. He is jovial. Everybody likes him. He came and stood right over the nest.

"Boys," he said, "if you are making unnecessary noise you must stop. It is true that the devil goeth about like a roaring"——

Buzz! Buzz!

Whack! Slam! Bang! Biff! Up into the air he leaped and came down seated plump on the nest. Buzz! Buzz! Whack! Slam! Bang! Biff! Up he jumped, and to the tent he bounded without a word. The long meter doxology sounded from the tent, and the boys walked up to receive the benediction.—Chicago Herald.

How He Got the Money.

William S. Walsh says this story was told him by a traveling friend. The friend was in Paris. Presenting a check at a bank, he was met with the customary formula, "You must be identified." "Whom shall I get—the American consul?" with a shade of sarcasm in his tone. "No; I don't know the American consul." The traveler objected that it was rather hard to expect of a total stranger that he should have already effected an entree into the society graced by the teller. But the latter was obdurate. Then the traveler had a brilliant idea.

He went into a neighboring cafe and called the waiter to him. "Do you know the teller of that bank?" he asked, pointing to the building. "Oh, yes; he stops in here every day for his lunch." "Well," said the traveler, "I want you to step into the bank with me and tell him that I am M. ——, of New York." The waiter shrugged his shoulders. "Oh, monsieur, but I don't know you." "That makes no difference; here's half a franc." The argument was conclusive. The waiter took the tip, accompanied the traveler to the bank and the teller accepted the identification without a murmur.—Once a Week.

Why the Inkstand Went Astray.

A very popular young preacher was the recipient of much attention on the part of the ladies of his congregation, and one shy and blushing spinster on the occasion of his birthday chose for him a pretty silver inkstand at ——'s. She gave to the clerk the following penciled inscription to be engraved upon its base: "To my pastor, from his grateful Malvina S." The changing of an "m" into an "n," however, made all the difference in the world; for the astonished young clergyman read: "Tony Pastor, from his grateful, etc.;" and naturally wondering what could be the connection between the theatrical manager and Miss S., whom he looked upon as one of the pillars of his church, he sent the package back to the jeweler's to be forwarded, as he supposed, to the rightful owner. It was not until the young lady herself, wondering why her gift was not acknowledged, made inquiries at the shop that the egregious blunder was discovered.—New York Tribune.

It seems that distress knows no rank in the realms of the czar. The Russian nobility are in comparatively as wretched circumstances as the peasantry. This month there will be nearly 900 estates belonging to nobles sold by auction at the instance of the state bank that has loaned them money on mortgages. The estates will bring far less than their mortgage value on account of the inability of Jews, foreigners or foreign syndicates to acquire landed property.

Queer tastes some people have. A recent visitor to Macon, Ga., wore a necktie made of rattlesnake skin. He killed the reptile nine years ago in Florida.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.

FRIDAY, MARCH 18 1892

George A. Smith, a sport who was in Bakersfield several years ago, and who was known all over the coast as "Big-neck Smith," shot and killed a man named Brannigan at the Republican primaries in Sacramento, on Tuesday last. Smith claims that the shooting was done in self-defense. The toughest elections in the State are the Republican primaries of Sacramento, compared to which the ward politics of San Francisco fade into utter insignificance.

There seems to be lively times in Tennessee just now between the whites and the blacks, wherein blood has been shed on both sides, and more is likely to be. Some deputy sheriffs in Memphis went to a certain quarter of the city for the purpose of arresting some negroes, when the latter fired upon them, dangerously wounding four of their number. Subsequently a number of the negroes were arrested and afterwards a mob of seventy-five whites took them from jail and shot three of the number to death. And the war will probably continue.

Complaint is made in England that Canada is shirking her proper share of the expense of fortifying her Pacific coast. The British Government desires to have work pushed on the fortifications at Esquimault, but Canada's inaction in providing sites and making other needed preparations delays the work. No doubt Canada is lukewarm in the matter. The fortifications will be of no benefit to her, though they would be of importance to Great Britain because of the protection they would afford the Canadian Pacific railroad, which is regarded by the British authorities as an important military highway to the Pacific. The Canadians are more interested in the subject of annexation to the United States than in the fortifications of their Pacific Ports.

The disposition of the Administration to stand firm against the English threat and demand that pending arbitration seal taking in Behring Sea shall not be suspended meets with the hearty approval of the people. The menace of the English Cabinet falls very little short of being insulting. To insist that while the judges sit upon the case the defendant may continue in what we claim to be an offense and an injury to us is very near the position of the person who wishes to be understood as determined not yield even should judgment be pronounced against him. The seal taking arbitration cannot possibly be completed before next fall; in that time unrestricted seal taking will destroy the fisheries, and thus England would accomplish the very thing that arbitrators are appealed to to prevent by amicable adjustment.

Perhaps there is nothing Jay Gould could do that would more quickly convince the world of the perilous condition of his health than the step he has taken to join the church. When a man who has wrecked railroads and pocketed the fortunes of orphans and widows; who has ground communities with his exactions, milked the stock market time and again, taken a hand with his partner, Jim Fisk, in creating a black Friday; organized Wall street panics on a colossal scale; bribed legislatures, common councils and boards of supervisors; sent his tools into party conventions to nominate men who would do his bidding as judges, and used his power and his wealth to cinch the public in all sorts of ways—when such a man finds that there is one enemy he cannot wheedle or bribe, and that he is gradually falling into his clutches, he naturally turns to the church to help him in his extremity. Gould has never before played the role of penitent, and we may therefore safely look upon him as a very sick man. But if he should get well and strong and hearty again, we would doubtless find the couplet about the devil and the monk applicable to his case.

"I have just recovered from a second attack of the grip this year," says Mr. Jas. O. Jones, publisher of the *Leader*, Mexia, Texas. In the latter case I used Chamberlain's Cough Remedy, and I think with considerable success, only being in bed a little over two days, against ten days for the first attack. The second attack I am satisfied would have been equally as bad as the first but for the use of this remedy, as I had to go to bed in about six hours after being "struck" with it, while in the first case I was able to attend to business about two days before getting "down." 50 cent bottles for sale by

I TEACH $3000 A YEAR

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why, no harm is done. Address,
E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY, the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98 10-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahnah, deceased, at the time of his death.

Lots Nos. 3 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Super or Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah, deceased.

Dated, Independence, Cal., February 11th, 1892.

ASSESSMENT NOTICE.
INYO MARBLE COMPANY.

Location of principal place of business, San Francisco, California. Location of works, Inyo, Inyo county, Cal.

Notice is hereby given that at a meeting of a Board of Directors, held on the 26th day of June, 1891, an assessment (No. 16) of Fifteen (15) cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary at No. 137 Montgomery St., San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 4th day of March, 1892, will be delinquent, and advertised for sale at public auction; and unless payment is made before will be sold on Wednesday, the 30th day of January, 1892 to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.
G. W. LOE, Secretary.
Office, No. 137 Montgomery street, San Francisco, California.

NOTICE TO CREDITORS.

Dated July 24th, 1891.
WM. F. MATLACK,
Administrator of said Estate.

For Sale!

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,
C. MULHOLLAND,
Independence.

MONEY Beginners earn from $25 to $50 per week, and more after a little experience. We can furnish you employment, and will teach you free. You work in your own locality, wherever you live. Both sexes, all ages. We start you. Novelty. Can work in spare time, or all the time. Full information FREE. TRUE & CO., AUGUSTA, MAINE.

OFFICIAL.

Notice of Forfeiture.

To Robert Lockett, or his heirs, exectors administrators and assigns: You, and each of you, are hereby notified that I have expended Two hundred [$200] Dollars in labor and improvements upon the certain mines situate in the Cerro Gordo Mining District, Inyo county California, commonly known and designated as the Protection and Union Jack Mine in order to hold said mines as follows, to wit: One hundred dollars on each for the year 1891, as appears by certificate on file in the office of the County Recorder.

If within 90 days from the date of this publication you fail or refuse to contribute your proportion of said expenditures, together with the cost of publication, as co-owners, your interests in said Protection and Union Jack Mines will become the property of the undersigned under the provisions of Section 2324, Revised Statutes of the United States.

A. L. BOLAND.

Dated February 16, 1892.

ASSESSMENT NOTICE
LONE PINE CANAL COMPANY.

Location of principal place of business, Independence, California. Location of Ditch, near Independence.

NOTICE IS HEREBY GIVEN THAT AT A meeting of the Board of Directors, held the 6th day of Feb. 1892, an assessment (No. 2) of Twenty-five (25) Cents per share was levied on the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary, at the office of the Company in Independence, Cal.

Any stock upon which this assessment shall remain unpaid on Saturday the 12th day of March will be delinquent and advertised for sale at public auction; and unless payment is made before, will be sold on SATURDAY, the 2nd day of April, 1892, to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.
P. H. MACK, Secretary.

NOTICE OF SALE OF PERSONAL PROPERTY.

Reno is to have a military post.

Georgia Minstrels at the Pavilion tonight.

Jack Wilson says the 17th at Keeler was a "burr'd."

The peach trees about town are all in bloom and look like huge bouquets.

S. G. Sneden Esq., came down from Bishop on Monday, returning yesterday.

After a stay of over six months in Placer county A. J. Wren returned to Inyo last week.

R. S. Mitt., Esq., won his case in the Supreme Court, of Kirman & Rickey vs. Hunewell.

John Shepherd expects to start for the San Joaquin Valley on Monday with a band of mules.

L. Wimberly has leased Boland's stable at Keeler and will take the best care of transient stock.

Ben. Williams came in to Keeler on Wednesday from Lookout and went on to Bishop yesterday.

Mrs. A. W. Eibeshutz will return home on to-days's train from a visit of several weeks at San Francisco.

John E. Jones Jr., of Round Valley, has gone to Los Angeles, where he will visit for some little time.

W. K. Millers' Keeler and Mojave stage line continues to do a thriving business. There is a load of passengers every trip.

F. H. Austin was up from Lone Pine early in the week. He reports work steadily progressing on the new reservoir.

Quite a number of Big Piners, creditors of the estate of John Mullane, deceased, were in town early in the week on legal business.

Sixty-three cases of the measles were reported at Lone Pine this week. The disease is also prevalent at Independence and the Fort.

S. P. Smith of bishop will be in town in a day or two with his fine stallions Antare and Pickpocket. If sufficient encouragement is given him he will make the coming season with them in this vicinity.

A cave in the C. & C. tunnel through the White mountains delayed last Monday's train a few hours. The damage has been repaired and trains are now on time.

W. O. Maroney went south on Wednesday train on his way to Fresno via Mojave. He expects to return to Bishop soon and will reopen a merchandising business in the old Stoutenbrough building.

The annual celebration of the 17th of Ireland given by Mr. and Mrs. John Barnes at Keeler is always a grand success and the ball given on Wednesday evening was no exception to the rule. Owing to sickness the attendance was not as large as in former years but those who were present had a jolly good time, lasting till 5 o'clock of "St. Patricks' Day in the morning."

INYO COUNTY.

A Rich Region Which Is At Our Doors.

Editor Mulholland Of Independence Interviewed.

The Trade and Resources Which Should Come Here.

A Most Interesting Talk—Very Valuable Mineral Resources—The County's Agricultural Possibilities.

[Los Angeles Daily Herald.]

During the past three years Inyo county has been kept before the business men of Los Angeles by Mr. C. Mulholland, editor of the Independent of Independence, Inyo county, the county seat. He is so well known to many of our leading citizens that his statements concerning that county are received without question. Mr. Mulholland arrived in Los Angeles a few days ago, and as the promised extension of the Carson and Colorado railroad is a matter of great importance to Los Angeles, a representative of the *Herald* called upon him and had a talk upon the matter. The following is the substance of what was said by Mr. Mulholland: The older business men of Los Angeles remember well the extent and value of the business that came here from Inyo county when the late Remi Nadeau did all the transportation for that county by teams hauling across the Mojave desert. So great and valuable was that business that Senator John P. Jones organized a company to build a railroad from Santa Monica to Independence, and to-day a part of the road then built extending from this city to the sea is called the Los Angeles and Independence railroad.

About the time when the road was completed from Santa Monica to Los Angeles, the financial troubles that developed in 1872 had extended to the Pacific coast, and enterprises of all kinds were arrested. The Los Angeles and Independence railroad shared the common lot. Before confidence had been restored and money again become easy, new conditions had arisen in Inyo county. D. O. Mills, the well known capitalist of New York, had become interested in Inyo to such an extent that he determined to build a railroad and the Carson and Colorado was begun. This road was extended to Keeler about eight years ago, and there it has since rested. From Keeler to the Central Pacific railroad at Reno the distance is 335 miles. Although the distance from Keeler to San Francisco is nearly three times as great as from Keeler to Los Angeles, yet the railroad was able to give cheaper rates than the teams, and all the business of Inyo county was diverted to San Francisco.

It has always been with the greatest reluctance, however, that the people of Inyo were drawn away from Los Angeles. All their sympathies are with this city, and it will give them hearty satisfaction to resume the old business relations. So strong is this old feeling of attachment for Los Angeles that the people of Inyo have for many months past been buying large quantities of merchandise here and hauling by teams from Mojave. This they are now doing, and will continue to do till a railroad shall be built, even if the cost of freight be somewhat greater.

Mr. Mulholland had described to business men here the immense value of the soda that may be obtained from the water of Owens lake, and tried to have some of them interested in the project. Nobody was willing to take hold, however.

About four years ago D. O. Mills began operations and now bicarbonate and carbonate of soda are obtained by simply running the water into ponds and let it evaporate. This is the cheapest and best source of supply for soda in the United States, or the world. London sent representatives to Inyo county, who examined Owens lake, and upon their report the principles have bargained with Mr. Mills for all of his interest that he would sell. The Englishmen will now control a majority of the stock. These people intend to greatly extend the capacity of the works, bringing the yield up to 25,000 tons a year, and ultimately to double that amount. The need for a short haul for this vast amount of material to tide water may be part of the inducement for the extension of the Carson and Colorado road. The great bulk of the stuff would of necessity pass through Los Angeles to reach one of the ports in the neighborhood.

All citizens of Los Angeles have for years realized the importance of having smelting works here, but the project has been more talked about than worked for. The extension of the Carson and Colorado road ought to bring that about if anything will. Inyo county has for years been the principal source of supply for smelting ores to the great works of Selby & Co. of San Francisco. These ores are of especial value to smelters, for reason that they carry a very high percentage of lead, and by mixing enable the smelters to work ores so deficient in lead that they could not otherwise be smelted. The extension of the road from Inyo will open up mining districts of great extent and value that have not yet been touched. Here will be one of the best fields on the Pacific coast for parties who want to become interested in mines. About three years ago a marble quarry was opened up near Keeler. The deposit is of vast extent and the marble of rare beauty. On Montgomery street, San Francisco, D. O. Mills is now constructing a building that will be one of the show places of California. It will be eleven stories high and will constructed in great part of Inyo marble. The cost of the structure is estimated at over two millions of dollars. The extension of the railroad will make this beautiful material available for Los Angeles, and doubtless much of it will be used here. Owens valley is one of the most fertile regions in the State. There is ample land there for a population of of 200,000 people, and there is far more water than all the land will need; it is the best watered region in the State. There will be the future supply of cherries, apples and other deciduous fruits for Los Angeles. Competent judges who have investigated say that, acre for acre, the growing of those fruits in Owens valley will be as profitable as orange growing counties farther south. It is admirably suited to the growth of horses and cattle; for several years past many of the best horses offered in the Los Angeles market have come from Inyo county. The extension of the railroad will bring the excellent beef and mutton produced there to Los Angeles. Creameries are now being established, and when at some future day visitors from Inyo come to Los Angeles, they will prefer the golden, sweet flavored butter of their own county to the oleomargarine now so common here. Cheap land, plenty of water and perfect title will be great inducements for men with small capital who want to get homes and make a living from their farms. All of these conditions are found in Inyo county. There never was a Mexican grant in the county, nor was there ever a grant of land made to any railroad company. The settlers all hold under patent direct from the United States government. These are but a few of the points of interest to the people of Los Angeles in connection with the extension of the Carson and Colorado railroad. It is well worth notice that this extension will be a link in the chain of unbroken railroad connection from tide water here to Portland, Oregon. A road is now being extended from Reno, east of the Sierra Nevada mountains, that will connect with that road at Reno.

The more fully all the facts in connection with the extension of the Carson and Colorado road are explained, the more clearly it is seen how important it is to Los Angeles. For several years past Mr. Mulholland has devoted most of his time and energy to the promotion of this important project; his efforts in favor of Los Angeles are so well known here that he has many warm friends among our business men. He is full of information about Inyo county, and is always ready to impart it where it will do the most good.—*Herald.*

Obituary

On Sunday morning last a telegram was received by the Rhine Brothers announcing the death of their father, Nathan Rhine, at San Francisco. Though ever unwelcome as such tidings must be, the news was not unexpected. Over a month ago Mr. Rhine's physician realized that he was suffering from what must be his last illness and both of his sons visited him for the last time in life. Bertraud Rhine, the eldest son, started on Sunday evening for San Francisco on a special, arriving there in time for the last sad rites.

Nathan Rhine was a land-mark in the business history of Inyo county. After a busy life, with various vicissitudes of fortune, he came to Inyo county in 1870. He purchased an interest with Isaac Harris in a general merchandising and banking business, the partnership continuing until the fire of 1886. He then became the sole owner of the firms' business. Under his careful and able supervision his sons were trained in his business methods, and on January 6, 1891, he left Inyo never to return, with full confidence in their ability to carry on the extensive affairs of the house.

He evinced a deep interest in the welfare of the country and took an active part in any enterprise which promised to promote the prosperity of the valley. In the prime of life he married Frederica Strauss, who survives him. His family consists of two sons and three daughters, all grown. Two months forbearance by the Reaper of Death had sufficed to complete the allotted life of man, three score and ten. He died at the ripe age of 69 years and 10 months.

A Fatal Accident

On Tuesday afternoon William Meyer came in town for some medicine for his brother-in-law, J. W. Lacey, returning to the home of the latter at Camp Independence, in the evening; soon after his return he went out and got on his horse to come in to town again. The animal started bucking and threw him in such a manner that he was severely cut and bruised and his spinal column dislocated between his shoulders, the pressure on the spinal cord resulting in paralysis of the body. Dr. I. J. Woodin was called on Wednesday, and did everything possible to save his life, with no avail, the unfortunate man dying yesterday morning at 9 o'clock. He recovered consciousness just long enough to realize that death was inevitable. Billy Meyer was an old and well-known resident of Inyo county. He owned considerable land and stock at Georges Creek, and was a thrifty, well-to-do farmer. The funeral took place this afternoon at Independence.

We have received a complimentary copy of Wertheimers' tobacco catalogue. As a specimen of the typographic art it is worthy of special mention, which we gladly accord the enterprising firm who had it published at great expense. Come and take a look at it.

R. W. Beckerton came in from Panamint Thursday morning. He is in charge of mining property there belonging to R. B. Taylor of South Riverside. He expects to secure patents for several claims there.

R. C. Spear has registered his trotting bred stallion Flash, by Promptor, dam Lady Nelson, his number being 16,713. Under the rule that no horse is standard until registered this makes him the only standard horse this side of Carson. Flash comes from trotting progenitors and should sire excellent roadsters from the common class of mares here.

Hi. Hamilton came up from Darwin yesterday. He reports the mining industry moving along steadily. There is considerable "jigging" being done; and this process, while it does not net very large returns to the owner, still it employs a number of men at good wages and evolves values out of old dumps, that otherwise would be useless waste.

Messrs Cage & Sherman of Alexander, Texas write us regarding a remarkable cure of rheumatism there as follows: "The wife of Mr. Wm. Pruitt, the Postmaster here had been bed-ridden for severl years. She could get nothing to do her any good. We sold her a bottle of Chomberlain's Pain Balm and she was completely cured by its use. We refer any one to her to verify this statement." 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

There is no danger from whooping cough when Chamberlain's Cough Remepy is freely given. It liquefies the tough, tenacious mucous and and aids in its expectoration. It also lessens the frequency and severity of the paroxysms of coughing, and insures a speedy recovery. There is not the least danger in giving it to children or babies., as it contains no injurious substance. 50 cent bottles for sale by

Again Caught Misrepresenting Facts.

The Royal Baking Powder Company has resorted to so many tricks to force its way upon the public, that whenever any cry of fraud is raised the public instinctively turns to the Royal Baking Powder Company.

Is it any wonder?

The Royal has recently printed a statement purporting to be an interview with Dr. Benjamin F. Drew, state chemist and analyst to the Food and Dairy Commission of Minnesota, to the effect that the Royal Baking Powder is all which the company asserts it to be. The statement is made that Dr. Benjamin F. Drew, state chemist and analyst to the Food and Dairy Commission, made the representations referred to before the legislative committee at the last session, which examined various baking powders.

WHAT IS THE TRUTH?

1st. There is no such person as Dr. Benjamin F. Drew, state chemist and analyst to the Food and Dairy Commission of Minnesota.

2d. There is a Dr. Charles W. Drew, who is state chemist and analyst to the said commission.

3d. He denies the statement in question of the Royal Baking Powder Company, generally, as follows:

1st. The statements in no sense represent his attitude or his utterance.

2d. There has never been, either in the published reports of the chemist of the commission, in his testimony before the legislative committee or elsewhere, any implied endorsement of the Royal Baking Powder as superior to other brands.

3d. At the session of the legislative committee before which Dr. Drew testified, an attempt was made by the attorney of the Royal Company to secure the statements which the Royal Company has since printed, which attempt failed.

4th. On the contrary, Dr. Drew did say there were sufficient grounds for objection to the presence of ammonia in baking powders to justify the legislative committee in recommending that all such powders be required to announce upon their labels the fact that Ammonia was one of the constituents; and Dr. Drew further expressed to the committee the following emphatic opinion: "I would not recommend such powders to my patients, nor would I use them in my own family."

The Price Baking Powder Company makes a Pure Cream Tartar Baking Powder, free from ammonia, alum, lime or any taint of impurity, and feels it owes a duty to the public as well as to itself to lay bare such trickery as the Royal resorts to in trying to wheedle the consumer into using its Ammonia Powder.

Not one unmarried woman in a hundred tells the truth when she is asked why she never married.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

TROT, MY GOOD STEED, TROT.

Where my true love abideth
I make my way to-night—
Lo, waiting, she
Espieth me
And calleth in delight:
"I see his steed anear
Come trotting with my dear—
Oh, idle not, good steed, but trot,
Trot thou my lover here!"

A-loose I cast the bridle
And ply the whip and spur,
And gayly I
Speed this reply
While faring on to her:
"O, true love, fear thou not—
I seek our trysting spot—
And double feed be yours, my steed,
If you more swiftly trot!"

I vault from out the saddle
And make my good steed fast;
Then to my breast
My love is prest—
At last, true heart! at last!
The garden drowsing lies,
The stars fold down their eyes—
In this dear spot, my steed, neigh not,
Nor stamp in restless wise!

O, passing sweet communion
Of young hearts, warm and true!
To thee belongs
The old, old songs
Love finds forever new!
We sing those songs, and then
Cometh the moment when
It's "Good steed, trot from this dear spot—
Trot, trot me home again!"

—Eugene Field in Chicago News.

THE GRAVE'S SECRETS.

I had loved her so madly! Why does one love? How odd that from a certain moment one sees in the world but one being, in the heart but one desire, on the lips but one name, a name which rises incessantly, which rises from the depths of the soul like water from its source, which rises to the lips, and which one says, which one repeats, which one murmurs continually everywhere like a prayer.

I will tell you our story. Love has but one, always the same. I had met and loved her. That is all. And I had lived for a year in her tenderness, in her arms, in her caresses, in her looks, in her robes, in her words, enwrapped, bound, imprisoned in everything, that I did not know whether I was dead or alive, on the old earth or somewhere else.

And then she died. How? I do not know; at least I no longer know.

She came home wet one rainy night, and the next day she was coughing. She coughed for a week and then took to her bed.

What happened? I no longer know.

Doctors came, wrote, went away. They brought remedies; a woman made her drink them. Her hands were hot, her forehead burning and damp, her look glittering and sad. I spoke to her; she answered me. What did we say to each other? I no longer know. I have forgotten everything, everything, everything! She died. I remember very well her little sigh—her little sign so weak—the last. The nurse said, "Ah!" I understood. I understood.

I knew nothing more, nothing. I saw a priest who uttered these words: "Your sweetheart." It seemed to me he insulted her. She being dead no one had any right to know that. I dismissed him. Another came who was very good, very gentle. I wept when he spoke to me of her.

They consulted me about a thousand things in connection with the funeral. I know no more. Still, I remember very well the coffin, the noise of the hammer when they nailed her in it. Ah! my God.

She was buried! Buried! She! In that hole! A few persons had come—friends. I went away. I ran. A long time I walked the streets. Then I went home. The next day I started on a journey.

* * * * * *

Yesterday I returned to Paris.

When I saw my room again, our room, our bed, our furniture, this whole house, in which was left all that remains of a being after its death, I was seized with such a violent renewal of sorrow that I came near opening the window and throwing myself into the street. Unable longer to live in the midst of these things, of these walls which had contained her, sheltered her and which must keep in their imperceptible fissures a thousand atoms of her, of her flesh and of her breath, I took my hat to go away. Suddenly, just before reaching the door, I passed by the large mirror in the vestibule, which she had placed there in order to view herself from head to foot every day as she went out, to see if her entire toilet was correct and pretty, from her boots to her hair.

And I stopped short in front of this mirror which had so often reflected her. So often, so often, that it must have preserved her image.

There I stood, erect, quivering, with eyes fixed on the glass, on the flat, profound empty glass, which had contained her entirely, possessed her as I, as my passionate look had possessed her. It seemed to me that I loved this glass. I touched it; it was cold. Oh, the memory! the memory! Mournful mirror, burning mirror, living mirror, horrible mirror, which causes one to suffer all the tortures! Happy the man whose heart, like a glass across which reflections glide and disappear, forgets all that it has contained, all that has passed before it, all that has contemplated and admired itself in its affection, in its love! How I suffered!

I went out, and in spite of myself, without knowing it, without wishing it, I went toward the cemetery. I found her very simple tombstone, a marble cross with these few words upon it, "She loved, was loved and died."

She was there, beneath, decaying! How horrible! I sobbed, my forehead on the ground.

There I remained a long time, a very long time. Then I perceived that the night was coming on. Then a strange, mad desire, the desire of a desperate lover, seized me. I wished to pass the night beside her, a last night, in weeping over her grave. But I should be seen and driven away.

What was I to do? I resorted to strategy. I rose and began to wander about in this city of the disappeared. On and on I went. How small this city is beside the other, that of the living. And yet how much more numerous than the living are these dead. For us, the four generations who live in the sunlight at the same time, drinking the water of the springs and the wine of the vineyards and eating the bread of the fields, much room is needed, high houses, wide streets.

And for all the generations of the dead, for the entire scale of humanity down to us, almost nothing; a field, almost nothing! The earth takes them back again, oblivion effaces them. Farewell!

At the end of the inhabited cemetery I suddenly perceived the abandoned cemetery, that where the older dead are completing their union with the soil, where the crosses themselves are crumbling, and where to-morrow the last comers will be placed. It is full of free roses, of vigorous and dark cypresses, a sad and superb garden, enriched with human flesh.

I was alone, entirely alone. I crouched beneath a green tree. I hid myself completely among its thick and somber branches.

And I waited, clinging to the trunk like a shipwrecked man to a spar.

When it was dark, very dark, I left my refuge and began to walk softly, with slow steps, over this earth filled with the dead.

I wandered about long, long, long. I could not find her grave again. With arms outstretched and eyes wide open, hitting against tombs with my hands, with my feet, with my knees, with my breast, with my head itself, I went on, without finding her. I touched, I felt, like a blind man seeking his way; I felt of the stones, of the crosses, of the iron railings, of the glass crowns, of the crowns of faded flowers! I read the names with my fingers, moving them over the letters. What a night! What a night! I could not find her again.

No moon! What a night! I was afraid, frightfully afraid in these narrow paths, between two rows of graves! Graves, graves, graves! Always graves! To right, to left, in front, around, everywhere, graves! I sat down on one of them, for I could no longer walk, so weak was I in the knees. I heard my heart beat! And I heard something else, also! What? A confused, indescribable sound! Was this sound in my bewildered head, in the impenetrable night, or under the mysterious earth, under the earth sown with human corpses? I looked around me!

How long did I stay there? I do not know. I was paralyzed with terror, I was drunk with fear, ready to scream, ready to die.

And suddenly it seemed to me that the slab of marble on which I was sitting moved. Certainly it moved, as if some one had lifted it. With a bound I threw myself upon the neighboring tombstone, and I saw, yes, I saw the slab which I had just left rise on its end and the dead appeared, a naked skeleton, who with his curved back lifted the stone. I saw, I saw very plainly, although the night was dark. On the cross I could read:

"Here rests Jacques Olivant, who died at the age of 51. He loved his family, was honest and good and died in the peace of the Lord."

Now the dead man also read the words written on his tombstone. Then he picked up a stone in the path, a small, sharp stone, and began to scratch out these things carefully. He effaced them thoroughly, slowly, looking with his empty eyes at the place where just now they were graven, and with the end of the bone which had been his index finger he wrote in luminous letters like those lines which one traces on walls with the end of a match:

"Here rests Jacques Olivant, who died at the age of 51. By his harshness he hastened the death of his father, from whom he wished to inherit; he tortured his wife, tormented his children, deceived his neighbors, stole when he could and died miserable."

When he had finished writing the motionless dead man contemplated his work. And I perceived on turning round that all the graves were open, that all the bodies had come out, that all had effaced the lies written by their relatives on the funeral stone to replace them with the truth.

And I saw that all had been tormentors of their kinsmen, hateful, dishonest, hypocritical, lying, cheating, slandering, envious; that they had robbed, deceived, committed every shameful act, every abominable act—these good fathers, these faithful wives, these devoted sons, these chaste young girls, these upright merchants, these so called irreproachable men and women.

They all wrote at the same time on the threshold of their eternal dwelling the cruel, terrible and sacred truth of which everybody on earth is ignorant, or pretends to be ignorant.

I thought that she, too, must have traced it on her tombstone. And running now without fear amid the half open coffins, amid the bodies, amid the skeletons, I went toward her, sure that I should find her at once.

I recognized her at a distance, without seeing her face, wrapped in a shroud.

And on the marble cross where but a short time before I had read:

"She loved, was loved and died,"

I saw these words:

"Having gone out one day to deceive her lover she took cold in the rain and died."

It seems that I was picked up unconscious at sunrise, beside a grave.—From the French of Guy de Maupassant in New York World.

Miles Upon Miles of Whales.

The officers and passengers of the steamship Veendam state that when the vessel was at about latitude 45, longitude 41, on Saturday, Aug. 23, they passed through the largest herd of whales that has been seen in the north Atlantic for many years. Professor J. L. Howe, of Louisville, who was a passenger, said:

"The passengers were all on deck enjoying the unusual sight of a distinctive line of demarcation between the light blue waters of the Gulf stream and the dark green waters of the arctic current, the line being so distinct that when one-half of the vessel was in one current the other half was in the other current.

"Suddenly some one in the bow called out 'There she blows!' and all eyes were turned toward a light spray upon the horizon. Soon more and more puffs were seen, and in half an hour the steamer was amid a surging, bellowing herd of sea monsters. I would not attempt to make an estimate as to their number," said Professor Howe, "but I calculated that the herd covered an area of about a hundred square miles."—New York Herald.

CONGRESS
At Last Takes Action.

A bill has been introduced at Washington requiring all baking powders containing alum and ammonia to be so labeled. This is a step in the right direction, and has been long foreshadowed by the action of state legislatures, boards of health, food commissioners, etc., in this matter. The bill affords needed protection to the public, for the evidence as to the injurious effects of alum and ammonia is very heavy; but it will nevertheless be fought bitterly by the manufacturers whom it effects who are accustomed to sell their goods as "pure Cream of Tartar," "absolutely pure," etc.

The bill is something needed. If a maker uses a drug in his powder, the name of which he does not want to have printed on his label, it is prima facie evidence that there is something wrong. We hope the subject will be vigorously prosecuted all over the country, not only as regards baking powder, but also all other food adulterations.

This bill may incidentally benefit the makers of pure articles, but if it should, this is only an additional point in its favor.

Maternal Love of the Whale.

No other member of the animal kingdom displays more maternal affection than the whale, especially if its calf is harpooned. The harpooner never throws his harpoon into the little one with the intention of killing it, for if this is done the mother will instantly forsake it. If alive and struggling, however, the dam can be easily enticed toward the boat to meet its fate. Knowing this, the whale fishermen always strike a calf if possible, and thus often make captures that could not be effected under other circumstances.

As soon as the dam becomes aware of the snaring of her young she rushes toward it, encourages it to swim away, and even assists by taking it under her fin. She seems to lose all regard for her own safety, and boldly attacks the boat containing the whalemen, or circles about it totally regardless of the harpoons that are hurled at her and enter her flesh.—Detroit Free Press.

In an Indian Mound.

Dr. J. F. Snyder, a Virginia, Ills. archæologist, has just returned home from Schuyler county, Ills., where he opened an Indian mound. The corpse was in the tumulus of a chief. It had been laid with the head to the east. On the forehead of the decayed skeleton was found a crescent shaped ornament of thin, hammered copper. On the breast had been placed a large sheet of mica that no doubt had served as a mirror. On one side of the skull was a small pottery vase of peculiar form. In one hand was a small stone ax, and in the other several arrows and spearheads of flint, a few bone awls and fragments of a large sea shell.—Chicago Herald.

Color of Street Gowns.

"Wear street gowns the color of your hair, house gowns the color of your eyes, and evening gowns the color of your complexion," is the advice given by a popular lecturer on the art of dress. As the majority of women have black, brown and gray hair the wisdom of the advice is apparent as far as street gowns are concerned. To dress well means to dress appropriately for each occasion, and it is now decreed that sober tints and plainly made woolen gowns are alone suitable for street wear. Silks and satins are permissible only to elderly women.—San Francisco Argonaut

Doctors at Berlin.

The army of doctors has apparently enjoyed itself amazingly at Berlin, where science and surgery have been judiciously tempered with amusements of the most varied description. In the history of the world no such array of medicine men has ever been seen as that which met in the gorgeous Kunst Anstellung to listen to the welcoming words of Virchow, the pathologist; Von Gossler, the minister of medicine and religion (an excellent combination of functions), and Von Palckenbeck, the chief burgomaster.

Sir James Paget secured the warmest reception of the foreign delegates; Dr. Baccelli, the Italian, "for the convenience of his cari colleghi," insisted on using Latin as a common language, and Dr. Von Bergmann's normal appearance has been vastly improved by his brand new uniform, although the passing interest he once excited was wholly eclipsed by Grand Duke Theodore, of Bavaria, the eminent oculist, who brought the grand duchess to look down on her husband's 5,000 fellow practitioners from a box. The heat was more than tropical, but the doctors submitted to be closely packed with the best possible grace, and the one royalty of the whole European faculty was indefatigable in pointing out to his wife such celebrities as the veteran Von Bardeleben, whose breast glittered with orders; Sir William McCormack and fifty others.—London World.

Wild Animals in Connecticut.

Otters and minks were very scarce in Connecticut a dozen years ago, and it was feared that the animals might become extinct, for their hides were worth from $5 to $10 apiece, and everybody hunted them. Then suddenly fashion changed her mind about the value of mink and otter skins, the price went down and now the animals abound in the state again. So numerous have minks become there that they are getting to be quite familiar with country people. Recently a mink, frightened by a sharp thunder storm, fled out of a meadow, rushed into a farmer's dwelling, and raced from room to room until a hound caught him upstairs in a chamber.

A still more remarkable incident occurred in Hartford a few days ago. A mink trotted right into the heart of the city, among throngs of people on the streets, and passed all kinds of dogs with impunity, and finally made his way into the back yard of a big store on Asylum street. In the yard men cornered him and tried to capture him alive, but he fought so desperately that they had to kill him.—Philadelphia Ledger.

Mountains Full of Gold.

Recent explorations of the Olympic mountains have been of great interest to mining men. A geologist, who has given some attention to the work of the exploring parties, says: "I have examined many specimens from the Olympic, but until of late they were of low grade outcroppings. Recently, however, some extremely rich specimens have been received. These new discoveries have excited a great deal of interest in prospectors in this region, and specimens are coming in rapidly. Not long since I received one piece that was so rich that I refused to assay it, as it could not possibly be a fair sample. It would have assayed over $100,000 per ton. There could not possibly have been in any locality any considerable quantity of quartz so rich. I have long known that this district was rich in coal and iron. I am now convinced that it hides vast treasures of silver and gold. Numerous prospecting parties are being fitted out, and hundreds of prospectors are already in the mountains, which are quite easy of access."—Tacoma (Wash.) Cor. St. Louis Republic.

A Long Siege of Euchre.

Some Pittsburg people had a great game of euchre lately. It began in Queenstown, Ireland, and ended in Altoona Tuesday morning, with only intermissions for meals and sleep on the steamer. The contestants were Charles A. O'Brien and James Wilson on one side, and George J. Luckey and William B. Neal. The deciding game of the series, the 185th, was won by Messrs. Luckey and Neal.—Pittsburg Dispatch.

The summer in Europe and especially on the continent has been abominable. Paris is quite lively, a kind of second season having been organized because so many people of fashion have returned from their chateaus to their clubs and mansions. Rain and hurricane alternated with singular rapidity for three or four weeks.

A Cough, Cold, or Sore Throat should not be neglected. "*Brown's Bronchial Troches*" are a simple remedy, and give immediate relief. *Sold only in boxes.*

Be Meek, But Not Too Meek—The man who shows too much of a Christian spirit is apt to get stepped on.

Use Enameline Stove Polish; no dust, no smell.

IN A DAY.

LAWRENCE, KANS., Aug. 9, '88.
George Patterson fell from a second-story window, striking a fence. I found him using

ST. JACOBS OIL.

He used it freely all over his bruises. I saw him next morning at work. All the spots rapidly disappeared, leaving neither pain, scar nor swelling.

C. K. NEUMANN, M. D.

"ALL RIGHT! ST. JACOBS OIL DID IT."

Tutt's Tiny Pills

A single dose produces beneficial results, giving cheerfulness of mind and buoyancy of body to which you were before a stranger. They enjoy a popularity unparalleled. Price, 25cts.

Sunday-school Teacher—Who loves everybody, Johnnie? Johnnie—My pa does, cos he is runnin' for office.

STATE OF OHIO, CITY OF TOLEDO, } ss.
LUCAS COUNTY,

FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

A. W. GLEASON,
{SEAL} Notary Public.

Hall's Catarrh Cure is taken internally and acts directly upon the blood and mucous surfaces of the system. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75 cents.

"Truth crushed to earth shall rise again,"
But not as quickly as it should;
It rises nine times out of ten
Too late to do us any good."

ALWAYS SAFE AND SURE.

It is safe to take BRANDRETH'S PILLS at any time, but to get the best results they should be taken on an empty stomach before going to bed. For Constipation or Dyspepsia one or two taken every night will, in a short time, perform an absolute cure. It is well to take a purgative at least once or twice a month as a preventive of disease. BRANDRETH'S PILLS are entirely vegetable, and the safest and most effective purgative ever introduced to the public. They have been used in this country for over fifty years.

There is more joy than sorrow in the world, for man smiles a thousand times where he weeps once.

A VERY COMMON WANT.

"Out of sorts," "distrait," "the blues," these are familiar appellatives for uncomfortable, undefinable sensations, accompanied with lassitude, nervousness, indigestion. Poverty of the blood, to remedy which an effective stomachic persistently used is the paramount need, is conclusive evidence that the system is insufficiently nourished because—and for no other cause where organic disease does not exist—the food is not assimilated. Reinforce the flagging energies of the stomach, reform an irregular condition of the bowels, keep up a healthful secretion of the bile with Hostetter's Stomach Bitters. For over thirty years this popular medicine has supplied the common want of the nervous invalid, the dyspeptic and of persons deficient in vitality, an efficient tonic. To its powers of imparting strength is attributable its efficacy as a preventive of malaria and la grippe. Thoroughly effective is it too for rheumatism, kidney complaint and neuralgia.

Miranda—I wouldn't marry that man if every hair were strung with gold. Maud—Why not? Miranda—He is bald-headed.

Try Germea for Breakfast.

COPYRIGHT 1891

A ringing noise in the ears, headache, deafness, eyes weak; obstruction of nose, discharges falling into throat, sometimes profuse, watery and acrid, at others, thick, tenacious, bloody and putrid; offensive breath; smell and taste impaired, and general debility. Not all of these symptoms at once. Probably only a few of them.

That's Catarrh.

A medicine that by its mild, soothing, cleansing and healing properties has cured the most hopeless cases. One that will cure *you*, no matter how bad your case or of how long standing. A medicine that doesn't simply palliate for a time, but produces perfect and permanent cures.

That's Dr. Sage's Catarrh Remedy.

A cash payment of $500, not *by* you, as you might expect, but *to* you, if you can't be cured. It's an offer that's made in good faith, to prove their medicine, by responsible men, the proprietors of Dr. Sage's Remedy.

That's the kind of medicine to try. Doesn't it seem so?

SHILOH'S CONSUMPTION CURE.

The success of this Great Cough Cure is without a parallel in the history of medicine. All druggists are authorized to sell it on a positive guarantee, a test that no other cure can successfully stand. That it may become known, the Proprietors, at an enormous expense, are placing a Sample Bottle Free into every home in the United States and Canada. If you have a Cough, Sore Throat, or Bronchitis, use it, for it will cure you. If your child has the Croup, or Whooping Cough, use it promptly, and relief is sure. If you dread that insidious disease Consumption, use it. Ask your Druggist for SHILOH'S CURE, Price 10 cts., 50 cts. and $1.00. If your Lungs are sore or Back lame, use Shiloh's Porous Plaster, Price 25 cts.

TO A POTATO.

Thou white and soft perfection of thy kind!
Thou feathery, powdery, dainty edible,
Thy snowy, creamy substance, gustable,
Delights the eye and satisfies the mind.
What though a lowly place 'tis thine to find—
Mere side dish in the grand menu—yet still
Temptation must each fluffy crevice fill,
And be (the cook agreeing) pleasure lined.

How fared the world before thy presence came?
How set a dinner for the genial group,
So wont around my eager board to troop,
Without thy laughing face and 'customed name?
Nay, bid me not to such resources stoop!
Too helpless I—too high and proud thy fame.
—Good Housekeeping.

A GAME FOR TWO.

Mr. and Mrs. Gibson Browne, although sincerely fond of each other, found ere they had been many months married that there were various things about which they did not agree.

Hundreds of other young married couples have made the same discovery, and although it surprised and shocked them they have been too wise to allow it to wreck the happiness of their married lives.

Mr. and Mrs. Browne were thus wise. They wasted no time in undignified and unprofitable wrangling over their differences of opinion, but neither of them yielded one jot or tittle to the other. They simply kept silence on all topics on which they should disagree.

Happily also for them their differences of opinion were in regard to the minor things of life, and, although it is the "little foxes that destroy the vines," their little differences did not destroy their worldly happiness, each of them being blessed with abundant good nature in spite of the firmness of opinion that made them decline to yield one to the other.

Mrs. Gibson Browne was a high church Episcopalian, while Mr. Gibson Browne was inclined toward Unitarianism, but Mrs. Browne did not become a Unitarian, nor did Gibson renounce his faith and become an Episcopalian—and yet they were happy as married folks go.

Mrs. Browne was decidedly opposed to all operas in which there was a ballet, while Mr. Browne was fond of a ballet purely because of the artistic effect it gave to operatic scenes, and he went to the opera whenever he felt like doing so, and he did not annoy his wife by telling her anything about it.

And when Mrs. Gibson wished to do anything she felt it was perfectly proper for her to, even though Gibson did not approve of it, she simply and quietly did it, and Gibson was none the wiser. There were times when Mr. and Mrs. Gibson Browne exemplified the old adage, "Silence is golden."

One morning at the breakfast table Mr. Browne said:

"My dear, don't forget that the Van Horns give their party to-morrow night."

"I remember it," replied Mrs. Browne without lifting her eyes from her plate.

"What dress shall you wear?"

"I am not going," replied Mrs. Browne calmly.

"Not going?" Mr. Browne dropped his knife and fork in surprise.

"No, I am not."

"Why not?"

"I have my reasons, Gibson. Rest assured that they are good ones. And I'd rather you didn't go either."

"But I think I shall go, my dear."

"I'd rather you wouldn't."

"I don't see why I shouldn't go."

"Let the fact that I don't wish you to suffice for this once."

For the first time in their married lives, Mr. and Mrs. Browne engaged in a heated discussion. Mrs. Browne firmly refused to give her reason for remaining at home, and as firmly insisted on Mr. Browne remaining with her. There was, in fact, a good deal of firmness on both sides.

Mrs. Browne did not resort to tears; she never did. Mr. Browne did not rage and fume and use ungentlemanly language; he never did; but their voices grew harder and colder every moment, and as they rose from the table Mrs. Browne said decidedly:

"You shall not go, Mr. Browne;" to which Mr. Browne replied with equal decision:

"Indeed I shall go, Mrs. Browne."

But he went down town in a more uncomfortable frame of mind than he had ever experienced as a married man. Never before had he seen such a look of firmness on his wife's face, and he knew by this time that Mrs. Browne was a very determined woman. But he was doggedly determined to resist her opposition. He would go to the party.

"I guess she'll hardly hide my dress suit," he said. "But hanged if I feel like putting it on and marching off before her very eyes. I'm afraid there'll be trouble if I do. But I shall go, all the same, if I—I know what I'll do! Yes, sir; I'll do it, and we'll have a big laugh over it afterward, although it wouldn't be much of a laughing matter if Mrs. Browne knew I intended doing it. But I'll do it, sure as guns!"

And when Mr. Browne went home to tea the next evening there was tucked away in his vest pocket a little phial containing a colorless liquid he had just purchased at the druggist's.

"She often puts a few drops of this in a glass of milk or of water, and takes it when she can't sleep or when she has a toothache," he said, "and it never fails to send her right off to sleep. Now I'll manage to put a few drops of this in her tea to-night. She always lies down for a little while after each meal, and she'll be asleep before ten minutes to-night, and I can dress and be off without those keen eyes of her upon me, and without any disagreeable arguing of the matter, for go I will."

Browne found it easy enough to "doctor" the glass of milk his wife always drank at the tea table, and according to her usual custom Mrs. Browne lay down on a sofa immediately after tea, and, as Browne had predicted, she was soon fast asleep.

"But hanged if I don't feel mean over it," said Browne as he sat in his big easy chair looking at her and picking his teeth with the gold and pearl toothpick she had given him only three days before.

"It was taking a mean advantage of the little woman, hanged if it wasn't. Wonder what she'll say when she wakes and finds me gone. She'll be mad enough, no doubt. But it'll teach her that I'm not to be thwarted. It isn't that I care much for the party. I'm tired and sleepy enough to stay at home, but"——

His arms went up over his head, he yawned fearfully, and said to himself:

"I must be careful not to yawn at Mrs. Van Horn's ball, and I will if I don't shake off this drowsiness. I've been losing too much sleep of late and"——

He yawned again and again. The paper he had taken up fell from his hands, and his arms dropped listlessly at his side.

* * * * * *

The handsome little ebony and gold clock on the mantel was striking 10 when Mrs. Browne yawned and opened her eyes to find herself lying fully dressed on the sofa in the dark. She rose slowly, groped her way unsteadily to the mantel in the darkness, found a match, lighted the gas and said to herself as she did so:

"How queer my head feels! Just like it does after I've taken an opiate. Mercy! if it isn't 10 o'clock! How could I have slept so long? And Gibson? I feel like a guilty wretch for doing it, but I was determined that he just should not go to that party, and"——

"Louise!"

"Why, Gibson!"

His voice sounded thick, and he had both fists thrust into his eyes and was rubbing them as he leaned back in his great easy chair.

"What time is it, Louise?"

"After 10, dear."

"You've been asleep all the evening?"

"Yes, have you?"

"I—I—guess so, and—why, it's time for the party!"

"It's long past time. It would take you an hour to dress."

Browne sat for a moment staring blankly at his wife. She had dropped suddenly into a chair and was staring as blankly at him.

"See here, Louise."

"See here, Gibson."

"Did you dare to"——

"Did you dare to"——

"Give me an opiate?"

"Give me an opiate?"

"Yes, I did."

"So did I."

For a full minute they stared at each other, and then both burst into a ringing laugh.

"But don't you dare tell it to anybody, Gibson."

"And don't you breathe a word of it, Louise."

"I? Never fear."

"I shall keep mum enough about it."

Nevertheless I know all about it and so do you.—Zenas Dane in Yankee Blade.

When a Man Appears a Fool.

How foolish a man appears when he is arguing with a railroad company about something that cannot be helped. For instance he has purchased a ticket to, say, New York. He intends to travel at night comfortably in a lower berth on a Pullman palace sleeping car. He steps jauntily up to the window of the Pullman office and says, in an offhand way, "Give me a lower berth on the 7:15 for New York," as he lays down a five dollar bill. "Haven't a berth left, sir." "What?" It is impossible to describe the awful emphasis with which this monosyllable is thundered forth, but we have all heard it and know how it sounds.

Then follows a long tirade by the traveler, who cannot understand why some one is not to be turned out of the berth he has paid for to make room for the late comer; why there are not more berths in a car; why there are not more sleepers on the train, and, above all, why the imperturbable clerk in the ticket office does not hold a conference on the instant with the superintendent of the Pittsburg division of the railroad to "fix it so that he can get a berth." There are experiences of this kind for the clerks every day, especially during the busy season. This is the reason they are not disturbed each time the inevitable too-late man comes foaming up to the window. And then the too-late man who will not accept the inevitable always looks such a fool.—Pittsburg Bulletin.

An Academic Joke.

Census Enumerator—How many children have you?

Lady—Two.

Enumerator—What is the age of the oldest?

Lady—I have no oldest.

Enumerator—Well, of the youngest then?

Lady—I have no youngest.

Enumerator—What then? Are they twins?

Lady—No.

Enumerator—I ask these questions officially and must have a correct answer.

Lady—Before I was married I was a schoolteacher, and I taught pupils that the superlative degree should not be used in comparing two things. I practice what I taught. My older child is 10 and my younger one 8.—Journal of Education.

Vaccination in China.

The Chinese, who reject scornfully nearly every application of western medical science, are, according to the governor of Hong Kong, firm believers in the advantage gained from vaccination and submit to the ordeal with a cheerfulness and philosophy which are characteristic of this wily oriental. Protection by vaccination is especially required in Hong Kong, owing, as Sir William Des Vœux points out, to the frequency with which smallpox is introduced by steamers coming from all parts of the world and to its fatal prevalence when it has once obtained a footing.—London Tit-Bits.

Area of American Cities.

Beginning with the largest in size, the area of the country's chief cities is this: Chicago, 172¼ square miles; Philadelphia, 129¼; Washington, 72; St. Louis, 62¼; New Orleans, 60; San Francisco, 42¼; New York, 41; Boston, 37¼; Baltimore, 32; Brooklyn, 26¼, and Cincinnati, 24.—Traveler and Hotel Record.

A PAINFUL INCIDENT.

The Postmaster Thought he had Been Robbed.

A LIFE OR DEATH STRUGGLE IN THE DARK

Trouble Caused by a Baby, and a Frightened Nurse Girl.

An incident recently occurred in one of the towns of Seneca county, New York, involving a Republican postmaster in serious embarrassment. As the postmaster, though a bachelor, has generally been of exemplary habits, a pillar in two churches and one of Congressman Flood's most active workers, the incident has, as the local paper sometimes remarks of other sad events, "cast a gloom over the entire community."

Owing to the lack of a safe in his office this postmaster has been in the habit of taking his money and postage stamps home with him every night in a small sachel. This sachel he took to his bedroom, and usually placed under his pillow. But one night he neglected to put the sachel in its usual place, merely dropping it near the door as he entered his bedroom. That same night the nurse girl employed by another boarder in the house found it necessary to carry the child in her charge to its mother's room. In passing through the unlighted hall she mistook the door and entered the bedroom of the postmaster.

That vigilant official instantly awakened with the belief that there was a burglar in the room, and reached under his pillow for his sachel. Not finding it, the thought crossed his mind that the burglar had already secured it, and he bounded out of bed and seized the nurse girl, who was groping about in the darkness. He was just getting his grip on her throat when she shrieked and dropped the child, which he, rather by involuntary impulse than deliberate intent, saved from wreck by catching hold of its clothing. The girl, finding herself released, ran out of the room and into her own, where she locked the door and fainted.

The child was by this time screaming terrific screams, and the dazed postmaster was trying to think whether to drop the soft, moist thing into the wash basin or throw it out of the window, when its father and mother entered the room with lighted candles. The mother rushed upon the postmaster crying, "Give me my baby," and having rescued it left the room. The infuriated father demanded, "What have you been doing with my child?" and began to jerk the postmaster around in a way that might be called "wiping the floor with him."

It is probable that the postmaster was at that moment nearer to insanity than men often are who escape it, but the rough treatment he received saved him. It is known that the mind works rapidly in the presence of great danger, and it seems that by the time the postmaster's legs had whacked

BEGAN TO JERK THE POSTMASTER AROUND.

against the bedpost and washstand, had upset a rocking chair, smashed a mirror, and sent the hairbrush, perfumery bottles and collar box on the dressing case flying about in disorder, his mind had got back to the lost sachel which he believed the burglar had captured. The thought nerved him for a mighty effort, and grappling with his now exhausted assailant he flung him on his back in a corner of the room. Then he yelled "Robbers!" and began to search for his sachel. He had just found it and was preparing to meet another assault from the outraged parent, when several other male boarders in the house, who had been aroused by the disturbance entered the room, and called a halt on the proceedings.

It required a great deal of heated talk to explain matters, and it is probable that the explanation never would have been satisfactorily made had not the door of the nurse girl's room been broken in, and the girl required to tell how she came to part with the child. Even then half the people who heard the story did not understand it, and the weekly paper published in the town having consented through friendship for the postmaster to refrain from mentioning the affair, the public have been left to draw very erroneous inferences. Some of the neighbors suppose the postmaster to be crazy, while others contend that even on the supposition that he was walking in his sleep it was very queer that he should steal an infant out of its cradle to torment it.—New York Times.

Nothing Extraordinary.

"Well," said Chappie impatiently, to the boy opposite him, "what are you staring at? Is there anything extraordinary about me?"

"Oh, no, sir," replied the boy, abashed; "I think you are a very ordinary looking person."—Harper's Bazar.

Too Literal.

Mrs Pussley—You won't do a thing to please me now, and yet before we were married you said you would go through fire and water for me.

Pussley—So I would, my dear. The water would put the fire out, you know.—Puck.

Not February.

Teacher—Which is the shortest month of the year?

Small Boy—Orgust.

Teacher—August?

Small Boy—Yes'm. That's the last month of vacation.—Street & Smith's Good News.

A Warning.

"Did George bring you up some candy to-night, Marianne?"

"Yes, mamma."

"I thought so! I wish the next time he does you would tell him not to smack his lips so loud when eating it."—Light.

Logical.

McCarthy—Oi say, McGinniss, is tin years the wood or the shilver weddin'?

McGinniss—Naythur, you fule. T-i-n shpells tin. It's the tin weddin', begobs!

PERIQUE TOBACCO.

The Reason for Its Peculiar Flavor and the Method of Curing.

In the case of perique tobacco the stripping of the midrib from the leaf causes the leaf to fall into two lateral halves, which are placed on top of each other in such a manner that the blade of one half of the leaf alternates with the apex of the other. These are then twisted into what are called "torquets." These torquets are folded upon themselves, side by side, and are placed in strong boxes, which are about twelve inches square, and subjected to pressure.

After twenty-four hours these torquets are taken out and repacked in the same manner as before every twenty-four hours for a period of a week, the idea being evidently to subject the torquets to a uniform pressure throughout. After this period has elapsed these torquets are repacked every three days for about two weeks. During all this time the tobacco is subjected to a constant, steady pressure with a press of the most primitive kind.

I should not forget to state that after the tobacco has been placed in the press one week a black juice flows out of the box, which has a pleasant odor, not unlike freshly cooked prunes. Square pieces of cottonade, 18 by 18 inches, are laid out, and on these the torquets are opened, or, to use the term of the English speaking Arcadians, the torquets are unraveled, great care being necessary to separate each leaf.

The largest leaves are laid upon the cottonade first, so that when rolled the largest leaves will serve as a covering of the carrotte presently to be described. The smaller leaves are placed longitudinally upon the larger ones until three and one-half to four pounds are placed upon the piece of cottonade, the ends of which are turned inwardly. The cottonade and contents are now rolled into carrottes, the ends of the cottonade are pulled out and a string tied to each end to prevent the carrotte from opening, and the whole wrapped in a clothesline, usually made of cotton.

The wrapping is performed in the primitive manner that characterizes the operation throughout. Use is made of a windlass and a rope; the end of the rope is made fast to the carrotte, passed around a post (driven into the ground), a twist is now made around the carrotte, and with each turn of the carrotte the pressure is increased. This is continued until the whole of the carrotte is enveloped; the end is made fast by passing it through several turns of the rope. This finishes the carrotte, but, before it is placed upon the market, it is allowed to age, which is usually from six months to a year. During this time the tobacco is allowed to undergo a slow fermentation, which gives the aroma and taste that distinguish this tobacco from all others.

The amount of perique grown and manufactured has averaged, during the five years preceding 1890, 19,000 carrottes of four pounds per annum. Wholesale tobacconists have expressed the doubt that any modern method would produce tobacco with as fine flavor as that produced by the old and primitive manner just described.—Pharmaceutical Era.

How a King Keeps Cool.

Although one may not keep cool, it is some satisfaction to read how others manage it. There is the king of Siam, for instance. He is said to have in one of his country palaces a wonderful pavilion. It was built by a Chinese engineer as a refuge for the king during the extreme heat of summer. The walls, ceiling and floors are formed of pieces of plate glass an inch thick. They are so perfectly fitted together with a transparent cement that the joints are invisible and no fluid can penetrate. The pavilion is twenty-eight feet long and seventeen wide, and stands in the middle of a huge basin made of beautifully colored marbles.

When the king enters the pavilion the single door is closed and cemented. Then the sluice gates are opened and the basin is filled with water. Higher and higher it rises, until the pavilion is covered and only the ventilators at the top connect it with the open air. When the heat of the sun is so great that the water almost boils on the surface of the freshest fountains this pavilion is deliciously cool. And this is the way the king of Siam cools himself off in hot weather. It sounds very delightful.—Exchange.

An Automatic Wrapper.

One of the most ingenious and at the same time practically useful among the automatic machines which have been introduced is a device which forms, fills, weighs and seals packages in those establishments where large quantities of goods, such as fine cut tobacco, soda, starch, etc., are constantly put up. The operation by which this result is accomplished, though decidedly novel, is not at all complex in any particular, the machine consisting merely of a series of forming blocks, receptacles, folders, gummers and feeders, all working in mutual harmony, so that the packages are smoothly and continuously produced.

The forming blocks successively size the paper, which instantly afterward is wrapped around them, folded and gummed at the end; the paper sacks are then plunged into receptacles filled with the commodity with which they are intended, finally folded on top and sealed.—New York Sun.

It Felt So.

An Irish servant girl came to her mistress one morning begging permission to go to the dentist to have an aching "toot" filled, saying that it had been going "thumpity-thump, thumpity-thump!" all night.

When the girl returned, her mistress asked:

"Well, Katie, did you have the tooth filled?"

"Oi did, mum."

"What did you have it filled with?"

"Oi don't know just phwat it was, mum, but from the way it fales Oi should think it was thunder and loightning he'd put into it, mum."—Youth's Companion.

QUAIL IN CAPTIVITY.

A Method of Raising Them has been Discovered.

BRINGING THE YOUNG ONES TO MATURITY

The Secret of Success Lies in the Food Given the Birds.

It is a fact well known to naturalists that animals are much easier to tame than birds. That is to say, mammalia are more fit to undergo the conditions of captivity than the winged and feathered tribes. The result is that the habits of many of the most common and interesting birds are practically unknown. The reason is that the bird requires more freedom and air than four footed creatures.

Among the birds which are rarely seen in captivity, although the species is extremely common, is the quail, the popular American Bob White. Although frequent attempts have been made to raise them as other poultry, they have generally been unsuccessful. Game preservers have kept quail under the most favorable conditions, and have induced the wary birds to lay eggs and to hatch their young, but they can do no more. When once hatched, the chicks die. The conclusion, therefore, has been reached that the feeding of quail is not properly understood.

These facts being generally recognized, it may be a matter of surprise to many to learn that a Philadelphian has for the past three years been successful in hatching out and raising quail. Most men have their hobbies, and the rearing of quail is Mr. Harry Rudolph's pet amusement. It is such an original hobby that it may well be asked how he acquired such an idea. Mr. Rudolph is a thorough sportsman, and, to quote his own words, "would rather gun than eat."

Quail and pheasant shooting is his delight, and he confesses that he always had a fancy for the game little Bob White. About three years ago he was given a brace of live quail while gunning at Newkirk station, in New Jersey. These were the nucleus of his present stock. He brought them to his home, and fitted up a cage for them in his little back lot.

HOW HE STARTED.

He gradually acquired a few other birds, which paired off and commenced to lay and hatch eggs during the summer. The small ones were successfully hatched out, but died very shortly after. Mr. Rudolph determined to discover the cause of their early demise, and, knowing it must be lack of proper food, determined to watch the habits of the older birds and experiment upon them with varieties of grain and insect food.

In spite of the amusement of his friends, who considered his attempt impossible, Mr. Rudolph set to work in earnest to raise quail, and, after numerous failures, was able, in his second year, to successfully hatch and raise a brood of quail. He had hit upon the right method of feeding them, and the young birds were as strong and healthy as if born under natural conditions. Since then he reckons that 65 per cent. of his young birds have been successfully brought to maturity. As statistics show that hardly 50 per cent. of wild game birds attain their full size, owing to the number of their natural foes, such as hawks and vermin, this is an extremely good record.

In a small yard, scarcely twenty feet square, Mr. Rudolph keeps his pets. The inclosure is shut in on three sides by a wooden fence, and on the fourth by the rear wall of the house. Around the borders are beds of geranium and small shrubs. In the center is a patch of grass, with a tall plant in the middle. On one side of the lot are the cages, in which three brace are paired off in separate coops.

RAISING QUAIL.

In the fourth cage is a lonely and disconsolate hen, while running loose about the yard are two cocks and a hen with three chicks. The latter are a remarkable brood. They were hatched, with five others, on the 8th of July, which is nearly one month ahead of the breeding season. The defunct ones were killed by the inclement weather or some other cause common to infant quail, but the survivors remain perfectly healthy.

When the next brood is born, the chicks loose in the yard, together with the parent birds, will be shut up to make room for the newcomers. Owing to the extreme pugnacity of the cocks it is impossible to let more than one pair loose at a time, or the lives of the birds would be endangered. The pairing off of two cocks with one hen, although rare, is occasionally found. The two male birds who champion the little mother hen live in peace and harmony, and both work together at making the nests and take their turn in sitting on the eggs.

The principal food which Mr. Rudolph gives to his pets is grain; grasshoppers also form part of their dietary. But the secret by which he manages to raise the young Mr. Rudolph refuses to reveal. He says that it is something natural to the birds in wild life, but beyond that he will not commit himself. The quail are very fond of hempseed, but they get so fat on it that its value as wholesome food is very small. It would soon kill them off. It is useful, however, in feeding hens which have been sitting in order to bring them back to their proper condition.—Philadelphia Ledger.

Two Brave English Yachtswomen.

There are two famous yachtswomen at Cowes, Mrs. Rudson Reed and her sister, Miss Cox, who both sail their own boats. The former lady's is called the Troublesome and the latter's the Miss. No sort of weather seems to make any difference to them, and they frequently carry off the prize. On fine days they wear blue serge frocks and yachting coats and a man-of-war's cap, but "when the breezes blow" one sees them in a stout pea jacket and tight fitting racing cap. Both ladies are good looking, with slight, graceful figures.—London Cor. Philadelphia Telegraph.

A Swell Boston Shoemaker.

For several years there has been a colored shoemaker on School street. He has owned his little shop, which is big enough for about four people to stand in without noticeable discomfort. He is a good looking young fellow, and there isn't anything remarkable about him at first sight. He has a very good trade for a small place, and his income is sufficient to enable him to live comfortably. If you go into his shop any time of the day between 7 o'clock in the morning and 5 o'clock in the afternoon you will find him seated on a little stool with a leather apron on. His sleeves will be rolled up, and he will be pegging away for dear life.

If you go into the place at 5 o'clock and wait a few minutes, you will presently behold as novel a spectacle as may be witnessed in the city anywhere. You will see that a gorgeous light overcoat has been hanging on a peg in the wall in a corner of the shop, and that a pair of flashing patent leather shoes have been reposing in the same corner on the floor, and that near by a big silver knobbed walking stick has been standing, while on a little shelf has been resting a glossy silk hat. When this young man's work is done in the evening he doffs his leather apron and attires himself in his swell apparel.

He may be seen on Washington street in the neighborhood of the Adams House an hour later, silk hat, patent leathers, spring overcoat, silver knobbed cane and all. He goes to his shop in this dress in the morning and leaves it similarly garmented in the evening. He moves in the swellest colored society of the city, and is looked on by his acquaintances as a person of quality. Yet he makes no disguise of his business.—Boston Cor. St. Louis Globe-Democrat.

A Rival of the Yosemite.

In the vast Sierra wilderness far to the southward of the famous Yosemite valley there is a yet grander valley of the same kind. It is situated on the South Fork of King's river, above the most extensive groves and forests of the giant sequoia and beneath the shadows of the highest mountains in the range, where the canyons are deepest and the snow laden peaks are crowded most closely together. It is called the Big King's River canyon or King's River Yosemite and is reached by way of Visalia, the nearest point on the Southern Pacific railroad, from which the distance is about forty-five miles, or by the Kearsarge pass from the east side of the range.

It is about ten miles long, half a mile wide and the stupendous rocks of purplish gray granite that form the walls are from 2,500 to 5,000 feet in height, while the depth of the valley below the general surface of the mountain mass from which it has been carved is considerably more than a mile. Thus it appears that this new Yosemite is longer and deeper, and lies imbedded in grander mountains than the well known Yosemite of the Merced. Their general characters, however, are wonderfully alike and they bear the same relationship to the fountains of the ancient glaciers above them.—John Muir in Century.

How Ancient Builders Built.

The builders of Babel built well. Tradition relates that it was only a confusion of tongues that checked their aspiration. There can be no doubt that the foundations of the celebrated tower that was designed by its architect to reach "heaven" were of the broadest and heaviest sort; let us say vast walls of the most solid granite, bound and knit together by that most excellent insoluble cement that is one of the lost arts to modern constructionists. Yet if latter day engineers be not hopelessly in error with concern to the conclusions they have drawn as respects ancient masonry from the ruins of ancient structures, ancient builders counted only on the law of gravitation, which they knew in an empiric way, for the safety of the works they wrought. The projector of the Nag-on-Wat, whose walls and roof might have sheltered a St. Peter's and a St. Paul's and still have had room for a building like the Equitable in Broadway within its vast inclosures, would never dream of setting his masons to begin the laying of his walls say at about fifty feet from the ground.—Harper's Weekly.

Her Views.

Charlie B—— is a board of trade man. His wife has ideas of her own.

A few days ago she told Charlie at dinner:

"Reciprocity is a great thing."

"When did you find that out?" asked Charlie.

"A lady stepped on my dress today and never offered a word of apology."

"Of course not," chuckled Charlie.

"But she smiled."

"Oh!"

"Then I smiled. You see that smile produced a smile in return."

"A man would have smiled, too, under the circumstances," remarked Charlie.

"That was reciprocity," said Mrs. Charlie, ignoring the remark.

"Almost as satisfactory as if you had slapped each other."

And she answered in a dreamy voice:

"Almost."—Detroit Free Press.

Feminine Superstition.

The elevator in one of the big newspaper offices was filled with men. One woman, fashionably dressed, was a passenger. Next her stood a hunchback—an aged man, neatly dressed and shrinking as far as possible out of notice. The woman looked at him with a thoughtful air as if weighing vast possibilities. Suddenly she leaned over and with the tip of her white gloved finger daintily touched the hump of her neighbor. "What was that for?" one man asked another in an undertone. "Don't you know? For luck," was the answer. "Touch a hunchback and bring good fortune, is one of woman's pet superstitions."—New York World.

At the present day the Persians call asafœtida "the food of the gods," the Russians delight in caviare and the Eskimo in train oil.

PETTICOATS MUST GO.

The Latest Decree of the Goddess of Fashion.

UNDERWEAR THAT IS ALMOST USELESS.

Fashionable Modestes Refuse to Fit a Dress Over a Skirt.

The newest thing in petticoats is no petticoat at all. This assertion may tax credulity, but it is a fact, a fashionable fact perhaps, but nevertheless a fact. It is hard to believe that woman would ever outlive her love for the fine cambric skirts with their cluster tucks, open insertions and Swiss embroidered ruffles, but she has, and more than that, she scorns the lace edged French skirt, and would not give thirty cents for the finest convent made flannel skirt in stock. At first it seemed positively shocking to lay aside that most feminine and really beautiful garment, but the fashionable modiste began the crusade, declared that she could not fit the dress nicely over the gathered cotton underwear, and ordered it off. The tyrant was obeyed, but not surprised; for did she not eliminate the narrow skirted, round shouldered chemise and the lozenge shaped corset cover?

It is no betrayal of confidence to say that this onslaught of underwear had its origin on the stage. No society actress or artiste goes through a part in the regulation underwear for the reason that her freedom would be restricted. She could not get around in ruffled dimity, nor deport herself with any sort of grace in starched cambric. The dressmaker who fits a stage dress over stays, stockings and tights very soon learns how superior the result is compared to the gown made over gathers, strings, bands or yokes. One is perfectly smooth, the other cannot be kept from wrinkling. It has come to a point now when the modiste will refuse to fit a skirt over a petticoat, and that ends all argument. She does not presume to say that madame shall not wear what she likes, but "I will not try to fit you unless you dress as I dictate. When the costume is finished you may do with it what you please."

Skirts hang better and bodices fit nicer the less there is under them, and in warm weather, when the dress is made over a lining, there is really no necessity for underskirts. With the tailor made suit, silk lined, there is sufficient warmth for cool weather, and a long ulster as a finish will suffice for cold days. This new arrangement is an advance in the right direction. Women need fewer clothes for housewear and more wraps or outer garments for the street.

This desire for smoothly fitting skirts and creaseless basques means rebellion against the baggy, divided skirts, which will never be adopted by women who follow the styles.—New York World.

Dropped Stitches.

A woman can do more harm to a rival by praising than by maligning her.

Mrs. Alice Shaw has signed a contract to go to St. Petersburg and whistle for the czar and nobles.

Sara Bernhardt says that whenever she has a fit of anger it is invariably followed by sickness.

An egg well beaten in a glass of milk and sweetened makes a nice strengthening drink for a teething child.

A Georgia woman who is engaged in the chicken business has sold 150 dozen eggs from twenty-seven hens this year.

Dress reform is sweeping away the barriers of sex. The patent office has been called upon to protect the idea of a bifurcated skirt, and has done it.

Ripe tomatoes will remove ink and other stains from white cloth, also from the hands.

Whenever you find a man who is a failure you will find also a patient little woman who makes his excuses to the world.

News comes from abroad that the correct thing in autumn wraps will be the leather jacket trimmed with a metal braid of nail head design.

In the handle of the newest tennis rackets is a place for a tiny bottle of smelling salts, which the fair players use to invigorate themselves.

A Beautiful Vienna Girl.

Standing, sitting, leaning; sad, smiling or simply meditative; arrayed in a variety of chic costumes; smoking a cigarette, peeping over a mask, etc., she has challenged comparison with every fresh rival. A few years ago she won a $5,000 prize at a beauty contest. Then she was simply Miss Mertens, "to fortune and to fame unknown." After that she became a fixed star in the theatrical firmament, and is now an actress at the Eden theatre in Paris. She is a distracting beauty, perhaps the most beautiful woman in Europe. Her skin shows the smooth, dead white of the magnolia blossom, a tint seen to perfection among the Austro-Hungarians. An Oriental languor softens her large, white lidded eyes. She is tall, of generous build and very graceful.—Philadelphia North American.

A Tale with a Moral.

A special six inch gun has just been made at the naval ordnance foundry at Washington, and the ordnance officers are tickled half to death over the fact that it has been constructed in fifty-two days.

It is a small gun, as guns go nowadays, and it wouldn't be worth much for defense against a first rate power. But if such a power should attack us it would take at least fifty-two days to make another one like it.

And in fifty-two days from the declaration of war a foreign fleet would have bombarded New York and Boston and Baltimore and Charleston, and sailed away again. In these days nations don't wait a year after declaring war before beginning to fight.

The obvious moral is that we must prepare for contingencies while there is time and opportunity.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.
FRIDAY, MARCH 25 1892

People in New York are eating California oranges beside a red-hot base burner and wondering why winter lingers so long in the lap of spring

Evidently this country must at once prepare for the reception of a larger volume of immigration than ever before. "The recent flurry in Berlin will result in increasing Teutonic immigrations to this country by tens of thousands." The Call informs us that 300,000 Germans will soon leave the Volga province of Russia for this country. Add to that the 3,000,000 Russian Hebrews who are coming, and we have in prospect the material of several new States.

The Republican State Central Committee met in San Francisco Monday. It was decided to hold the coming State Convention at Stockton on May 3rd. The basis of representation in the State Convention as follows: One delegate at large for each county, one delegate for each 250 votes cast for Hon. H. H. Markham for Governor of California in 1890, and one delegate for each additional fraction of 125 votes or more. Under the apportionment Inyo county will be entitled to three delegates.

After an enervating sequence of pusillanimous statesmen, David Bennett Hill presents an ingratiating picture to every true American. There is a sturdy, trenchant ring about all of his utterances that strikes home. Mr. Hill is the man destined to round out the closing years of this eventful century with the forceful impress of a patriotic inspiration. With Mr. Hill at the helm every American would feel certain that the American flag will be respected, that the Monroe doctrine will be revivified and vitalized by a man who has the courage of his convictions. He will waste no time with the abstruse profundities of an astute school of diplomacy, but will deal in ultimatums. That's the sort of presidental tune this country has been yearning for these many years.

Postmaster General Wanamaker made a number of popular recommendations in his recent official report. He strongly advocates the use of the the telegraph and the telephone in the postal service. He proposes to have one-cent letter postage, three-cent telephone messages and ten-cent telegraph messages. But he does not propose to create any monopoly of the telegraph or telephone service by the government. Under the system he proposes private companies could continue to do business, wherever they could find it profitable. The proposed telephone service would be used for the purpose of sending messages to the postal telegraph offices, and would not be in the nature of a telephone exchange. Mr. Wanamaker argues that the government may with the same propriety use the telephone and the telegraph in the postal service as it has used steamships and railroads in place of the old sailing vessels and stage coaches.

The proposed dissolution of the Standard Oil Trust is seemingly more a matter of form than a reality. The combination is to be as powerful in maintaining prices and pushing business under the new arrangements as under the old. Mr. Dodd, the solicitor of the trust, is authority for the statement that the business will go on as usual, but with a slight change of form. The shares now held by the trust will be returned to the individual corporations composing the trust, each receiving the shares in proportion to its capital But as the men who are in the trust hold the majority of the stock in the various companies, there can be no change as long as they agree to regulate their business on a common line of action. As trustees these men not only represent the majority, but the minority among the shareholders. As holding control in the companies they will represent themselves and may have a minority in opposition. The corporations in the trust are thirty in number, and they carry on business in five States. An attempt was made to unite the companies in each State into one, but it failed. Now, however, an effort will be tried of incorporating with the large concerns a number of small companies. From all this it may be inferred that the benefits of genuine competition are as far as ever remote in reaching the public, and that the men who have grown enormously rich on these methods will grow richer still. They may, however, become antagonists when working separately.

French Cookery Terms.

With the best of Anglo-Saxon intentions it is sometimes a little difficult to avoid the use of French terms in cookery or a bill of fare. Here are some that one encounters constantly: Releve is no dish in particular so far as the style of preparation is concerned, but answers to the word "remove," and consists of a dish replacing another, a doubling, so to speak, of the same course before going on to the next. It is therefore not unusual to find in a large dinner a releve de potage, releve de rot, de gibier, etc. Entree is a made dish served after the fish or in its stead, where it is not obtainable, and preceding the rots or roast meat. After the latter comes the entremets, i. e., sweets or puddings.

The term hors d'euvre is the most difficult to particularize. When cold it comprises all side dishes which are really accessories to the meal. As such they can be and are eaten indifferently either before or after the soup; they are always placed on the table when it is being laid, and are often left there until the entrees have been served. They consist of radishes, olives, caviar, boutargue, all manner of salt and smoked fish, sardines, anchovies and a variety of dainties.

Hot hors d'euvre are almost unlimited; they are very acceptable at large dinners, and are generally served immediately after the soup and before the fish; they are often fried or baked, and are then usually such things as can be dished on a napkin, such as patties, rissoles, croquettes, vol-auvent, etc.; obviously, however, the series can be very much extended. At ordinary family dinners they are often served as and instead of an entree.—Providence Journal.

The Boy Who Discovered the "Saw By."

A few years ago a green country boy applied to the superintendent of a western railway for work, and, somewhat against the superintendent's wish, on account of the danger to life and limb attendant upon such occupation, was given a place as brakeman of a freight train.

On one of his first trips it happened that his train met another freight train at a station where the side track was not long enough to accommodate either of them. The conductors were debating which train should back up to a point where they could pass, when the new hand ventured to suggest that neither should back; that they could pass each other by means of the short side track if the thing was managed right.

The idea excited a good deal of laughter on the part of the old trainmen, but the boy stood his ground.

"Well, how would you go about it?" asked one of the conductors, confident that the lad would soon find himself against a stump.

The boy took up a stick and traced in the sand a diagram to illustrate his plan.

"Good gracious!" said the conductor, "I believe that will do it!"

And it did do it. Today every trainman in America probably knows how to "saw by" two long trains on a short side track, but it is not so generally known that the thing was never done until an inexperienced country boy, who is now the manager of a great railway line, worked out the problem for himself.—Washington Post.

An Expensive Infirmity.

I happened to be in a Broadway optician's store and saw a good looking, well dressed matron with a slip of a girl and a small boy, all of whom wore spectacles. The lady gave some directions about a pair of glasses, and when she had gone I asked the optician whether defective vision is hereditary.

"Rarely," said he. "That lady has four children, and all of them must wear glasses. The father's eyes are sound. The mother and her children are afflicted with astigmatism, a defect of the vision which is almost as rare as anything that afflicts the human eyes. It makes straight lines crooked and parallel lines fade into one. Special glasses must be made and ground to suit each person, and sometimes the respective eyes. They cost five dollars apiece too. So you see a large family of children with astigmatism costs a good deal of money in glasses alone. As the children grow up the range of vision changes, they break or lose their glasses oftener than adults, which increases the expense."—New York Herald.

The Shark Is a Slow Swimmer.

One ill service nature has done the shark, namely, that of placing a triangular fin on his back which acts as a danger signal and gives warning of his approach. Happily, the shark has not been gifted with sufficient sagacity to be aware of this peculiarity, for had he been so he would unquestionably abandon his habit of swimming close to the surface of the water, and would, in that case, be enabled to approach his victim unobserved. The shark is a slow swimmer for his size and strength.

Byron observes, "As darts the dolphin from the shark;" but Byron was a poet, and does not appear to have been a close observer of the habits of inhabitants of the water, or he would have known that a shark would have no more chance of catching a dolphin than a sheep would of overhauling a hare. A shark will keep up with a sailing ship, but it is as much as it can do to follow in the wake of a fast steamer, and a torpedo boat would be able to give it points.—London Standard.

Benzine Cleans Furs.

Nothing cleans soiled fur better than benzine. Accesses immerse their wigs in baths of this liquid with most excellent results. Buy the fluid at a paint store, where ten cents will fill a quart bottle, rather than at the druggist's, where the same amount will cost a quarter. Wash the fur until the benzine remains clear; the first two or three rounds will show fairly black. Be careful not to throw the fluid into any receptacle where by any chance a lighted match may follow.—New York Times.

A Crisis in Spain.

Queen of Spain—Moi gracia! The baby king has the stomach ache.

Lord Chamberlain (excitedly)—Woo-o! Call the secretary of the interior.—Good News.

Some Famous Echoes.

There is a famous echo on the Rhine between Coblentz and Bingen, which repeats a word seventeen times, while in the sepulcher of Metella, the wife of Sulla, in the Roman campagna there is an echo which repeats five times in different keys, and will also give back with distinctness a hexameter line which requires two and a half seconds to utter. Brewster mentions an echo on the north side of Shipley church, in Sussex, England, which repeats twenty-one syllables.—Brooklyn Eagle.

NOTES ABOUT WEATHER VANES.

Carved Wooden Vanes Went Out with Figureheads in Ships.

When the Phœnician sailor stuck a needle through the stem of a feather and held it out in the wind, he invented the first weather vane, or feather vane. He was nearly equaled by the Indian boy, who was taught to moisten his finger in his mouth and to hold that finger aloft in the air. When that finger grew cold on a certain side the Indian child knew that the wind came from that particular direction. The Phœnicians, however, were probably the first of all civilized peoples to put the vane of feather into practical use.

Since those early days weather vanes have been used in every form and by all races. Modern vanes in their present shapes were first made of wood by traveling carvers and later of copper by tinkers and smiths. They were used on poles, churches, public buildings, ships and were placed on rocky points of land along the seashore. They are now made in every conceivable design and pattern. Horses, cows, deer, eagles, ships, roosters and even pigs are hammered out in copper and used to register the direction of the wind.

The newer vanes have rain cups attached for catching water during a storm. The amount of water that falls is measured by the square inch in a tube under the vane. Wind gauges also are attached. These indicate the speed of the wind. The gauges are small cups hung sideways to the vane. The wind blows them around in a circle and the revolutions are registered by electricity. Nearly all the large weather vanes in town are connected with dials in the buildings below.

The dial is round, like the face of a clock, lettered like a compass, and a revolving hand shows the action of the wind on the vane overhead. Vanes are no longer set in sockets, as it is nearly impossible to keep them properly oiled. They are hung loosely, like a cap on a pivot, and the hollow stem of the vane hangs over the head of the pivot, covering it from rain and rust.

One of the largest vanes ever seen in New York was placed on the postoffice about fifteen years ago. It was so large that it was considered unsafe and was taken down. A good drawing of it is still in existence. The arrow, scroll and banneret seem to be the favorite shapes in vanes at present. The fence jumping horse and the plow are yet found on the grounds where country fairs are held, but they are not in great demand. The tobacco leaf vane is found largely in the south and in Connecticut. The spread eagle and running deer are wind signs in the western states, the deer more particularly in Canada. Malt barrels in copper are placed on breweries throughout the country.—New York Recorder.

The History of Tweeds.

I had not been many weeks in Edinburgh before one of my friends in the cloth trade wrote me from London inquiring about a "coarse woolen black and white checked stuff, made in Scotland and expected to be wanted for trousers," and asked me to send some patterns of it. This was easier asked than performed, for at that period shepherds' checks were only made in plaids, or mauds with borders and fringes. I, however, contrived to cut a small piece from the seam of my brother's cloak and forwarded it. The postage in those days cost 2s. 3d., as the small pattern constituted my note a double letter.

He replied that the article was just what he wanted, and asked me to forward him half a dozen pieces, but at that time I do not believe there was one piece in all Scotland! I, however, soon got them made, and I believe these were the first Scotch tweeds that were sent to London in bulk. My friend was in a position to introduce them into influential quarters, which he did successfully. Increased orders followed rapidly, and he and the firm I am connected with had almost a monopoly of the trade in London in these goods for a considerable time.—Border Advertiser.

The First Iron Ship.

The first iron ship has more reputed birthplaces than Homer. Both the Clyde and the Mersey claim pre-eminence in this respect. Sir E. J. Robison, of Edinburgh, designed an iron vessel in 1816, which was not launched till three years later; and it is said that an iron boat was worked on the Severn even as far back as 1787. Steel was not used in the construction of merchant ships' hulls until 1859. Old salts were not alone in their belief that wood was meant by Providence to float, but iron to go to the bottom. A naval constructor of some repute once said, "Don't talk to me of iron ships; they are contrary to nature." Now none but small craft are built of wood in this country.—Chambers' Journal.

How Modern Greeks Vote.

In Greece at the present day the ballot is a little lead ball. There is a box for each candidate, divided into two compartments. A clerk goes from box to box with the voter, carrying a bowlful of these balls. At each box the voter takes one, puts his hand into a funnel, out of sight, and drops his ball into the yes or no compartment, making a vote for or against the candidate. If he wishes to vote for more than one party there is nothing to prevent him.—New York Evening Sun.

Her Hubby's Teachings.

Friend—Why do you get married so soon after the death of your husband?

Widow—My dear, if there was any one thing that my poor dead and gone husband insisted upon, in season and out, it was that I should never put off till tomorrow what I could do today.—New York Weekly.

It is now suggested that many dwelling house fires caused by lamp explosions might be averted by keeping some of the ornamental vases in the rooms filled with sand, so that it would be always at hand and ready for use in case of need.

"He who discovers a new dish confers a greater benefit on mankind than he who discovers a new star," says a famous writer, and the majority of persons would be willing to accept the statement without dissent.

The artificial honey is becoming a formidable rival of natural honey. Its composition is sugar, water, free acid and a small proportion of mineral salts.

Every Japanese workman is ticketed. He bears on his cap and on his back labels giving his name and business, as well as his employer's name.

One Woman's Bedtime Hours.

A lovely woman who was talking with a friend one day about the enjoyments, disappointments and heartaches of childhood, said: "The sufferings I endured when a child were more acute than any I have known in later years, and the pleasantest remembrances I have of those far away times are of the bedtime hours, when my mother sat by our beds in that low roofed chamber and taught us the songs she sung as a child, told stories, some of which were of her childhood, while others were conjured up in her own head. Some of the sweetest hymns and sacred stories I learned then, and there ever comes to me when I close my eyes a faint picture of my devoted mother sitting there in the twilight. I think the only reason that the darkness had no terrors for me was that it nearly always came while she was with us. The sound of her voice dispelled all fear; it was associated with tenderest words, sweetest lullabys, softest good nights."—Anna P. Payne in New England Homestead.

Art in Telling Lies.

Telling the truth is an art, but not nearly so difficult an art as telling lies. It is within reach of any man's power, if he will take time and pains, to relate the thing that is. It takes a man of imagination and strong memory to bring forth the thing that is not. Besides, the liar cannot carry his lie all over the world and back to the creation; at some point or other he must piece it on to the universal truth, and to do that neatly he must be a good workman, but this is only part of the greater question as to vice and virtue generally. Virtue is for all who love it; in order to become an accomplished villain a man must have natural aptitude, careful training and immense powers of application, and at any time the villian may be ruined, as a villain, by the unexpected coming to life of conscience.—All the Year Round.

Silver Dollars 675 Miles High.

The treasury counts its silver by weighing it, which is part of wisdom, in view of the fact that a man, counting at the rate of 200 dollar pieces per minute steadily for eight hours per day, Sundays included, would be kept busy for considerably over eleven years.

Piled one upon the other, the $400,000,000 in the treasury would attain a height of 675 miles, and placed side by side they would carpet a room 50 feet wide and nearly 24 miles long.—David A. Wells in Harper's Weekly.

The Uses of the Sword.

The uses to which the sword has been put seem to have been almost as varied as its appearance, when we recall the anecdote told of Charlemagne, who said, as he used the pommel of his sword to put his stamp on treaties, "I sign them with this end, and with the other I will take care that they are kept."—Kate Field's Washington.

OFFICIAL.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY, the 8th day of March, 1892 and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows to wit:

The South half of the South east quarter and the South half of the south west quarter of Section No. 10, and the North east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south east quarter of North east quarter of Section No. 18 in Township No. 13 South, Range No. 35 East, M. D. M. and running thence West eleven chains and 78 links; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispicada Lode."

That certain lot, piece or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence Northwesterly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South east quarter, and the North-west quarter and the North east quarter of the Northwest quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah, deceased.

Dated, Independence, Cal., February 11th, 1892.

OFFICIAL.

Notice of Forfeiture.

To Robert Lockett, or his heirs, exectors administrators and assigns: You, and each of you, are hereby notified that I have expended Two hundred [$200] Dollars in labor and improvements upon the certain mines situate in the Cerro Gordo Mining District, Inyo county California, commonly known and designated as the Protection and Union Jack Mine in order to hold said mines as follows, to wit: One hundred dollars on each for the year 1891, as appears by certificate on file in the office of the County Recorder.

If within 90 days from the date of this publication you fail or refuse to contribute your proportion of said expenditures, together with the cost of publication, as co-owners, your interests in said Protection and Union Jack Mines will become the property of the undersigned under the provisions of Section 2324, Revised Statutes of the United States.

A. L. BOLAND.

Dated February 16, 1892.

ASSESSMENT NOTICE

LONE PINE CANAL COMPANY.

Location of principal place of business, Independence, California. Location of Ditch, near Independence.

NOTICE IS HEREBY GIVEN THAT AT A meeting of the Board of Directors, held the 6th day of Feb. 1892 an assessment (No. 2) of Twenty five (25) Cents per share was levied on the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary, at the office of the Company in Independence, Cal.

Any stock upon which this assessment shall remain unpaid on Saturday the 12th day of May, will be delinquent and advertised for sale at public auction; and unless payment is made before, will be sold on SATURDAY, the 2nd day of April, 1892, to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.

P. H. MACK, Secretary.

NOTICE OF SALE OF PERSONAL PROPERTY.

NOTICE IS HEREBY GIVEN THAT IN pursuance of an order of the Superior Court in and for the County of Inyo, State of California, made on the 18th day of November, 1891, in the matter of the Estate of John Lucas, deceased, the undersigned will sell at private sale, to the highest bidder for cash, gold coin of the United States, at any time before the 25th day of May, 1892, at the town of Lone Pine, County of Inyo, State of California, the following personal property, to wit:

Eighteen head of horses in lots to suit.

Bids or offers in writing will also be received at the office of the undersigned, in the said town of Lone Pine.

Dated November 18th, 1891.

E. H. EDWARDS.
Administrator of the Estate of John Lucas, deceased.

NOTICE TO CREDITORS.

Estate of John Allen Hannah, deceased.

Notice is hereby given by the undersigned, William L. Hunter, Executor of the last Will and Testament of John Allen Hannah, deceased, to the Creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within ten months after the first publication of this notice to the said William L. Hunter, at the office of P. W. Forbes, in the town of Independence County of Inyo, State of California, the same being the place for the transaction of the business of the said estate, in the said County of Inyo, State of California.

W. L. HUNTER,
Executor of the last Will and Testament of John A. Hannah, deceased.

Dated at Independence, Cal. Nov. 18, 1891.

COURT NOTES.

Geo. M. Gill, Superior Judge.

SATURDAY, March 19, 1892.

Estate of Wm. A. Bolinger deceased—Filed order of sale of real estate and personal property.

MONDAY, March 21, 1892.

Williams vs. Williams—Clerk's entry of default.

Estate of John William Meyer, deceased—Filed request for the appointment of an administrator in the place of the parties entitled. Filed petition for letters of administration.

THURSDAY, March 24, 1892.

Estate of John A. Haunah, deceased—Filed affidavit of publication of order to show cause why lease of real estate should not be made.

DIED.

VAGT—At Camp Independence, March 20, 1892, Jacob Vagt, a native of Germany, aged 57 years.

WHEELER—Near Bishop, March 21, 1892, Austin Wheeler, a native of New York, aged 64 years.

J. G. Dodge of Lone Pine is in town.

You can go trout fishing one week from to-day.

Mrs. S. E. Williams of Round Valley is town.

Charley Green was up from Lone Pine last Tuesday.

The prospects are good for a stirring season at Saline Valley.

The Norman House bar-room and card-room have been newly painted and papered.

Harry Boland came up from Keeler yesterday morning. He reports all quiet at Cerro Gordo.

J. W. Lacey will be appointed administrator of the estate of John William Meyer, deceased.

A large band of beef cattle was sold at Reno last week the average price being fifty dollars per head.

Apple and pear trees are donning their green dresses with white trimmings in honor of Spring.

H. Levy has received a fine new stage from San Francisco. It is a strong and roomy conveyance.

Mrs. A. Church came down from Hawthorne last Monday on a visit to her parents at Independence.

C. H. Parsons came down from Round Valley on last Monday's train and has been visiting at Independence and vicinity since then.

Mrs. W. H. Russell has returned home to Benton from a lengthy visit to San Francisco. Her health is very much improved.

Hon. Pat Reddy has been retained to defend Martin Brazzanovich, for the killing of Wm. Robson, at Sodaville last month. The trial will take place in April.

S. P. McKnight C. E. passed through town this week on his way to Panamint, where he will make a number of mineral surveys for parties who desire procuring patents for their claims.

If you want to be well treated and get a good meal make it a point to stop at the Big Pine Hotel. A fine new livery stable is connected with the hotel, and transient stock receive especial attention.

Real estate was lively on Wednesday afternoon due to the Spring equinox. The gentle zephyr (of the Washoe order) was succeeded by a cold north wind, and prospects of rain are very slight.

For sale cheap.—Two years' files of the *Breeder and Sportsman*, one year of *Wallace's Monthly* and other interesting stock publications. Something every horseman should have. Inquire at this office within ten days.

The case of the Poorman Mining Company vs. the Indian Queen Company was concluded at Hawthorne last week and a verdict rendered in favor of the Queen. Hon. P. Reddy was the attorney for the latter company.

The new soda concern at Keeler is steadily employed upon the vats and other necessary works for the manufacture of that article. Two carloads of lumber went down last Friday to be used in the construction of the needed buildings.

Messrs. Mills and Austen came up from Lone Pine yesterday. Mr. Mills arrived at Lone Pine last Monday and spent the week looking over the country in that section. He will start to San Francisco on Monday going by way of Mojave.

Messrs Cage & Sherman of Alexander, Texas write us regarding a remarkable cure of rheumatism there as follows: "The wife of Mr. Wm. Pruitt, the Postmaster here had been bed-ridden for several years. She could get nothing to do her any good. We sold her a bottle of Chamberlain's Pain Balm and she was completely cured by its use. We refer any one to her to verify this statement." 50 cent bottles for sale by A. K. EUGLEY, Big Pine.

Death Of A Pioneer.

Jacob Vagt, a pioneer of Inyo county, died at his residence at Camp Independence on Sunday evening last. About two weeks ago he was taken ill with the measles, now prevalent in this vicinity. His illness was not thought serious. A year ago, however, he had a severe attack of the grip, and early this winter he was again afflicted with the same dread malady. This left his constitution greatly debilitated and measles brought on pneumonia, causing his death. His end came peacefully, surrounded by the members of his family. He realized that death was approaching and was prepared to pass through the Valley of the Dark Shadow to the peaceful realms beyond. The funeral obsequies took place on Tuesday, his remains being laid to rest with the children who had gone before him in the Camp Independence Cemetery. The large funeral cortege testified to the great respect in which the deceased was held.

Mr. Vagt came to Owens Valley in the early '60's. For twenty-eight years he resided upon the ranch where he died. He was a man of many ideas and had the welfare of the farmers deeply at heart. He took an active part in any movement that promised to benefit the agricultural interest. When the movement was inaugurated a few years ago to organize a Farmer's Co-operative Union he took an active part in the enterprise. It is a fact not generally known that through his efforts the "No Fence Law" was enacted by the Legislature. He took a deep interest in the advancement of the 18th Dist. Agricultural Association, and under contract with the Directors, built a race track on his farm. Socially, he was fond of amusement, and nothing pleased him more than to see the young folks enjoy themselves. He was most hospitable, his house being always open to his many friends. His estimable wife warmly seconded his genial disposition, and in this, her hour of adversity, hosts of friends condole with her in her sad bereavement. The memory of the unvarying kindness and unselfishness of the deceased will raise up a host of friends for the widow and fatherless. The Grim Specter is fast calling upon the old-timers, and soon the pioneers of Inyo will be a revered memory to the present generation.

It will be remembered that at the time of the arrest of McCarroll and Goodale a report was circulated that they had drawn weapons on Tom McLaine. Mr. McLaine desires us to state that the report was not correct. That although McCarroll had a revolver on him at the time, he made no attempt to draw it, nor made any threats. It is but just to correct any false impression that may have been created.

F. E. Densmore Esq., went to Big Pine on Tuesday to conduct two cases in the Justice's Court on behalf of the people. Complaints for battery had been preferred against Louis Schalten and Will Schalten, the result of a difficulty between the parties named and Vernon Smith. A jury trial was had in both cases, and the defendants were acquitted. E. Spencer, Esq. appeared for the defendants.

Nothing especially new is reported from the Darwin country. Neil McLean is fitting up his team at Keeler preparatory for hauling two hundred cords of wood to be used in a run of Fitzgerald's new mill. Calloway's team will be kept busy hauling ore from Modock to Keeler. Skinner's team has all it can attend to hauling ore for Reddy and McKinsey. George Lewis has fifteen tons of ore sacked ready for shipment and no team to haul it. Other mines in that region are looking very well.

On Monday last Austin Wheeler, a native of New York, died near Bishop. Mr. Wheeler was a cousin of C. B. Rawson and was well known in the Valley. The remains were brought to Independence for burial, the funeral taking place on Tuesday. Mr. Rawson owns a lot in the Masonic and Odd Fellows' cemetery, and other relatives are interred there.

A. W. D. Carroll was in town from Lone Pine early in the week. He informs us that the dam constructed by F. E. Austen is completed, and also the necessary ditches to convey the water upon the lands to be irrigated. Other irrigating works will probably be constructed by the same parties.

In the case of Williams vs. Williams in the Superior Court yesterday the plaintiff, Susan E. Williams, was granted a divorce from Thomas Williams and given the custody of the daughters. The grounds of action are not known as on motion of Mack & Laird, attorneys for plaintiff, the papers were sealed.

There is no danger from whooping cough when Chamberlain's Cough Remedy is freely given. It liquefies the tough, tenacious mucous and aids in its expectoration. It also lessens the frequency and severity of the paroxysms of coughing, and insures a speedy recovery. There is not the least danger in giving it to children or babies, as it contains no injurious substance. 50 cent bottles for sale by A. K. EUGLEY, Big Pine.

"I have just recovered from a second attack of the grip this year," says Mr. Jas. O. Jones, publisher of the *Leader*, Mexia, Texas. In the latter case I used Chamberlain's Cough Remedy, and I think with considerable success, only being in bed a little over two days, against ten days for the first attack. The second attack I am satisfied would have been equally as bad as the first but for the use of this remedy, as I had to go to bed in about six hours after being "struck" with it, while in the first case I was able to attend to business about two days before getting "down." 50 cent bottles for sale by A. K. EUGLEY Big Pine.

Shop on Edwards St., opposite the Court House, Independence.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest it to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are now making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars Free. After you know all, if you conclude to go no further, why, no harm is done. Address, E. C. ALLEN, Box 420, Augusta, Maine.

For Sale Cheap

A two stamp mill in running order, with abundant water power, near railway. [Benton, Cal.] Apply to F. W. FARWELL, 148 Market St., Chicago. Or W. H. RUSSELL, Benton.

For Sale!

ONE HUNDRED AND SIXTY ACRES, THE CHOICEST TRACT OF LAND UNDER THE

Eastside Canal.

There are irrigating ditches on each subdivision of forty acres, and the tract touches the canal so that no long irrigating ditches will have to be kept in repair. The land is in a nook sheltered by the foot hills of the Inyo Mountains. Mr. McIver, the Superintendent of the canal, kindly advised the selection of the location, and to him reference is made for the truth of the description. Six dollars per acre will be accepted for the tract. Address,

C. MULHOLLAND, Independence.

NOTICE TO CREDITORS.

Estate of PAULINO PELLEGRINY deceased

NOTICE IS HEREBY GIVEN BY THE UNdersigned, Administrator of the estate of Paulino Pellegriny, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice, to the said Administrator, at his residence, in the town of Independence, County of Inyo, the same being the place for the transaction of the business of said estate in the county of Inyo.

Dated July 24th, 1891.

WM. F. MATLACK, Administrator of said Estate.

$6060.00 a year is being made by John R. Goodwin, Troy, N.Y., at work for us. Reader, you may not make as much, but we can teach you quickly how to earn from $5 to $10 a day at the start, and more as you go on. Both sexes, all ages. In any part of America, you can commence at home, giving all your time or spare moments only to the work. All is new. Great pay SURE for every worker. We start you, furnishing everything. EASILY, SPEEDILY learned. PARTICULARS FREE. Address at once, GEORGE STINSON & CO., PORTLAND, MAINE.

Pastry Without Butter.

Light, flaky and digestible pie crust and all kinds of fine pastry can be made with Dr. Price's Cream Baking Powder without butter or with one half the usual portion, if preferred, or with a small quantity of lard or other shortening as desired. Pie crust made in this way is more wholesome and digestible besides being more economical and easier prepared in addition to saving all the butter if desired. One-third the flour is also dispensed with, and the crust is rolled that much thinner, the raising qualities of Dr. Price's Powder swelling it to the requisite thickness. Those who enjoy the appetizing qualities of the delicious home made pie will rejoice to know this secret.

Dr. Price's Cream Baking Powder is the only powder that contains the white of eggs.

Dr. Price's Cream Baking Powder is reported by all authorities as free from Ammonia, Alum, or any other adulterant. In fact, the purity of this ideal powder has never been questioned.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Women who wear rings on the forefinger will help themselves to toothpicks in a restaurant.

Bronchitis.—Sudden changes of the weather cause Bronchial troubles. *"Brown's Bronchial Troches"* will give relief. *Sold only in boxes.* Price 25 cts.

The net indebtedness of the world in 1890 was $26,917,000,000. And yours, now?

MANY SUCH.

A group of mechanics was seated in the engine-room when one said: "How was it Tom?" "I was caught up, slapped 'gainst the ceiling and whirled down to the floor. I lay there like one dead, and every muscle was sprained! I was cured in one day." What cured him?

ST. JACOBS OIL

with equal facility and certainty has cured promptly and permanently worse cases. Here is one after suffering half a lifetime.

14 Sumner St., Cleveland, O., Aug 11, '88.

In 1881 sprained my arm clubbing chestnuts; could not lift my arm; constant pain until 1889, when St. Jacobs Oil cured me.

JACOB EITZENSPERGER.

"ALL RIGHT!

ST. JACOBS OIL DID IT."

"August Flower"

What is It For? This is the query perpetually on your little boy's lips. And he is no worse than the bigger, older, balder-headed boys. Life is an interrogation point. "What is it for?" we continually cry from the cradle to the grave. So with this little introductory sermon we turn and ask: "What is AUGUST FLOWER FOR?" As easily answered as asked: It is for Dyspepsia. It is a special remedy for the Stomach and Liver. Nothing more than this; but this brimful. We believe August Flower cures Dyspepsia. We know it will. We have reasons for knowing it. Twenty years ago it started in a small country town. To-day it has an honored place in every city and country store, possesses one of the largest manufacturing plants in the country and sells everywhere. Why is this? The reason is as simple as a child's thought. It is honest, does one thing, and does it right along—it cures Dyspepsia. 50

JINNY.

She hed no paw ner maw
Ner any blood ner kin,
'N thet's huccome it happened
Thet we all took her in,
A poor, peaked little critter,
Red-headed, pale an' thin.

Six boys thar wus o' we uns,
An' pap he used to 'gree
Thet five of us wus likely
As you would wish to see,
An' one of us wus slowly,
An' thet thar one wus me.

An' Jinny used to pleg me
Fer bein' big an' lean,
All hands an' feet an' freckles,
The thickest ever seen;
She jedged 'twas only sunburn
Kept me from lookin' green.

First off I didn't mind it,
Them funnin' ways of hern,
But when she took to growin
Like a slim young forest fern
An' did her hair up on top, why
Her jokes begun to burn.

I knowed I wasn't nothin'
Set off 'ginst John an' Jim,
An' Bud—well, he was slightly,
An' Ted—I looked at him,
An' sensed his chance with Jinny
Wus big an' mine wus slim.

So I 'lowed to never mention
How much I keered for her;
Cus I jedge to pine in secret
It passes easier
Then to pine with folks a knowin'
Jest what you're pinin' fer.

I aped a friendly manner
An' talked with her right smart
About her beaux an' reckoned
She hedn't any heart,
An' one day when I said so
Her eyes flew wide apart

In a suddint, curious fashion,
An' the blue looked wet an' shy
Wus pink as any rosebush,
An' I? well, when I see
Thet blush—well, the truth is,
She's goin' to marry me!

—Eva Wilder McGlasson in St. Louis Critic.

BERENICE'S HAIR.

"Please indulge me in this, Fred."

"You know I object to spending the summer in such an out of the way place, Nora. Next winter I must go to work again in good earnest, and I wanted a little pleasant travel and recreation during the warm weather."

"Oh, nonsense! Berry says it's splendid, and she ought to know, for she spent two months there with her aunt last summer. The nicest hotel in the world, with a shaded terrace that overlooks a pleasant green. There are lovely walks and drives, too, and the dearest little lake, with a boat upon it. The village is perched upon the top of a hill, and it's such a cool, breezy place, with a fine view of the surrounding scenery."

"Stop and take breath, Nora!" exclaimed Fred, putting up his hands in dismay. "Does Berry talk like that? If she does I should decline going to the place, even if it were an Elysium."

"Oh, Berry would make a desert delightful! She was the dearest friend I had at school—a lovely little blonde, with such beautiful hair—long and heavy and shining, and she arranges it so prettily! She was always the first to adopt the new styles at school."

"Probably her father was a hair dresser, and she assisted him when at home."

"You fibber! Her father was a wealthy gentleman when living, and Berry is an orphan, residing with her aunt. It's really romantic the way she was named. Her mother had long, beautiful hair like Berry's, and her husband, who admired it very much, used to call her 'Berenice' sometimes for a pet name. Soon after Berry's birth he died, and her mother called her Berenice because he loved the name. Berry used to look at her constellation, as she called it, every summer night when the moon was not too bright. I never cared for it before, it is so dim, but now I always think about it when I'm looking at the stars. Come, Fred, you are interested in her, I know. Be a good brother and promise me we'll go, for I told Berry I was almost certain of it."

"Very well, Nora. If you are sure you will be satisfied with the place we will consider it settled."

Two weeks later Fred Lewis and his sister Nora arrived at the hotel in the little village which Nora had described as so enchanting. Berry was immediately notified of their advent, and was delighted to meet her friend. Fred, for a wonder, though he had heard her praised so often, was not disappointed in her.

"Don't you think Berry is beautiful?" asked Nora of her brother upon the first opportunity.

Now Fred had lost his heart already, but thinking "discretion the better part of valor" looked a little bored, and answered, "Well, ye—yes"—lingering on the "yes"—"rather."

"You know very well she is, but you won't confess it, because I wish you to like her," said Nora sharply.

This was quite true, for Fred loved to tease his sister, though usually he was very indulgent. He was a noble hearted fellow and very handsome, and Nora was really very proud of him.

He met Berry almost constantly, for their two parlors were adjoining and both opening upon the terrace, and he soon grew very fond of her society, though he still indulged his propensity to tease Nora about her.

One evening they were all sitting out upon the terrace enjoying the starlight and the cool night breeze.

"Your constellation is quite distinct to-night, Berry," Nora said.

"Yes," returned Berry, "though usually it is scarcely brighter than the Milky Way."

Fred smiled and gallantly quoted:

Behold
The glittering maze of Berenice's hair;
Forty the stars, but such as seem to kiss
The flowing tresses with a lambent flame.

And Berry, feeling slightly flattered, was very decided in the opinion that Nora's brother was a perfect gentleman and could be very entertaining if he liked.

The ardor of her imagination was somewhat dampened, however, upon the following afternoon. She was looking unusually charming in a dainty white muslin, her hair a wilderness of smooth braids and soft curls. Fred admired her exceedingly, and rendered himself so very agreeable that Nora was highly delighted. Berry stepped into her own parlor a moment in pursuit of a book, and Nora remarked, "How beautifully Berry's hair is arranged today!"

"Yes," remarked Fred, provokingly cool now the object of his admiration was absent. "Yellow hair is very expensive, I'm told. I wouldn't wonder if the mass she has on her head this afternoon cost £20."

Nora was about to cry "For shame!" when a vision of Berry in the doorway checked her. She had returned unperceived and stood half hesitating a moment. Then she advanced slowly, the soft white train of her dress rustling in her wake, her face crimson, her eyes flashing, and in spite of her anger a suspicion of tears.

"I wouldn't take a thousand pounds for the hair I'm wearing today, Mr. Lewis!" she answered.

And she was scarcely coquette enough to hide the pain in her voice.

Fred flushed hotly, and he would have given almost anything to be able to recall his words.

He rose to his feet and bowing said: "Miss Berenice, I humbly beg your pardon for my ill natured remark. I only made it to tease Nora, for of course I had no idea"——

"Apologize to Nora, then, not me," she answered quickly, and turning left the room.

She crept away by herself and sat down, feeling, in spite of her efforts to conquer the sensation, hurt and sore at heart. It was nothing, she told herself; she surely didn't care what Mr. Lewis thought about her, or said, either. And then came a sigh as she thought he did not care for her, or he could never have ridiculed her in any way, even to his sister.

And then, though she was not vain, she had always looked upon her hair as a sacred birthright bestowed by her dead mother, and had ever associated the beautiful constellation "Berenice" with thoughts of her mother in heaven; a childish fancy, but it had clung to her as childish fancies will cling to us all.

That night, before retiring, she braided her hair in two long braids, and in the morning she combed it out and left it flowing, only drawn away from her forehead, and banded by a blue ribbon.

The braiding had made it wavy, and it fell in bright, heavy, golden ripples, like a mantel of "cloth of gold," far below her waist. Fred smiled, half triumphantly, when he saw it.

"I didn't dream she cared so much for me," he thought.

Berry observed his peculiar smile, and the wrath appeared on her cheeks.

"I wonder if I'm wearing my heart upon my sleeve?" she asked herself. And then she told herself, in a little comforting whisper—"Wait."

Not long afterward Fred sat down to the table and began writing letters. Presently Berry came flying into the room.

"Nora!" she called in the softest little voice in the world, whirling around on one foot, and carelessly tossing aside her long hair with her hand. Out flew the bright golden ripples, and Fred's pen went spinning along the carpet.

"Oh, pardon me!" she cried. "My new wig is a little troublesome to manage, yet I've no doubt but that I shall become accustomed to it in time," and away she sped, leaving Fred to pick up his pen and resume his writing as best he might.

This was more easily said than done, for there was a zigzag mark over his letter, and as the pen had fallen on its point it was bent nearly double. Vexed as he was, he leaned back in his chair and laughed heartily.

"That was gracefully done, I'll acknowledge," he said.

The afternoon was fine, and Lady Eaton, Berry's aunt, called them all out upon the terrace to view a distant mountain, which showed very clearly, the air being so pure. Fred brought out his telescope and gallantly held it while Berry peered through with such a look of interested curiosity one would suppose she had no thought for anything this side of the mountain.

"How pretty!" she exclaimed, giving her head a sudden toss.

Away flew a lock of hair, straight as an archer's arrow, into Fred's eyes. He nearly dropped the glass, and uttered an angry exclamation in sudden pain.

"Excuse my carelessness," she said quietly. "I had forgotten for the moment you were so near."

Fred went into the house and bathed his eyes in rather a reflective mood; but when he again appeared Berry seemed so unconscious of having done anything wrong and she was so pretty and engaging in manner throughout the evening he forgot his vexation and was as agreeable as possible.

The next day she appeared with her hair in the same style, and Fred all the morning was on the lookout for another hostile attack. None came, however. In the afternoon they went out to have a row upon the lake. After rowing a while Fred rested his arms and his oars at the same time, under the pretense that it was nicer to float slowly along. He took out a cigar and lighted it, saying he must make the most of it, for it was his last. He asked for some music while he puffed away, and the girls began a vocal duet.

In the midst of the song Berry took off her hat, making an excuse to fan herself with it. As she drew the elastic cord suddenly from beneath it out flew her shining hair like a glittering flag at the head of the boat, and away went Fred's "last cigar" into the water.

"That was too cruel!" he exclaimed; but Berry sang on, her soft voice floating so smoothly above Nora's alto that he swallowed his wrath, and sat with his eyes half shaded by his hat for fear of another dash, and thinking she looked and sang like a siren of the sea.

That evening he moved his chair to a remote corner of the terrace, at a safe distance from Berry, and smoked his cigar in silence, glancing meditatively toward the two girls, who sat near each other engaged in lively conversation.

"I'm tired of this one sided warfare!" he said to himself reflectively. "Of course I take a lively interest in it, wondering what she will do next; and then she's sure to act when I'm entirely off my guard. I believe I'll surrender at once and throw myself upon the mercy of the enemy!"

Fortune seemed to favor him, for soon after Nora rose, and, saying she promised to read aloud to Lady Eaton, she passed into the house. Berry was about to follow her, but Fred came quickly forward.

"Berenice," he said rather abruptly, "will you never forgive me for that unlucky speech?"

She turned almost coldly.

"To what speech do you refer, Mr. Lewis? I was not aware you were an orator."

"You cannot help knowing what I mean!" he cried. "And you are still unforgiving, though I acknowledge it was both ungentlemanly and unkind."

She was silent for a moment, a hush seemed to hover over her, whether from anger or excess of emotion he could not tell.

"I agree with you," she said concisely.

Not a very encouraging remark, and he felt it, but was determined to have done with suspense.

"I wish to recall what I said," he went on hurriedly. "I'll say you have the most beautiful hair in the world; for you have, Berry. I'll say you're an angel, and I'll say and do anything you desire for the rest of my natural life if you'll only forgive me, and—be my wife."

"I am not an angel," she answered. "And if you are worthy to be the husband of an angel you are too good for me."

She spoke in a cold, hard, unnatural tone of voice, but Fred was too much excited to notice it.

"If you will only love me, dear, I'll try to be worthy of you," he said gently.

Her lips were growing unsteady, and she set her teeth hard together.

"Don't make the attempt," she said at last. "It would be impossible for me to learn to love you." And she swept into the house.

Fred began to walk the terrace hurriedly.

"I don't understand these women," he said, as thousands of men have said before him and thousands more will say after him.

A few moments later Nora came running out.

"What's the matter, Fred?" she asked. "Here you are looking like a thunder cloud, and Berry is in her room crying as though her heart would break, and I can't find out what afflicts her."

"Berry crying?" echoed Fred in astonishment.

"Yes, indeed. Have you been quarreling?"

Fred was unable to speak from amazement, and Nora began to suspect the truth.

"I don't see how it is with you two," she continued. "I know you love each other, and yet you never agree upon any subject."

Leaving Fred to ponder on her words she went into the hotel to try and comfort Berry, and she succeeded so well that before many minutes had elapsed the two girls came out together. Berry was anxious to show Fred how indifferent she was, and the starlight told no tales about the evidences of tears.

"Come, Fred," said Nora, "don't sit musing by yourself; it's awfully dull this evening."

So she gradually drew them into conversation, and then withdrew to the opposite end of the terrace, making an excuse to listen to some singing in the adjacent rooms; and Fred, without losing a moment of time, began the conversation where it left off before.

"Berry," he said softly, "cannot you see how wretched I am? Do forgive me!" he entreated.

"Hush!" she exclaimed, under her breath. "Nora will hear what you are saying"—her heart all in a flutter.

"Whatever you may think of what I have done and said," he continued, dropping his voice a little for her sake, "I love you dearly—dearly. And"—here a little strategy crept in—"it almost drives me wild to know you dislike me so much."

"I—I didn't say I disliked you!" And she seemed so troubled. Fred drew nearer and passed his hand caressingly over her flowing hair.

"But I know you do!"—still clinging to artifice, since its use resulted favorably—"I know by your manner. You call me Mr. Lewis, instead of Fred, and you torment me without the slightest compunction. You swept your hair in my eyes yesterday and almost blinded them. They pain me yet sometimes."

This last was an awful story and only told for effect, but he managed to look so miserable that, woman like, she believed every word.

"I'm sorry I gave you so much pain, Mr.—Fred," she said, in a contrite little whisper.

His heart gave a bound. He leaned closer, very much in earnest now.

"Take pity on me, dear," he said, extending his hand.

She still hesitated, half afraid. Nora came quickly forward, and seizing Berry's little hand she placed it in Fred's eager palm, and then left them together.

"She heard us!" gasped Berry, drooping her head until her face was hidden by the bright falling hair.

Fred parted it and smoothed it back gently with his disengaged hand, twining it tenderly around his fingers and drawing her head to his breast.

"No matter, my darling," he said. "We won't care if you only love me, and you must give me the right to call you mine, all mine, before the world very soon!"—New York World.

Plenty of Notice.

Mrs. Winks—The paper says a cold wave has developed in Montana, and is expected here within a week.

Mr. Winks—Well, send word to the plumber that our pipes have burst, and then he and the cold wave will get here about the same time.—Street & Smith's Good News.

An Electrified Locomotive.

An unusual electrical exhibition is said to have been seen in the neighborhood of Fanwood during a heavy thunder storm. A freight train on the Central railroad was running along in the darkness, when the engineer and fireman heard above the roar of the storm and the rumble of the train a strange, incessant, crackling sound. Looking out of the cab windows the men say they were astonished to see vivid electric discharges flash from the telegraph wires on one side of the track through the locomotive to the wires on the other side. The display back and forth continued some time and was repeated at intervals along the road to Westfield. At times the locomotive seemed illuminated with a pale bluish flame, giving a weird effect, and what seemed to be balls of fire shot out toward the wires. Suddenly there came a heavy crash, which dazed the engineer and stunned the fireman. The manifestations then ceased. — Boston Transcript.

A hole ten feet in circumference appeared in Oconee county, Ga., during the great earthquake in 1886. It is full of water, and there has long been talk about its depths, but no soundings were taken until a few days ago. Then a rope 200 feet long was put down, but it failed to touch bottom, and now there are persons who declare that "the hole extends into the bowels of the earth." It is proposed to take a second sounding in the near future.—Philadelphia Ledger.

STATE OF OHIO, CITY OF TOLEDO, } ss.
LUCAS COUNTY,

FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

A. W. GLEASON, Notary Public. (SEAL)

Hall's Catarrh Cure is taken internally and acts directly upon the blood and mucous surfaces of the system. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75 cents.

Fair Warning—"A shipment of American barbed-wire fence has been made to Bankok, Siam."

A VERY COMMON WANT.

"Out of sorts," "distrait," "the blues," these are familiar appellatives for uncomfortable, undefinable sensations, accompanied with lassitude, nervousness, indigestion. Poverty of the blood, to remedy which an effective stomachic persistently used is the paramount need, is conclusive evidence that the system is insufficiently nourished because—and for no other cause where organic disease does not exist—the food is not assimilated. Reinforce the flagging energies of the stomach, reform an irregular condition of the bowels, keep up a healthful secretion of the bile with Hostetter's Stomach Bitters. For over thirty years this popular medicine has supplied the common want of the nervous invalid, the dyspeptic and of persons deficient in vitality, an efficient tonic. To its powers of imparting strength is attributable its efficacy as a preventive of malaria and la grippe. Thoroughly effective is it too for rheumatism, kidney complaint and neuralgia.

If you should see yourself as others see you you wouldn't trust yourself with your own pocketbook.

LIVING ON THE REPUTATION OF OTHERS.

"Take everything that I have but my good name; leave me that and I am content." So said the philosopher. So say all manufacturers of genuine articles to that horde of imitators which thrives upon the reputation of others. The good name of ALLCOCK'S POROUS PLASTERS has induced many adventurers to put in the market imitations that are not only lacking in the best elements of the genuine article, but are often harmful in their effects.

The public should be on their guard against these frauds, and, when an external remedy is needed, be sure to insist upon having ALLCOCK'S POROUS PLASTER.

The dusky sons of far Siam
May buy barb-wire if they please,
But they'll not find it worth a cent
To sit on at their Siamese.

Use Enameline Stove Polish; no dust, no smell.

Try Germea for Breakfast.

Nothing can be said in favor of the best medicine in the world that may not be said of the most worthless. In one case, it's true; in the other, it isn't—but how can you distinguish?

Judge by what is *done*. There's only *one* blood-purifier that's *guaranteed*. It's Dr. Pierce's Golden Medical Discovery—and this is what is done with it; if it doesn't benefit or cure, in every case, you get your money back. Isn't it likely to be the best?

All the year round, as well at one time as another, it cleanses and purifies the system. All blood-poisons must go. For Dyspepsia, Biliousness, Scrofula, Salt-rheum, Tetter, Erysipelas, or any blood-taint or disorder, it is an unequaled remedy.

It's the cheapest, too. With this, you pay only for the *good* you get.

And nothing else is "just as good." It may be better—for the dealer. But he isn't the one that's to be helped.

The loss of flesh is a trifle. You think you need not mind it.

But, if you go on losing for some time or lose a good deal in a short time, you are running down. Is that a trifle?

Get back to your healthy weight and generally you get back to health.

A book on CAREFUL LIVING will tell you what it is to get there, and when Scott's Emulsion of cod-liver oil is useful. Free.

MAKE YOUR MARK.

In the quarries should you toil,
Make your mark;
Do you delve upon the soil,
Make your mark;
In whatever path you go,
In whateve place you stand,
Moving swift or moving slow,
With a firm and honest hand,
Make your mark.

Should opponents hedge your way,
Make your mark;
Work by night, or work by day,
Make your mark;
Struggle manfully and well,
Let no obstacles oppose;
None, right shielded, ever fell
By the weapons of his foes,
Make your mark.

What though born a peasant's son,
Make your mark;
Good by poor men can be done;
Make your mark;
Peasants' garbs may warm the cold,
Peasants' words may calm a fear;
Better far than hoarding gold
Is the drying of a tear;
Make your mark.

Life is fleeting as a shade;
Make your mark;
Marks of some kind must be made;
Make your mark;
Make it while the arm is strong,
In the golden hours of youth;
Never, never make it wrong;
Make it with the stamp of truth;
Make your mark.

—David Barker.

THE OLD CHIFFONIER.

My Louis XV chiffonier is a very handsome and graceful piece of furniture. It is inlaid and polished, with locks of burnished copper, and always seems to be smiling, as if its red and white mosaics were merry rosy lips.

It was given to me by my grandmother, who inherited it from her grandfather, and I verily believe that it once stood in a boudoir of the palace of Marly.

Never was an innocent little piece of furniture abused and rated so mercilessly as my chiffonier was when I chanced to think of it one day during my sojourn at the Perseus in Greece. You will no doubt ask why I thrust my trembling hand through my hair and cried out, "Miserable idiot," without stating whether the epithet was applied to myself or to my chiffonier. Good heavens, the only wonder was that I left a single hair on my head! Judge for yourself.

I had been so fortunate some time before as to be loved by the most charming of women. I shall not attempt to describe her, not even by the color of her hair; it is sufficient to say that for two years I called her "my angel" and "bright image of my dreams." At the end of that period I allowed one of my friends to say to me in speaking of her, "How could you be such a fool?" She sent me back my letters, and I neglected to return hers, but put the whole lot into a drawer of my old chiffonier, without thinking to turn the key.

That chiffonier was in my room; my room was in my mother's chateau; my mother's chateau was eight hundred leagues away, in the middle of Provence. In setting off unexpectedly on a diplomatic mission I had completely forgotten to destroy those remains of an attachment which had been delightful—as long as it lasted.

When I accidentally called out the memory of those letters from some obscure corner of my brain, I started up in surprise and shame, for I knew that my thoughtlessness might seriously compromise a woman who had done nothing to deserve such treatment at my hands. I felt that my conduct had been unworthy of a gentleman, and in a fine frenzy I rushed out of the house, inquired for the first steamship bound for Marseilles, took passage, and listening to nothing but the voice of my conscience returned to France.

A week later I arrived at the maternal abode, and I will spare you a recital of the ejaculations, the "What! You? George! Why! So soon?" which greeted me as soon as I appeared. My mother nearly stifled me with her embrace, and was sure that something dreadful had happened to me, and I had great difficulty to reassure her. When she had grown calm I said in as indifferent a tone as possible:

"Will you have my valise sent to my room, mother dear?"

"Certainly, my son; you must be tired out," she answered. Then summoning a servant, she said, "Take my son's baggage to the blue room, Pierre."

"You mean the green room," I added.

"No, the blue room," persisted my mother.

"But the green room is my room."

"It was yours once, George," she said smilingly.

"And whose is it now?" I asked in surprise, and my mother pointed to the door, saying merrily:

"Here comes the present occupant."

"Gabrielle!" I cried, going to meet my cousin, the loveliest and most charming of girls, with abundant blonde hair, eyes as blue as heaven, a smile of childish innocence and teeth like pearls. It was she, of all persons, who was occupying the green room, and who no doubt had ransacked the drawers and cupboards.

Unfortunate, thrice unfortunate man that I was!

Gabrielle, gay, artless and confiding, though a trifle shy, gave me her hand, looking delicious as she said:

"How do you do, Cousin George?"

My face must have betrayed my confusion as I took her hand, and looked searchingly for some sign of dissimulation in her soft eyes. Had she found the letters; had she read them? To tell the truth Mrs. —— had loved me ardently, and had been so imprudent as to express her sentiments in writing, running the gamut of ohs and ahs with plentiful exclamation points attached thereto. And suppose little Gabrielle had read them? I blushed at the thought.

But quite calmly she said, "How do you do, Cousin George?" That was all, and in my great palm lay a soft, cool, maidenly little hand.

Ah, but what abyss is deeper than a woman's heart? as the psalmist says; suppose she had read the letters! The only way to make sure was to go into the room and look for them. Gabrielle's room! What sweet melody in the words, yet I felt that I dared not enter that sanctuary, although I had known my cousin since she was a child.

"Come, George, and see how prettily I have arranged your room," she said suddenly.

Joy, bliss, ecstasy filled me as she spoke; I was saved. Innocence had come to the rescue of depravity!

Lightly and gracefully she ran up the staircase; what a pretty figure she had! I followed her like a culprit, feeling almost afraid to go, but yet I must at all hazards get my letters.

My former room was perfectly charming, decked out in blue and white, and with no odor of cigars anywhere. The little bed was modestly draped with snowy curtains which looked like the wings of guardian angels. I looked round anxiously for the old chiffonier; there it stood as usual.

"May I have some water, Cousin Gabrielle? I am dying of thirst," I said.

She took up the caraffe, but I, artful demon, had already observed that it was empty.

"Wait a minute. I will get you some water," she said, and left the room.

I rushed to the chiffonier and opened the drawer. Horror! It was empty.

The next instant my cousin returned, gave me a glass of water, then showed me her album, and then we talked merrily, just as we used to when we were playfellows.

But where were my letters? Had she found them, and hidden them away, or had she burned them? My head seemed to swim as I wondered.

As soon as I could think of a pretext I left Gabrielle, and in the hallway I met my aunt, her mother. She greeted me joyfully, then shook her finger at me in a mysterious way, and with a very knowing air whispered:

"Come with me, you naughty, careless boy." I followed her into her own room, where she opened a drawer, saying meanwhile:

"When we first arrived here it fortunately occurred to me that before putting a young lady into a bachelor's room it would be well for me to look about it a little. I have had some experience of young men and their ways."

Here she put a package into my hands. Heavens and earth, my letters!

I threw my arms around my aunt's neck, kissed her rapturously and confessed everything. Oh, how happy I was! My dear little cousin Gabrielle—how happy I was!

A week passed. One morning when I got up I found a tiny piece of paper lying on the floor, as if it had been slipped under my door. I picked it up. It was a letter.

"What does this mean?" I thought, and then I unfolded it and read:

"DEAR COUSIN—Why do you not tell mamma all about it?"

"All about it!" What does she mean? "Dear cousin." It is from Gabrielle.

I did not understand it at all, and waited anxiously for the breakfast hour. When I heard my cousin go down stairs I darted out and was going to speak to her, but she blushed, turned her face away, and putting a piece of paper into my hand said hurriedly:

"Take back your letter and speak to mamma."

My letter! I rushed out into the garden and read the missive. Thunder and lightning! it was my writing, my style, my name.

"You are adorable, therefore I adore you. Will you listen to me? Will you let me devote my life to you? A word from you and I throw myself at your feet—— GEORGE."

It was indeed my letter—it was number one of my effusions to the ex-queen of my heart. It had slipped out of the package of letters, and Gabrielle, finding it in the chiffonier, thought that I had placed it there for her, and her answer was, "Speak to mamma." The result of the accident was I spoke to "mamma," and I married Gabrielle. I adore her and am the happiest husband in the world.

The christening will take place next month. Thanks, thanks, old chiffonier! —Translated for Epoch by Isabel Smithson from the French of Jules Lermina.

A Skeleton Behind the Pulpit.

The First Baptist church, situated at the corner of Third avenue and Sixteenth street, West Troy, was the scene of a shameful and sacrilegious disturbance during the services Sunday evening. The pastor, the Rev. A. M. Prentice, was in the pulpit preaching his Sunday evening discourse, when suddenly a noise was heard in the vicinity of his large chair, immediately behind the pulpit. Then, with a jump, a skeleton appeared, with dangling arms and legs, directly over the chair, having come from below instead of above, as would be imagined of one appearing in a house of worship. The congregation were dumfounded, some screaming and others laughing. The Rev. Mr. Prentice continued his discourse without further interruption.

Investigation showed the skeleton to be of paper, neatly and correctly arranged, and was evidently the work of boys. They could enter the basement by a side door, and having the skeleton arranged with a cord fastened to the chair the latter was thrown down stairs, and at the same time the skeleton appeared. —Troy Standard.

One of Our Rural Friends.

Some amusement was caused in a car on the Sixth Avenue elevated road Friday by the unsophisticated pomposity of a young man from some rural retreat not known to the interested observers in the car. The young man was apparently escorting two country lassies about town, and he felt that the task was one of great importance to the public as well as of pleasure to himself. He talked in a very loud tone of voice and essayed to explain everything that passed in view to his companions. After he had succeeded in attracting the attention of all of the other passengers to his own party he unconsciously furnished an incentive to general merriment by rising pompously just after the train had left Eighteenth street on its down town trip and drawling in an affected tone: "I say, conductor, stop at Fourteenth street, please."—New York Times.

WOMAN'S WORLD.

A Few Items of Interest to the Fair Sex.

AN INTERVIEW WITH A MANICURE GIRL.

A Few Useful Dont's.—A Sensible American Girl.

"It is horrid to be young," said a manicure apprentice to the writer, at the same time stealing a glance in the mirror near by. "Don't you think so? Can't remember how it feels? Why, you don't look so awfully old. As for me I look younger than my age, and that was against me ever since I came to this city. Did you know that I came expecting to go into a training school for nurses? I had filled out a blank that had been sent me from an up town hospital, but either I made a mistake in writing or the superintendent read it wrong, for instead of understanding that I was 20 on the 26th of March, she got it that I was 26 on the 20th, and so when I came, after being written for, I was told that I was strong and healthy enough, but too young, 23 was the youngest age for applicants, and even then they must look 25. Now dear knows when I shall ever look 25, but as I was bent on nursing, and had a letter of recommendation from a doctor who had seen me bring a patient through a case of typhoid fever, I concluded to stay in the city and look for private work. I answered an advertisement for a nurse to take care of an insane person, but I might have saved myself the car fare, as all the answer I got was, 'not old enough.' Then, as I had some experience in housekeeping, I thought I'd look out for work of this kind to support me until I should be old enough to enter a training school, but when I went to an agency and told what I wanted, they only laughed at me.

"And so I answered an advertisement for young ladies to learn to manicure. Paid while learning? Not a bit of it. I had to pay $15 for being taught. I am nearly through my apprenticeship now, and soon I'll be paid $8 a week for my services. Don't you wish me to beautify your nails for you? I like to practice all I can outside of the shop. Keep them cut yourself? I suppose you can; but you cannot file and polish 'em, and make 'em look stylish. Look at mine, will you? Of course, I must have 'em in the latest fashion to show that I know what's what. Don't like pointed nails? You ought to like whatever is style. When I first saw folks with pointed nails I felt like asking 'em if they were getting ready to grabble up graves, but now I think round nails look awfully plain and countrified.

"See, this is my case of files, and this pointed stick I use for pushing back the skin that grows down on the nails. My first lesson was to learn how to use the stick properly. I was as nervous as a cat at first, but now they tell me I have a steady hand and correct eye. You know one must have correct eyes in this work, to see if one side of the finger nail is exactly the length of the other. I am a little bit slow yet, but I am improving, and I know that before long I can finish off a customer in half an hour. All my customers young ladies? No, I have old ladies, and young ladies, and old gentlemen, and young gentlemen. No middle aged people? Oh, you know, when I say old I mean middle aged as well as real old. The real old ones take as much pleasure in having their hands look nice as any of the young ones do, and I have filed and polished up many an old gentleman with one foot in the grave; how particular that kind are to have their fingers touched with a sweet scented pink powder puff! I tell you it isn't us girls only who want to look pretty! Some of the ladies are as stuck up as duchesses, and haven't a word to throw at a girl who works for a living, but some of 'em are real good natured. My file slipped the other day and cut a lady's finger. I said to myself, when I saw the blood come, 'Now she will complain to the madam, and I'll be well scolded!' but instead of that she only said, 'Accidents will happen,' and then she went on to talk to me about Paris, where she lived for quite a while, and where she first got into the habit of having her finger nails attended to in a manicure establishment. Nice of her, wasn't it? And she was nicer still when I had finished her, for she gave me a handful of fancy candy out of a bag she was carrying.

"Many customers? As many as we can attend to. The manicure parlor is a good resting place for ladies when they have run themselves down with shopping, and most of 'em have lots of half hours, and half dollars, too, that they don't know what to do with. Are the gentlemen stuck up? No, they are all of them ready enough to talk to a girl that's young and not very bad looking, and has her complexion done up with the stuff that's kept for sale in the parlor; but I know the madam is eying us girls all the time we are attending to customers, and so I am awfully proper and precise in my answers. I try to keep on the good side of the madam, though I needn't, for if I get the bounce after I have got my training I can go around from house to house and file and polish folks for fifty cents a head—at least that is what some other girls do, and they make a good living out of it."—New York Tribune.

A Sensible American Girl.

While crossing the Atlantic for Europe, a young American girl happened to have a seat assigned her at the table near Charles Sumner, who was also bound abroad. She listened eagerly to every word, but soon became mortified because she could not understand much of his conversation. She had never studied the science of government; she knew nothing of European politics and little of American history. For the first time in her life she realized that an interesting, helpful science had been neglected in her education. She determined to supply the omission for herself, and on reaching England began the study of American politics.

Her growing enthusiasm amused her friends, especially her brothers. What could be the use of a girl troubling her head about such things? they asked. The answer came in a manner quite unexpected. One evening during their continued residence in England the family was invited to a small reception given to John Bright, then at the zenith of his fame. Shortly after their entrance into the drawing room the conversation turned to American politics, in which Mr. Bright manifested great interest. A convention was at that time in session in a western city, and much anxiety was expressed about the nomination which it was likely to make. Turning to an American gentleman, Mr. Bright made some inquiry as to the rules governing the formation of such an assembly. The person addressed, evidently greatly chagrined at his ignorance, was obliged to answer that he did not know. Appeals to three other guests met with the same response.

Then, to the surprise of every one, a modest little American girl advanced timidly to Mr. Bright and gave him the desired information. Mr. Bright was delighted. He seated himself at the girl's side and talked with her for the entire evening, and when taking leave of her said to her mother: "You Americans have indeed made wonderful advance in education. The future of a country is secure when the young men and women alike are trained to intelligent understanding of the laws which govern them. The next generation will be a race of patriots." A few days afterward came an urgent invitation for the entire family to spend a week at the Bright homestead. There the little American was introduced to Mr. Gladstone and many other prominent English statesmen.—Detroit News.

She Is a Rebel.

A pretty woman of New York, who has been accused of being a rebel, who invariably wore the red and white colors of the Confederacy, writes in reply: I am not going to deny it, but wish to state that I am and always have been a rebel with a large R. At the minute of my birth I rebelled against coming into the world with the most piercing of yells, and I have been rebelling against something, from dirty streets to tiresome women, from badly fitting frocks to badly managed governments, ever since. As to wearing red and white, I also confess to both sins. Having a drop of Quaker blood in me, I had a craving—the craving for forbidden fruit—for red. In time I got it; first, because I liked it; then because the man I liked liked it, and lastly, because it was becoming. The same reasons apply to white; but I have never appeared on the street in either of them, and don't expect to until the streets are cleaner and the world is more appreciative of color. I rebel against making a guy of myself.

What else do I rebel against? Insincere friends and malicious gossip.

Thick cups and over big soup spoons.
Grass green gowns and shiny dress suits.
Tight shoes and tight stays.
Lack of loyalty to one's own people.
Early dinners and late teas.
Badly cooked terrapin and canvas back sacrificed to ignorant cooks.
A great many diamonds and no manners.
Impertinent children and insolent women.
Bad actors and worse plays.
The man who has a scheme on hand, and the woman who takes you to a dressmaker so she may get a percentage off.
Politicians who are not politic enough to have their subordinates work well.
So called Christians who remember your trespasses and forget their own.

Yes, I'm a rebel, and shall be until the gentleman with the scythe approaches me, and even then I shall rebel against his cutting down like grass her who is known as ——.—New York Sun.

A Few Don'ts.

Don't use "don't" for "does not." "Don't" is an abbreviation of "do not." We can rightly say "I don't, you don't, we don't." But what do you think of "He do not, she do not, it do not?" And yet this is what you are saying over and over every day of your lives when you say "He don't, she don't, it don't." Don't use "a'n't (pronounced "ain't," though it should not be spelled that way) for isn't or is not. A'n't is an abbreviation of "am not" or "are not." It's an ugly word, according to my way of thinking, and the less it is used the better. But if you cannot get along without it remember that when you say he a'n't, she a'n't, it a'n't you are really saying, "He am not, she am not, it am not."

Don't say "popper" and "mommer," but papa and mamma, with the emphasis on the last syllable. I can always tell an English girl or boy by her or his pronunciation of these words. They pronounce them correctly, and I see no reason why their American cousins should not do the same, especially when you take into consideration that they sound ever so much prettier when spoken as they should be. So, girls and boys, practice the correct way until you have it perfect, and then go and teach it to your teacher. For, between you and me, all of them that I ever met were as faulty in their pronunciation of mamma and papa as you are.

Don't say dorg instead of dog. How would you pronounce b-o-g, f-o-g, h-o-g, l-o-g and all other one syllable words ending in o-g? Well, pronounce d-o-g to rhyme with them and you'll be right. Don't leave off the "g" in such words as talking, laughing, singing, etc. A great many people do, and as a consequence we very often hear sentences like the following: "Oh, I've been out walkin', and it's so cold it's freezin', and I'm just starvin', and I do hope there's a puddin'."—Aunt Peg in Detroit Free Press.

Lady Pauncefote's Diamonds.

Lady Pauncefote has some very fine diamonds, according to Washington report, but they are clumsily set in gold, and do not show up beside the splendid displays of our American nobility. English women frequently wear jewels an American millionairess despises, and the fact that they have been in the family for several hundred years does not mitigate their scorn, by any means. It is said that since so many wealthy New Yorkers have been in London society the family diamonds of many an aristocratic house have been reset, in order that their proud wearers should not be outshined.

Generally these heirlooms are reset when there is coronations to walk at, as the saying is, and again when some great marriage occurs to warrant the expense. But what with these rotten with money families who now shoulder the English nobility, conservatism in diamonds, pearls, rubies and emeralds have been lost to view, and the London jewelers are reaping the reward. Perhaps if Lady Pauncefote is quick to "catch on" to our ways of living, she will mark the difference between London and Washington "style," and hasten to dispatch her "family diamonds" to Tiffany's, where they will be made as resplendent as any mushroom sparklers.—Boston Herald.

Music at Home.

"What fashionable mothers and their young lady daughters know about music," writes a lady in society, "is very slight. Judging from my own experience, there is no time for anything but the obligations attending cards and guests. I am frequently prevented from accepting invitations by the demands of the mails which have to be met with a freshly stamped budget of letters. It seems to me that instrumental music is the least desirable of the so called accomplishments. If a girl has a voice it is cultivated, but children are not kept at the piano as they were twenty or even ten years ago. Society women do not entertain friends by their own playing. They hire it. At Mrs. Astor's, Mrs. Vanderbilt's, Mrs. Stevens', Mrs. Martin's and the homes of other popular queens such professionals as D'Albert, Sarasate, Mme. Carenno, Mme. Berthe Marx, Reuben Brooks, the banjoist; Hegner, Reichmann and gifted musicians of local reputation are engaged. The artist gets his own price, the guests are entertained in what is really royal fashion, and art gets the patronage it deserves.—New York World.

The Boston Gazette has risen up in its might to rebuke the ladies of that town for their bad dressing. "The mixture of costumes to be seen at some small evening entertainments," says The Gazette, "is extraordinary. Half of the women present will be properly dressed in dinner or evening costumes, while the others will wear stuff gowns and bonnets. Until women learn that it is wretched taste to go to any house in the evening in a street dress, Boston must still bear the penalty of being considered by cosmopolitans a most provincial little town." Where are you going to find cosmopolitans? Not in New York, surely, for Mrs. Kendal says that New York ladies wear bonnets at dinner parties.—New York Commercial Advertiser.

THE LITTLE RAT MULE.

Where He Comes From and Whence He is Going.

WHAT HE COSTS BROKEN AND UNBROKEN.

His Work and Years of Labor in the Street Railway Service.

How often one hears the remark, "Just look at those mules drawing that car; they look like rats." They have thus become known very generally as little rat mules, and the description is a good one certainly. Many of them don't look much larger than a good sized billy goat, being so small that they are hidden from the people in the car by the dashboard in front. It certainly does look cruel to make them pull a car loaded down with people, a load that would strain powerful horses on an up grade.

It is cruel only in appearance. The little mule is equal to this and much more. If the car would hold more people he and his mate would pull it any place, and on a level would take it skipping along so fast that you would almost begin to think no other motive power was required to realize rapid transit. He has endurance, speed and strength, and thrives where an animal more hardy and stronger in appearance would soon die. In rapid motion he goes by jumps and jerks, but he accomplishes the desired result, and is one of the most serviceable animals to be had in the street railway business.

He is, however, rapidly disappearing, giving way to mechanical motors. As the old darky said when he saw the electric cars, "The Yankees is great people; they wa'nt satisfied ter free de nigga, and now they've done gone and freed de mules." That is about the case. In St. Louis, for instance, the little rat mules—and, for that matter, the larger mule and the horse—are few in number, not one in thirty for those employed as recently as three years ago. With our increase in population, new industries, etc., this is a somewhat remarkable statement, but it is correct.

The little rat mule is a peculiar animal. Born and raised in the southwest, Texas and Mexico, he is now going to the south and southeast for service on the plantations. In the very recent past, when all the street cars were drawn by horses and mules, the demand for them was very great for that purpose, but as things generally equalize themselves, so has the demand for horses and mules. The street railway companies which have changed to cable or electric motor power have generally disposed of their live stock to very fair advantage, though there are still on hand some of the little rat mules that are unused.

This little animal is one of some value, though he does not look it. Twenty dollars would be a very fair valuation, but in fixing that estimate you would be away off the mark. Unbroken he commands considerable more than that. The cheapest lot that ever came to St. Louis, probably, was one of 200, the price paid for them being a few cents less than twenty-six dollars per head, but they were unbroken. He is a stubborn little brute, and there is considerable labor in breaking him so he can be put ahead of a bobtail and trusted to the average driver. Thus broken he has a value of sixty to seventy-five dollars.

One would naturally suppose that his raiser would break him, and get his enhanced price, but, as a rule, he has come to the St. Louis railroads as wild as could be, and also as stubborn, but the employees of the companies have had a great deal of fun in breaking them in and reducing them to tractability. They have also had some exciting experiences, too, as the little fellow has heels quite as serviceable as his larger relative, and he knows how to use them too. You have got to look out for them, and you have got to put some muscle into use when you think you have an easy task to hold them with the lines. This is not at all easy sometimes, as he has strength and frequently a very hard mouth—hard enough to pull a bobtail car by it with the traces slackened.

It has been said that it seems cruel to run these little fellows to a street car loaded down with passengers. To the contrary, there are few animals which have an easier life. The pulling of the car is nothing to them. They can laugh at that and grow fat. Twenty-five to thirty miles a day for them is nothing at all, and that is about what they cover, with rests between trips. Through with their day's work, they are turned into a big yard, where they run and roll as they please. They never die, or at least the employees of the street railways never hear of their dying. When they approach that period of life they are sold or sent off to the farm, where they may still be of some use.

They are aged before that time comes, however. There are, for instance, little rat mules as much as 20 or 25 years old still in service here, and some which have been in the service twelve and fifteen years. And still they are, to all appearances, good for several years yet. They are as strong and active as ever, apparently, and will likely a year from now start in for a second life on a southern plantation. This is a long time for an animal to tramp over granite and other kinds of paving, through mud and in all kinds of weather, but the limit has seemingly never been reached with this hardy little fellow. He might be subjected to twice as much, possibly, and still not fall under it.

In addition to performing service equal to that of the horse or the large mule, the little rat mule is one of the easiest animals known in the care required. It might, in fact, be said that he really does not require any care. He flourishes best when allowed to rough it. He is, of course, fed grain and hay, but he is not in the least fastidious about his food, as is the horse, and in the absence of anything else would probably manage to live on old boot legs. He likes nothing better than to run to fodder and cheap food.—St. Louis Globe-Democrat.

PRETTY LITTLE GIRL FLIRTS.

They Lavish Their Attentions on the Dear Old Summer Ladies.

It is the fashion to flirt. But it takes money, pretty clothes, a sweet vocabulary, winning manners and a little dash of assurance. The delightful pastime, which is purely feminine, is said to have had its origin at Narragansett Pier. The girls who habitually go to the pier are the prettiest creatures imaginable. Most of them are southerners. They talk with a liquid lisp, and talk incessantly. They have tiny feet, small heads, bright eyes, soft hands, and light dresses which they wear with gay hats and gayer sunshades. They flirt because they can't help it. They were designed for that purpose. A victim selected, they begin by smiling at the lady. If she is met on the beach, the rocks or piazza, in the casino or dining room, she is greeted with the most winning face, which is followed by a timid "Good morning" or "Good afternoon."

The ice broken, a few words are exchanged, and then comes the flower favor. Sweet pea, roses or carnations are selected, and a little bunch sent to the lady by a messenger with her love. This is repeated until the "object" becomes curious, finds out the name of the girl in some way and sends an invitation to call. From that time the "object" and "idolatress" are inseparable. The young lady carries her parasol, spreads a rug on the rock or the sand for her "sweet one" to sit on, brings her books and papers to read, divides her bonbons, fans her and invites her to have ice cream and soda every day. She tells her all about her love affairs, lets her read the letters she receives, and anticipates her every want.

On the piazza she sits at her feet, holds her hand, tells her how good looking she is, calls her by sweet names, hugs her inordinately, and kisses her on the neck, ear and hair, but never presumes to touch a powder spot or rouged place. She begs her to wear a special dress or color "for her sake;" she puts bows or buckles on her slipper; she gives her handkerchiefs, scent and fans and dilates on her pretty hair, her sensitive, nose, thin lips, artistic finger or graceful figure. To a third party she sounds very like a gusher; to the object of her adoration she is as refreshing as a sea breeze, as intoxicating as champaigne. To have attention called to her good points is delightful; to be a "sweet thing," a "dear," a "darling," a "queen," a "love," is delicious.

These girl flirts are gay little philosophers. They turn their witchery into real triumph. The "dear, sweet thing," is sure to have a nephew, a second cousin or a grandson, who is invited down to the pier and proceeds to devote himself to the little idolatress. When madam gets ready to go to the mountains she finds that she "can't possibly leave her little girl," and Miss Flirt is invited to accompany her, and accepts. We reap as we sow. The girl flirt has a value. She puts her victim in harmony with herself and the world at large; she revives her youth; she brightens her life and makes her forget her years, her gout, her adipose and her discontent. And for such sweet service she is a blessing. Long live the girl flirt!—New York World.

The Capri Girls.

And now we come to the Capri girls. Well, of course they alone would furnish material for an article. There is something peculiarly winning about them. I do not think it is their beauty half so much as their frank, natural ways that please one. I have observed in them a simple tact, a sweet courtesy of manner which would not disgrace a duchess. Yet there is nothing studied, no effort; the attraction lies in their being so entirely unaffected,

And being natural, naturally please.

This is made obvious by the fact that when a Capri girl is taken out of her original sphere she loses many of the winning qualities which so become her.

Ladies do not always perceive how taking these girls are. "I cannot understand how men, gentlemen by birth and education, are attracted by those common girls," is a very general remark. Why is it that ladies see no charm where men find so much? Can it be that simplicity and other of nature's graces have a certain mawkish flavor to our feminine palates? I hope not.—Cornhill Magazine.

Spots and Dots Again.

Spots and dots seem to have re-established their former prestige, and it is said will continue in favor through the autumn. The polka dot, while fashionable, is not so popular as a much larger disc placed at wide intervals. A new dahlia red, with white spots, is much used for tea jackets and house toilets. Fine cottons of this class prove a better investment than woolen materials of similar color and design.—New York Post.

She Paid Her Husband's Fine.

The other day, just as one of Belfast's (Me.) fish peddlers was starting out with his load, for some cause he was arrested and placed in jail. His wife learned of the affair, hunted up his team, mounted the seat and drove into the country, peddled out the fish herself and returned to her home late in the night with an empty wagon and a full purse. She then paid her husband's fine and they began housekeeping over again.

Would Make a Careful Wife.

There is an old maid in Bellefonte who, being possessed of considerable property, pays a large amount of school tax. She now wants the privilege of pasturing her cow on the school house grounds, because, as she says, she has no children to send to school. This woman ought to have been born a lawyer.—Bellefonte News.

Mary Anderson-Navarro will sit for Felix Moscheles, the London artist, in her bridal robe. During his visit to Chicago the ideal Galatea was the model for a study in green, showing the classic beauty of the actress in a gown of apple green silk.

WRECK OF THE ATLANTIC.

How She was Lost on the "Devil's Cradle."

A STORM ON THE NOVA SCOTIA COAST.

Old Jack Watts Describes the Thrilling Scene.—His Son's last Voyage.

It was during holiday week about fifteen years ago that the ill fated steamship Atlantic was wrecked upon the reefs on "Devil's Cradle," within forty feet of the lofty rock bound west coast of Nova Scotia. It was one of the most disastrous of ocean horrors on record. The oldest resident of that vicinity is venerable, silver haired Jack Watts, who has just turned his 82d year. He is a stalwart, hardy, rough, weather beaten fisherman, and has a brilliant record thereabouts for not a few deeds of life risking and life saving valor. With muscles like wire ropes and sinews like steel, his strength, too, has been famous.

"Do I remember that night? Do I? You wouldn't ask that question, my boy, if you had been here, for if you lived ever so many lives you would not forget that awful night through all eternity," said he, and the sturdy old man's voice quivered as he paused to clear his throat, and his eyes glistened as though they smarted with the salty moisture of a gathering tear.

"Well, sir," he continued, "you remarked that this was a stormy night when you came in. Pshaw! this is nothing. Sure there is a bit of a storm brewing and a rather stiff breeze, but nothing worth noticing. Look out a bit." And as he opened the door a gust of wind extinguished the lamp on the table, leaving the room in total darkness.

We walked out toward the bluff. The air was murky, raw, and growing bitter cold. Eighty feet below the waves dashed against the rocks, pounding like some enormous sledge hammer, with a noise like distant thunder, and causing the ledge under our feet to vibrate with each blow.

Far away in the distance there was now and then visible a tiny point of light—of some vessel; so far that it would wholly disappear for awhile, and then again come into view.

"That light is about sixty miles away, and a steamship, likely one of the English or French liners," he said. We had reached near the very edge of the bluff—as far as it was safe to go—when my companion pressed my arm and paused. Stretching out his arm and pointing with his long, bony fingers, he exclaimed: "Down there, just beyond us—it is only eighty feet from dry land—you see that dark streak in the sea? That is the 'Devil's Cradle,' and is under water at very high tide. It is called that name because the reef is like a set of big saws; the sharp rocks hold a vessel that runs on them, and sometimes the sea has beaten and pounded and shook the wrecks, very much as a cradle is rocked, until they are torn to pieces.

"Nine have been lost there during my time. But that was not the luck of the Atlantic, which was too firmly set in the rocks to be moved, and the waves pounded and broke her in two, and after awhile tore her to pieces. But that night set in hard. It was cold—bitter cold—and the sun went down in a blinding snow storm, and the wind blew every way with a force that was awful; then came sleet and hail that cut your very clothes and drew blood wherever it struck your flesh. All the time the wind was rising and the air was getting more bitterly cold. It was so cold that the air seemed to sting you, and the wind would whirl you around almost off your feet; it whistled and howled and screeched with a frightful noise. I says to my pious old woman: 'Mary Ann, it does seem as though hell itself had been let loose to-night.' And says she to me: 'Jimmie, I believe it is—but—Jimmie—hark!' and she and I ran to the window and looked out and listened.

"Well, with all that unearthly uproar of the tempest you could not hear much else, yet we did hear a faint 'boom,' like the sound of a cannon; in a minute or two we saw a streak of fire shooting up through the snow and hail and then we knew that the Devil's Cradle had, or would have, another wreck. 'God help the poor souls!' I cried, and Mary Ann went down on her knees and prayed for them and the poor lad of ours—our boy Jamie—who we thought was on an East India merchantman. But—he wasn't, though!" And the old man's voice was choked into silence.

"Well, sir," he resumed, "the wife put on a boiler of water and I put wood to the fire. We always do when we think we may have good use for it, if some are rescued. Then I ran out in the storm. I was a good bit of a strong man then, sir, but I could hardly stand up in that gale. It blew with awful force, and one could not see ten feet away, yet I pushed on to just about where we are standing. Another rocket shot up, and its track of fire disclosed an awful sight.

It was all in a minute, and I had to strain my eyes and look under the peak of my hat through the blinding storm. There was a great, big, splendid ocean steamship driven over the outer edge of the reef; the waves looked as though the whole bottom of the ocean had violently heaved them up; they were actually like mountains, and they lifted that huge steamship up and let it down, bumping over those jagged points of flinty rock.

"Then all was pitchy darkness again, and although I could not see anything I kept my eyes in the same direction. In a few minutes another rocket shot up, and again I saw that noble vessel lifted up almost out of the water by a mighty wave; astern it seemed caught and pivoted on one great point of rock; then it was wheeled around, and as the waters receded the bare, rough rocks seemed like a huge jaw, down into and upon which the steamship dropped with a crashing noise of broken iron, glass, tackling and machinery; loud above which I could hear the smothered but unmistakable sound of women's shrieks and the shouts of men—one loud, hideously piercing pandemonium of anguish and despair.

"Then all was inky black darkness, and the waves and winds seemed to vie with each other in transcending their fiendish parts of the horrid elemental orgy. I had hard work to hold my balance—keep my feet, and get to our little home.

"We were up soon after daybreak, and as the storm had somewhat abated I joined some neighbors and went down to the base of the cliffs. There we saw the noble steamship Atlantic hard fast on the rocks, split in the center and strained all over. The waves were yet furiously breaking over her, ice had formed on various parts of the deck, bulwarks and rigging; bodies were frozen stark and stiff. All was as silent as the grave—not a living soul in sight on board. But few bodies were washed ashore until the next day, and one had been thrown up near where I stood. I leaned and reached forward and drew it in. It was the body of a man; his overcoat had been twisted over his face and was stiff with a casing of ice. We turned the corpse over, loosened the garment and drew it down, disclosing the face. Merciful God! it was our boy Jamie. As we were afterward informed by a shipmate of his, he had planned it to come home and surprise us New Year's day."—Chicago Mail.

INDEPENDENCE, CAL.
FRIDAY, APRIL 1 1892

The Warsaw correspondent of the London Standard furnishes the statement that Russian troops on the Polish frontier have been ordered to make ready to cross the frontier and destroy Prussian communications. If this report be true, war between Germany and Russia is liable to break out any day. The ill feeling existing between Emperor William and the Czar makes news of this sort seem not improbable. Predictions were made last fall that Russia would go to war when spring opened. Some of the best authorities on European affairs have regarded war between Russia and Germany as inevitable, and nothing more than a question of time. Russia is a particularly hungry bear this spring.

What a nonsensical piece of business it was for Congressman Bowers to lug a fifty pound block of Temescal pig tin into the House as an object lesson explanatory of the benefits of the high tariff policy. Just think for a moment how absurd the proceeding was. There is no protection on pig tin, nor will there be unless we produce 5,000 tons of the metal in a single year prior to the first day of July, 1895. The Temescal mines are owned by a syndicate of English free-traders, and the business of producing block tin there is carried on on a free trade basis. So far as the production of pig tin is concerned there is not a particle of difference between the conditions which exist at the Temescal mines and those which exist at any tin mine at Wales or Australia. But the public at large does not know this, so an alleged statesman takes advantage of the popular ignorance and puts a block of Temescal tin on exhibition as evidence of the great benefits of the McKinley Act in creating new industries. But this is a part of the policy of the Republican party.

A meeting to consider the Chinese immigration question was held in New York last week. It was presumably called to counteract the effect of the late protest against the prohibition of Chinese immigration by law of Congress instead of by treaty. The report that one of the representatives of California had admitted the injustice of the present exclusion law is an additional reason why the whole question should be discussed in a way to secure the widest possible circulation. The claim that prohibition should be effected if at all through the treaty-making power would render it impossible to act except as the Chinese Government might choose to act with us. We could not make a treaty with China unless China would make a treaty with us. Neither could we insert in a treaty a provision that did not meet the approval of the Chinese Government. We formed one treaty with China restricting immigration to certain favored classes, but under it Chinese laborers entered the country by the thousand. It was found by experience that the come-and-go clause in the treaty was fatal to its efficiency. After putting up with systematic evasion by both treaty and law until patience ceased to be a virtue we enacted an exclusion law which, except for the opening afforded through Canada, is reasanably effective. It is well that this anti-Chinese meeting should be held in New York. The question has ceased to be local. Workingmen all over the Union are complaining of the influx of foreigners who divide with the native laborer our limited labor market. Of all foreigners the Chinese are the most difficult to compete with. Their abstemious habits enable them to accept wages that a white man finds wholly insufficient. In this State we have seen one industry after another go into the hands of Chinese. What would have been the condition of the white wage-earners if the exclusion law had not limited Chinese competition to those already in the country can only be conjectured. As matters stand, the limited number of Chinese in the country enables those here to stand out for very nearly white men's wages. Consequently, in certain industries the whites have recovered much of their lost ground. The fact that makes the agitation of exclusion especially necessary at the present time is the near expiration of the present law. The ten-year period from the enforcement of the first Chinese restriction law expires on the 6th day of next August. Unless the courts hold that the amendment to the original law made in 1884 continues the ten-year period, there will be no restriction upon Chinese immigartion after August 6.

AFTER DEATH.

Is this the couch where she lay yesternight,
With awed, pale face, and fleeting, painful breath,
And great, sweet eyes that would not shrink from Death?
Is this the pillow, soft as down, and white,
On which her dear face lay, turned from the light?
I downward lean, and lo! could almost swear
I feel the old, soft goldness of her hair!
Kind Heaven! if but for one dear time, I might
Again press trembling lips upon her cheek—
Her slim, pale throat—her whiter brow—her hair—
Her tender eyes wherein the love-light shone!
But once—but once—to hear those sweet lips speak!
I should be glad that she is free from care—
But oh, this first and awful night alone!
—Ella Higginson in Overland Monthly.

Coffee in the East.

How long coffee was in use among eastern nations before being introduced into Europe is not known. Aljeziri Alhambali, a noted Arabic author, states that it was first made known about 870 of the Hegira, and so quickly did coffee houses and booths multiply throughout Arabia that the government several times made strenuous attempts to suppress them, fearing they would lead the people into idleness.

Notwithstanding these efforts, the "coffee habit" took such a firm hold on the people that the beverage was made and drank in secret. They even went long distances into the desert and there prepared the seductive concoction without fear of molestation.

Some pious Mohammedans thought it might be included among the intoxicating beverages forbidden by the Koran, but Alhambali, in an able pamphlet entitled "The Support of Innocence," proved that it was not in the prohibitory section of that book. As a consequence the followers of the prophet once more returned to the delights of coffee.—Detroit Free Press.

Almack's Closed.

Almack's is no more; Willis' Rooms have had their day and ceased to be! No more will the magnificent hall and salons of the dingy edifice in King street, St. James', celebrated under both these titles, re-echo the sounds of revelry and mirth. Henceforth the animation within its walls will be confined mainly to sales by auction. In its day Almack's was the center of fashion, entry to which was guarded by a committee of ladies as closely as ever Cerberus guarded a region not so inviting, and who were less easily satisfied than even the fabled sentinel.

Even the Duke of Wellington—who, according to Lord William Lenox, earned for himself in his day the title of "The Beau of the Peninsula," just as in later times a gallant admiral earned for himself the distinction of "The Swell of the Ocean"—was denied admission one night because he had donned black trousers instead of the knee breeches and silk stockings which the committee had voted indispensable for gentlemen. Every book dealing with fashionable life at the end of the last century and the beginning of this abounds in references to Almack's.

According to legend Mr. Almack was in reality a Scotchman, who came to London in the proverbial condition. His real name was M'All, but as at that time his countrymen were not so esteemed south of the Tweed as they are now, he thought to diminish hostility to his nationality by reversing his patronymic. Almack's ultimately became Willis' Rooms, and was for long the headquarters of social festivals, dances and charity dinners. These festal times are over, and instead of the toastmaster's "Fill your glasses, gentlemen; bumpers, if you please," the refrain of its presiding genius will be "Go, going, gone!" And thus disappears another link which joined the end of the century with what the late Lord Lamington called the "Days of the Dandies."—London Telegraph.

Blunders of the Teachers.

A friend, himself for many years a teacher, writes: "The blunders of teachers of English literature are sometimes more amazing than any that are told of their pupils. I heard the other day of a woman at the west who, when a class was reading Tennyson's 'Day Dream,' explained to them that the happy princess, in following her lover 'deep into the dying day,' went to America! The laureate would be tickled to know of this. A year or more ago there was a discussion in a leading educational journal as to the persons meant in Longfellow's lines 'To the River Charles,' where he says:

"More than this—thy name reminds me
Of three friends, all true and tried, etc.

"One writer suggested that they were Professor Cornelius C. Fulton, Nathaniel Hawthorne and Charles Sumner. Another thought that Louis Agassiz's name should stand in the place of Hawthorne's, and this was finally accepted by all concerned. Neither the editor nor any of his correspondents or readers appeared to see the absurdity of making the name of the river suggest friends whose names were other than Charles."—Critic.

Making the Right Shade.

Those who have sought in vain for laces to match the color of silk on lamp shades and other decorative articles may be able to produce the right shade by using some of the French tapestry dyes. One should experiment on a bit of lace, first to see if the dyes are properly thinned, so as to get the desired shade. Any of the thin laces in silk or cotton take the dyes nicely, Point d'Esprit and German Valenciennes looking very well when treated with the yellow shades. In the Valenciennes several delicate tints may be used on the light and the heavy part of the lace, bringing out the design with excellent effect. In preparing lace for the dye, brush and press it carefully, then stretch it upon a board, laying several thicknesses of paper underneath. Dip a small bristle brush in the dye and lay it on freely. When nearly dry, lay the lace on a padded board and press with a hot iron.—New York Post.

Some Famous Echoes.

There is a famous echo on the Rhine between Coblentz and Bingen, which repeats a word seventeen times, while in the sepulcher of Metella, the wife of Sulla, in the Roman campagna there is an echo which repeats five times in different keys, and will also give back with distinctness a hexameter line which requires two and a half seconds to utter. Brewster mentions an echo on the north side of Shipley church, in Sussex, England, which repeats twenty-one syllables.—Brooklyn Eagle.

THE OLD TENOR.

Did you say the singing was only fair?
Sir, if the chance was given me
To change from him on the stage up there
Straight to an angel's symphony—

Well, it might stagger my poor old brain,
But I think, on the whole, I back should come
To hear these worn, sweet notes again,
And see yon form that is cumbersome.

The why of it all? It fell, my friend,
A matter of fifteen years ago.
A certain man was nigh his end,
Lying racked in a fever glow,

And a fine young star, in his flush of fame,
Stept to his bedside, took his hand,
And tried to waken life's spent flame
By singing songs of the lovely land.

God, how he sang! till the sick man turned
His face from the wall and took deep breath,
And said, as his eyes with new light yearned,
That life ran sweeter far than death

Mone might hearken to strains like this,
And he swore he would live in death's despite.
Then sleep dropped down on him like a kiss,
And he woke with his blood all cool and right.

Perhaps you can fancy who was the man,
And who is the singer there on the stage,
And why I listen and sob and can
But love his faults and his hints of age.

Some folks will say, when they pay their coin,
The perfectest singer is their choice,
Where youth and art and genius join,
But I like a man behind the voice!
—Richard Burton in Harper's Weekly.

An Enigma to Men.

Most men think that the ways of that woman is past finding out who rails against the male sex for chewing ten cent plugs of tobacco and expectorating on the pavement, yet who goes herself and deliberately wipes up that same pavement with a twenty-five or fifty dollar gown that her father or husband earned by the sweat of his brow.—Albany Sun.

Bently composed after playing a prelude on the organ, or while taking his "ante jentacular" or "post prandial" walks he found in the solitude of the dense forests something more profound and suggestive than anything he could find in books.

A Young Diplomat.

Mrs. Brown—I'm afraid to let you have a bicycle.

Little Johnnie—Don't feel that way, ma. Even if it did kill me, remember that it would be the last thing I ever asked you for.—New York Epoch.

There is no danger from whooping cough when Chamberlain's Cough Remedy is freely given. It liquefies the tough, tenacious mucous and and aids in its expectoration. It also lessens the frequency and severity of the paroxysms of coughing, and insures a speedy recovery. There is not the least danger in giving it to children or babies., as it contains no injurious substance. 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

May Resume.

In an article on Candelaria the *News* says: "We understand that notwithstanding the low price of silver the Holmes Company will resume operations with 25 or 30 miners next week if the union is disbanded, as the company is desirous of doing prospect work preparatory to resuming operations on a large scale. But of course with the present outlook they cannot pay more than three dollars per diem. Many families, as well as single men have left Candelaria the past month, and the famous old camp begins to present a deserted appearance."

"I have just recovered from a second attack of the grip this year," says Mr. Jas. O. Jones, publisher of the *Leader*, Mexia, Texas. In the latter case I used Chamberlain's Cough Remedy, and I think with considerable success, only being in bed a little over two days, against ten days for the first attack. The second attack I am satisfied would have been equally as bad as the first but for the use of this remedy, as I had to go to bed in about six hours after being "struck" with it, while in the first case I was able to attend to business about two days before getting "down." Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy Place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Halhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Displicada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence Northwesterly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and alls bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a Year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why, no harm is done. Address,
E. C. ALLEN, Box 420, Augusta, Maine.

$6000.00 a year is being made by John R. Goodwin, Troy, N.Y., at work for us. Reader, you may not make as much, but we can teach you quickly how to earn from $5 to $10 a day at the start, and more as you go on. Both sexes. All ages. In any part of America, you can commence at home, giving all your time, or spare moments only to the work. All is new. Great pay SURE for every worker. We start you, furnishing everything. EASILY, RAPIDLY learned. PARTICULARS FREE. Address at once, GEORGE STINSON & CO., PORTLAND, MAINE.

OFFICIAL.

Notice of Forfeiture.

To Robert Lockett, or his heirs, exectors administrators and assigns: You, and each of you, are hereby notified that I have expended Two hundred ($200) Dollars in labor and improvements upon the certain mines situate in the Cerro Gordo Mining District, Inyo county California, commonly known and designated as the Protection and Union Jack Mine in order to hold said mines as follows, to wit: One hundred dollars on each for the year 1891, as appears by certificate on file in the office of the County Recorder.

If within 90 days from the date of this publication you fail or refuse to contribute your proportion of said expenditures, together with the cost of publication, as co-owners, your interests in said Protection and Union Jack Mines will become the property of the undersigned under the provisions of Section 2324, Revised Statutes of the United States.

A. L. BOLAND.

BUHACH
THE UNRIVALED
Insect Exterminator

Manufactured solely from Pyrethrum flowers, grown in California, in a locality where the soil and climate are peculiarly adapted to the production of flowers rich in the essential oil which makes them so remarkably destructive to insect life.

Avoid the Worthless and Spurious Preparations, sold as Insect Powders, and use Buhach from original packages, and clear your premises of all Annoying and Destructive Insect Pests.

None Genuine Without the Trade Mark.

If your dealer doesn't keep it, order directly from the

Buhach Producing & Manufacturing COMPANY,
SOLE MANUFACTURERS,
STOCKTON, CALIFORNIA.

Geo. M. Gill, Superior Judge.

SATURDAY, March 26, 1892

Estate of F. Paderes—Filed account of sale of property.

Estate of Thomas Parker—Filed return of sale.

Estate of John R. Hughes—Filed final discharge.

MONDAY, March 28, 1892.

Susan B. Williams vs. Thos. Williams—Decree of divorce.

TUESDAY, March 29, 1892.

Estate of John A. Hannah—Order authorizing lease of real estate

Manuella Diaz vs. Abraham Diaz et al.—Report of referees and judgment entered.

WEDNESDAY, March 30, 1892.

Estate of Wm. A. Bolinger deceased—Filed notice of sale of real estate and personal property.

THURSDAY, March 24, 1892.

Estate of Jacob Vagt, deceased. Filed petition for probate of will. Filed will.

Estate of Henrietta Vagt, deceased.—Filed petition for letters of administration.

J. E. Reynolds vs. T. B. Scovil.—Filed amended complaint.

FRIDAY, April 1, 1892.

Estate of John William Meyer, deceased—Filed affidavit of posting notice. Application for letters of administration.

MARRIED.

CARRASCO—GONZALES.—At Lone Pine, March 27th, 1892, by Irv H. Mulholland, J. P., Relles S. Carrasco and Carmalita Gonzales, both of Lone Pine.

DIED.

VAGT—At Camp Independence, March 26, 1892, Mrs. Henrietta Vagt, a native of Germany, widow of the late Jacob Vagt, aged fifty years.

Jack Wilson was in town yesterday.

Grain will be very scarce before the new crop is harvested.

Poultry is being shipped to California by the car load from Kansas.

The Broder—Conklin case will be tried in Mono county this month.

J. R. Turner came up from Lone Pine last Tuesday returning next day.

Bertrand Rhine is expected to return from San Francisco early next week.

Frank Dunn and A. M. Byrnes, sports well known here, have opened a saloon at Bodie.

James Jones has leased the Shedd ranch belonging to the Hannah estate for the coming season.

C. A. Walters was engaged several days in town this week with his horse power cracking corn for L. Wood and A. W. Eibeshutz.

Stock cattle are selling in Nevada at from sixteen to twenty dollars a head. Beef is worth seven cents at wholesale in San Francisco.

"A hayrack loaded with household goods and drawn by four horses went through town this morning labeled 'Amedee or bust.' "—*Reno Gazette.* The party may be like the fellow who went to Texas with the same sign out and came back with the label "Busted" on his wagon cover.

Ed Thornton is down from Bishop with a fine looking stallion. He is by Stranger, 2:34; stands over 17 hands high and weighs about 1400. He should prove a first-class all purpose horse. He is certainly a beauty for looks, being of fine color and perfect symmetry.

We had the pleasure of a call yesterday from P. W. Forbes, Esq., district attorney of Inyo County. He resides at Independence. Mr. Forbes assures us that the mining outlook in his section is improving. He signalized his visit to Los Angeles by going through an attack of the measles. The fact that he was obliged to succumb to this infantile disease shows the childlike and bland character of the man. There is no grown up guile about him.—*Herald*

Mr. Chas. Walter, Foreman of the *Index* office, received by telegraph the sad announcement of the death of his only brother, Cecil Walter, which occurred at the residence of his mother in Fairfield, Solano county, last Sunday night. As the trains run here, it was impossible for him to reach home in time to attend the funeral. Cecil Walter was a native of Canada, aged 29 years. He was for a number of years a dealer in real estate at Vacaville, Solano county, and closely identified with the prosperity of that thriving section.—*Index.*

Messrs Cage & Sherman of Alexander, Texas write us regarding a remarkable cure of rheumatism there as follows: "The wife of Mr. Wm. Pruitt, the Postmaster here had been bed-ridden for severl years. She could get nothing to do her any good. We sold her a bottle of Chomberlain's Pain Balm and she was completely cured by its use. We refer any one to her to verify this statement." 50 cent bottles for sale by A. K. EUGLEY, Big Pine.

Obituary.

One of the saddest events yet recorded in the vicinity occurred at Camp Independence within the past two weeks. Last week's issue contained the news of the death of Jacob Vagt, and this week we are under the painful necessity of noting the death of his estimable wife, Henrietta Vagt. She was afflicted with no specific illness, but her general health had become greatly debilitated, and the shock of her husband's death caused her own demise on Saturday evening last, just six days later. Her remains were laid to rest beside her husband on Monday at Camp Independence cemetery. United in heart and thought through life, they are inseparable even in death.

Mrs. Vagt was a fond and devoted wife, a kind and loving mother and a good neighbor. She warmly seconded her husband in constant and open-handed hospitality. Three children, between the ages of ten and eighteen years, are orphaned within a week, and what was for twenty-eight years a bright and happy home is a house of double mourning. The God of the father- and motherless will provide friends and guardians for the orphans, and will watch over and care for them. The sad event cast a gloom over the entire community.

Fine Stallions.

Last Tuesday Captain Jacob Hayes of Porterville, Tulare county, accompanied by his trainer, W. E. White, arrived at Independence bringing with them the trotting stallion, "Judge Kyle", and a three-year-old stallion by that horse. The horses were shown in town, and as the result Dave Holland and El Rose bought the older horse and will stand him at Independence and vicinity at the service fee of $25.

Judge Kyle is by Red Wilkes, the sire of 68 2:30 performers and regarded as the best sire in Kentucky. His dam is by the thoroughbred horse "Jimmy Glencoe" out of a mare by Rysdick's Hambletonian. He is a fine looking, showy horse; has trotted a mile in 2:33 and a half-mile in 1:15. He has never been trained or driven for a record, and the boys will probably put him in shape and give him a 2:30 record this fall. In a few years Owens Valley can boast of as fine stock as can be found anywhere. We have representatives of the best trotting blood in the world through Albenton, Antare, Flash, Bismark and now the famous Wilkes family through Judge Kyle. The enterprising young men should meet with every encouragement, as the purchase of this stallion is a valuable addition to our stock.

Will Be Here Next Week

Attention is invited to the advertisement of S. P. Smith for his two stallions, Antare and Pickpocket. These two fine horses are too well known to need any extended description. Antare comes from the most celebrated Electioneer family, his sire being Anteros, a full brother to Anteeo, 2:16¼, and Antevolo, 2:18¾. He trotted at Bishop last fall in 2:54½ with two weeks' training, and barring accidents will this year enter the 2:30 list. Pickpocket is a registered thoroughbred, by Joe Daniels, the sire of Hidalgo and many other first-class race horses. His dam is Mattie C., who produced Idaho Chief a horse that won all through the State last year in the best company and was sold at Los Angeles last fall for $6,000. Pickpocket thus comes of winning stock on the side of both sire and dam. Mr. Smith has placed the service fee within reach of all.

Wedding Bells.

On Sunday last Relles S. Carrasco and Carmalita Gonzales were united in marriage at the residence of the bride's parents at Lone Pine. Only the relatives of the contracting parties were present. The bride wore the customary vail and orange blossoms. Soon after the ceremony the young people started for Keeler where they will make their future home. Relles is well known all over the valley as a steady, industrious and capable young man. The bride is an estimable young lady, and the happy couple start upon the sea of matrimony under the fairest auspices.

The Board of Supervisors will meet next Monday and the Fair Directors on next Tuesday at Independence.

1st Premium TROTTING STALLION "ANTARE"

By Anteros, 6020, 1st dam Sallie W. by Iowa Chief, 525, 2d dam by Tornado, 502,

This horse possesses the quality so highly prized among horsemen, namely, INDIVIDUAL MERIT. No horseman has ever driven him that did not think him capable of trotting his mile out in 2:30 or better with a reasonable amount of training.

This horse will make the season of 1892 at Independence and vicinity. Terms for the season, $25, payable Aug. 1, 1892.

S. P. SMITH, Manager.

—THE—

Thoroughbred Stallion "Pickpocket"

Entered in Bruce's American Stud Book, Volume 5, page 500, will stand for the season of 1892 at Independence and vicinity. Terms for the season, $15, payable August 1st, 1892.

Pickpocket has proved a sure foal getter, and his colts are his best recommendation as a sire.

S. P. SMITH, Manager.

LONE PINE CORRESPONDENCE.

A Lady's Opinion on the Matter of Equality.

Yesterday I had the visit of Mrs. V. and she said: "I see that you have at last received a great variety of ladies and children's hats, corresponding with the astronomical predictions of the day in shape, strength and names; I buy this stormy one for myself, that cyclone for Ida, and that magnetic for Rosy; I hope that our astronomers are mistaken in regard to their saying about the effects to be produced in the surface of the earth from the spots; but nevertheless in case we are exposed to undergo the atmospherical disturbances announced; our new hats shall protect us against any and all of those calamities; but this is not what troubles my feelings. Sir, let us come down to the present, and examine some of men mistakes which create many of our misfortunes. We have the evidence by the answers published in the Official Organ of public instruction of this State, that some of the teachers, and good many of the school trustees, are ignorant of the State School Laws, that class of teachers are working for the money they receive, and have not their duties at heart. They ought to be discharged by the Trustees, but some of the Trustees have an axe to grind, and some others never read the School Law, therefore are unfit for the office and are the ones to blame for hiring such teachers. Statistics show that for every increase of 25 per cent in our population, we have 40 per cent increase in crime. Many persons set the blame directly upon the public school teachers and make them responsible for the same; but this is an erroneous charge; most of the teachers are competent and are performing their duties as such diligently and honorably, in manners and morals, and those making the charges upon teachers are the ones to say responsible for the evils. And the law makers are responsible for another part; the difficulties of both parties to reform are immense, but not impossible, and the greatest is the difficulty to surmount, the greatest is the aid needed to do it, and, as men recognize their mistakes and are unable to reform the State laws satisfactorily, why they don't concede the rights of suffrage to women on the base of equality? Then some women would have a chance to express their views in debates, and if their views and propositions to make the necessary reforms in our own State laws are found to be better than those under which we are now compelled to submit ourselves, if it was proved that their energy employed in such proposed reforms were to simplify our laws, and be superior as to justice, political and public economy, toward the people in general, they would first expose certain defects in our laws, and show out. Since it is known that hygiene or (diet) is the art of preserving health, and that the medicine is the art to re-establish the same, after being lost, or greatly impaired, and that good many of our population either young or middle age persons, or at any step in life, are dying for lack of knowledge of the two above cited arts, and the number is so great dying on those circumstances that at least 25 per cent could be saved and live many years longer if the patients were their own doctors, and how comes it that our Legislators are neglecting that part of people's protection, not only to save their lives but it creates a great expense to the people, for if we call the doctor he charges not only for the visit but according to the distance that he has to travel, and then some times he comes too late, other times the patient has to intrust his life to a quick and the result is the same, and the law confer to a doctor by his diploma the right to kill his patients without any recourse. And how come it that the Honorable Board of Public Instruction of this State, being the highest authority, on the subject, has omitted to foresee that the practical study of medicine must sooner or later be a part of education in our public schools, and the sooner the better, for health, and the financial benefit of the people, and would place the State of California in the front rank, in the reforms of public economy; why said Board has not recommended to the Legislature the adoption in the State series of School text-books for the grammar grade, an abridged book on the treatment of diseases and recommend the Legislature to adopt said branch of instruction to be taught in grammar schools, and have Section 1665 of the Political Code amended accordingly and reduce and remove from said Section, the branches industrial drawing, and practical entomology from said grammar grade.

The parents and guardians of children must not depend exclusively on the teachers to educate their children, for the first example the children have before them, are the parents, and to the parents incumb the first duties, not only to be the living example before them, but they must enforce and use their authorities, to train them in good habits, morality, obedience, and to honor; labor for self-support. And any parent neglecting to perform his or her duties on the above specified points, lose the rights to, and cannot claim the benefice of having raised a good citizen."

Then she said good-bye, taking her three new hats. C. MEYSAN.

NOTCE TO CREDITORS.

Estate of JOHN WILLIAM MEYER Deceased

Notice is hereby given by the undersigned, Administrator of the estate of the said deceased to the Creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four (4) months after the first publication of this notice, to the said Administrator, at the office of Mack & Laird, in the town of Independence, in Inyo county, the same being the place for the transaction of the business of said estate in the county of Inyo, State of California.

False in One, False in All.

THE ENGLISH OF A LATIN PROVERB APPLIED TO A CONCERN WHICH IS NOW IN BUSINESS.

A Business started upon shams, must resort to shams, or retire.

The Royal Baking Powder Company garbled official documents to give it standing.

For this it was publicly branded.

The Food and Dairy Commissioner of Ohio caught the Royal Baking Powder Company in the act of misquoting his report, to make its goods appear unadulterated.

The same Company stole the livery of the Board of Health of the State of New York and went on dress parade in the garment.

The Board exposed this. When the apparel was removed, of course the deformity was left alone.

Then the Royal Baking Powder Company resorted to constructing a speaking machine.

It called this machine "A Government Chemist." When it mouthed its words to order, the Royal Company quoted the same and passed them around. These words represented the Royal Baking Powder as pure, etc.

"Government" is a stately word. Like everything good, it is abused by unscrupulous tricksters.

MAKE A NOTE.

There is no such office as that of Government Chemist.

A THOUGHT.

If a concern garbles official state papers, misquotes Boards of Health and Creates Official Mouth-pieces, for its own purposes, what will it do in adulterating its goods?

Dr. Price stands a foe to impure goods and tricky methods of advertising.

Dr. Price's Cream Baking Powder is the only Pure Cream Tartar Baking Powder now to be obtained, and the thinking public are finding it out.

She—I think the Chinese have very musical names. He—Indeed? She—Yes. There's so much Sing about them.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

We always hate too see a man "act the hog" at the time when we, ourselves, are endeavoring to appropriate the lion's share.

CURES

RHEUMATISM,

SPRAINS, BRUISES, CUTS, WOUNDS, SORENESS, STIFFNESS, SWELLINGS, BACKACHE, NEURALGIA, SCIATICA, BURNS.

A PROMPT AND PERMANENT CURE.

CONSUMPTION.

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, with a VALUABLE TREATISE on this disease to any sufferer who will send me their Express and P. O. address. T. A. Slocum, M. C., 183 Pearl St., N. Y.

Beauty often depends on plumpness; so does comfort; so does health. If you get thin, there is something wrong, though you may feel no sign of it.

Thinness itself is a sign; sometimes the first sign; sometimes not.

The way to get back plumpness is by CAREFUL LIVING, which sometimes includes the use of Scott's Emulsion of cod-liver oil.

Let us send you—free—a little book which throws much light on all these subjects.

SCOTT & BOWNE, Chemists, 132 South 5th Avenue, New York.

Your druggist keeps Scott's Emulsion of cod-liver oil—all druggists everywhere do. $1.

Tutt's Tiny Pills

enable the dyspeptic to eat whatever he wishes. They cause the food to assimilate and nourish the body, give appetite and develop flesh. Price, 25 cents. Exact size shown in border.

VOICES OF THE NIGHT.

Do you ever lie awake at night
And think—and think—and think
Of a hundred thousand foolish things
Which "hang 'round" midnight's brink?
And do you at the same time hear
The hollow, gurgling—gurg—
Of your stationary washstand,
Like a bungling burglar's burg—
While the latticed window shutters flap
The sashes (full of pane);
And the myriad voices of the night
Talk nonsense at your brain?
You don't? I do.

And the ghostly, grewsome, groaning
And the melancholy strain,
Of that measly, mourning, moaning,
Gurgling, guzzling water main,
Wrap an eerie, iree, ickery, fillacy,
Fallacy sort of sound
In the meshes of the midnight,
Which entwine me round and round.
My flesh creeps all in heaps,
Finally sheeps;
While the melancholy moaning,
And the hungry, hollow groaning
Of the stand,
Keep my slumbrous soul a-soaring
Up and down a raging, roaring
Nightmare land.

—"Joe" Kerr in Chicago Mail.

Family Jars.

"A pleasant smile and voice at the morning meal, a neat costume with a knot of becoming ribbon at the throat; a good dinner tastefully and promptly served, a song or an agreeable book in the evening after tea," and a lot of other stuff like the above appears quite regularly in the papers as advice to married women relative to retaining the love of their husbands. I call it "stuff" because I do not believe the results aimed at can be brought about in any such way. It is an attempt to teach a thing which cannot be taught. If the affection exists it is not going to be wiped out by delayed dinners, wash day attire, sick headaches and no music or books, and that is all there is to it, barring an occasional row which sets the household blood moving vigorously and with good results.—Cor. Detroit Free Press.

Points of the Compass Among Pueblos.

Among the Pueblo Indians six points of the compass are recognized, and each has its color. North is yellow, west is blue, south is red, east is white; the upper regions are many colored and the lower regions are black. All the prey gods are represented by their images in these six colors.

For example, there is the yellow mountain lion of the north, the blue mountain lion of the west, the red mountain lion of the south and so on. Likewise it is with the other beasts, and thus a very considerable number of deities is formed. All of them must receive worshipful attention lest they get angry and revenge themselves for the neglect.

French Bread Laws.

The French baker is not only required to conform to laws regarding weight, but he is also told at what price he must sell his bread. He is further required to deposit a certain sum of money in the hands of the municipal authorities as a surety of good behavior. In the large fortified cities he has to keep a specified quantity of flour on hand to provide for warlike emergencies.

In Germany laws of similar import are in existence, and are enforced with such severity that no baker ever dreams of defying them.—Baker's Helper.

A Halloween Experiment.

Halloween is sometimes called "nut crack night," because nuts have always taken a conspicuous part in its observance. Two nuts placed in the fire on Halloween are named for two lovers. Should they lie together and burn together, John and Tillie will be a happy husband and wife, but should the nuts bounce and fly asunder, the sign is a bad one.—New York Herald.

COLONEL D. M. BURNS.

A Straightforward Statement Concerning the New Police Commissioner of San Francisco.

The following is copied from the San Francisco *Wave:*

Colonel D. M. Burns, the new Police Commissioner, is a man of few words. He rarely speaks of himself or for himself. Among those who know him he is referred to as "the Silent Man." He has, however, many warm, steadfast friends who are always ready to talk and act in his behalf. A gentleman who has known him for something over twenty-five years, thus speaks of him:

"My first acquaintance with Burns was through the medium of the military. This was in 1866, when he was a lieutenant of the "Woodland Guard," at the age of twenty-one years. I am cognizant of his career since that time, having been brought in contact frequently with him socially and politically. Let me say that I have never known him to train with the corruptionists or bosses in politics. On the contrary, I have found him in every convention and in every campaign battling against those influences. While quite a young man in Yolo county he was with the local reform party, and became so popular that in that Democratic county he was elected several times County Clerk, although on the Republican ticket.

"In the Republican State Convention of 1879 Burns repudiated all overtures from Stow, Higgins, Gannon, and Frank Rhoades, and at the risk of losing the nomination which he sought, he openly opposed them, and carried the convention not only for himself for Secretary of State, but for Perkins and other candidates opposed to bossism.

"In 1882 he again measured swords with the same politicians, and in a masterly manner secured control of the State Convention.

"On his return from Mexico we find him again knocking the bosses out, as he did handsomely against Kelly and Crimmins in the convention of 1890, when Colonel Markham was so triumphantly nominated for Governor.

"These acts speak for themselves. If he had been disposed towards the corrupt methods of bossism, surely he would have at sometime in his career been found fighting side by side with them. But he has always been opposed to them by word and act.

"When Burns was elected Secretary of State, there was no more popular man in California. The only fault one could find with him afterwards was that he devoted too much time in aiding others, personally and politically, and reposed too much confidence in a certain person connected with his office which cost him dearly. In 1879 he owned considerable property in Woodland, and was comfortably fixed. When he left the office of Secretary of State he was almost penniless.

"One cannot but admire his subsequent career. Money gone, trouble upon him, and so-called friends, whom he had bolstered, deserting him—what did he do? With the determination characteristic of the sturdy Scotch race from which he sprung, he struck out for fortune. You have heard how he delved and struggled in the mountain fastnesses of Durango; how he struck a very rich mine; how he came back to his family and friends rolling in wealth.

"I know that after the election of Governor Markham almost every one expected that Burns would be appointed to high office; but I know also that he refused to accept any commission from the Governor except that of Colonel on the staff.

"When the vacancy occurred in the Police Commission, several of Colonel Burns' friends deemed him just the man for the place. His military career and well-known characteristics make him a disciplinarian of no mean order. In fact, knowing Burns as well as I do, I congratulate Governor Markham on the appointment.

"Again Dan Burns was a patriot, and responded to the call of his country. When a mere boy, he enlisted in the Fourth California Volunteer Infantry, expecting to be sent East, but instead, his regiment served in Southern California, Arizona, and New Mexico. He is a member of George H. Thomas Post, G. A. R. During the years 1880-1-2, he served as Major on the staff of Brigadier-General John F. Sheehan, who then commanded the Fourth Brigade, N. G. C.

"He is also a pioneer of California, having been brought to this State by his parents in 1849, when but four years of age. He was born in Mississippi.

"Colonel Burns' wife is a most estimable lady, of such charming disposition that all who know her love and respect her. The couple have only one child, a daughter about eleven years.

Painting Lace.

Has the lace trimming of the dressing table assumed a questionable tinge? If washed, it will still have the "done over" look. Rip it off, thoroughly shape and brush, then press it a little to flatten. Now stretch it firmly upon a board or table, with several thicknesses of newspaper beneath it. Use a half inch wide bristle brush and put on paint made from dye freely. The paper will absorb the extra moisture. If dyed all one even tint it is very quick work. When the lace is nearly dry, press it with a hot iron over a padded board, as though it were embroidery.

Any of the thin laces, especially Valenciennes, can be painted in several dainty tints, thus bringing out the pattern effectively and in a very novel manner, care being used in selecting harmonious colors. The small tasseled fringe which comes in cotton for edging curtains and draperies can be treated in the same manner with the dyes. Any cotton or silk goods take and retain them easily, and they will not overrun the outlines of the design. But on linen they are a little apt to "spread."—Mrs. M. R. Ramsey in Good Housekeeping.

Why Sunsets are Red.

A shower of a remarkable character occurred in Sicily on April 24, 1781. On the morning of that day every exposed place within an extensive district was found covered with a gray water, which being evaporated left a deposit nearly a quarter of an inch in thickness. It was determined that this solid matter must have come from Mount Ætna. It is certain that vast quantities of solid substances are constantly afloat in the atmosphere. The sunsets all over the world are redder to this day on account of the dust from the mighty eruption in the Straits of Sunda years ago, which has not yet entirely settled.—Washington Star.

Delicacy of feeling is not confined to gentle people, commonly so called. It is well known, for example, by those who have to do with men confined in prison, that such convicts never speak the hated word "prison," but invariably use some euphemistic substitute, "this institution" being perhaps the one oftenest adopted.

The Railway Brake Problem.

In the history of railroading a most difficult problem has been that of stopping cars quickly when under high speed. It is this problem that now confronts the electric car managers. It is admitted by Electrician Pearson, of the West End company, that the cars cannot be suddenly stopped by the same motor that propels them without danger of serious injury to the driver and the passengers, to say nothing of the motor itself.

The same problem for many years baffled all inventive genius in steam railroading. Finally the invention of the air brake seems to have solved it, at least to the extent that a train can be stopped as rapidly in an emergency as passengers can safely bear the shock.

In the nature of the case the same agent and the same machinery which produce momentum are able to reduce it with the same facility. The application of this fact has proved an approximate success on steam railways, but Mr. Pearson, as reported, practically admits that it will not always work without danger in the case of the electric motor, and that the motor men are enjoined from applying it, except when, in their judgment, the emergency is supreme.

But although the cars are now propelled electrically and stopped mechanically the problem is bound to yield to the boundless resources of invention, and the West End company is pursuing it tirelessly. The feasibility of a vacuum brake which can utilize the rotary motion of the car wheels is now a subject of experiment, and either this or some other substitute for hand power in stopping the cars will yet be made a success. —Boston Globe.

New Styles in Postal Cards.

"We may decide on a pale blue shade," said Postmaster General Wanamaker in talking of the new postal cards, "or a pale gray shade, or it may be that a pearl or a yellow shade would be best. The color and size is still subject to change. The pale gray was the color we favored, but, as I say, we may later decide on some pale shade of blue, or perhaps on pearl or yellow."

These new postal cards will be the handsomest things of the sort ever offered to buyers. There will be two new varieties, a large card, perhaps a third larger than the present ordinary card, of a complication suggestive of torpid liver, and another size, just the least bit smaller than the present card.

"These cards," went on Postmaster General Wanamaker, "will be almost penny postage. Their size will enable one to indite a quite lengthy epistle on them, all for one cent." But it is the pale gray or pearl colored card that will be the greatest bargain. It will not hold so much, but it is to be an uncommonly attractive affair.—Washington Post.

Restored After Five Years.

Five years ago little Johnny Hale, then a lad only 8 years old, was stolen from his home, near Marion, Ind., by a band of gypsies. The distracted parents spent several years trying to find traces of their missing boy, but gave up the search, mourning him as dead. The lad became attached to his gypsy friends and followed them on their pilgrimage through the western states. The other day a boy—none other than Johnny Hale—stopped at the residence of a farmer named Joseph Weikel, living near Elkhart. His clothes were ragged and he had the appearance of a boy tramp. He told Mr. Weikel that the gypsies with whom he had been making his home had maltreated him and that he had run away, hoping to find his way home to his father and mother. The parents at Marion were telegraphed, and the boy mourned for dead for five long years is to be restored to them.—Chicago Herald.

One Way to Court Accidents.

I saw an odd sight yesterday. A small row boat was floating down the East river just below Hell Gate, and in it was a German family, consisting of the head of the household, his wife, his sister and four children, ranging all the way from seventeen to six. They all had on their bathing suits, and were jumping off the boat and scrambling back again with the greatest glee. It was a wonder to me that they were not all drowned, for not one of them could swim over two hundred yards at most, and the tide was running fully five miles an hour, carrying them and the boat along together, but they sputtered and splashed around in the water, and seemed to enjoy it immensely.—New York Star.

A Thrifty and Crafty Duke.

The Duke of Edinburgh (thrifty soul!) went all the way from London to Edinburgh last spring to open the exhibition, and after his return he sent in a bill of expenses for the exhibition people to pay. Among other items was a charge of $1,000 for a special train, whereupon it was remonstrated that the duke did not travel in a special train. "That's true," said the duke, "but I was entitled to one, and even if I didn't take it you should be willing to pay me the cost of one." Well, now, maybe the frugal Scotchmen who are running that exhibition aren't just too mad for any use.—Cor. Chicago News.

A Popular Aristocratic Club.

According to the latest club book of the Union club the waiting list numbers nearly 350, and less than forty vacancies occurred within the past year. The limit of 1,200 was reached during that period, and the waiting list was reduced by about eighty. If vacancies continue to occur at the average of the past two years it will take exactly nine years to elect the present waiting list, unless some die off or get tired of standing in line.—New York Sun.

Miss Margaret Harkness, who is now studying the labor movement on the continent, will soon visit Olive Schreiner at the Cape. Miss Harkness hopes to go on to the diamond fields, following the example of Miss Schreiner, who spent a year at the gold diggings. Her new book, "The Labor Leader," will appear at Christmas.

When a Chinese compositor sets type he places them in a wooden frame twenty-two by fifteen inches. This frame has twenty-nine grooves, each for a line of type, and the type rests in clay to the depth of a quarter of an inch. The types are of wood, perfectly square, and the compositor handles them with pincers.

The first electric telegraph at all deserving the name was invented by Messrs. Cooke and Wheatstone, and was laid on the London and Blackwell railway in June, 1887.

A Louisiana Home.

Through a broad avenue of moss draped oaks we drove to the door, where the family servants were gathered to receive us.

How can I hope to make one see that mighty hall, through which we could drive the traditional coach and four, the grand old staircase, the beautiful oak and cypress walls and ceilings, mellowed with age, the carved mahogany doors with chased silver knobs and hinges!

All the rooms in this old house were built as if in memory of the days when there were giants upon the earth. Lofty ceilings, wide windows and many and huge fireplaces—though in this sunny land winter is only an almanac figment—are the features of every room. By the time I had changed my traveling gown supper was announced.

Do you know what a creole supper is? In the first place there was no tea, but most delicious cafe au lait. A great dish piled high with rosy shrimp, crystals of ice shining among them, fricasseed chicken flavored juste au point, deviled eggs, hot and cold breads, cakes and preserves. The china and silver were no modern conceits. Suspended from the ceiling and crosswise of the table was an immense fan of peacock feathers. A cord hung from it, which was held by a little darky who pulled it gently to and fro.

This small African, overshadowed by the name of Agamemnon, so gloried in his office of fan boy that he was held in secret detestation by all the other small Africans on the place.—The Home Maker.

How to Serve Oranges.

A word or two as to the methods of serving oranges at table may not be amiss here. A simple way is to remove the peel from the top and bottom of the fruit, leaving a girdle about an inch wide all about the equator, sever this at one side and carefully separate the sections from each other, leaving them all attached to the strip of skin. Another fashion which is effective for table dressing is to cut the skin on the lines of longitude, leaving the sections attached at the south pole. In making up a dish of oranges prepared in this way some of the points of the peel may be bent forward under the orange and others be allowed to stand loosely away from the fruit. Carefully done, this makes an orange look like a large yellow flower with a white center.

Sliced oranges is too familiar a dish to require any comment, but a very palatable modification is to alternate in the dish layers of sliced banana and sliced orange, and cover the whole with a frosting of desiccated cocoanut. The oranges do not look quite so pretty if the slices are cut parallel with the core rather than across it, but they are easier to eat. But every housewife knows of dozens of ways of fixing oranges for the table. After all an orange is something like a watermelon. However beautiful and palatable it may be when prepared for the table, it never tastes quite so sweet as when it is plucked from the tree and sucked with the vigorous assistance of both hands to squeeze out the juice.—Allan Forman in Ladies' Home Journal.

Gallicisms in East Suffolk.

The following Gallicisms, surviving in East Suffolk, are worth preserving:

1. Ho-go. Used in relation to fish that is tainted or not quite fresh—haut gout.
2. The smallest pig of a litter is called "the pit man"—petit man.
3. Largesse. The gleaners in a corn field demand largesse of passers by.—Notes and Queries.

A VERY COMMON WANT.

"Out of sorts," "distrait," "the blues," these are familiar appellatives for uncomfortable, undefinable sensations, accompanied with lassitude, nervousness, indigestion. Poverty of the blood, to remedy which an effective stomachic persistently used is the paramount need, is conclusive evidence that the system is insufficiently nourished because—and for no other cause where organic disease does not exist—the food is not assimilated. Reinforce the flagging energies of the stomach, reform an irregular condition of the bowels, keep up a healthful secretion of the bile with Hostetter's Stomach Bitters. For over thirty years this popular medicine has supplied the common want of the nervous invalid, the dyspeptic and of persons deficient in vitality, an efficient tonic. To its powers of imparting strength is attributable its efficacy as a preventive of malaria and la grippe. Thoroughly effective is it too for rheumatism, kidney complaint and neuralgia.

Gent—I must say, madam, that you carry age remarkably well; you look almost as young as your daughter. Lady—Why, I'm the daughter.

USING THEM FOR FIFTY YEARS.

MRS. Fayette Dixon writes:

"ARKANSAW, PEPIN CO., WIS., Dec. 2, 1885.

For upwards of fifty years I have used BRANDRETH'S PILLS. I am now nearly eighty years old and in good health. That my faculties are still intact is due to this fact, and this only, that I have almost relied on BRANDRETH'S PILLS, to the exclusion of stronger medicines to restore me to health whenever either seriously indisposed or in great suffering from colds, backache, etc., and am deeply grateful, next to my Maker, to the blessed man who originated and placed within reach of his fellow-beings so simple and efficacious a remedy. For bilious derangements and kidney disturbances, their usefulness, in my experience, is particularly noticeable."

He left the woodpile and purloined the pie,
This tramp who scorned all decency and law;
He said—and gayly winked the other eye—
"I came, I conquered, but I never saw."

STATE OF OHIO, CITY OF TOLEDO, } ss.
LUCAS COUNTY,

FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

A. W. GLEASON,
Notary Public.

{SEAL}

Hall's Catarrh Cure is taken internally and acts directly upon the blood and mucous surfaces of the system. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75 cents.

If men knew as much at forty years of age as they knew at twenty, there would be more statesmen in the country.

Why continue the use of remedies that only relieve, when Ely's Cream Balm, pleasant of application and a sure cure for Catarrh and cold in head, can be had.

I had a severe attack of catarrh and became so deaf I could not hear common conversation. I suffered terribly from roaring in my head. I procured a bottle of Ely's Cream Balm, and in three weeks could hear as well as ever, and now I can say to all who are afflicted with the worst of diseases, catarrh, take Ely's Cream Balm and be cured. It is worth $1,000 to any man, woman or child suffering from catarrh.—A. E. Newman, Grayling, Mich.

Apply Balm into each nostril. It is Quickly Absorbed. Gives Relief at once, Price 50 cents at Druggists or by mail.

ELY BROTHERS, 56 Warren St., New York.

About all some men do is to spend their time getting ready to do something they never do.

Use Enameline Stove Polish; no dust, no smell.

Try Germea for Breakfast.

A woman who can see.

She's the woman who gets well. It's the woman who *won't* see and won't believe who has to suffer.

And it's needless. There's a medicine—a legitimate medicine—that's made to stop woman's suffering and cure woman's ailments. It's Dr. Pierce's Favorite Prescription. It's purely vegetable and perfectly harmless—a powerful general, as well as uterine, tonic and nervine, imparting vigor and strength to the whole system. For periodical pains, weak back, bearing-down sensations, nervous prostration, and all "female complaints," it's a positive remedy. It improves digestion, enriches the blood, dispels aches and pains, melancholy and nervousness, brings refreshing sleep, and restores health and strength.

No other medicine for women is *guaranteed*, as this is. If it fails to give satisfaction, in any case, the money paid for it is refunded. You pay only for the good you get. On these terms it's the *cheapest*.

But more than that, it's the *best*.

1 CENT THE GREAT **SHILOH'S CONSUMPTION CURE.** COUGH CURE A DOSE

This GREAT COUGH CURE, this successful CONSUMPTION CURE is sold by druggists on a positive guarantee, a test that no other Cure can stand successfully. If you have a COUGH, HOARSENESS or LA GRIPPE, it will cure you promptly. If your child has the CROUP or WHOOPING COUGH, use it quickly and relief is sure. WHAT WOULD IT BE.

What would it be to live my life
Without the sight of thy dear face,
Ne'er look again into thine eyes,
Nor view again thy form of grace?

If thou shouldst prove untrue, at last
Forsake me for another's charms,
The sweet and tender past forget,
Return not to my loving arms.

'Twould be as night on noonday hills,
As frost on fairest summer flowers,
As laughter in the halls of death,
As serpent hid mid Eden bowers.

Yet would I live and bear my part,
Deceive the world with laughter gay.
Conceal my pain within my heart
Till death should bear my soul away.
—Isabel Richey in Chicago Herald.

OFF WINDMILL ISLAND.

The lustrous light of a June moon shone over Philadelphia one night in the year 1779. The summer air was full of the odor of roses and the streets were embowered in verdure, but sounds of martial music floating down from Chestnut street brought home to every heart the chilling remembrance that war was raging in the country and that the issue was as yet in the balance. Far away from the din, out in the open fields west of the Pine Street Presbyterian church, was a settlement in which but little heed was being paid to the uproar. The colony existing in the tiny cabins huddled together had nothing in common with the Continental armies except a deep, unrelenting hatred of the English.

This evening the strangers gathered in little knots and conversed in quiet, unfamiliar accents, the men smoking their long pipes, and the women knitting in a slow, measured fashion. In a French patois they told the children stories of their ever to be remembered land far in the north, the villages and farms, and the cruelty of the British in wresting from them their beloved Acadia, turning them adrift in a strange country separated from their kindred and every home tie. After all the years which had elapsed since their coming to the City of Penn, the Acadians were simply sojourners, not citizens. Few of them had any acquaintance with the inhabitants of the city, and but a small number could speak the English language. The industrious Quakers did not take kindly to the indolent habits of the refugees, hence it is not to be wondered at that the Acadians had no intercourse with their neighbors, and strenuously sought to deter their children from making connections outside of their own people.

The young are apt to be perverse, however, and the French blood in their veins was too volatile to be easily controlled. In one of the cabins had a maiden gone to and fro through the long hours of the day now drawing to a close busied with the house work, but with heart beating high, for she had heard that the troops were expected to arrive in the city during the day, and thoughts of her brave Willie, with his blue and buff uniform and three cornered hat, had driven all other subjects from her mind. Little her parents guessed of her secret, and, although they noticed her preoccupied manner, they did not attribute it to the proper cause.

Now that dusk had come she impatiently awaited the time when they should take their usual stroll to neighbor Minot's doorstep for the accustomed chat. When at length the old folks were safely away, she tied a light shawl over her head and sped along the path to Pine street, then down that thoroughfare to Third street, carefully avoiding the open door of St. Peter's, through which streamed a flood of light. In Third street she reduced her pace, and slowly walking under the trees she finally reached St. Joseph's church, looming up in the fast gathering darkness beside the humble dwellings of the Quaker poor. She knew she had started too early to meet her lover, so she entered the sacred edifice, and after spending a few minutes in prayer, or rather in silence, for her feelings were too tumultuous to be calmed, again sought the open air.

Third street was deserted, but a square below the pavements were crowded. News had come of a battle, and the pulse of the people was at fever heat. Louise cared not for the news of the war so long as her lover was safe, and now she waited anxiously at the trysting place. One or two persons hurried past, too eager to hear the latest tidings to notice her. A soldier released from his duties came down the street anxious to get home again. She drew back in the shadow. Soon she heard the step of a vigorous man, and peering through the twilight saw the glitter of another uniform. The man came closer, and she perceived he was young and stalwart, with a bold, masculine face, which, though in a measure attractive, had stamped upon it traces of sensualism and rough living, such as is noticeable in the countenances of soldiers who have been on a long campaign.

All this the girl noticed by the dim light of the lamp fixed on the watchbox near by. The stranger was evidently in search of some one, as he constantly peered around him as he moved forward, but as he saw Louise all doubt vanished. Walking directly up to the maiden, he bade her good evening, calling her by her first name. The girl's countenance expressed at once annoyance and surprise. The cause of the first is easily imagined, but the manifestation of surprise was only explained when she ejaculated in French:

"You here, Jacques? We thought you had decided to stay in Opelousas. And why in this uniform?"

The soldier replied with a light laugh: "It is hard to get rid of a bad penny, you know. I found the surroundings of our friends in the south not suited to my taste, and, having a chance to enter the army, did so. But I came on an errand to-night, and that is to carry a message from your lover."

Although a smile accompanied his words, the expression of Jacques' eyes was far from pleasant, but this Louise did not notice. She grasped his arm in terror.

"A message from Willie! What do you mean? Is he wounded?"

"No, no, girl," the man replied almost roughly, "but the fact is he was instructed to remain with his company. He does not wish to miss the chance of seeing your pretty face, however, and so he asked me to meet and accompany you to a place near his post, where he can steal out for a few minutes and greet you. His command is stationed at the old barracks on Front street, and, if you are willing to go along, I will take you up and back in a boat lying below the dock, which I engaged on my way."

The maiden was greatly perturbed. Without any sense of fear she would have readily gone alone to the encampment, but the reputation of Jacques was not of the best and she hesitated to trust him. It was now past the hour when her lover should have come, and as Jacques told a plausible enough story she decided, finally, to accompany him. The two proceeded to the river, where in answer to a low whistle given by Jacques a like signal was returned, and guided by the sound they reached the side of a boat lying in the shadow of a pile of cord wood. There were two men in the boat, which struck Louise as rather odd, it being rarely the wherries were manned by more than one person. She took a seat, and Jacques, loosening the painter, sprang into the stern. The rowers bent to their task with a will, and the craft shot out into the bright moonlight.

Instead of turning north, however, Jacques kept the prow headed directly for Windmill Island. Louise noticed this and asked him why the boat was not pointed up the river. He uttered an unintelligible reply about the current, which did not reassure the maiden, and she, though inwardly frightened, insisted in firm tones that the wherry be directed north. Her companion, thinking all occasion for secrecy past, sneeringly replied that he would run the boat to suit himself. Now thoroughly alarmed and seeing the trap into which she had fallen, Louise sprang to her feet and screamed for aid. In those days the river was much used as a highway, and usually the evening air was enlivened by the dip of countless oars and the hum of animated conversation. To-night, however, the water was deserted, every one being in the center of the town seeking the latest tidings. No answer came to her cry for help, and before she could again find voice Jacques pulled her down beside him, and, covering her mouth with his disengaged hand, bid the rowers make all speed to the island, whose shadows would effectually hide them.

With a frantic effort Louise wrested herself loose and scream after scream rang over the water, to be answered this time by a welcome cry from up the river. The conspirators turned their heads in alarm. A hundred yards distant was a light boat with two occupants bearing toward them, and propelled with such force as to very materially lessen the distance between them before the abductors could realize the situation.

"Row, men, row!" yelled Jacques. "It will be ball and chain for life if we are caught."

"Stop!" came from the pursuers. "Stop or I fire!"

Jacques muttered an oath, and, seizing a musket lying at his feet, took aim and fired at the speaker. No return fire came from the party in the second boat, and they had resolved apparently to delay action until they overtook the wherry. Making an almost superhuman effort, they shot the light skiff alongside the heavier boat, when the island was not more than ten yards distant. Snatching a pistol from his belt Jacques leveled it at the nearest occupant of the other boat, but as his finger trembled on the trigger an oar quickly sweeping through the air fell upon his arm and the weapon was tossed into the water, while his right hand fell useless by his side.

The boats by this time had drifted almost to the shores of the island, and the cowardly boatmen, seeing their leader disabled, and with the horrors of Walnut Street prison in their minds, abandoned their oars and sprang ashore, followed by the pistol shots of the second occupant of the skiff, as well as by the curses of the maimed Jacques, who saw his scheme fail when at the point of success.

Louise was lying in the bottom of the wherry senseless, and, seeing further resistance useless, Jacques threw himself into the tide at the same instant the officer, for so his uniform showed him to be, stepped into the boat. The rower of the skiff made strenuous efforts to reach the drowning man, but failed, and the dark waters of the Delaware closed over the abductor, who was unable to swim to the land with his uninjured arm. Meanwhile the officer raised the maiden in his arms, and at the first glance ejaculated: "Heavens, it is Louise!" The rescuer was no other than William Clark, her lover, whose command had indeed been located in the Liberties as stated by Jacques, and he was on his way to meet his sweetheart when the scream of Louise rang over the water.

Jacques' story of Clark having been detailed for special duty was entirely false. Through a letter which had fallen into his hands he had learned of the meeting arranged between Clark and Louise, and having known the Acadian girl for years, he resolved upon the daring plan of abducting and carrying her to New York, of course deserting to the British. Not until Louise revived and told her part of the story could Will understand her presence in the boat, or until then did he know who was the abductor.

Louise reached home before her parents had returned from the Minots', and in the disturbed condition of the city the fight on the river and the sudden disappearance of Jacques created no comment.

Years after, when Louise had become the wife of Clark, she told the tale for the first time to her daughter, and it was one of her grandchildren who related the incident to the writer.—Philadelphia Times.

Cable Railway Engines.

The new cable railway station of the West Side Cable railway, in Chicago, has two Greene engines, each 36 inches by 72 inches; each engine weighs 238,000 pounds and has a capacity of 1,200 horse power.

BUCHANAN'S ROMANCE

An Episode That Caused Him to Remain a Bachelor.

IDLE GOSSIP AND A THOUGHTLESS ACT.

They Probably Caused the Death of his Fiancee.—A Life of Sorrow.

A Minneapolis lady told me the other day the true reason why James Buchanan, the fifteenth president of the United States, never married. She used to live in Lancaster, Pa., and it was near this little city that President Buchanan lived (when "at home") and died. I quote her own words:

"When I was a girl and a young lady at home I used to know Mr. Buchanan quite well. Father was one of his intimate friends, and used to spend a good deal of time—nearly all his Sunday afternoons—at his country place, Wheatland, about a mile from Lancaster. They had a bond of sympathy between them; both were Democrats. Why, he was at my sister's wedding, and I remember the expression on his face and the twinkle in his eye as he quoted the old saying to my oldest sister: 'When a younger sister is married first the older has to sit on the fence and await her turn. You must dance in your stocking feet tonight.'

"He was a tall, fine looking man, with silvery white hair, generally dressed in black broadcloth, black satin vest, and wore the old fashioned high linen collars. One great peculiarity of his was carrying his head on one side.

"He told my father about the love affair. I've heard it dozens of times. He was engaged to Miss Coleman, of Lancaster, and there, too, lived Miss Rose Hubley, also very much in love with him and mortally jealous of Miss Coleman. The course of true love was running smoothly for the two lovers until Miss Hubley came between them. Mr. Buchanan had been out of town on some business, returned late one afternoon to the city, and on his way home he passed by where Miss Hubley lived. She called him into the house, and he was there some minutes, and then went directly home to get his supper.

"As frequently happens, some gossipping neighbors either saw it or Miss Hubley herself took pains to inform Miss Coleman that Mr. Buchanan had called at the other lady's home first, although engaged to her. She resented it, and when he went to call upon her that evening declined to see him. The next day he went up to Philadelphia on an early train and with her father. She went up later in the day to go with the two gentlemen to the theatre in the evening. She did not appear as usual, not at all like herself, and finally declined to go to the theater or even see Mr. Buchanan. When they returned she was a corpse, and was brought to Lancaster and buried there. Heart disease was given as the cause.

"The other lady lived to be an old maid and suffered an awful fate. She was standing before an open grate, warming her hands behind her, when her clothing caught fire and she was burned to death. Mr. Buchanan never forgot Miss Coleman. When he died he said that he wanted to be buried in Woodlawn Hill cemetery, because when she was living they used to walk out that way together."—Minneapolis Tribune.

Genius versus Grit.

It is an everyday occurence to hear individual exclamations of surprise over the brilliant, successful career of an apparently commonplace man or woman. "To save my life I can see nothing remarkable in her," is what the amateur critic, with rather fretful impotence, complains—and yet, one by one, the triumphant seeker after fortune captures every citadel, storms the fortress and finally plants her colors on the topmost turret for all the world to cheer.

Of course, no one ever does see the one thing able to accomplish these wonders, for the sole agent is hard, patient toil, the sort that is done in the closet in odd hours, when the rest of mankind is asleep, ever digging away at an idea and breathing life and activity into it by sheer force of will—over and over again, the same old story of tortoise and hare, until one marvels to hear lack of talent given as excuse for want of fortune.

In material matters genius, unless supplemented by energy, does not count for tuppence. While, on the other hand, grit is an independent factor, spinning flax out of hay and long straw, indifferent of means at hand, and only caring for the end in view.—Boston Herald.

One Woman's Bedtime Hours.

A lovely woman who was talking with a friend one day about the enjoyments, disappointments and heartaches of childhood, said: "The sufferings I endured when a child were more acute than any I have known in later years, and the pleasantest remembrances I have of those far away times are of the bedtime hours, when my mother sat by our beds in that low roofed chamber and taught us the songs she sung as a child, told stories, some of which were of her childhood, while others were conjured up in her own head. Some of the sweetest hymns and sacred stories I learned then, and there ever comes to me when I close my eyes a faint picture of my devoted mother sitting there in the twilight. I think the only reason that the darkness had no terrors for me was that it nearly always came while she was with us. The sound of her voice dispelled all fear; it was associated with tenderest words, sweetest lullabys, softest good nights."

Wanted to See the Soldiers.

A wealthy New York lady who has traveled much abroad, but who knows very little about her own country, was in Washington a few days ago for the first time. She was taken to the White House by an influential friend, and through his intercession the private apartments of the house were opened up to her, and she had an exceptional opportunity to inspect the numerous beauties of the dignified but modest mansion. As she was being helped into her carriage on departing, a shade of disappointment was detected in her face.

"Well, what do you think of it?" her friend inquired.

"I must confess to a very keen disappointment," was the reply. "The rooms are all very prettily decorated, and some of them are dignified and impressive, but I am sorry not to have seen the military."

It appeared on further inquiry that this un-Americanized New Yorker had fully expected to find the president's mansion surrounded by a military guard in full uniform, and she was vehement in her assertions that the German way was "ever so much better than ours."—New York Recorder.

Man's Duty to Man.

The father may think to hide certain parts of his character from his child, not wishing him to imitate them, and may give him precepts that he has never followed, but the child absorbs what he fancies is concealed and forgets the words which contradict it. Commands and exhortations may produce or restrain certain acts, but they are powerless to inspire emotions or create desires. Often they have a reverse effect.

To give every one his due, to refrain from taking unfair advantange, or in any way enriching one's self at the expense of another, are supposed to be duties which are simply to be inculcated and obeyed, yet how is the desire of gain, so intense in many minds, to be made to yield when it conflicts with these duties? Chiefly by crediting within the breast a stronger desire for justice and integrity. The love of rectitude, the faith in honor, the desire to deal fairly and squarely with all men, must be aroused and strengthened before any one can be thoroughly and truly just. And the same is true with regard to every good quality.—Philadelphia Ledger.

The Dear Innocents.

Some Detroit ladies, not more than a thousand miles from a barrel of salt in front of a Woodward avenue grocery store, recently organized a debating club for the development and benefit of the rights of women. It was their first experience, the dear things, so they appointed a committee to go down town and get the needed stationery, etc. When the polite and affable clerk had about finished selecting the articles they had put down in a memorandum book, he inquired of the spokeswoman of the party:

"You will want a 'Cushing's Manual,' won't you?"

"A what?" she asked sharply.

"A 'Cushing's Manual,' madam," he answered, moving out of range.

"No, sir," she said, with severity, "this society is exclusively for ladies, and if we want anything at all in that line it will be a womanual, sir. How much do we owe you?"—Detroit Free Press.

Rowed Forty Miles for Amusement.

Willis Holly, Mayor Grant's secretary, used to amuse himself by rowing around Staten Island whenever he got a holiday from his arduous newspaper work a few years ago. He did not row very fast, but he always made a complete circuit of the island. I think the distance is about forty miles; at any rate, I know that Mr. Holly had to rise before daylight in order to get home with the cows in the evening. It is a feat that he used to speak of with a proud, beaming eye, and I never wondered at it. I must say, however, that in the course of seven or eight years' consideration of the subject, I have never been able to understand exactly why a man should care to row around Staten Island.—Blakely Hall in Brooklyn Eagle.

The Water in Utah's Great Lake.

Salt Lake is by no means a saturated solution of salt, yet it is five or six times as rich in salts as the ocean, and nearly as strong as the Dead sea. In summer it contains between 20 and 22 per cent. of salt, the saturation point not being reached until the salt forms a little over a third of the liquid. There are all through the great basin numerous saline lakes and ponds, but none of the size and importance of this in Utah. Not infrequently they are shallow and entirely disappear during the dryness and heats of summer, leaving to mark their sites only a stretch of some acres—or it may be miles—of clay or mud, entirely covered with salt.—Goldthwaite's Geographical Magazine.

Weight of Paper Money.

In the treasury here one day the question came up as to the weight of a dollar bill. Scales of perfect accuracy were brought into requisition, and the surprising discovery was made that twenty-seven one dollar notes weighed exactly as much as a twenty dollar gold piece. The latter just balances 540 grains. However, the bills weighed were perfectly crisp and new. Trial made with soiled notes, such as come in every day for redemption, showed that twenty-seven of them weighed considerably more than the twenty dollar coin. Every paper dollar on its way through the world continually accumulates dirt, so that after a year of use it is perceptibly heavier.—Washington Letter.

Two Men.

Paterfamilias (furiously)—You scoundrel! Why did you elope with my daughter?

New Son-in-law—To avoid the insufferable fuss and nonsense of a society wedding.

Paterfamilias (beamingly) — Thank heaven, my daughter got a sensible husband anyhow!—New York Weekly.

HYDROPHOBIA A FAKE.

So says Supt. Hankinson of the A. S. P. C. T. A.

SOME OF HIS EXPERIENCES WITH CASES.

People who are Bitten go Mad Through Fear and Excitement.

"Can a man scare himself to death after having been bitten by a dog which isn't mad?" I asked Superintendent Hankinson, of the American Society for the Prevention of Cruelty to Animals, one day, as he sat in his little office on Twenty-second street.

Mr. Hankinson is a good natured looking man with reddish hair, who is afraid of nothing and nobody; certainly not of hydrophobia quacks.

"Why, certainly," he said, with decision. "That man down in Asbury Park who was bitten by a cat was scared to death. He never had hydrophobia. He died of nervous prostration brought on by worry over an imaginary danger. His friends were all pitying him and hoping he wouldn't die, and phrophesying that he would, and he was a man of nervous temperament, as educated people sometimes are, and it simply killed him. I suppose he read up in the books about hydrophobia and it turned his head. That's all there was about it. Do you remember what a great howl there was about those Newark boys who were bitten by a 'mad dog,' and who were sent over to Pasteur to be 'cured?'"

"Why, of course; who doesn't?"

"Well, it's quite easy to cure a disease that never existed. Those boys never had hydrophobia and never would have had it. The dogs didn't have it. During that excitement we went to Newark and found a lot of dogs shut up. We asked to be allowed to take them away to our stables, but the people wouldn't have it. Do you know what was done with those dogs? After the excitement was all over they were given back to their owners, every one of them. Not one was killed. Not one of them had anything worse than a fit. Why, our men are constantly handling dogs, get bitten again and again, but they never dream of having hydrophobia. It's a myth. There isn't any such thing."

A CASE OF IMAGINATION.

"Then you don't believe in the existence of such a disease?" I asked, thinking that, as Mr. Hankinson probably knows more about animals than any other man in America, he must be good authority.

"No, I don't. There may be such a disease, but I don't believe it. I never saw a case or knew of one positively."

"How about these doctors who cure it?" I asked.

"They don't cure anything. I asked a man who makes a specialty of treating hydrophobia, as he calls it, if he ever saw one single case of hydrophobia to which he could swear. He refused to answer, but he told me this story: 'A man came to him one day in terrible distress. He had been bitten by a dog; he feared madness; he could not sleep at night and was afraid he was going to die. He begged the doctor to treat him. The doctor said it was too late; the period of inoculation had passed, and it would be no good now. If he had hydrophobia there was no way to stop it.'

"The man went away, but came back the next day nearly frantic. He hadn't slept a wink and begged the doctor to do something for him. So the doctor took the man into his operating room and gave him a hypodermic injectic of water—just pure Croton water. He went away, slept for the first time in two weeks and came back the next day for more water, and again the next, and was soon perfectly cured. The doctor told me that himself, and he professes to cure hydrophobia.

SHE WAS MAD.

"Why," continued Mr. Hankinson, "I've had a woman in hysterics right in that chair you're sitting in because a dog had bitten her. She wanted me to kill the dog. I wouldn't do it. Then she screamed in a terrible way. When she stopped I said to her: 'Madam, you ought to be ashamed of yourself. A woman of your intelligence! You've interrupted the business of the office and drawn a big crowd under the window to listen to your yelling, and all for a whim. Somebody told you you were going to go mad, and now you think you ought to go mad and you'll be mad if you don't go mad. You just go home and say nothing about it and you'll be all right.' And she did it.

"Another woman brought her boy in. He had been bitten by a mad dog, and she wanted it shot, she said. The boy looked perfectly well.

"'Now, look here,' said I, 'you've been talking a good deal to the boy about this, haven't you? And the neighbors have too? And you've been telling him that he's likely to have hydrophobia, haven't you?'

"'Yes, of course, we've talked about it,' said she.

"'Exactly,' said I. 'You've been taking the precise course likely to drive him mad or make him think himself so. You have been trying to scare him to death. If he were to go crazy it would be your fault. How is it, bub,' said I, turning to the little fellow. 'You don't expect to go mad, do you?'

"No, he didn't think he should, he said. He didn't feel any different. He was a brave little fellow. So I sent them home, too, and that was the last I heard of it. The dog had had a fit, that was all. It's a shame the way people will shoot valuable dogs just for a fit that might easily be cured or avoided."—New York World.

The Uses of the Sword.

The uses to which the sword has been put seem to have been almost as varied as its appearance, when we recall the anecdote told of Charlemagne, who said, as he used the pommel of his sword to put his stamp on treaties, "I sign them with this end, and with the other I will take care that they are kept."—Kate Field's Washington.

Exhibition Bathers

The number of exhibition bathers who hang their clothes on a hickory limb, but don't go near the water, is daily on the increase, and during a walk along the beach at Atlantic City one can readily pick out hundreds of young girls and even mature dames arrayed in the most attractive and costly bathing robes who don't even wet their dainty feet in the surf, but prefer to gayly trip in groups along the strand or gracefully recline on the warm sands.

They, as a rule, wear collars and cuffs, jaunty little caps, neat slippers, and are invariably tight laced. They are as careful of details in donning this beach costume as if they were dressing for a ball, and certainly appear far more captivating. These fair and frolicsome visitors are known as exhibition bathers, but they don't bathe.

A new fad among this particular class is to go carriage riding in their brief attire, and it is a familiar sight on the avenues daily to see a bevy of pretty girls clad in handsome surf costumes urging along a weary beach steed, and evidently enjoying the diversion.—Cor. Philadelphia Times.

Names That Overcame a Hotel Clerk.

Among the many thousands of proper names annually written, more or less legibly—usually less—upon the register of a hotel like the Grand Pacific, pretty much every known combination of letters is found. Hotel clerks become hardened, and greet Mr. Buck and Mr. Cluck and Mr. Duck with equal affability. But Paul Gores, of the Grand Pacific, ran up against a combination the other day that laid him out.

The two Japanese produce and stock exchange commissioners who are stopping there walked up to the desk and asked if any one had called on them during their brief absence. They had registered before Gores came on duty and he did not know them.

"Let's see; what's the name?" he asked briskly.

"Oh, go way," said one.

"Oh, no," remarked the other.

Gores was dazed until he discovered that the gentlemen's names were Ogowa and Ono.—Chicago Tribune.

Electric Cars in Brooklyn.

One of the features of Brooklyn life among people to whom the expenditure of small sums is a matter of jealous interest is a trip on the new electric car which has been put on a road that runs to Fort Hamilton. There is an odd mixture of heavy browed scientific men and picnic parties on the car during the morning runs. The scientific men talk electricity until the air is blue, and the excursionists eat peanuts and wonder what makes the car go. Not infrequently crowds of heavy financiers from New York are to be found swooping up and down on the car, observing its work with beetled brows. One of the engineers, in speaking of it the other day, said that he had been questioned so much about electricity that he had come to the conclusion that very few people knew anything about it.—New York Sun.

A Mastodon's Bone Found.

A big bone was unearthed by workmen in excavating for the east channel span of the new bridge being constructed by the Wheeling Bridge company. The bone was found thoroughly imbedded in blue clay at the bottom of the excavation fifteen feet deep and fully eight feet below the depth of the river. The excavation is but a short distance from the river, and is soil that had probably been undisturbed for ages. The piece of bone, which is apparently not complete by some two or three feet in length, is fully 25 inches in diameter at its greatest bulk, a foot through at the more narrow parts and about 2½ feet long.—Wheeling (W. Va.) Register.

Why Burmah Was Taken.

An extraordinary case is now pending at Mandalay. Two foresters seek to bring a pauper suit to revive, for their own benefit and that of other foresters, a judgment of the Hlootdaw or council of Burmese ministers, pronounced in 1885, fining the Bombay and Burmah Trading corporation nearly two million and a half of rupees for the benefit of the king. The government of India considered the action of the Hlootdaw such a gross violation of justice that it was the immediate cause of the invasion and annexation of upper Burmah.—Cor. London Times.

From the German.

Visitor (to mine host)—You seem to have the blues.

Host—Yes, and I've got good reason for it. You know the old ruin on the hill back of the hotel is haunted, and lots of tourists put up here at this hotel just to see the ghost. Now what does the specter do but strike me for an increase of wages, and I'm already giving more than he could earn anywhere else.—Texas Siftings.

A Freak of Nature.

A young lady walking along a mountain path near Altoona, Pa., observed a wild blackberry bush with a large bunch of cockle burrs growing upon one of its branches. The burrs were healthy and perfect in every particular, as was also the branch of the bush to which they were attached. Here is an opening for some scientific figuring.—St. Louis Republic.

Unkind.

Miss Summit—Did you have a good time at Long Branch?

Dashaway—Exceedingly. Indeed, I had a hard time to get away.

Miss Summit—No baggage, I presume?—Clothier and Furnisher.

Righteous Indignation.

First Mosquito—Why did you bite that fellow so wickedly a moment ago?

Second Mosquito—He just sprung that chestnut about blue blood in the mosquito's veins.—Munsey's Weekly.

It is reported that a telephone line is about to be constructed between Reikjavik and Hanefiord, Iceland. It will be the most northerly one in the world.

NETS FOR COUNTRYMEN.

How Rascally Horse Traders Entrap the Unwary.

OILING AN OLD ANIMAL'S STIFF JOINTS.

Filing the Teeth and Dyeing the Hair A Glossy Brown.

Yes, the swindler is abroad in the land. "Tricks in all trades except ours," laughingly spoke a horseman recently to a Post reporter who happened to witness a transaction not too commendable to the spokesman. An investigation as to the manner in which these traders on a small scale were accustomed to do business is not flattering in its result to the men following this calling for a livelihood. While every occupation is supposed to have some degree of respectability attached to it, and there are, no doubt, many honest men engaged in the livery and sale business, hiring and boarding of horses, it has become a notorious fact that there are a class of men who follow it in small dealings, most of whom in their operations border on the line of rascality, and, to say the least, show what knavery and trickery can accomplish, and keep those who resort to it beyond the reach of criminal prosecution. Now and then they become over confident, emboldened by their successes, and deliberately rob some poor victim, and then frighten him beyond daring to make any attempt to recover his confiscated property.

In this city can be found a number of men who call themselves horse traders. Some of them have neither horses nor stable, while the stock of the others will range between one and half a dozen horses. Many of these men locate near the Center market and bazaar, where they find countrymen who can be cheated and robbed with their eyes wide open; also where opportunities are constantly being presented for deals and trades. The man with a few horses and the stable, small or large, will work in with the one without either, and they will quickly form a combination when a chance presents itself of their bettering themselves. Some of the old hulks that are on hand, and to be operated with, have been obtained for little or no money consideration, and it is astonishing how rapidly they change ownership, fitting the circumstance and necessities of the case.

It is known that one horse was handled and claimed by five different men as its owner in two days. It figured during that period in five trades, only one of which was successful, and then the farmer, having let the sharpers get hold of his horse, they disappeared, leaving the worthless animal in his hands. The stock used in this cheating is doctored for the purposes of deception. It is known that to mislead as to the age of some of these veteran horses, whose services should entitle them to a place on the retired list in the pasture field, have had to submit to a filing down of teeth, that the year marks might be destroyed. In another instance the fetlocks were neatly cut and trimmed, the frogs cleaned and polished, and toes set up to hide all appearance of weakness in those points and give the impression that the horse was all right in front.

Stiff and lame shoulders, to which an animal may be subject, have been temporarily limbered in order to trade the unsound horse off. When the new owner attempts to work the animal he quickly discovers the imposition and fraud put upon him and brings back the horse, complaining of the deception. He is coolly informed that the horse was not lame when traded, but that the mishap occurred since and he must make the best of it. The horse he received is proven as represented, and the dealer comes out $50 or more ahead on the trick.

Coloring of the horse's hair is also practiced for the purpose of facilitating trade. It might be supposed that this would have no weight in such matters, but in some cases it is very important as to the looks of the horse. By a process used among the dishonest traders the horse is fitted out in a bright, glossy suit of hair, which will last for a few days, or until water strikes it, when it will entirely disappear.

Then it will be discovered that the animal has a coat badly sunburnt and worn, anything but soft and pleasing. Generally three, four, or half a dozen men participate in the effort to effect a trade, and the innocence they pretend to show regarding horses is refreshing to witness. Schemes of all kinds are devised, combinations effected and jobs put up to cheat the unsuspecting, if not to actually rob men willing to make trades of their horses, or give them in exchange a worthless, patched up animal under the falsehood told and description placed upon them.

The neighborhood of Fifteenth street and Louisiana avenue and B street, thence up to C street, between Tenth and Eleventh streets, has been the scene of a number of these rascally transactions. Countrymen, more particularly the younger ones, are selected to operate upon by the traders, who start on a very plausible plan. A stranger happens near, and stops to look at the countryman's horse, admires the animal and wants to know if he is for sale. In this manner the ice is broken for a conversation, and the stranger suggests that he has a horse and will make a trade. He has not, but a lie like that amounts to nothing in a horse trade.

He goes away representing that he will bring the horse, consults his confederate, who loans him a plug that has had a different owner for every trade attempted to have been made for a week. It has been worked upon until presentable, and is shown to the countryman in its best light. About this time a stranger appears on the ground, apparently unacquainted with either party. He is soon followed by one or two more. They learn the terms proposed by the professional trader, and to their mind it looks like a good offer. Both horses are represented as entirely sound, and a satisfactory trial is to be made before the bargain is considered complete.

If the countryman hesitates and appears disinclined to agree, one of the strangers will say, so that he can hear: "I'll try and get this horse myself if this man don't get him. He is worth more money than that." That proves a helper for the trader, and it is decided to try the horse. During this performance the countryman's horse disappears and he is left with the plug as a substitute. If he objects he is met with an oath and informed that it is a square trade. The strangers chime in for the horse sham, and the greeny gets worsted on all sides.

Another way is to make the bargain and carry the man about a mile away to get the money promised to be paid in the trade. Of course the dummy man won't be there, and neither will the horse be where he left it when he gets back. Instead, however, will be found an old timer, whose usefulness has long since departed. He invokes the aid of the police, and the evidence against him will be overwhelming, witnesses springing up for the horse trader like mushrooms, to swear that it was a square trade and that the countryman was satisfied, while the truth is that he never got a dollar and his horse was virtually stolen from him.—Washington Post.

INDEPENDENCE, CAL.
FRIDAY, APRIL 8 1892

Apropos of the Behring Sea trouble Lord Salisbury had as well be mindful of the fact that the United States is the only country in the world that can go to war without first obtaining the consent of the Rothchilds.

The Supreme Court of California is probably the most remarkable judicial body that ever misinterpreted the law or upset common sense. That court rendered a decision the other day in a gambling case in which the court took notice of the fact that faro is a "banking game" and ruled out the "Modern Pocket Hoyle" as being incompetent evidence. Perhaps their Henships, as Ambrose Bierce calls them, think they know more about faro than the famous Mr. Hoyle. And likely enough some of them do.

Prophet Foster's prediction of drought during the coming summer has no terrors for California. California summers are always dry, but they never fail to bring a golden harvest. Dry summers are what the California farmers and fruitgrowers want. The absence of rain during the harvest season insures the safety of grain and brings all sorts of fruit to the fullest perfection. No one who understands the advantages of the California climate would wish to see it changed by summer rains.

Henry Clews says that the strong public sentiment against monopoly of all kinds is having an effect on the New York stock market. The influence of such sentiment is seen in the downward tendency of trust stocks and such stocks as those of the Reading railroad system, which recently had a boom in consequence of the combination made to control the output of hard coal. The hostile attitude of the public towards such monopolies is being reflected in legislation, and this tends to weaken the stocks concerned. Mr. Clews is doubtless right in believing that the laws will be generally construed so as to overthrow combinations destined to defeat competition.

The opinions of foreigners concerning American people depend largely upon the size and character of the audience to whom the opinions are addressed. If the audience is large and socially high the speaker gives them taffy; if it is small and socially low he gives them fits. Dickens' "American Notes" would never have been written if Dickens had succeeded in getting a copy right law passed that would have enabled him to obtain royalties on his books. But the spectacle of Americans on every side reading his novels and not one of them paying for the privilege was too much for the great novelist's philosophy. Dickens has had numerous followers, and the end is not yet. This pursuit of the American dollar is perfectly legitimate, however. A man is entitled to the credit of smartness who can coax men and women into giving a dollar to hear themselves flattered.

All but two or three of the vessels fitting out for Behring Sea have cleared, the British Government has issued an order to the effect that sealers going into the sea do so at their own risk. The modus vivendi was agreed upon last year after the sealers had cleared for the sealing ground. No sealer was supposed to have any knowledge of the agreement until notified on the high sea. Sealers had a perfect right to keep clear of gunboats of either nation and thus remain in ignorance of the fact that their pursuit had been declared unlawful. The sealers made good use of their time and in the course of the season took about 70,000 seals. If the modus vivendi had been announced this year immediately upon the signing of the Behring Sea arbitration treaty the sealers would have been notified in advance of sailing that they were liable to capture. But the British Foreign Office used up the greater part of a month in correspondence on the modus vivendi proposition. The sealers having got away without knowledge that the modus vivendi had been agreed to, they are now about in the same position they were last year. They will avoid gunboats as long as possible and then exercise their discretion as to the chances of capture if they pay no attention to notification. The English papers call this a triumph of British diplomacy. It is not clear that they are not right. The result is a larger poaching fleet in the Behring Sea this year than last with no more chance of interference this year than last.

KNOCKING OUT A JEHU.

Resentment of the Insults of a Big Stage Driver by a Little Dude.

Colonel William Greene Sterrett, of the Galveston-Dallas News, tells this story:

"Once, a good many years ago," he said, "I was traveling in a stage in western Texas. It was long before the snort of the locomotive was heard on the prairies of that region, over which the buffalo yet roamed. At one of the stations a young Englishman and his wife got in. He was a little fellow and dressed as a typical Englishman—what we now call a dude. The driver was a big, raw boned six footer. He was a noted fighter. He had never been whipped and was a regular terror. He seemed to take a dislike to the little Englishman from the start. Presently he stopped the stage, got down, came back and threw open the door.

"'Here,' he said to the Englishman, 'you come out of that and get up on the seat with me. There ain't room for you in there.' The Englishman didn't move. 'Come out, I tell you,' roared the driver. The Englishman just sat still. 'If you don't come out, I'll haul you out by the legs,' shouted the Jehu. Then the rest of us expostulated with the driver. I was too tired to fight and couldn't get at my gun, so I just expostulated along with the rest. We told the driver there was plenty of room inside; that the Englishman was not crowding us, and that if he (the driver) insulted or injured any of his passengers he would be discharged by the stage company. The driver by this time was wild. He swore he was in command of that stage and that he proposed to run it to suit himself, and if that blankety blank cuss didn't come out he'd pull him out.

"'All right,' said the Englishman, at last. 'I will come out, and when I am out I will whip you soundly.'

"He got out slowly. We all felt sorry for him and sorrier for his wife. She didn't seem scared or worried, though, and all she said was:

"'Charley, don't let him scratch your face.'

"Well, when the little Englishman got out he took his coat off and handed it back into the stage. Then he started toward the driver and the driver started toward him. We heard a sound a good deal like that made by hitting a steer in the head with an ax. Down in a heap went the driver. He was up as quick as a flash. Down he went again. Actually that little English dude knocked that burly six foot driver clean off his feet a dozen times. How it was done none of us could tell. The big fellow would rush at the little 'un with his arms going like flails. Suddenly the little fellow would make a dash, his right arm would fly out, and down would go the driver. After the dozenth round that driver called out:

"'Hold on, stranger—hold on! I'm whipped and throw up my hands. You kin ride anywhere on this stage you darn please, outside or inside or on the hosses. You're the boss now; but,' he added, glaring savagely at the rest of us, 'I kin lick anybody else on this stage.'

"We didn't expostulate. The Englishman climbed back into the stage as quickly as he got off. His wife was satisfied, for 'Charley's' face wasn't even scratched. At the next station the driver explained that if he'd only have got hold of the little fellow he'd have hugged him to death like a bear; 'but,' he exclaimed, 'every time just as I was about to lay hands on him the ground 'd fly up and hit me on the back of the head.'

"Who was the little fellow? Oh, a graduate of Cambridge, and the best boxer of his time at the university."—Washington Post.

A Well Superstition.

One of the comparatively modern superstitions of the eve of All Saints is found at the bottom of old and abandoned lime kilns. Just where it began nobody can tell with certainty, but in all probability Ireland has the best claim to it. At all events, it used to flourish in that country some years ago. A girl with no beau or a girl with too many beaux is puzzled to find out who is the lucky chap destined to become her husband. In such a predicament all she has to do is to arm herself with a spool of strong thread and start off after dark on the eve of All Saints to some old lime kiln reputed to be the abode of evil spirits.

Standing alone on the edge of the deep hole, the candidate for matrimony repeats the Lord's prayer backward. Then she takes the end of the thread in her left hand, and after tossing the spool into the chasm before her, patiently waits for a bite. Soon she will feel three pulls and she must politely ask his satanic majesty to be kind enough to tell her the name of her future husband. A voice below will pronounce the name.—Galig-

Never Heard of Him.

Telegraphers' stories are unique sometimes, and they do not hesitate to tell them to one another. It is said that the operators in New Haven, having always lived there, seldom hear of anything beyond the limits of the city and their operating rooms. The fact was illustrated recently when an operator in New York remarked to the man he was working with in New Haven that Parnell had just died.

"Who?" was the inquiry.

"Parnell," was the reply.

After a short interval, during which, it is supposed, the New Haven operator was in conference with somebody, this message was sent: "If you mean P. T. Barnum, we heard that long ago, but no one knows who Parnell is."—Telegraph Age.

New Alloys.

Two new alloys for making boring and cutting tools have been invented in England. The metal equals steel in hardness and temper, and does not lose its temper when heated by friction. The alloys consist of pig iron, ferro-manganese, chromium and tungsten in proper proportions, melted together in crucibles under stick charcoal and calcined borax. This compound is then remelted with bar iron and proportions of nickel, copper and aluminium are added. It is then cast in sand molds.—New York Times.

Stage Coach Dreams.

Losses are presaged by a dream of riding in a stage coach. If you run after one you will be out of employment for a long season. To see one pass will rid you of troublesome friends. If you are in a stage coach and it turns over without injuring you, you will be lucky in your speculations, but if you dream that you are killed by the fall you must expect misfortunes.—New York Herald.

Why the Shark Is Always Hungry.

As it is a source of wonder how the flea manages to exist in the sand, where his chances of obtaining a meal may not occur once in a lifetime, so naturalists are puzzled as to how the shark maintains himself. The ocean is wide, and the number of men who fall overboard small indeed in comparison to its area. The vast proportion of sharks, then, must go through their lives without a remote chance of obtaining a meal at the expense of the human kind.

There is no ground for the supposition that the shark can exist upon air; he is not like the whale, provided with an apparatus that enables him to sweep up the tiny inhabitants of the seas. He is too slow in swimming, and infinitely too slow in turning, to catch any fish that did not deliberately swim into his mouth; and unless we suppose that, as it is said of the snake, he exercises a magnetic influence over fish and causes them to rush headlong to destruction between his jaws, it is impossible to imagine how he obtains a sufficient supply of food for his sustenance.

Indeed, it would appear that it is only when he gets the good luck to light upon a dead or badly injured fish that the shark has ever the opportunity of making a really square meal. His prolonged fasts certainly furnish an ample explanation and excuse for his alleged savagery of disposition.—London Standard.

Uses for a Bottle of Gold Paint.

A twenty-five cent bottle of gold paint is a capital investment for any woman. She will find a dozen occasions for its use every week of her life. Perhaps she chips some bit of Japanese or other fancy porcelain in dusting; a brushful of gold paint over the chip will make everything right. A gilt picture or mirror frame may be bruised or tarnished; call in the little bottle again and remedy in five minutes and for a fraction of a cent a damage the cabinet maker would charge a dollar to repair and keep your frame a couple of days besides.

By the by, you girls who are clever with your paint brushes, did you ever spend a few dollars at the damaged counters of the large Japanese stores? Do you know that you can buy for a trifle lovely delicate vases and bits of oriental wares that would sell for many dollars were it not for a crack or a chip somewhere. Buy them joyfully, take them home tenderly and spend half an hour with your paint box, filling up the nick with flour paste, plaster of paris or putty. Any of these will take color nicely, and if carefully painted and dried the vases will be practically as good as the best.—New York Press.

An Ideal Way to Live.

"The man I marry," quoth a vivacious young woman the other day, "has got to promise to give me a yacht home. I've just been visiting some friends who live all the year round on their yacht. During the summer they cruise about our northern waters and in winter go south, taking in the Mediterranean, Japan or Norway and Sweden by way of occasional outings. The yacht, a large schooner, is gorgeously fitted and has every needed convenience, comfort and luxury, including a well stocked library, aboard. It is an ideal existence—no calls to make, no balls, no shopping, no uncomfortable gowns, sunshine, fresh air and the starlight—what can one want more?"—Her Point of View in New York Times.

"I have just recovered from a second attack of the grip this year," says Mr. Jas. O. Jones, publisher of the *Leader*, Mexia, Texas. In the latter case I used Chamberlain's Cough Remedy, and I think with considerable success, only being in bed a little over two days, against ten days for the first attack. The second attack I am satisfied would have been equally as bad as the first but for the use of this remedy, as I had to go to bed in about six hours after being "struck" with it, while in the first case I was able to attend to business about two days before getting "down." 50 cent bottles for sale by

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 5th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death, in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North-east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot Nos. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hallhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER
Executor of the Last Will and Testament of John Allen Hannah, deceased.

Dated, Independence, Cal., February 13th, 1892.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest active to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I choose nothing and receive nothing unless successful, as above. Solicit no pupils that do not promise to be worth $3000 a year. Address, E. C. ALLEN, Box 420, Augusta, Maine.

$8000.00 a year is being made by John H. Goodwin, Troy, N.Y., at work for us. Reader, you may not make as much, but we can teach you quickly how to earn from $5 to $10 a day at the start, and more as you go on. Both sexes, all ages in any part of America, you can commence at home, giving all your time or spare moments only to the work. All is new. Great pay ALL for every worker. We start you, furnishing everything. EASILY, SPEEDILY learned. PARTICULARS FREE. Address at once, GEORGE STINSON & CO., PORTLAND, MAINE.

OFFICIAL.

Notice of Forfeiture.

To Robert Lockett, or his heirs, executors administrators and assigns: You and each of you are hereby notified that I have expended Two hundred [$200] Dollars in labor and improvements upon the certain mines situate in the Cerro Gordo Mining District, Inyo county California, commonly known and designated as the Protection and Union Jack Mine in order to hold said mines as follows, to wit: One hundred dollars on each for the year 1891, as appears by certificate on file in the office of the County Recorder.

If within 90 days from the date of this publication you fail or refuse to contribute your proportion of said expenditures, together with the cost of publication, as co-owners, your interests in said Protection and Union Jack Mines will become the property of the undersigned under the provisions of Section 2324, Revised Statutes of the United States.

A. L. BOLAND.

Dated February 16, 1892.

NOTICE.

ALL PERSONS HAVING CLAIMS against the undersigned will present the same by the first of each month and payment will be made on the 5th.

FRANK FITZGERALD.
Supt. Modock Con. Mining Co., Modock Cal.

$3000 A YEAR. Hundreds in this city (each one fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously) learn how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. No money for no unless successful as above. Easily and quickly learned. I desire but one worker from each district or county. I have already taught and provided with employment a large number, who are making over $3000 a year each. It is NEW and SOLID. Full particulars FREE. Address at once, E. C. ALLEN, Box 420, AUGUSTA, MAINE.

MISCELLANEOUS.

THE ODELL TYPE WRITER.

$20 will buy the ODELL TYPE WRITER with 78 characters, and $15 for the Single Case Odell, warranted to do better work than any machine made.

It combines SIMPLICITY with DURABILITY, SPEED, EASE OF OPERATION, wears longer without cost of repairs than any other machine, Has no ink or ribbon to bother the operator. It is NEAT, SUBSTANTIAL, nickel plated, perfect and adapted to all kinds of type writing. Like a printing press, it produces sharp, clean, legible manuscripts. Two or ten copies can be made at one writing. Any intelligent person can become a operator in two days. We offer $1,000 to any operator who can equal the work of the Double Case Odell.

Reliable Agents and Salesmen wanted. Special inducements to Dealers.

Geo. M. Gill, Superior Judge.

FRIDAY, April 1, 1892.

Estate of E. Mallory, deceased—Filed final account.

WEDNESDAY, March 30, 1892.

Estatate of Thomas Parker, deceased—Filed notice by Clerk of day fixed for hearing return of sale of personal property.

Estate of Francisco Paderes, deceased—Filed notice by Clerk of day appointed for hearing return of sales of personal property. Filed proof of posting notice of time fixed for hearing return of sales of real estate.

MARRIED.

SCHROEDER—WILLIAMS—At Round Valley, Apr. 6th by Rev. A. Clark, Julius Schroeder and Maria Williams.

Sheriff Gorman visited Bishop early in the week.

W. H. Walker of Olancha has been in town all the week.

O. I. Mairs returned home from Los Angeles last Sunday.

E. H. Edwards of Lone Pine was in town yesterday.

Church social on Tuesday evenidg next at Mrs. McCalls. All invited.

The old race track south of town will be fitted up for use during the coming fair.

P. W. Forbes Esq. arrived home from his visit to Los Angeles on Thursday morning.

Big moderation in the weather during the last few days. Looks as though Spring finally meant business.

A. O. Collins was re-appointed sheep license tax-collector for the ensuing year by the Board of Supervisors.

Fred Holbert arrived from Los Angeles on Wednesday evening. He reports a successful trip with the cattle.

Misses Lamar of San Jose are visiting with their brothers at the Cottonwood ranch. They arrived yesterday.

S. P. Smith and Frank Williams arrived from Bishop yesterday with the two stallions, Antare and Pickpocket.

Norman Mairs returned home from Los Angeles on Thursday. He has been attending school there for the last two years.

Miss Maggie Zaun arrived home at Lone Pine on Thursday a week ago, coming up overland on Miller's Mojave and Keeler stage line.

Everybody should "stand in" and see to it that the coming fair is a greater success than any yet given. Now is the time to commence rustling.

Mr. and Mrs. F. Fitzgerald came in from Modock on Sunday last. Mr. Fitzgerald being a member of the Board of Supervisors is here on official business.

On Wednesday of last week Miss Matilda Meysan of Lone Pine started for Los Angeles by way of Keeler and Mojave. She expects to visit several months with her sisters there.

Hon. J. C. L. Sherwin and A. H. Allen, the Mono county members of the Board of Directors of the 18th District Agricultural Association, arrived at Independence last Monday to attend a meeting of the Board.

Mr. and Mrs. Julius Schroeder arrived from Round Valley last evening. A reception was given them at the Independence Hotel, and the many friends of the newly married couple met and wished them long life and prosperity.

John Shepherd bought from Jacob Hayes the young stallion by Judge Kyle, which the latter recently brought over here from Tulare county. The stallion is a fine young animal. He has never been trained and can show a 2:30 gait on the road.

Prospects are very good for a boom in the southern end of the Valley. There is more than one project on the tapis that will prove of great benefit to all down that way. Lone Pine is likely to be a better town in the near future than it ever was.

Ben Lasky came up from Lone Pine on Wednesday. He says the men employed on the ditch by Mr. Austen clubbed together, sent away for music and had a jolly good time last Monday. The social was given in Carrasco's hall, and dancing was kept up till 6 o'clock Tuesday morning.

Mrs. Adelia Tobias Earl, the widow of Josiah Earl and the mother of Edwin T. and Guy C. Earl, died Saturday morning at her home on Fifteenth street Oakland. She had been sick about a week with acute bronchitis. Mr. and Mrs. Earl were well known in this county during former years. They owned the Lewis place at Camp Independence and lived there for a considerable time.

There is no danger from whooping cough when Chamberlain's Cough Remedy is freely given. It liquefies the tough, tenacious mucous and and aids in its expectoration. It also lessens the frequency and severity of the paroxysms of coughing, and insures a speedy recovery. There is not the least danger in giving it to children or babies., as it contains no injurious substance. 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

SUPERVISORS' PROCEEDINGS.

MONDAY, April 4, 1892.

Board met at 7:25 p. m. on the above named day, all the members being present. Minutes of last regular session read and approved and Board adjourned till 9:30 a. m. of next day.

TUESDAY, April 5 1892.

Bill of J. W. Tracey returned for correction.

After the noon recess the Board proceeded to examine the petition of the voters of Lone Pine school district on the question of issuing bonds; laid over.

On petition H. E. Wilkinson was appointed Justice of the Peace and W. M. Richards Constable for 4th Township.

Rates of toll on the Deep Spring toll road fixed the same as last year.

The following claims were allowed:

Mrs. Keppler, Janitress	$30 00
D J Hessian, Justice fees	37 75
F Andrews, iron beds'ead	5 00

Reports of the various Road Overseers accepted and claims allowed.

Claim of Thos. Hughes for $3 allowed on Road Dist. No. 3 fund.

Joseph Fernbach allowed $7.83 rebate on account of error in assessment.

A. J. Gould, Chas. Anthony and S. P. Knight were appointed Viewers on a proposed road in Dist. No. 7.

Ordered that M. and J. Silva be allowed to close a road now traveled through Sec. No. 16 and open one westerly thereof on line of said section.

Adjourned until 9:30 a. m. of next day.

THURSDAY, April 6, 1892.

Board met at 9:30 a. m., same members present.

Dr. I. J. Woodin was appointed Co. Physician for the ensuing year.

Contract for boarding prisoners awarded to O. I. Mairs at 39½ cts per day for each prisoner.

Proposal of Mrs. R. A. Clark for boarding the prisoners at the Bishop branch jail at the rate of 70 cents a day for each accepted.

A. O. Collins was appointed sheep license tax collector.

Hospital contract was awarded Mrs. M. Lewis at the rate of $700 per annum.

Ordinance No. 43 was amended and ordered published.

Contract for stationery and printing awarded to A. W. Eibeshutz.

Contract for publishing delinquent tax list awarded Irv. H. Mulholland. Also the contract for printing Great Register at the rate of 17 cents per name.

Ordered that Co. Assessor be allowed $250 to pay deputy for current year.

Adjourned until 9:30 a. m. of next day.

THURSDAY, April 7, 1892.

Board met at stated hour, all the members present.

Bond required of Sheep License Collector was fixed at $3,000.

S. G. Sneden and Bertrand Rhine were appointed delegates to the World's Fair Convention to be held at San Francisco April 20th, to serve without expense to the county.

Petition for a bridge in Road District No. 3 laid over.

Road District No. 3½ was formed out of a portion of 3d District. The new district covers the neighborhood of Laws. Henry Gerkens was appointed Road Overseer.

The Clerk was ordered to advertise for bids for election booths. He was also authorized to procure the necessary election blanks etc.

The Sheriff was ordered to sell a lot of brick at public auction.

The examination of the reports of the Auditor and Treasurer was continued until 9:30 a. m. of next day, to hour the Board adjourned.

FRIDAY, April 8, 1892.

Board met at 9:30 a. m., all present except Fitzgerald.

Joseph Fernbach allowed tax rebate of $6.08.

Resignation of Mrs. Elma Conklin as a member of Board of Education accepted.

F. E. Densmore was appointed agent for the County to collect certain claims against the State.

Reports of Auditor and Treasurer were accepted and approved.

J. E. Dunlap allowed claim for Justice fees in sum of $9.

Ordered that $350 be drawn from the General Road Fund to buy machinery and Supervisor Love appointed agent to purchase same.

CANDELARIA (Nev.), April 2.—Several severe shocks of earthquake were felt here and at Belleville this morning. Crockery was shaken from the shelves in the stores and the people were badly frightened.

Directors Meeting.

Board of Directors of the 18th Agricultural District met in Independence on Tuesday, April 5, 1892. Present, E. Robinson, President; Directors Robt. Love, T. F. A. Connelly, J. C. L. Sherwin, A. H. Allen, C. A. Walters and F. McIver; C. W. Craig, Secretary; Absent, Director Bertrand Rhine. Robert Love was elected President for the ensuing year by unanimous vote. With but one dissenting voice it was resolved to hold Sixth Annual Fair at Independence on Sept 27, 28, 29 and 30, 1892. The only condition is, that the people here give as much for race purses as was given at Bishop last year. The ollowing Committees were appointed: Finance—President Love, Directors McIver and Robinson. Printing—President Love, Secretary Craig, Director Rhine. Premiums—Directors Robinson, Rhine and Connelly. Races—Robinson, Connelly and Allen. Meeting adjourned subject to call of the President.

Cloudy days	6

H. E. WILKINSON,
Weather Bureau, Observer.

Messrs Cage & Sherman of Alexander, Texas write us regarding a remarkable cure of rheumatism there as follows: "The wife of Mr. Wm. Pruitt, the Postmaster here had been bed-ridden for severl years. She could get nothing to do her any good. We sold her a bottle of Chomberlain's Pain Balm and she was completely cured by its use. We refer any one to her to verify this statement." 50 cent bottles for sale by

A. K. EUGLEY,
Big Pine.

The dam of Albenton, 4023, Abbie by Almont, out of Norma, by Alexander's Norman was disposed of at the recent Palo Alto sale of broodmares for $250.

1st Premium
TROTTING STALLION
"ANTARE"

By Anteros, 6020, 1st dam Sallie W. by Iowa Chief, 525, 2d dam by Tornado, 502,

This horse possesses the quality so highly prized among horsemen, namely, INDIVIDUAL MERIT. No horseman has ever driven him that did not think him capable of trotting his mile out in 2:30 or better with a reasonable amount of training.

This horse will make the season of 1892 at Independence and vicinity. Terms for the season, $25, payable Aug. 1, 1892.

S. P. SMITH,
Manager.

—THE—

Thoroughbred Stallion
"Pickpocket"

Entered in Bruce's American Stud Book, Volume 5, page 500, will stand for the season of 1892 at Independence and vicinity. Terms for the season, $15, payable August 1st, 1892.

Pickpocket has proved a sure foal getter, and his colts are his best recommendation as a sire.

S. P. SMITH,
Manager.

The Best Baking Powder

AND MOST ECONOMICAL,

Is that of Dr. Price's Cream Baking Powder. It is prepared with greater care and accuracy, from finer and more expensive materials, competent chemists test every ingredient nothing is left to chance. No ammonia, alum or other adulterant taints this purest of human food products. Dr. Price's Cream Baking Powder is the embodiment of all the excellence that it is possible to attain. It is always uniform and reliable and retains its full strength until used. It is not only more economical because of its wonderful raising power, but by reason of its greater bulk, the cans being much larger than the ordinary kind; it will go farther and do better work. It never disappoints. Dr. Prices is the only baking powder that contains the whites of eggs.

Do you wish not to be angry? Be not inquisitive. He who inquires what has been said of him torments himself.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted. .....

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

CONSUMPTION.

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, with a VALUABLE TREATISE on this disease to any sufferer who will send me their Express and P. O. address. T. A. Slocum, M. C., 183 Pearl St., N. Y.

AGENT made $71 in four days on my Electric Corsets and Specialties. 100 per cent Profit and Cash Prizes. Sample free. Dr. Bridgman, Broadway, N. Y

Before the cause of consumption was known (that was only a few years ago) we did not know how Scott's Emulsion of cod-liver oil did so much good in consumption and in the conditions that lead to consumption.

The explanation is interesting. We send it free in a book on CAREFUL LIVING.

Scott & Bowne, Chemists, 132 South 5th Avenue, New York.
Your druggist keeps Scott's Emulsion of cod-liver oil—all druggists everywhere do. $1.

"German Syrup"

Just a bad cold, and a hacking cough. We all suffer that way sometimes. How to get rid of them is the study. Listen—"I am a Ranchman and Stock Raiser. My life is rough and exposed. I meet all weathers in the Colorado mountains. I sometimes take colds. Often they are severe. I have used German Syrup five years for these. A few doses will cure them at any stage. The last one I had was stopped in 24 hours. It is infallible." James A. Lee, Jefferson, Col. ①

Test the seams of your Water Proof COAT Before Buying.

POUR some water in the sleeve holding the end tight as here shown or anywhere else where there is a seam, and see if it is water tight. There are goods in the market that look very nice, but will leak at every seam. We warrant Tower's IMPROVED Fish Brand Slicker to be water tight at every seam *and everywhere else;* also *not to peel or stick,* and authorize our dealers to make good any Slicker that fails in either point. There are two ways you can tell the Genuine *Improved* Fish Brand Slicker.

1st. A Soft Woolen Collar.

TOWER'S FISH BRAND

EARTH'S SHADOW.

What spirit darkens the bloom of day?
The clovered meadow no sweetness yields;
A silence rests on the waveless fields;
The world is haggard and gaunt and gray.

The clouds drift wearily over the sky;
The grain is yellow—the hills are bare;
A heaviness broods in the quiet air;
The streamlet sobs as it passes by.

But yesterday morn the flowers were sweet,
The day was bright and the world was young;
And in the even the throstle sung,
And his song was glad and the hours were fleet.

But a misty darkness glimmers athwart
The fields today, and the hours are long;
And I hear a dirge in the throstle's song;
For the gloom is the shadow of thee, my heart.
—Chambers' Journal.

IN NORTHERN WILDS.

I was one of ten, five boys and five girls. My father, a clergyman of the English church, was grateful to Providence for having filled his quiver with ten, but I think that in reality he was more grateful they were not eleven. The problem of his life, the worry of attempting to solve which helped to bring him to his grave, was how to provide a living for us all. As he died before a single one of us was provided for, he might have saved himself much anxiety.

I was not the eldest of the family, but the second son. The oldest had been sent to one of the universities, and had followed the very glorious but impecunious profession of his father, without a "living" and without definite hope of obtaining one. I was intended for the Indian civil service; possibly the viceroyship, but the examiners at Burlington house failed to recognize my fitness for such great possibilities, therefore I determined to emigrate, and a friend of my mother's hearing of my determination secured for me, by personal interest, a berth in the Hudson's Bay company. I was duly engaged and signed a document as long as a deed of transfer, by which I bound myself to serve the company, even to the extent of defending their property with my life.

I sailed to Montreal and presenting my credentials there was soon informed that my services would be required at a post in the far north in charge of one John McIvor. There was also intrusted to my care a pair of fowls, Plymouth Rocks, with the request that I would deliver them safely into the hands of Mr. McIvor. I mention this fact seeing that these fowls played an important part in the events which I am about to relate.

On my arrival at my destination, after sleeping about forty nights under canvas, I was glad of the comfort which reigned at Fort Trial, due chiefly to the domestic energy of Mrs. McIvor, a bright, pleasant little woman, who seemed out of place in the heart of this "great lone land."

Mr. McIvor was Scotch, as his name would imply, a rough and ready man, with a heart of steel, but which on occasion could be as soft as a woman's. After reading the dispatches which I handed him he said:

"Weel, young mon, I dinna see what the likes o' you can do in a country like this. Had na ye better gae back before it is too late?"

"I won't go back, sir, unless you send me back," I answered.

"Ah, weel; boy, stay where you are. It's no always the coarsest twine that stands the biggest strain."

So I entered into my duties without another discouraging word from Mr. McIvor, who, though a perfect martinet in the matter of duty, was kindness itself in the privacy of his own house. There were two other clerks beside myself, who stayed there only during the summer, but who in the fall took charge of small trading establishments, outposts as they are called, returning to Fort Trial after the winter's hunt was over.

Like most young Englishmen I had formed my ideas of Indians on a Fenimore Cooper basis, but the noble red man fell far short of my ideal. I found him to be a selfish, ungrateful, treacherous savage, whose power for evil was luckily curtailed by his cowardice. I do not say that there are no good points in an Indian's character; we find good points in the character of a dog or a horse, but we do not set the horse or dog on a pedestal and proclaim him all that is perfect; rather we keep clear of his heels and teeth respectively until we know something of the brute's idiosyncrasies. One has to do the same with Indians. Be thoroughly on your guard until you have proved that they can be trusted, and don't trust them then. Mr. McIvor had the most supreme contempt for them—a contempt which he never tried to hide. He used to say:

"They are cowards, arrant cowards, and are afraid o' you, e'en like a dog."

It was not long after my arrival that I had a sort of adventure which gave great sport to the other clerks, and even Mr. McIvor himself would occasionally make joking allusions to it.

There was a river running about 100 yards from the store; it was deep and fairly swift. One day as I was working in the store I heard a scream which appeared to come from the river. I ran out and down to the bank, from where I saw an old woman struggling in the water; she had been fishing and her canoe had upset. There were about a dozen Indians looking on, but they only laughed and made not the slightest movement toward helping her. Indians, as a rule, are cruel to the old. They look upon them as incumbrances from which they are not sorry if an accident relieves them. I saw that this poor old thing was in distress and likely to be drowned, so I jumped into the river and swam out to her assistance, not before, however, relieving my mind by abusing soundly the men who would cheerfully have let her sink before their eyes. It was no difficult task to bring the poor old thing ashore, and when I had done so the poor creature followed me as I walked toward the house, crying in earnest tones:

"Meegwitch! meegwitch!" meaning "Thank you, thank you." But I found this very annoying, for the Indians all laughed at me in my wet clothes and at the old woman, whose clothes were also wet and very thin, as she clung to me, with her incessant "Meegwitch, meegwitch."

The chaff that I suffered from my companions was merciless. I was dubbed "The Knight Errant," "The Heroic Preserver," etc., until I grew sick of it; but to have lost my temper would only have made it worse, so I suffered in silence, and to aggravate my suffering the old woman thought it her duty to present me with every extra large fish that she caught, or if her son-in-law threw her a beaver tail or a moose nose, or any other delicacy especially prized by Indians, they were sure to find their way to my room, and each demonstration of the kind only added to the fun. After a time I began to pick up the Indian language, and as I always had a sneaking regard for the old woman, I often made use of her assistance in acquiring it. In fact we became fast friends, I cementing the friendship by gifts of a little flour, sugar or tea.

I received less chaffing in the winter, for the other clerks had long since taken their departure for their respective outposts, and I was left sole occupant of the clerks' quarters, or "clerks' house," as it was called.

It was coming on to the end of March when an event occurred which made me glad that I had pulled the old woman out of the river and treated her with some consideration, if not kindness. The two fowls which I had brought safely to their destination had fairly survived the rigor of the winter. In fact Mrs. McIvor announced one day at dinner that she had found one egg which the hen had laid. But shortly afterward there was consternation in that household. The two fowls had been found dead, and an Indian dog was quietly making a meal off one of them. The hole whereby he had effected an entrance was stopped up before he could escape, and Mr. McIvor, using his revolver, had the satisfaction of shooting the brute and pitching his body down on the frozen river.

Now it happened that this dog belonged to Match-ee-ninie, an old Indian claiming to be chief of the band, and who had the reputation of being a conjuror and a cannibal, in consequence of which the Indians all feared him and obeyed him.

He came into the store that evening and spoke to Mr. McIvor thus:

"You pay me for my dog."

"How much?" asked Mr. McIvor.

"Twenty weeg." The Hudson Bay company use at inland posts a standard for value, the name differing in different localities. A weeg equals about fifty cents.

"All right," said McIvor, "I will pay you for your dog if you pay me for my fowls."

"How much?"

"Twenty weeg."

The Indian saw that he was caught, and walked out with a muttered "Kish," meaning, "Hold on, we shall see." Next evening he again came to the store, and said: "There are bad people about; I have seen a wendigo. You pay me for my dog." (Wendigo: a spirit, a ghost, giant, something uncanny.)

"Get the wendigo to pay you," said Mr. McIvor, laughing, and again the man slunk off. Mr. McIvor knew the Indian nature well, and he said to me:

"That old fellow is up to some devilment. That's what they always do when they want to do an evil trick themselves: pretend that some one else is going to do it. We had better keep a watch on the place; he might set fire to it."

We watched that night, but nothing unusual occurred. After dinner next day, as I was endeavoring to recuperate a bit from night watching by a short snooze, I became aware of a presence, and opening my eyes saw my old woman standing over me, with her finger on her lips to enjoin silence. When she saw that I was awake she w' ispered hurriedly:

"Run! Indians going to kill trader, kill all white people in the store. Match-ee-ninie keep trader's wife. You good to old woman. Run!"

And the old woman, casting an anxious look at the door, hobbled away as fast as she could.

I did run, but it was to Mr. McIvor, who was at that moment walking down to the store with his wife.

I breathlessly related to Mr. McIvor as nearly as I could remember them the words of the old woman.

"There's something in it," he said, "and we must be prepared for them. Let us look for our guns. The loons mean business."

His wife, who had heard all, looked frightened, and he turned to her saying:

"Which is it, Maggie? Wi' us, or at the hoose?"

"With you, John, till the death," she answered boldly.

He gave her a look of admiration and affection, and hastily rose to collect and load our arms.

But we were too late: while we were talking in the office the store had silently filled with Indians, their faces sinister and threatening as they stood ranged up against the high counter. So intent had we been on the discussion that we had not heard the soft tread of their moccasined feet, and there we stood, fairly caught, face to face with death.

It is hard to remember what passed through my mind at that moment. I think that my feelings were more those of indignation than of fear. It vexed me to think of death at the hands of those brutes, an inglorious death, of which but a passing notice might appear in some newspaper, or, what was more likely, no notice at all, for the Hudson's Bay company have never cared to publish abroad such little mishaps as these. How different, I thought, would it have been if I were in the army. Then if I had to die my name would be mentioned with pride by my family as well as with regret, and possibly my portrait might appear in The Illustrated London News. So dear to humanity is the praise it receives when no longer alive to hear it, when the pleasure of the praise is but in the anticipation alone.

I watched Mr. McIvor with a certain amount of curiosity, not unmixed with hope, to see what he would do. He did not hesitate a moment, but drawing his wife to his side and putting his arm around her waist he said:

"You have come, I believe, to kill me?"

"Yes," answered Match-ee-ninie, "to kill you as you killed my dog."

"All right," answered Mr. McIvor coolly; "but surely we may as well take a smoke before you kill."

Whether the Indians were swayed by the force of a superior will, or whether they were themselves glad to put off a tragedy which they had pledged themselves to perform, I cannot say; but they cheerfully complied with the request, and each producing his pipe leisurely filled it and commenced to smoke, as if they had come there for nothing else. In the meanwhile Mr. McIvor had quietly drawn toward him a small keg of gunpowder containing about twenty-five pounds. He deftly removed the head; then taking a candle and lighting it with the same match with which he lit his pipe he thrust it down into the powder to within two inches of the flame. So quietly had he done this that the Indians, who were at the moment engaged in lighting their pipes, did not notice it. It was a solemn kind of a smoke. Not another word was spoken on either side. The only thing that woke the dead silence was the occasional "puff, puff" of a pipe that would not draw. I watched the candle with a kind of fascination and saw an inch burn away. I was fearful lest a spark should drop from it, and thus rob us of our full two inches of life; but the candle burned steadily on.

There was but half an inch left.

I remember that I wondered if the plovers had begun to make their nests in the marshes at home; if my brother Charley had come home for the Easter holidays, and if he would know where the migle thrush always built her nest in the big elm tree; but my reveries were broken by a movement among the Indians and a muttered "non-gom," meaning now.

Match-ee-ninie arose and with him all the rest of the Indians, with their guns in their hands. Mr. McIvor, who was watching them, made a movement toward the candle in the gunpowder. The movement attracted the attention of the Indians, and they now for the first time comprehended the situation. A minute later there was not an Indian in the store. They had gone out as silently and suddenly as they had come in, leaving us in sole possession, but with the candle burning dangerously near the powder. Mr. McIvor now carefully approached the keg, and with a steady hand raised the candle from its dangerous candlestick. Not one moment too soon, for scarcely had he lifted it clear off the keg when the few grains of powder which had adhered to it came in contact with the flame and were ignited; but we were saved.

The sudden revulsion of feeling took the strength completely out of my legs, and I sat down helplessly on a box, until the voice of Mr. McIvor ordering me to shut the door and lock it recalled me to my senses. Mrs. McIvor clasped her husband around the neck and kissed him passionately. He was not unmoved for the moment; but suddenly he burst out laughing, and said in his broadest Scotch:

"Did ye see the look o' the auld diel when he caught sight o' the candle i' the pouther, Maggie?" But Maggie did not hear him; she had fainted, and the man who had been cheerfully looking death in the face for the last half hour now became as frightened as a child when he saw his wife in a fainting fit. "Will she come around, dy'e think?" he asked in a tone of intense anxiety. There was no need to answer him, for Mrs. McIvor answered the question herself by sitting up and bursting into tears.

For some time afterward we lived prepared for a siege, but the Indians never made sign again of attempting to injure us; in fact they became mighty civil, and in the spring, when communication by water had been re-established, we had no difficulty in securing our friend Match-ee-ninie, who was safely transported to the far west, where he soon pined away and died. Of the old woman who had done us such service I could gather but little information. I never saw her again; she had completely disappeared. It was whispered that Match-ee-ninie, having found out that she had warned us, quietly made away with her, so that practically she gave her life for mine. Can it therefore be wondered at that I prize her memory, especially as in her I have found through long experience the one solitary exception to the treacherous ingratitude of the North American Indians?

Shortly after these events Mr. McIvor received charge of a district on the borders of civilization. Nothing would do but that I should accompany him to his new charge, and so favorably did he report of me to headquarters that I rose rapidly in the service, and ere many years had passed was in charge of a district of my own.—C. C. Carr, Buffalo Express.

A Newspaper Kleptomaniac.

There is an old, gray haired, venerable appearing gentleman who is often seen about the corridors of the Hoffman house and the Fifth Avenue hotel. He is a newspaper kleptomaniac. Just leave a paper lying on a seat and watch him. He gets up, looks about unconcernedly and soon sits down next to the paper. Carelessly he picks it up and glances through it.

After a few minutes, if no one observes him, he folds the paper carefully, puts it in his pocket, then calls for an imported Henry Clay and pays for it from a good sized wallet at the cigar stand. In the course of the evening he usually gets all the papers, then disappears.—New York Journal.

A Literary Romance.

Winks—I understand the woman you are going to marry has been engaged to you for ten years.

Jinks—Yes. You see I am a newspaper writer by profession, and her proud father said I could not have his daughter until I could show him my name at the head of an article in some great magazine. Well, I went to work, and soon got an article accepted, but it was ten years before it was published.—Good News.

A mangrove plant has been successfully grown in the University of Pennsylvania. Hitherto it has been found impossible to grow this plant away from the ocean.

A chest protector made of papers that will not rattle and covered with flannel answers the same purpose as the expensive ones sold by druggists.

His Hair Turned Gray.

A printer, well known in Atlanta, had an experience during the past few days which he is likely to remember. Like many a better man he got hard up in Birmingham last week. He wanted to come to Atlanta and he crawled into the first vacant stock car he saw, and as it was night, rolled into one corner and went to sleep. He was awakened in a little while by a lot of mules which were driven in on him.

"Scared? well, I think I was," he says in telling the story. "But I wanted to come, and I thought I could pacify the mules so they would let me alone. I soon found that wouldn't work. They eyed me suspiciously, then bit at me and kicked me until I began to realize that there must be some change or my last days had come. I made up my mind to ride one of the mules. I tried one and was promptly landed against the top of the car. Then another, and another, with the same result. The fourth one was docile, and on that mule's back I rode for a day and a night. It was the most horrible ride anybody ever experienced, and you need not wonder at my hair turning gray."—Atlanta Constitution.

As an illustration of the ludicrous results produced by bilstickers pasting one bill over another, Mr. C. Spurgeon, son of the Rev. C. H. Spurgeon, mentioned in a letter that on one occasion in London, when he and another gentleman were announced to preach special sermons, he was astonished to read the following announcement: "£10 Reward. Lost—Two Fat Heifers. Mr. J. J. Knight and Mr. C. Spurgeon." Another read as follows: "Pigs fattened in six weeks on The Englishman, edited by Dr. Kenealy. Price 2d. weekly, and kills fleas, beetles, insects and all kinds of vermin. Perry Davis' Painkiller cures smoky chimneys, and notice to mouters, feed your infants on Bond's marking ink, 6d. per bottle.—Cork Examiner.

Coughs, Colds, and Sore Throat quickly relieved by "*Brown's Bronchial Troches.*" 25 cts. a box.

Joy makes us grieve at the brevity of life; sorrow causes us to be weary of its length; trouble and industry can alone render it supportable.

Use Enameline Stove Polish; no dust, no smell.

Try Germea for Breakfast.

SYRUP of FIGS

ONE ENJOYS

Ask your druggist for SHILOH'S CURE. If your lungs are sore or back lame, use Shiloh's Porous Plasters. Price, 25c.

I CURE FITS!

When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. Give Express and Post Office.
H. G. ROOT, M. C., 183 Pearl St., N. Y.

First Irishman—Pore Flanagan has jist been drowned. Second Irishman—He's a lucky bhoy. Oi always thought he'd be hanged.

TAKEN FOR A CRANK.

A semi-fiendish demon often seems to possess people of strong nerves in sneering at those with weak ones. The irritability of the nervous hypochondriac is ridiculed as natural ill temper. The very genuine and distressing symptoms from which he suffers are made light of. "He" or "she is a crank!" is the cheerful sort of sympathy with which the nervous invalid meets from the unfeeling and the thoughtless. At the same time no complaint is more defined and real, none has a more easily explainable origin when it is chronic. Imperfect digestion and assimilation are always accompanied by nervous debility and anxiety. Build up the powers of assimilation and digestion with Hostetter's Stomach Bitters, and nervous symptoms, sick headaches and a generally feeble condition of the system are remedied. Remember that fearful ravages are produced by la grippe among weakly, nervous people. Hostetter's Stomach Bitters cures it, and prevents malaria, rheumatism and kidney complaint.

Sure to Be a Bore—Hostess—May I introduce you to Miss Conder. Wag—Well, if her name isn't Anna.

TWENTY YEARS' EXPERIENCE.

C. D. Fredricks, the well-known photographer, 770 Broadway, N. Y., says:

"I have been using ALLCOCK'S POROUS PLASTERS for 20 years, and found them one of the best of family medicines. Briefly summing up my experience, I say that when placed on the small of the back ALLCOCK'S PLASTERS fill the body with nervous energy, and thus cure fatigue, brain exhaustion, debility and kidney difficulties. For women and children I have found them invaluable. They never irritate the skin or cause the slightest pain, but cure sore throat, coughs, colds, pains in side, back or chest, indigestion and bowel complaints."

There is a tide in the affairs of men which, if not skillfully dodged at the proper time, drowns them.

STATE OF OHIO, CITY OF TOLEDO, } ss.
LUCAS COUNTY,
FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

WHENCE? AND WHITHER?

A little crib. A tiny babe. A mother's lullaby.
A gracious ray of sunshine from a bright, unclouded sky.
A breath of light and loveliness. A cherished hope, a prayer
Dropped down into the present from that strange, mysterious where?

A cold white stone. A little mound. A mother's grief and tears.
A shadow reaching out across the sunshine of the years.
A voice unanswered evermore, an echo of despair.
Gone from the living present to that strange, mysrious where?

BIG SIS MIDDLETON.

The other night I went to bed feeling rather unwell.

My doctor had given me a whole lot of little papers with a modicum of white powders inclosed in every one, and had kindly instructed me to swallow one of these delectable potions, in water, every three hours.

If he had said in a glass of beer the task would have been easier, or even if he had prescribed a nice little milk toddy; but he is a strange man, this doctor is, and he simply said water—plain, old fashioned water.

I had taken those powders all the evening, and I felt drowsy. Just as I was getting into a good doze there was a knock at the door, and when I went out to see what was wanted the office boy handed me a note, instructing me to take the next train for south Georgia.

The command was imperative, as newspaper commands usually are, and in fifteen minutes I had my grip packed, and was on my way to the depot.

The train was on time, and I didn't have time to get a nip before I was aboard and on the way to my destination.

It was a long, weary ride, and I went to sleep on a car seat and slept until the brakeman howled out "Doodleville," and I opened my eyes to find it broad daylight, and I in the heart of the dear old piney woods.

The first thing that struck me was the scent of the smoke of the burning log heaps, and the chirp of the birds, and the sight of the dogwood blossoms, and I just felt too jolly for anything.

I got off the train and stared around at the old familiar landmarks and tried to remember for what they had sent me south. Suddenly it occurred to me that in my bewilderment I had got off at the wrong station, and I turned around only to see the train rattling away in the distance.

"When will the next train pass?" I asked the station master, who was eyeing me curiously.

"Going up?"

"No, going down?"

"Why?"

"Dad burn it, don't ask me why. I'm in a hurry."

"S'pos'n you aire. Won't do no good."

"When will the next down train pass, please?"

"Freight?"

"No, passenger, you—beg pardon, but I've got off at the wrong place."

"You have, eh? Don't this town suit you? If it don't, thar's the road."

"Oh, the town's all right, but I had important business further down the road."

"Well, thar's the crossties."

"I know, but when will the next train pass—passenger train, I mean—going down?"

"Whyn't you ax me that at fust?"

"Well, it's my fault. Will you tell me now?"

"Well, I don't mind if I do. If it's on time, it will be just this hour to-morrow. What time you got?"

"Half-past 3 by my watch," I answered.

"Do you want to trade that ere turnip?"

"No, I don't care to trade."

"Seems to me I ought to know you. I've seen you som'ers, in spite o' them clothes."

"Why, Dink Watson, as sure as I'm alive!" I exclaimed, as I gave the fellow a clearer scrutiny.

"That's me, old hoss. Whar you ben so long?"

"Oh, knocking around. Say, how's all the folks that we used to know?"

"All 'bout the same. Big log rollin' an' frolic over to ol' man Dempsey Middleton's today. That is, the frolic's to-night."

"Is that so?"

"Shore to be so. You used to be sorter soft on Big Sis, didn't you?"

"Yes, how is she? Married, I guess."

"No, she haint, nother. Fat an' sassy as ever, an' jest 'bout as spry. Looks as young and dances as good as she al'us did."

"Well, I'll be hanged if that isn't good news."

"Wanter go to the frolic? You useter to be a hellacious sort of a feller for frolickin'. Ricollect them days when you useter 'walk jawbone' with the Johnson gals?"

"Oh, hush, Dink; you remind me of old times."

"How'd you like to take in the frolic? Can't git away I'm here nohow till this time tomorrer, less'n you walk. I'm agwine, and ef you wanter go I'll borry Nathe Mixon's buggy an' we'll hitch pap's cretur to it and jest go asallin'."

"Dogged if I don't go, for a little while, anyhow."

"All right. I'll be ready in a jiffy."

While Dink was gone for the turnout I sat down on a stump and indulged in some queer reminiscences. Right around this locality, in years gone by, I spent some wild and reckless days. Big Sis Middleton was one of my favorites. She weighed 165 pounds, was as plump as a gosling, and dance, Great Cæsar! True, when she had on her low quartered shoes, her feet looked like a funeral procession, but I didn't care a cuss for that.

She could sling those feet around in a way that would make the German trotters weep. I got so absorbed until I began whistling "Chicken in the Bread Tray," and Dink had to yell at me two or three times before I heard him.

Soon as we got away from the little clearing around the station everything began to look familiar. There were the long avenues of pines, carpeted with the dull, gray wire grass; the glimpses of old, broom sedge fields, and now and then a log farm house, with the well sweep and the martin gourds—and all just as I left it.

Oh, golly! Happy! Why, I forgot that there was such a thing as a newspaper on earth. Brick walls and stony streets faded from my mental vision, and the jingle of the bell on the brindled cow took the place of the engine bells.

The drive was very pleasant. The old mare went blundering along, and the rickety buggy rocked from side to side, like a ship at sea, over the roots and through the mud wallows; and all the old familiar signs and scenes of my boyhood home in the wildwood.

Dink recounted to me the family histories of every family in the district, told me who had died, who had married, how many children they had, who had moved away, and where they had gone to and——

"What in the dingnation did you wanter leave here fur? Don't you know this is the gyarden spot of the yearth?"

"I don't know, Dink; it is a good country, and it is going to improve."

"Don good 'nough as it is. That cussed railroad—if I do work fur it—kill one o' papa's likeliest yearlins, 'tother day. The dadblasted thing, but he'll git damages, regular Jersey cow damages, shore's you'r borned."

"Dink, I couldn't make a living here."

"Make the nation! What d'you want with any better'n we got? Why, you never sot down to a better supper than we'll git at Old Man Dempsey's, and gals, phew-ew-ew!"

"Girls don't help a fellow to make a living, Dink."

"What's the difference ef they don't? Hain't Sue 'bout all that's worth livin' fur? Gimme plenty o' good terbacker and licker fur Chris'mas, an' plenty o' purty gals; an' durn the expenses!"

About this time we drove up to the gate, and in less time than it takes to tell it, the Old Man Middleton, and the Old Lady Middleton, and Old Aunt Sukey Middleton, and Old Granny Middleton, and a half dozen other Middletons, had hold of me. You never saw such a time.

The old man offered me a chew of tobacco, the old lady hustled me into the back room and pulled out a brown jug of corn liquor from under the bed, and, with many a wink and meaning smile, told me to drink hearty, for that was some she was saving to make camphor with.

As soon as I could go back, I began to look for Sis, but I didn't have long to wait.

"Why, you're a stranger in these parts," said she, shaking both my hands, "you gwine to be at the frolic?"

"Yes, and I'm going to dance with you."

"It's a go, and here's your mule, my honey."

"How long till supper, Sis?"

"Oh, I'll have it ready in three jerks of a sheep's tail. Lemme go, now."

"Ain't you going to give a fellow a kiss?"

"If it ain't wo'th axin' fur, it ain't wo'th havin'."

"Then I won't ask," and I suited the action to the word.

I had to tell the old man and the old lady and all the neighbors the history of my life during the last few years.

"And hain't you married?" asked old Mrs. Middleton.

"Ahem! Well, yes, you know I have been married a good while, but you musn't tell the girls."

"Why, shure 'nough, you are merried. Lemme see who"——

"Why, mammy, don't you recollect that gal that cut me out?" said Sis, who had slipped up in hearing distance.

"I'll have another kiss for that," said I, making the best of a bad job.

"Well, hoss, you won't as easy as you might think. You can't play off as a single feller with us. We all know you."

"Go on an' fix that supper, Sis. Name o' common sense. You've got the man beside himself. I want to chat with 'im some. I've knowed his daddy afore 'im fur forty years. Uster spark me, in my younger days; that's what makes this boy seem like home folks."

I thanked her from my heart for that, and I was soon engaged in retailing an illustrated history of myself, with notes and comments, to the contented listener.

The twilight had deepened into dark when Sis yelled:

"Supper's ready, folkses!"

The long tables were erected in the sandy yard, and were loaded with homely good things of innumerable variety. If you doubt the power of the hog to manipulate himself, you go down to that land of "hog and hominy," and investigate for yourself.

Ham, jowl and peas, hoghead cheese, souse meat, hog feet, chitlings, sausages, liver puddings, blood puddings, spare ribs, back bones, crackling bread—but why go on?

I ate like a famished wolf. It was the first meal of the kind I had had in a dozen years, and I made up for lost time. I gobbled down porcine delicacies that would make me weak with dyspepsia to even think of here in town.

But after awhile we got through, and by that time the sets were forming for a breakdown in the big room of the house, which had been cleared of everything but a few chairs up close to the fireplace, where the old folks could sit and look on and enjoy the fun.

"Partners on the floor!" bellowed Dink, and old Nick Watson began to tune his fiddle.

"Come on, Sis," I said, and we took our places.

"First four forward!"

Old Nick struck up "Happy Tim in Georgy," and at it we went.

Jerusalem! We came down to it in regular old time style. I felt my joints grow limber and my feet grew lighter at every jump.

"Right an' lef' thar!"

Here we went, "trippity, trippity, trippity, trip," and every time I caught Sis by the hand I squeezed it with all my might.

"Hands all round to the right!"

"Trippity, trippity, trippity"——

"All promenade!"

With a hop and a skip and a jump we went, while old Nick began to sing to his fiddle:

"Reelin' an errockin',
An' I'm boun' to go;
Reelin' an' errockin',
An' I'm boun' to go.
Oh, ladies, fare you well!

"Swing and change!"

My head grew dizzy, and as I swung Big Sis I reached my arm as far around her waist as I could reach, and I yelled:

"Bring me a piece of chalk!"

"Turn your corner!"

"Swing your partner!"

"Bring me that chalk!" I cried.

"What fur?" yelled Old Dady Middleton, from the corner.

"So I can keep count. I've hugged Big Sis half way 'round; now I want to make a mark so I can go 'round and hug the other"——

Smack!

I felt a stinging blow on my cheek.

"What do you mean?" I asked, opening my eyes.

"Who are you hugging? Who's Big Sis?"

Great Scot! It was my good and faithful wife! I had been asleep all the time, and the whole business was a dream.

"Who's Big Sis, I say?"

The next time that doctor gives me any of those frisky white powders I'm going to engage a room at some hotel, and lock myself in.

The blamed things fixed me up the jolliest dream, and then got me into a scrape.

Dogon such physic!—Montgomery M. Folsom in Atlanta Constitution.

He Knew the Fact.

A small boy had a dog that was rough, as most small boys' dogs are, and a young girl who lived next door had a kitten, sly as all cats are. One day the small boy came nonchalantly into the girl's presence, and, after some desultory conversation, he said:

"You know my dog Barca and your cat Darling?"

"Yes."

"Well, my dog had a piece of meat, and he thought your cat was going to take it away from him."

"Thought?" exclaimed the wise little girl. "What makes you say that the dog thought? You know dogs don't think—they instinct."

"Well," said the boy, "I don't care whether he thought it or whether he instincted it, but, anyhow, he killed your cat!"—Boston Transcript.

"Can't you give a poor fellow a lift?" asked the tramp.

"Not very well; I've only got my slippers on," said the farmer. "But if a little push, which is always good in this world, will help you, there it is." And he shoved him out into the night.—Harper's Bazar.

FOWLS FED BY MACHINERY.

Visit to a Great Poultry Stuffing Mill.

PUMPING FOOD INTO HUNGRY CHICKENS.

A Company that Fattens Lean Western Hens for the Market.

Chickens, geese and turkeys which have been fed by machinery for three weeks previous to their demise will be placed on the market in this city. They will be known as Jersey stock, and will be cheaper than the Philadelphia dry picked. A company has been formed with $2,000,000 capital, it is said, to make the lean western chicken a marketable article. It has a hennery in Provost street, Jersey City, next door to the old oleomargarine foundry, and when it gets in full working order 65,000 chickens will be accommodated at once, and 4,000 will be killed, picked and made ready for eating every day. The company is known as the William French Fattened Poultry company, and its principal stockholders are hotel proprietors and produce dealers of this city.

In its prospectus the company tells how much better French poultry is than American, because it is stuffed or specially fattened before it is placed on the market. The object of the company is to raise the standard of American hens to that of the French by means of the stuffing process, the secret of which Mr. William C. Williams, the head of the company, learned, he says, when he lived in Paris.
